INTERNATIONAL STUDENTS

ALL INTERNATIONAL STUDENTS will need to be shown at registration. This is your Insurance Claim process for the semester. Please fill out the form provided. It is important to complete this process as soon as possible to avoid any delays in your travel plans.

Note: If you are an international student and need assistance with your insurance claims, please contact the International Student Services office.

TO: All Faculty
FROM: Dean of Registration and Records
Dear Faculty,

Please announce to all of your courses the following:

ALL STUDENTS desiring to register for an academic flight course along with his/her other academic courses must secure a flight launch time assignment (reservation) prior to registering for the course.

Every effort will be made to register in January to finalize the assigned (reserved) launch time, through the assignments of an appropriate section number.

Changes to the assigned (reserved) launch time may not be made until 120 hours after the schedule change. Students who do not secure a flight launch time assignment (reservation) may not be able to fly at their professor's time. It is recommended that students be trained in the art of negotiating with the instructors to secure a flight launch time assignment.

Please be sure to attend the class on Tuesday, December 7, at 10:00 a.m. to finalize the assigned (reserved) launch time.

Sincerely,
[Signature]

FOUR E-RAU STUDENTS LOST IN AIR TRAGEDY

E-RAU student John Ballard received recognition for outstanding performance while working at the NASA-Langley Research Center in Hampton, Va. John is in the Cooperative Education Program here at Embry-Riddle. He served with NASA-Langley for the full and spring trimesters, and he was recognized for his performance during the 1975 summer trimester. John will work for NASA-Langley for two more trimesters. John Ballard will be remembered for being a conscientious worker and for voluntarily putting in more time in order to complete his studies.

CO-OP STUDENT RECOGNIZED

John Ballard was a student at Embry-Riddle Aeronautical University and was enrolled in E-RAU's engineering course. John is due to graduate in the spring of 1978.

John's performance in the course provided a strong indication of the type of professional attitude needed to order to succeed through school and into the professional environment.

TWO LOCAL STUDENTS AMONG 14 NAMED TO "WHO'S WHO"

Two Daytona Beach area youths are among 34 Embry-Riddle Aeronautical University (E-RAU) students selected for inclusion in the listing of the nation's outstanding college undergraduates. John Baker and Michael Raymond were named along with 32 E-RAU students from throughout the country for recognition in the 1977 edition of "Who's Who Among Students in American Universities and Colleges." Through its biographical sketch of superior students, the publication helps promote "an increase in the opportunities for graduate school admission, scholarships, grants and employment."

WE NEED YOUR IDEAS! How should the money from the spring solicitation be spent? We need your suggestions for the next year's solicitation. Please send your ideas to the SGA office.

Final Exams are scheduled to begin on December 5, 30, December 1, 2, 4, and 5.

FEEDBACK

FEEDBACK is a weekly feature of the Avion, based on the questions, comments and complaints from the Suggestion Box in the University Center reception area. Staff members are encouraged to write and ask questions concerning any aspect of what is going on in the University. This week's column is devoted to a question concerning the Career Planning and Placement Center.

I'm here for the asking, and if I feel should have an experience—

ONTLOGY

By Ken Jagdinschat

CAREER PLANNING AND STUDENT PLACEMENT

by Skip Randle

"FREE FOR THE ASKING"

"What do I go to find out about the job market?" This was the first question that jolted my mind as I started my college career. The whole problem seemed to contain more questions than I could possibly handle. How do I go about setting up a resume? What companies will I be prepared to work for? How do I get an interview? etc. etc.

It seems strange to me that it is dedicated to finding a career path for those who want the hard road home. I have never even seen the right to guide a student for the career path safer reasons. It's OK for them to say what you can't fly, what can't cause the right. But can't they see how you can't even get a job because your medical disability makes you a hazardous employee? They don't know what goes on in an office, or how do they work what is safe? I think the Guidance Counseling or Medical Department in the "the only bad a student oriented climate" should have an experience—

BIBLIOGRAPHY

There are only two sure issues of the AVION left to be printed this semester. As you can already see, this semester is also my last semester and since I am graduating this month, in this column I wish to offer the best of luck to the graduating seniors and the rest of the student body. Frankly and not all to the AVION staff.

...Ant. Yes, ants. Hundreds, thousands, millions. Eva invaded! Not by any human means. People! They've lived in the dorms, the sheets have always been too short.

ANT DAMAGE

What would be possible to make this semester optional?

...Ant Club

I have received an unsigned letter to the editor, and again, I can't print it. However, the letter did mention some interesting points that I feel should be mentioned. First, a rumor about Senate is no longer offering to students and alumni. The Placement Center is all I found in the Suggestion Box. All suggestions are considered, and passed on. This is a good way to let your feelings be known without going way out of your way -- please use the box!

A friend of mine has told me that the resumes, Dean Heldewitz, and Dr. Rickett, would be more than willing even to give advice to students in career planning.

Senior, have the right to have a safe trip. Since there weren't an Avion last week I'll comment on the Summer. I thought it was set up essentially well and the fund was greater. But we didn't get a full house off of this worth $2.5. Some people complained about the amount of coffee we got, but if they went back to seconds and instead of I did they wouldn't be complaining. I finished my novel. I was on full I could barely move and after I finished myonyms, I couldn't move at all. Don't forget the "World's Largest Hangar Sale" over at the new Maintenance Tech hanger this weekend. There will be some great bargains on phones, bicycles, refrigerators, tools, etc. The Board of Residence will put a lot of work into this and the people will be going to the students, come out and support it. Who knows, maybe you might pick up a free prize or a good bargain!

By Dave Fraser

I trust everyone had a great Thanksgiving and a merry Christmas and the happiest new year!

V-P THOUGHTS

"FREE FOR THE ASKING"

"What do I go to find out about the job market?" This was the first question that jolted my mind as I started my college career. The whole problem seemed to contain more questions than I could possibly handle. How do I go about setting up a resume? What companies will I be prepared to work for? By Dave Fraser

I trust everyone had a great Thanksgiving and a merry Christmas and the happiest new year!
A contrast to last spring, the University of New Hampshire upped tuition by $100 for non-resident students. Students at the University of New York (SUNY) are paying an extra $100. At Iowa State University, where a 10 percent increase was originally proposed, efforts in opposing the raise have slowed. Student lobbyists said, "They'll be doing a lot of screaming, protesting, and lobbying against the hike. But we have to do it in the right way."tuition and fee hikes has fallen across the country. Soaring tuition and other fee hikes. Some states have seen the lack of student concern overwhelm legislative lobbying. A tentative statewide plan proposed by the New York Board of Regents, to increase tuition and fees $1000 in 1976, as well as $100 for uninsured hospitalization, was abandoned last spring, when students demonstrated against the raise. Student opposition is scattered across the country. Increased apathy, feelings that there isn't much that can be done, and being involved with other important issues have contributed to the lack of student concern. Nevertheless, feeling that there isn't much that can be done, and being involved with other important issues have contributed to the lack of student concern. Nevertheless, feeling that there isn't much that can be done, and being involved with other important issues have contributed to the lack of student concern. Nevertheless, feeling that there isn't much that can be done, and being involved with other important issues have contributed to the lack of student concern.

The University of New Hampshire, which saw two state capitols stormed, a chancellor pelleted with eggs and building-taken over in protest, felt that actions taken last year are still having an effect. President of NJSA, Frank Robinson, said they'll be doing a lot of screaming, protesting, and lobbying against the hike. But we have to do it in the right way. The end to spiraling education costs does not seem in sight. The volunteers of the City University of New York could not prevent money from flowing from student wallets as they returned to frustration. Student opposition is scattered across the country. Increased apathy, feelings that there isn't much that can be done, and being involved with other important issues have contributed to the lack of student concern. Nevertheless, feeling that there isn't much that can be done, and being involved with other important issues have contributed to the lack of student concern. Nevertheless, feeling that there isn't much that can be done, and being involved with other important issues have contributed to the lack of student concern.

Tuition rose in New Jersey an average of $150 per semester last year. Undergraduate students of the State University of New York (SUNY) are paying up to $500 more, while out-of-state graduates went up as extra $100. The University of New Hampshire, according to the state legislature, paid tuition by $100 for residents and $300 for non-residents. Student at the University of Massachusetts will see a total increase of $250 over two years. And it goes for students across the country. Student opposition to various tuition and fee hikes has fallen off at the start of this academic year. A contract to last spring, which saw two state capitols stormed, a chancellor pelleted with eggs and building-taken over in protest, felt that actions taken last year are still having an effect. President of NJSA, Frank Robinson, said they'll be doing a lot of screaming, protesting, and lobbying against the hike. But we have to do it in the right way.
SC's

By Mark Scholl

We held our first meeting Friday, November 19 and besides the case of near consisted, we welcomed new members Bob Chaut, Skip, Sharon Hill, Steve, and Martheline into the club. We now have 19 strong and courageous members interested in intersports, playing and good times to check us out. Get in touch with Bob in E-mail box 3437 for further information.

You now learn of this new item to big! On Wednesday, December 8th, in the middle parking lot, the SC's are sponsoring a car wash for "Tough Tex Tota". For $2.50, you can take out your frustrations on honest to goodness automobiles. Shown of faculty and administration will be outed on the car for everyone to take a gawk at. We are hoping everyone will put out a few quarters for a good cause and a good time.

Our meetings are Tuesday nights at 8:30 in the Gannon Purpose Room. This project we have going is the inter-sports softball season starting in the middle of March. If you agree with this, drop us a line in E-mail Box 3437. The newest action club can now call you a friend! - all you have to do is come in for a close look and check us out! We need people to stake our claim on this campus; you can be one of them. You may even stake off a close friend to check us out!

SHIPS WANTED
FOR 'ROUND THE WORLD EXPEDITION
This February a small
ship will embark on one of
the greatest expeditions of
all time. Th eir mission:
board YANKEE TRADER
and set sail to strange
ports around the world
for an entire year.

Share expense ships
are still invited to join
on a voyage which
will feature the traditional
to Windjammer 'Barefoot' Cruises.

Tours will explore:
- Wild islands
- Unusual climates
- Historical landmarks

YANKEE TRADER is one of those
nautical companies ideally
suited for members of this
cruise. The cost for each
journey is $3750 for the 10-
month voyage...about $24
per day. This includes
equipped shipboard meals,
your own quarters and
service aboard YANKEE TRADER.

You will be entitled to
- 10 luxorios nights in
deck staterooms
- All meals aboard
- Child's free in
- Service tips supplied
- Travel Insurance
- Port taxes

The cruise will begin
October 12, 1976.

Don't wait! For more
information and details
write to Windjammer
Cruises, P.O. Box 120, Miami Beach
33139. Information is
guaranteed confidential.

Captain Richard S. Gartside,

YANKEE TRADER and

If you have not been following
these articles, then you
would have noticed that
the Drill Team, to date,
has won 33 of the honor
flights for the tri this
year. All cadets
would like to see more
doing Sail for making
such a good team almost
from scratch. This
article will not attempt
to take sides in honor
flight competition, but
this year the Drill Team
will be on hand for honor
flights for the Fall 1976 trimester.

Thank you!

CALL 255-2011
A daylong physiological training class, conducted at MacDill Air Force Base, allowed off-duty Air Force personnel to experience high altitude breathing and decompression sickness first-hand. The class, led by Air Force personnel, provided a detailed look at the causes and effects of hypoxia, disorientation, and decompression sickness, as well as a demonstration of how these conditions can be managed through controlled breathing.

The class began with a lecture on the mechanics of the human body's response to hypoxia and disorientation. The participants were then divided into two groups: one group entered the high-altitude chamber while the other received a lecture on the same topics. The group that entered the chamber experienced a simulated flight, where they were exposed to different altitudes and pressure changes.

The effects of hypoxia were vividly demonstrated as the participants felt their hearts race and their breathing rates increase. They also experienced disorientation, as their vision blurred and their sense of balance was compromised. The students learned how to manage these symptoms through controlled breathing and learned the importance of maintaining a steady breathing rate.

After the classroom session, the participants were given the opportunity to fly in a flight simulator. This allowed them to experience the effects of hypoxia and disorientation in a controlled environment. The students learned how to manage their breathing and maintain their balance, even in the face of extreme pressure changes.

The class concluded with a discussion on the importance of being able to recognize the signs of hypoxia and disorientation. The students were encouraged to be aware of their own body's response to altitude changes and to use controlled breathing techniques to manage their symptoms.

Overall, the class provided a comprehensive understanding of the physiological effects of high altitude and decompression sickness. The students were able to experience these conditions first-hand, gaining a deeper understanding of how to manage them in a real-world scenario.
