Printing sparks cost concern

Unlike many campuses, Embry-Riddle is one of the few that does not charge their students for printing in the academic and business labs. Due to recent findings of an abuse in the free paper system and printing, this may change.

The Academic Computing and Campus Services Committee have been talking about ways to have some type of control on the unused paper waste without having to charge the students for the cost of paper. This is where the student body as a whole, though a few ideas have been swirling around to help alleviate the cost that the school pays for the paper, the future might entail an imputed cost for printing.

The problem does not rest fully on students however; some professors do have slides that they require their students to bring to class. The request has been for teachers to become more resourceful as in asking students to print double sided or even have multiple slides on one page instead of one slide per page.

There are many paper saving techniques that students and teachers alike can advocate and use in order to not only alleviate the problem but to lower a cost. Printing costs can be lowered not only by using both sides of the paper and making sure to use the paper that has been donated, but also by having the printing done in the SGA labs.

In schools such as Rochester University and New York University, student printing cost have already been implemented, something that the committee wants to avoid as much as possible. Currently, the committee only turn it to as a last result.

“The whole objective is to make everyone, faculty and students, sensitive to the need to reduce the wasted paper,” said Dr. Hamilton Hagar, head of the Academic Computing and Campus Services Committee.

Though there is nothing that can be done to solve this increasing problem, the committee is hoping that with more awareness of the printing problem, students will print less. Printing has become a privilege, one that both students and faculty must not abuse in order to keep printing available to everyone.

Basket Brigade provides food for those in need for Thanksgiving

Though the program started out small within families who were willing to give, it has expanded to ERAU and Daytona State College. The program spreads all the way from Daytona Beach to Port Orange, Deland and to the Deltona area.

Cathy Downs, Associate Dean of Students, who has been in charge of the basket brigade for three years, explained the importance of the basket brigade.

Downs said, “The basket brigade is a grassroots effort to provide a thanksgiving meal for families in need.” She also explained how the basket brigade top coordinated. A total of 27 baskets were donated by the SGA to the basket brigade. This year total of 100 baskets along with five cartons of canned food and grocery bags were donated by the SGA to the basket brigade.

The police department, school guidance counselors, fire department and other emergency units in the area in need provided the addresses for the families. The basket provided by Embry-Riddle contained mandatory items: a basket, roast, pan, and gift cards. Additional materials included decorative candles, deck of cards and puzzles for children, kitchen towels and potholders. The baskets were organized and taken to Daytona University.

The baskets were delivered the Saturday before Thanksgiving. The families who were not aware of this act of kindness are usually overwhelmed on seeing the basket on their doorstep with the tag “from a friend who thought you would need this” on the baskets. It is mainly aimed at making sure every family has the traditional thanksgiving dinner and a good time together.

A few ideas have been swirl around to help alleviate the cost that the school pays for the paper, the future might entail an imputed cost for printing. The problem does not rest fully on students however; some professors do have slides that they require their students to bring to class. The request has been for teachers to become more resourceful as in asking students to print double sided or even have multiple slides on one page instead of one slide per page.

There are many paper saving techniques that students and teachers alike can advocate and use in order to not only alleviate the problem but to lower a cost. “Coming to Africa” is a show which was produced by American-born Indian Students Association (ISA) and the Embry-Riddle African Students Association (ERSA). The show was aimed at showcasing and educating the attendees of the show about the culture of Africa. It was held at the Student Center on Sunday, May 23, this year and kicked off at 6:30 p.m. It was a huge success, with many people attending. The show was decorated with flags from different African countries which was in connection with the theme of the show. The audience for the night was comprised of Addesanya Adewumi and Caleb Choge. The positively received the attendees with their songs and dance performances. Caleb Choge welcomed everyone to the show and described the Diwali festival as “coming to Africa brought a lot of joy to the students”. He also said that “music, free ethnic food, culture showcasing and the fashions” would be presented to the audience. Kam Hardiman, part of ERAU African Student Association (ASA), was also present at the show and she thanked everyone for attending. The show was also attended by senior Dr. Afza Khan, advisor of the Indian Students Association. The show also included a game involving all the attendees. The game was based on the names of northern India and won the game two. Two-dollar gift certificates were given to the two players who correctly answered questions in the game. An exhibition stall was also set up with the display of Indian culture and accessories. Henna tattoo was also available for sale. Of course, food was not left out. Dishes like Biryani (rice and Gulabjamun (Indian sweet) and ‘Jamaican’ food were served next, with cultural showcasing and the fashion show. Food was served next, with cultural showcasing and the fashion show. Food was served next, with cultural showcasing and the fashion show. Lear concluded that she has not been easy to learn, self, as she did not understand the course’s assignments. According to her, she better understood the poems when her teacher wrote them in class the next day. “When I read them on my own, they still did not make much sense to me, even when I read the annotations. However, in a classroom will help you learn the material,” she said. The classroom is the best place for learning. It is a division of the Student Government Association. **Winter break shuttle dates**

**Curtis Dodge**

COA Representative

The Flight Department of the college has joined forces with the Student Government Association to bring flight students a shared shuttle service. These forums are held on a bi-weekly basis and focus on assisting students with their flight training. The next forum will be held on Tuesday, Dec. 7 at 6:30 p.m. in the RC Auditorium. The forum will focus on flight training.

**Tessa Doughtier**

COA Representative

It is now time to sign up for the Winter Break shuttle to Orlando! The shuttle will run from the Embry Riddle campus to Orlando International Airport. If you would like to participate in the Orlando Break shuttle, please write your name and flight number on the Student Government Office to sign up! The last day to sign up will be Dec. 8. The following are the dates and times for the shuttle:

- **Dec. 13 – 9 a.m.** and **9 p.m.**
- **Dec. 14 – 5 a.m.**, **9 a.m.**, **5 p.m.**, and **9 p.m.**
- **Dec. 15 – 5 p.m.** and for the return shuttle
- **Jan. 10 – 1 p.m.** and **5 p.m.**
- **Jan. 11 – 1 p.m.** and for the return shuttle

There is also an opportunity for students to fly their Riddle’s campus from the Orlando Airport during the winter break. The flights are 30 dollars one way or 40 dollars round trip and you would like to get a ride on the shuttle, stop by the Student Government Office to sign up!

Fraternity recognizes best educators

Anthony Evans
Pi Kappa Alpha

The best teachers are the ones who say something that is new to the student, and inspire their students to think. They are the ones who make their students up to success, not to fail, and they do not take the role of coach, they force their students to think on their own. Teachers who inspire students are becoming less and less frequent and the Pi Kappa Alpha Fraternity thought it would be a great idea to celebrate those who were able to surpass the expectations of their professors. On the evening of March 17th, the brothers of Pi Kappa Alpha decided to recognize some of the best educators at this university, by the hosting of the 1st Annual Pi Kappa Alpha Educational Honors Dinner. We nominated and chose one professor from each of the colleges to be honored. Those honored truly exhibit the qualities of excellent teachers. They always go above and beyond and inspire the students to think on their own. The atmosphere of the event was filled with people who were able to inspire others to go above and beyond their call of duty. We all look forward to the future and hope that those who were honored will continue to inspire others to think on their own.

Kristina Diaz
Army ROTC

The Leadership Training Course, more commonly known as LTC, is a four-week long training event held at Fort Knox, KY, which is used to create leaders and to prepare college juniors for the Junior ROTC. The course is designed to allow students to receive necessary training if they join the ROTC. "Late" - after freshman year, it is necessary training if they join, allowing students to receive necessary training if they join.

Reserve Officer Training (ROTC) is used to prepare college juniors for the Junior ROTC. The course is known as LTC, is a four-week course, more commonly the Drill Sergeant phase, the Army way. After surviving the first three days of training, the Army was about. From the very beginning, the Drill Sergeants embedded the Army discipline and way of life. In their own way, they taught me that all that we did live the Army way. After surviving the Drill Sergeant phase, the true learning of the Army values and leadership began. Every cadet, including myself was tested through series of events and pre-exhaustive Team Work Development events. The leadership was taught me the true meaning of teamwork within our squad when missions. The Squad Tactical Training Course tested my ability to adapt to a challenging tactical environment while using my fellow cadets to negotiate the course. The Climbing Companions used my personal courage and ability to overcome challenges. The Map and Field Training Navigation sought my knowledge on how to use aeronautical charts and create a map of a specific point in any given area, and tested each cadet on utilizing those tools in a heavily wooded environment. Call of the Wild tested my strength and mental agility as I helped my squad achieve a goal in an obstacle course, as well as in the Call of the Wild competition. The Combat Water Survival Training tested my ability to use a life vest and stand in the water. The Squad Tactical Training Exercises tested my ability to use Operation Orders, and to plan and execute missions. Finally, the 10K March was the most demanding training event, testing my mental and physical ability to the extreme. After the conclusion of the training exercise was completed, I was able to utilize my mental and physical abilities to successfully accomplish each task with 100% success. There were plenty of times where LTC was extremely challenging. For example, when it rained almost all day during our Assault Training and we became completely drenched in mud, or when it was so hot that I walked outside. But aside from all the events, most of course constant encouragement from the Drill Sergeants, LTC was the greatest challenge I have ever encountered in my life. LTC gave me the discipline, LTC gave me the focus, LTC gave me the drive to succeed in ROTC, and to be strong not only for myself, but for the Army.

On Sunday, Nov. 21 at 5:58 p.m., the 45th Space Wing of the U.S. Air Force and the United Launch Alliance launched a Delta IV Heavy Lift Rocket from pad ET SL-C37B (Launch Complex 37), of Cape Canaveral Air Force Station, Florida. The payload of this mission, NROL-32, is classified, but what is known is that it was some type of spy satellite cargo for the U.S. National Reconnaissance Office.

Originally scheduled for Thursday, Nov. 18th at 6:06 p.m., technical issues delayed the launch 24 hours, taking off Friday Nov. 19. The problem was attributed to ground support equipment and pyrotechnic ordnance lines not meeting code. These ordnance lines fire and release the "hold down bolts" allowing the rocket to takeoff.

A second delay on Friday was due to anemalous temperature readings in the side CBC's. The launch was again pushed back until Sunday, Nov. 21.

The Delta Rocket series is an expendable launch system, which makes use of Boeing designed rocket boosters. Unlike most heavy lift rockets, these boosters are liquid hydrogen and oxygen rockets also known as Common Booster Cores, or CBC's.

Delta IV Medium, the simplest Delta Rocket, make use of one CBC as a first stage followed by more liquid fuel as a second stage. Medium(+) variants make use of solid rocket boosters (typically GEM-60’s) on either side of the CBC in order to achieve maximum lift.

This launch marks the 14th use of the Delta Rocket platform. Although the cost of these rockets is slightly higher than competitors, such as the Atlas V rocket, it has proved highly successful.

Another launch of the Delta Heavy system is scheduled for Jan. 15, 2011. Labeled Mission number NROL-49, it will carry classified payload for the National Reconnaissance Office, and will become the first Delta IV Heavy to launch from the Vandenberg Air Force Base’s Space Launch Complex 6 (SLC-6) pad in Santa Barbara County, California.

With the Space Shuttle Program’s inevitable end looming in the distance, Boeing and the ULA have proposed modifying Delta IV Heavy lift rockets to be used in low orbit transport for the ISS. The competition for NASA’s funding between SpaceX’s Falcon 9 rocket equipped with the SpaceX Dragon capsule and Boeing’s Delta IV program should become very interesting over the next few years.

Harry Potter and the Deathly Hallows Part 1

+ Skyline
  and Rooney
No ‘Eureka’moment

Harry Potter returns Skyline, a let down

The opening track “Holding On” is very characteristic of Rooney, with simple catchy lyrics such as “I don’t know where I’ll go, if I don’t give it time, how can this garden grow?” I’ll go, if I don’t give it time, how can this garden grow?”

“All or Nothing” the fifth song in the album is another pop rock tune, the music is lively, upbeat with happy tunes that are very radio friendly. Rooney still has a number of catchy tracks in the album.

The opening track “Holding On” is very characteristic of Rooney, with simple catchy lyrics such as “I don’t know where I’ll go, if I don’t give it time, how can this garden grow?”

Fourth track, “Into the Blue” goes Rooney moving away from the usual heavy guitar work towards the keyboard. Pure vocals with the keyboard lead and an almost acoustic guitar. The bass slowly comes in towards the middle of the song. When the drums come in, you can almost place Schwartzman crooning this song on a bar with a special lady in the crowd.

Skyline is still very much present and the sound which is not necessar-

After almost thirty minutes of the characters battling in the apartment, and another thirty minutes of very quickly combat scenes, you’re back to just Jezard and Elaine, on the carpet with a book. It was created definitely leaves you feeling cheated.

Throughout the show, most of the characters bickering in the apartment, and another thirty minutes of very quickly combat scenes, you’re back to just Jezard and Elaine, on the carpet with a book. It was created definitely leaves you feeling cheated.

no fan of Rooney, you can still yet to movie the introduction of the characters. Although, I know many of the Harry Potter fans will be happy to see the second part is just going to be a huge disappointment in order to stay true to the story.

The quick summary of this movie is how Jezard (Eric Balfour) and his girlfriend Elaine (Sereana Thompson) fly to Los Angeles for his brother’s birthday and later try to survive the alien invasion. Terry (Donald Faison) introduces to Jezard (and the audi-

The film is full of action as the title suggests. Plus, the music is lively, upbeat with happy tunes that are very radio friendly. Rooney still has a number of catchy tracks in the album.

Skyline is still very much present and the sound which is not necessar-

Overall, I give this movie four and a half out of five. I think that I just can’t give it a full five because it is a huge disappointment and the second part is just going to be a huge disappointment in order to stay true to the story. Still, a bill that we can’t pay” and “connation. Phrases such as “Just

“Rooney”s third studio album is more of the same kind of sound which is not necessarily a bad thing. First gaining attention in the wake of The O.C. way back in 2003, Rooney has since gained a following both in the music world and pop music crowd. Filled with happy tunes that are very radio friendly. Rooney still has a number of catchy tracks in the album.

“Rooney”s third studio album is more of the same kind of sound which is not necessarily a bad thing. First gaining attention in the wake of The O.C. way back in 2003, Rooney has since gained a following both in the music world and pop music crowd. Filled with happy tunes that are very radio friendly. Rooney still has a number of catchy tracks in the album.

The film is full of action as the title suggests. Plus, the music is lively, upbeat with happy tunes that are very radio friendly. Rooney still has a number of catchy tracks in the album.
