After much consternation, aggravation, and in general, many frustrations, Sigma Chi Delta has come up with what we think is the perfect Fraternity House.

Formally known as Dorm 3, our new gathering hall features such conveniences as individual rooms for the brothers, a spacious kitchen, (if you can cook) and last, but not least, (probably the most) a wonderful, cool, relaxing, inviting swimming pool.

It's amazing what many man hours, much paint, and some wierd wall paper can do for an otherwise dreary place to live. The brothers were given the decision as to what color they would paint their rooms and out of this meeting of the minds came tasteful rooms which are a pleasure to entertain in, and which actually enhance study (if you can picture that!)

Sigma Chi Delta was founded last fall and since then has made enormous strides to prove itself to an asset to the school and community. We feel that we have something that we can be proud of in our new fraternity house, and would welcome visits from members of the student body who are interested in seeing how we are coming along.

The AVION reserves the right to edit letters as we see fit in accordance with good journalistic practice. All letters must be signed, although names will be withheld upon request from the writer.

I want to be a Navy pilot when I grow up because it's fun and easy to do.

Pilots don't need much school, they just have to learn numbers, so they can read instruments. I guess they should be able to read maps so they can find their way if it's foggy and they can't see if a wing or motor falls off they should stay calm so they'll know what to do.

Pilots have to have good eyes so they can see through clouds and they can't be afraid of lightning or thunder because they are closer to them than we are. The salary pilots make is another thing I like. They make more money than they can spend. This is because most people think airplane flying is dangerous except pilots don't because they know how easy it is. There isn't much I don't like, except girls like pilots and all the stewardesses want to marry them so they always have to chase them away, so they won't bother the girls. I hope I don't get airsick because if I do I couldn't be a pilot and would have to go to work.

By Ed Hewson

Last trimester many students began talking about the school's current academic policy. Finally several were motivated to action. A group requested that the SGA appoint a committee to examine some of the more prevalent complaints and offer recommendations. The SGA sanctioned the idea and offered to present the findings to the appropriate persons.

The committee has taken the three most prevalent complaints and offered four recommendations. (1) It is felt that instructors should take appropriate measures to ensure academic honesty. Specifically, old tests should not be used over and over again. (2) In some cases faculty work loads do not conform to standards set by the American Association of University Professors. We should conform. (3) If the school is to maintain an effective "open" door admissions policy, a comprehensive and effective battery of preparatory courses must be utilized. One student not prepared to enter a freshman level course can hinder the whole class. (4) A student or student/faculty committee should be established by the faculty each trimester to insure student involvement in the area of academic standards. The student is the biggest loser if the school falls behind the national level of academic standards.
The Brothers of Sigma Chi Delta would like to welcome all new and returning students to the ERAU campus. For those who were unable to attend last summer trimester, we can only say Daytona Beach had a lot to offer: in the way of parties, bands, etc.

Wednesday, September 16 the Brothers met close to fifty potential pledges at the first Sigma Chi Delta Smoker. Friday night several guest rushees and fraternity members will meet at the newly acquired Fraternity House located at 520 South Ridgewood Ave. Friday night party should be the largest event ever held by Sigma Chi Delta.

Several new officers were elected at the past Monday night meeting. They are Ken Bording, Treasurer; Buss Allsup, Rush Chairman; Steve Foster, Pledge Trainer; Mike Buach, Social Chairman; Tom Reed, House Manager; George Waterman, Corresponding Secretary; Paul Williams, Scholarship Chairman; and Public Relations Paul Eddy. The three remaining officers Terry Owens, President; Don Osmondson, Recording Secretary; and Stephen Avery, Vice President.

The Sigma Chi Delta football team is coming along fine - we think we have an all star team. Several veterans have returned. They are Chris Brown (Bear) weighing 255 lbs; Doug Allsup (Critter) Delaandom 195 lbs, Skip Beard (Shadow) 200 lbs, Steve Everly (Bear) weighing 285 lbs, Jim Patterson(Black) 210 lbs, Paul By 215 lbs, Don Osmundson 210 lbs, Stevie Murray, 220 lbs.

The Sigma Chi Delta Fraternity would like to take this opportunity to welcome all new and returning students and wish them a good trimester at ERAU.

On Thursday, September 10 Pi Chapter celebrated its 10th anniversary. Looking back, Pi Chapter has done much to benefit Embry-Riddle as well as itself. Pi has made a great gain in only the last six months with the purchase of two new chapter houses at 519 and 525 South Ridgewood Avenue. But much work lies ahead to maintain this advancement.

Sunday, September 13 elections were held for new officers. The new officers are Bruce Rozett, Rush Chairman; Steve Elton, Business Manager; Fred Foster, Pledge Chairman; Tom Reed, House Manager; and Gary Kriettner and Woody Van Why as Secretary.

On Friday, September 19, Sigma Phi Delta will hold its Rush Party. We encourage all second trimester or transfer engineers to come to the Chapter House at 8 PM to learn more of Sigma Phi Delta, the Professional Engineering Fraternity.

Once again, welcome to Embry-Riddle from "The Professionals."

Happiness is...a better multi-engine aircraft something like a Lear Jet or Jet Commander

Happiness is...a lounge at Dorm 2.

Delta Chi

Delta Chi is back from our first full year on campus one that will be remembered. Last weekend we initiated nine new brothers at the University of Florida Delta Chi Chapter. The Initiates went to Gainesville Friday afternoon and spent the weekend learning about the fraternity before being initiated Sunday afternoon. Everyone agreed that it's GREAT to be a Delta Chi.

This weekend the remaining pledges will go to the University of Florida for their initiation and a number of the brothers will go up with them for some pointers on how to rush new members.

The brothers will be traveling the dorms next week talking to people about Delta Chi. If we miss you and you or any of your friends are interested in seeing what Delta Chi can do for you, drop a note in Box 1497 or Box 197 telling us when you'll be in your room and we'll stop by and talk or stop by the house at 927 S. Ridgewood Avenue and someone will show you around.

Alpha Eta Rho

Twenty six salty little bodies returned to the Rho House Tuesday night after an exhausting day at the beach, for an organizational meeting of the fraternity. Nominations for officers were held and stories of the summer's disasters were related in gory detail.

Plans are in motion to hire a cook for the evening meals and a host ladies showed up Sunday afternoon applying for a job.

Thus far in the trimester things have gone very smoothly except for the brothers returning from the summer. ***

CONTINUED NEXT PAGE
summer reserve and OCS programs. Several have been caught practicing close order drill in the living room after quiet hours.

We wish to welcome all of our transfer brothers from other chapters to join us in what we hope will be a very exciting semester. Meetings are held Monday nights at 7:30 at the Frat House, 424 South Ridgewood. If you have a transportation problem call 252-9503.

The football team is going to have to make up for small size with experience. All of last year's players are returning as seniors or juniors. Coach Eliasoff ran the team through practice last week and finished up with a scrimmage on Thursday. Disaster struck when quarterback Jeff Acker suffered a recurrence of the knee injury that sidelined him last year. Flanker Bob Duden or Halfback Jim Frye will probably replace him.

Defensive captain Gary Anderson will be working with a small line, but offensive line Bob Anderson should provide a very effective pass rush at 6'4".

BY DAVID L. CROAKMAN
PUBLIC RELATIONS, VA

Welcome back from the all too short trimester break and a hearty welcome to all the new Veterans who have now entered ERAU. Hope to see you all around campus. In celebration of this new trimester the Veterans Association and the Wives Auxiliary are sponsoring a Welcoming Party at the American Legion, 105 North Palmetto (1 block east of US #1, corner of Volusia and Palmetto) on Friday, September 17th (that's tonight!) at 7:30 PM. The dress is casual and good ole' draft beer will be one thin dime - the party is for old veterans, new veterans their wives or dates, faculty and administration. So, hope to see you there.

If you haven't already seen or made use of the VA Used Bookstore, please do so. Used books are always in demand at the start of every trimester. We don't buy your books, but sell them for the price YOU want and deduct a mere 10% All types of diving books are needed, so bring them in and save yourself some money. We are located in the administration building just down the hall from the Cashier's Office. I'm sure you all know where that is!

Come one, come all! To the veterans first big blast of the new school year. Plenty of beer and food, with no long chow lines. See ya all there!!!

EMBRY RIDDLE DIVING EAGLES

The Embry-Riddle Diving Eagles is a campus club dedicated to the promotion of SCUBA diving. To this end we hold meetings with all interested persons, do a lot of diving, and offer diving instruction to all who want to try something new.

So far this trimester we have held two meetings, both of which have had excellent turnouts. These weekly meetings, held every Monday night at 8:00 pm in room 108, are usually very interesting and informative. Dive schedules are formed with an attempt to keep the cost as low as possible so that more people can afford more diving. Dives held over the weekend of the previous week are reported in detail so that the stay-athomes can get a good idea of what they missed. We also coordinate with another local diving club so we all get the most out of the available diving.

Beginning Tuesday night September 22, 1970, at 8:00 pm in room 108, we will be conducting a seven week SCUBA diving certification course. The charge for this course is a very reasonable $25. With textbook, tanks, and regulators provided. A $10 deposit is required the first night.

For the certified diver a two-day trip to Bimini is now open for reservations. The cost of the trip is $40 per person, with a $10 deposit required. The trip is scheduled for October 17-18. The boat leaves Miami at midnight, Friday. For more information contact Ralph Wickland, ER Box 413, or come to a meeting.

Now that you know a little about us, come by some Monday night and learn more. Maybe you'll try diving - IT'S FUN.

ANSWERS TO FLIGHT QUIZ:
1-C; 2-C; 3-B; 4-C; 5-D.
RATING FOR EACH CORRECT QUESTION:
1- Student Pilot
2- Private Pilot
3- Commercial Pilot
4- Instrument Pilot
5- Certified Flight Instructor
ERVAWA
PEGGY KIDDER, SECRETARY

As we swing into the Fall trimester, the Embry-Riddle Auxiliary has a whole new group of faces leading it. Elections were held on September 8 and as a result the new officers are: Dee Saxton, President; Linda Moore, Vice-President; Peggy Kidder, Secretary; Pat Sicotte, Treasurer; and Jan Shannon, Historian.

Taking up most of the club's time right now is the big project of the membership drive for this fall. The big event is a tea to be held on September 27th. All wives of veterans on campus are invited to be our guests. We plan to conduct a tour of the Riddle campus first hear a guest speaker, and have refreshments. It will be an afternoon of fun and friendship. In addition, Mister Roberts has donated a certificate for a wig to be given away at the tea. Any wives who are interested in attending should contact Linda Moore at 253-0732 or Barbara Gregory at 253-4785 for information, reservations, and transportation. We are hoping for a great turn-out and forms are going to be distributed soon to new and old student wives for whom we have addresses or their box numbers...so if any of you husbands are reading this, do not throw anything away that you might receive in your mail box without checking to see if it might have been addressed to your wife!!

**********

BY DON BUNDY

1. While at the weather bureau you determine that the air mass over the southeastern part of the United States is warm and has a high relative humidity; the lapse rate is 4° Centigrade per thousand feet and a cold front is pushing in from the Tallahassee area southeast bound. From this information you determine that the weather conditions will be:
   a) stable, stratiform clouds, possibly showers
   b) conditionally stable, cumuloform clouds, moderate rain
   c) unstable, cumuloform clouds, possibly thunderstorms.

2. While operating your aircraft you make a left slipping turn; from this you know the position of the ball and turn needle would be:
   a) turn needle left, ball to the right
   b) turn needle right, ball to the left
   c) ball left, turn needle left
   d) ball right and turn needle right.

3. While on a heading of 180°, a turn is made toward the east, the magnetic compass will:
   a) lag and indicates a turn in the opposite direction
   b) leads and indicates a turn in the same direction
   c) has no lead or lag when the turn is coordinated and made at 15° degrees of bank.

4. As you make an approach on the glide path of a VASI you should see:
   a) the upwind lights white, downwind lights red
   b) both upwind and downwind lights white
   c) upwind lights red, downwind lights white.

5. Which of the following terms describes the flow of air in a low pressure system:
   a) diverging and descending
   b) converging and descending
   c) diverging and ascending
   d) converging and ascending.

This schedule is the strongest of our career. The "Eagles" are again strong in talent, short on practice time - the coach has to put this team together while in flight ultimately. The first two games will be in Miami and the team will shuttle down on our own DC-3 - the second part arriving in time for the second half. Miami Dade North handed us a bad score last year - we look to better results. There are about half of the present team members who are returning from last year. 1-2 record holders (including 2nd place in the UofF invitational tournament). If we can get off and running - and get some practice - this should be the most skilled group put together since the start of inter-collegiate athletics at ERAU.

## MODERN DANCE CLASS

**BY GARY ANDERSON**

Like many students I was interested to hear that Riddle is offering a modern dance class this fall. In order to be the first to sign up I rushed to the Registrar's Office to get the details:

"Who's teaching the course," I asked.
"We have a new instructor this year."
"Yes, who is it?"
"Harvey the dancing bear."
"Harvey the dancing bear?"
"That's right, Harvey the dancing bear."
"Why did you hire a bear to teach modern dance?"
"He helped little kids get lost."
"I see. Isn't it going to be a little embarrassing having an instructor that spends his lunch hours hunting for nuts and berries?"
"Are you kidding? With the salaries we pay them, our faculty has been doing it for years."
"What happens if he doesn't pan out as a modern dance teacher?"
"We have an opening in the biology lab."
"Instructor?"
"No, a specimen."

## SAFETY TIPS FROM SID

**BY SID BARLING**

While browsing through the grizzly details of aircraft accidents, or in other words, who didn't do it (pre-flight) and get caught, my attention was drawn to an interesting set of statistics concerning "faults" in pre-flight planning and/or inspections.

Out of an estimated total of 5,356 general aviation accidents, 206 were blamed to the above. It's easy to see how the "cause" factors break down.

1. Poor preflight - fuel quantity 73
2. Poor preflight - weather 50
3. Poor preflight - a/c performance 18
4. Poor preflight - at and balance 10
5. Improper servicing 1
6. Misc. inadequate planning 46

Number 1 on the agenda was "poor preflight - fuel quantity" with a grand total of 73. It's amazing how many pilots will kick the tire, light the fire, and never consider how long it is going to burn. When the fuel gauges near the "e", so is flight approaching "e". For precise initial planning and constant monitoring are essential to safe flight.

The second grim reaper was "poor preflight - weather" with 58 accidents. Most of the weather cases followed a general pattern: a 36 year old pilot took off on a VFR night flight from Great Bend to Dodge City, Kansas. En route, he ran into a rapidly moving low complete with high winds, blowing snow, icing, a lowering ceiling and visibility. Hoping to break out in the clear, he bored on through the stuff but luck was logically against him at 0230 he noticed ice beginning to form on the leading edge of the wings, so he decided on a precautionary landing and headed for terra firma. When he peered through the darkness and managed to make out the ground coming up, he leveled off. But not soon enough to keep from striking the surface in a relatively flat attitude. The aircraft slid along the ground several hundred feet, the landing gear still neatly tucked into the belly, and came to rest against a slight rise in the terrain. The pilot was unhurt, but a passenger spent some time in a hospital, and the aircraft - an even longer time in the repair shop.

The reported cause in this instance was "continuing visual flight in adverse weather" and "descending below obstructing terrain". A third cause, and one that led directly to the other two, was "inadequate flight preparation" and justifiably so because he had not obtained a weather briefing before taking off. If he had, he'd have been warned of weather which proved to be exactly as the weatherman had forecast.

The cure is obvious, being a thinking pilot, and propilot can spell out the cure in a voice louder than our boldest type, ALWAYS INCLUDE A WEATHER BRIEFING BEFORE EVERY FLIGHT, AND KEEP A CONSTANT CHECK ON WEATHER AS YOU GO.

As the often repeated advice in aviation states it, "Learn from the mistakes of others; you don't live long enough to make them all yourself!" So, ERAU future pilots, while you are learning the art of flying like a pro, remember that preflight planning and inspection are vital first steps in the direction of safe flight. THINK AND PREPARE SAFELY.

WHAT'S UP?
BY ED HEWSON

"Hunt Says ERAU May Move Campus", "No Definite Action On ERAU Land", "To Recommend Rejection of ERAU Land Purchase". I thought that those of you who were absent over the break might be interested in the above headlines as they appeared in the Daytona Beach Morning Journal. Our President was even on television talking about the move. It seems that the county has second thoughts about selling the school the seventy-two acres surrounding the present two structure campus.

The recent news has provided little further coverage of the situation. As usual, we all wonder where we stand now!

I think that the new students should be aware of the fact that the student activity fee was recently raised from $18.00 to $30.00 per year. Many of us have had trouble finding justification for the increase. Nevertheless, it is now upon us. Students, new and old, must make an effort to see that the fee stabilizes at $10.00 per trimester for the next few tris.

Other schools pay the equivalent or more, but they get football tickets, a whole week of social gatherings during orientation, periodic top name entertainment, heavily subsidized student clubs, and various other things. Were you new students who exist between the airport, the Holiday Inn, and the dorm, provided with orientation parties or gatherings? If you were, it's a first at Riddle. Don't be apathetic when you get the chance to elect a new student government. Put someone in office who will work to make Embry Riddle a real university. If you don't support someone now, don't bitch later!

Fields is running a special on compact fold-up camp chairs this week. A small investment on your part will insure a seat in class.

Unfortunately Fields does not have textbooks. You'll just have to wait.

GIRLS' TÉA
Friday, September 11, ER's infamous "Dean of women" held a tea welcoming new and returning coeds to the campus. The atmosphere was congenial, and most of the coeds enjoyed the endless introductions to staff and faculty members.

ERAU LIBRARY HOURS
8:00 AM - 10:00 PM
MONDAY THROUGH THURSDAY
8:00 AM - 5:00 PM FRIDAY
10:00 AM - 3 PM SATURDAY

Longer hours are in effect because the library is experimenting to find the most desirable times for students needs.
DEVELOPMENT OFFICE

Embry Riddle Aeronautical University announced today that Dr. Jack R. Hunt, Dr. Edward P. Yackel and Dr. Daniel D. Sain have been selected to appear in the 1970 edition of OUTSTANDING EDUCATORS OF AMERICA. Nominated earlier this year, they have been chosen for the awards publication on the basis of their civic and professional achievements.

The Outstanding Educators of America is an annual program designed to recognize and honor those men and women who have distinguished themselves by exceptional service, achievements and leadership in education.

Nominations for OUTSTANDING EDUCATORS OF AMERICA are made by the presidents, deans, superintendents and other heads of schools and colleges...individuals who have first hand knowledge of their endeavors and accomplishments.

The educators included in this biographical history receive a high honor. They are chosen for national recognition of the basis of local standards of excellence.

Guidelines for selection include an educator's talents in the classroom, contributions to research, administrative abilities and any civic and professional recognition previously received.

********

GOLDEN DOOR MOVES AGAIN

ROSY CABRERA
Due to the 50% increase in the female population at ERAU the door that separates the males from the females has been moved down the hall in the Nova Road Dorm.

The girl farthest away from home this trimester is Rosy Cabrera from Colon, Republic of Panama.

Rosy is 19 years old and speaks three languages: Spanish, English, and French. She prefers that they be listed in that order.

After traveling a year in South America, Rosy decided to come to Embry Riddle after hearing about it from a Panamanian friend who is now attending Riddle. Coming from a Catholic all girls school, Rosy finds ERAU quite a switch. Rosy is enrolled in the Aviation Management program. After receiving her A.S. Degree, Rosy hopes to work as an International stewardess.

FALCON FOR TWO-TANDEM

I would like to thank everyone for their donations of flowers and expressions of sympathy at the death of my father last week. They were of great comfort to my mother, brothers, sisters and myself. I am sure dad would have been proud that his son's loss was shared by so many.

Terry Miner
SGA President

Happiness is... someone with an answer to your question.

Happiness is... less class time and more beach time.

THE AVION'S UNDERWATER PHOTOGRAPHER, SMEDLEY MUFFGLIEB, CAUGHT THIS TRAGIC PHOTO FROM THE BOTTOM OF THE NOVA DORM POOL WHERE HE WAS PREFLIGHTING HIS TIMEX WATCH. THE FLOATING SAND DIVER WAS LATER IDENTIFIED AS MISS DORIS DUVER, WHO WOULDN'T.

SEAPLANE RATING

THE BUNNELL AIRPORT IN BUNNELL, FLA. IS NOW OFFERING A SEAPLANE RATING 1970 CITABRIA on floats

For Further Information Call 904-437-3846
MARY SCHWARTZ, ENROLLED COED, MADE THE STARTLING DISCOVERY WHILE SWIMMING IN NOVA ROAD DORM POOL THAT EVERY TIME HER ROOMMATE FLUSHED THE TOILET THE POOL LEVEL RAISED 1 INCH. THE ADMINISTRATION IS CURRENTLY STUDYING POSSIBLE OTHER USES OF THIS PHENOMENOM IN THE ACADEMIC COMPLEX.
DEAN BUCKS

Hi there! I am DEAN BUCKS. I'M THE DEAN OF ADMINISTRATION. WELCOME TO ALL YOU NEW AND RETURNING STUDENTS! I WOULD LIKE TO DISPELL A COUPLE RUMORS BEFORE WE GO ANY FURTHER. WHO EVER SAID I WAS TO BE THE FIRST RECIPIENT OF A PERSONALITY TRANSPLANT IS OF COURSE WRONG. ACTUALLY ANOTHER DEAN IS TO BE THE FIRST — MYSELF SECOND. NEXT, I'M TIRED OF THE COMPLAINTS ABOUT THERE BEING EXCESSIVE EX-MILITARY PEOPLE AND RAMPANT NEPOTISM ON CAMPUS. I'M GOING TO TRANSFER ALL THESE COMPLAINTS TO MY BROTHER-IN-LAW JUST AS SOON AS HE IS DISCHARGED AND HIRED HERE. OK, JUST PAY THE CASHIER AND DO NOT WEAR SANDLES — WE WON'T HAVE ANY PROBLEMS THEN. LIGHT 'EM UP, MEN!

The AVION is a weekly publication for Emory Middle students financed by the student's activity fee through the Student Government Association.

Articles may be submitted to the AVION for publication by the Administration, the faculty and student body. The AVION deadline is every Monday afternoon at 4:00 p.m. Please mark all items AVION and deposit in the basket in the trailer, the Suggestion Boxes, or BRAV Box 1608.

The opinions expressed in this paper are not necessarily those of the University or all members of the Student Body, nor do letters appearing in the AVION necessarily reflect the opinion of this newspaper.
