Graduation Weekend Busy

Groundbreaking for the $1.4 million Gill Robb Wilson Memorial Aeronautical Science Center on the campus of Embry-Riddle Aeronautical University was just one of many events scheduled during Graduation Weekend, April 17-18-19. Mary Mitchell, widow of Gill Robb Wilson, and Mrs. George Denison, his daughter, were on hand to dedicate the three building complex. Dr. Tine W. Davis, Senior Vice-President of Winn-Dixie Stores, Inc., used a golden shovel to break ground for the TINE W. DAVIS SIMULATOR LABORATORY. On Monday evening Mr. John L. Bader, of the FAA, gave the Convocation address to 385 graduating seniors of ERAU. ERAU bestowed Honorary Doctorates on five men for achievement in their respective career fields. Receiving Doctorates were Mr. Paul J. Meyer; Mr. Robert Reed; Mr. Phillip Hughes; Mr. Ray Work; and Mr. John Baker.

Earlier that weekend, the first meeting of the ERAU PTA (Parents To Aviation) was held in the Academic Complex.

Also on Saturday, the open house was held at President Hunt’s new Ormond Beach residence.

SGA Election Upcoming

The S.G.A. will hold elections on May 24, 1971 in order to fill the vacancies now existing in the S.G.A. senate.

The two officer positions open are that of secretary and third vice president. Anyone who:

1. has been a student for a period of one trimester directly preceding the election.
2. is not on academic or disciplinary probation
3. has at least two trimesters remaining at EMU may run for the position of secretary or third vice president.

In addition, there are numerous senator positions open. Senators are needed from the following programs:

Aviation Management
Air Science
Engineering and Math
Airframe and Powerplant
Pilot

Anyone who:
1. has been a member of the S.G.A. for four weeks preceding the elections
2. is not on academic probation may run for office of senator representing his or her respective program.

Elections will be held in the student center from 8am to 4pm.

Candidate Registration will be open until noon May 18, 1971 at the S.G.A. Office.

*Any Student is a Member of the S.G.A.*
Welcome to summer '71! One of the themes the S.G.A. will be stressing is "participation." We heartily encourage participation in the varied services and affairs offered by this summer's S.G.A. Get involved and join the movement!

To guide the S.G.A.'s direction and growth, it is imperative that all students participate in the upcoming elections (Monday May 24th). The ability of the S.G.A. to function actively rests on the representatives elected to office. We need people to run for office and people to intelligently choose a candidate who will get the "job" done. At this date, we are in dire need of people who will volunteer a small amount of their time to accomplish the many tasks involved in S.G.A. functions. Come into the S.G.A. Office and inquire about candidacy NOW!

We wish to welcome and offer encouragement to the new leadership of the campus publication giants, the AVION and the PHOENIX. Their role as S.G.A. sponsored publications is extremely important in documenting and informing our entire student body. Both organizations rely on help and participation from US, the students. Again, we urge you to support the PHOENIX and/or the AVION, if you can assist them in any way.

Looking ahead on the SGA calendar, the BLOOD DRIVE (Friday, June 11th) is encouraged. The benefits to the donor and recipient are too often taken for granted. Please give serious thought to blood donation, and participate in this life-sharing and important drive. I personally pledge to give blood at this drive and all in the future.

Saving one of the heaviest raps for last, we suggest every student read (and reread) the Conduct Regulations set forth in the STUDENT HANDBOOK and the ERAU BULLETIN. Any knowledge lacking of these conduct rules can seriously hurt you. Also, one should be extremely cautious what one says about oneself, and what one says about others in regard to conduct. In the first case, one might cast unjustified suspicion on one's self's conduct. In the second case, one might open oneself to the legal actions of libel and/or slander. A little knowledge and caution can save one's university career.

The University Conduct Committee is the school judicial body to which conduct infractions are referred. As a voting member of that committee, I can attest to the effort in reaching a judicious decision on alleged infractions to the conduct rules. The S.G.A. Student Conduct and Grievance (SC and G) Committee actively defends or aids alleged infractors upon request. This trimester, the SC and G Committee will work to further improve the system and reduce infractions. Again, your participation is needed to reach these goals.

We wish you the best of luck this tri and hope you can find the time to join in on our S.G.A. functions.

Looking ahead on the SGA calendar, the BLOOD DRIVE (Friday, June 11th)

PRESIDENT'S CORNER

Activities Fund Proposal

by Henry Cothran

With "Scooter" in a body cast, and Gary graduated, someone had to take over the sports column, if only temporarily, and report on the great victory of the Eagles on April 16. They shut out the fit Engineers 5 to 0.

Coach Anderson and the team were, at their best this season, racking up a four win record. Losing only the coach and pitcher the team looks forward to an even better season next year.

One of the major problems faced by the team this year was lack of support by the student body (what else is new?). To remedy this in the future, I am proposing in the first senate meeting of the summer that thirty dollars from the SGA activities fund be used in the construction of several devices that would allow the team to have some semblance of support and the students won't have to interrupt their sleep and build sessions to support the school.

Twenty five dollars of the money would go to the art class to construct a twenty by one hundred foot mural bearing the likeness of 1600 Embry-Riddle students.

The remaining five dollars of the money would go to the Audio Visual Department for buying reels of tape to record the following:

1) To cheer the team each time it took the field, got a hit, or got an out on the opposing team a recording of Dr. Yakel, Genie Strine, and Gary Spangler would be played.

2) Each time the opposing team took the field, or came to bat, a record--
IN KEYNOTE SPEECH
YOUNG LOOKS INTO FUTURE

by Hilda Stickles

Astronaut John W. Young was keynote speaker at the National Aerospace Education Congress held here at Embry-Riddle from April 28-30. He challenged the audience to travel into the future and look back at the 1970's and 1980's.

Envisioning future SST's carrying 5000 passengers a year, he predicted that people will question the need for a hypersonic transport which would travel from Cape Kennedy to Tokyo in 5 minutes when "old SST's" could make the flight in 8 hours. These same SST's will have second suburban cars referred to as "Geo Gees" (grocery getters) --- small electric cars developed from basic ideas resulting from the lunar rover developed by Boeing and Delco Electronics (a division of GM).

He noted that each generation is plagued by the "gold-rush period of the now possible".

Imagined events included an inevitable Jumbo Jet mid-air collision in 1973, causing the "system" to begin the use of safe computer controls by 1974; also in 1974, the United States' SST is funded in a way to allow us to underbid Anglo-French and Russian bids for the international carrier market. Other predicted advancements include: Ability to take advantage of improved high-strength alloys; weather predictions so good that air-carriers rarely need to carry full reserve fuel supplies; no cases of holding patterns in the United States after 1979; permanent manned scientific stations on the moon for study of the origin and evolution of the planets with over 1500 men at station Grissom; the understanding of processes internal to our sun leading to the successful control of plasma generation in our thermonuclear fusion process which allowed us to have the switchover to fusion electrical power far earlier than was predicted in the 70's and in time to relieve the problems of the generation power outages and their cascading catastrophes; stations throughout the world to predict and control environment; knowledge to prevent the world from having major hurricanes or typhoons after 1985; and many more revelations due in whole or in part to space program discoveries.

He challenged the delegates of the Congress to help teach all America about the field of aerospace and its promises.

ASTRONAUT JOHN W. YOUNG

VETERANS ASSOC.

Our summer trimester is over. Welcome Party was held on Friday, May 7th, 8:00 p.m. at the Boars Head Lounge. Free beer was served and a great time was had by all. Our next meeting will be held on Friday, May 21st, at 8:00 p.m., at the Boars Head Lounge. Along with the regular order of business, there will be a special event.

The VA Used Bookstore will open five days a week: 11:50-1:20 and 2:30-4:00 p.m. If you have used books you want to sell, bring them to us. Let us do the work for you. Also, book sales checks will be made out by next Monday, Check your mailboxes. Movie tickets are being sold in the Barber Shop for $1.25.

Remember, meeting May 21st, 8:00 p.m. - See ya' there.

GRW BUILDING BAD?

The following article was printed in the DAYTONA BEACH EVENING NEWS in the section under "Letters to the Editor".

Having been connected with the construction industry for more than 60 years, I can state categorically that the Bill Robb Wilson Memorial buildings in Embry-Riddle Aeronautical University are the most conspicuous case of spending money for buildings and not for education. Anyone seeing the plans and the rooms and floor layouts can see that the buildings as designed will cost at least 50 percent more per square foot than if they were rectangular.

Oran Vonderau
Daytona Beach

Placement

Please contact the Placement Office for further information on employment for Airframe and Powerplant technicians - a number of jobs available at Fairchild Hiller, St. Augustine and, also, through Nation Personnel Service (Atlanta) - a company in South Carolina needs approximately 25 A&P technicians.

Institute for Aeronautical Education, Mr. Alan Gillespie, President, is interested in hiring several graduates in any degree program - needs representatives with ASME-T ratings. For further information, please contact the Placement Office.

OF FLORIDA
To all of you lucky students who are going to stick it out this summer, welcome back. You might not regret it. We'd also like to congratulate the April graduates. The last we heard, they are all flying 747's for Army Airways. Congratulations are also in order for Lt. Gary Anderson who was recently married. Best of luck, Gary.

At our last meeting, we were fortunate to have a local stock broker attend, and give us a talk on the possibilities of the first investing in some stock. There was an undisclosed rumor that the frat already owns real estate in New York. They recently bought the Empire State Building, and the Brooklyn Bridge in a package deal. We'd also like to invite all students interested in pledging Rho to attend the smoker which will be held at 8:30 tonight at the House of Rho Here, you'll get a chance to meet the infamous one and only Rho boys.

That's about all for now, until next week.

SHALOM. P.S. Has anybody seen Kanadian Kris? Also next week is the annual Be-Nice-To-Turtle Week.

Masters Program at ERAU

At the trimesterly meeting of the Curriculum Committee at ERAU, a fundamental step was taken towards the realization of a masters program on our campus.

In actuality, there will be three separate programs: Aeronautical Science, Aviation Education, and Aviation Management. The unanimous approval by the Curriculum Committee means that the proposal will now be presented by Jack Bunt to Southeastern for their final approval. If all goes well, we should have a masters program here at ERAU by September of '72.

Among other items covered at the Curriculum Committee meeting were academic credit for S.G.A. senators and officers (and for that matter, any ERAU student) to be given on a contractual basis for individual work credit. This individual study would have to be worked out with a member of the ERAU faculty before beginning the course of study.

Also a very significant program was presented by Mr. Barrs of the Aviation Technology Division and subsequently approved by the Curriculum Committee. This degree program was specifically designed for those interested in becoming Aviation Maintenance Technology instructors. Upon graduation from the program, you would receive a Bachelor of Sciences degree in Aviation Maintenance Technology Education. Mr. Barrs feels that this program would fill the now existing gap for qualified Airframe and Powerplant instructors.

If you are interested in anyone of these programs, contact your S.G.A. representatives, Doug Truckhorn or Ron DeVoy for further information.

SGA election! May 24 student center
The sixteenth regular meeting of the SGA Senate was held today in Room 108 with 4 officers and 10 senators attending. The meeting was called to order at 12:20 by President Stanley Widak, who appointed Ron DeVoy Speaker of the Senate for the summer and fall, 1971, trimesters.

Dean Mansfield asked the Senate to consider the possibility of holding separate graduation ceremonies in August and December for academic students graduating then, and ceremonies in June, August, October, December, and February for A & P students, in addition to the regular April graduation and convocation. These small graduations might have more meaning and significance to the individuals involved. On the other hand, people graduating at any time other than April might feel they aren't receiving as much pomp and circumstance as the April graduates. Students are asked to forward their opinions and suggestions to the SGA office before next Tuesday.

The Senate agreed on one point: the administration puts too much emphasis on its own interests at convocation (honorary doctorates, etc.) and too little on the graduates themselves. The ceremony should be more detailed and better organized.

The minutes of the April 13 meeting were accepted as written unanimously.

President's Report. President Stanley Widak reviewed last week's meeting, which was declared invalid because although 51 per cent of the Senate was present, 51 per cent of the Senators were not. (It was discovered later that afternoon that the Constitution calls for 51 per cent of the Senators.) The appointment of the following new committee chairmen was approved by the Senate, 6 for, 2 against, 1 abstaining: Social Functions, Gary Spangler; Student Relations, Mark Leahua; Blood Drive, Ivan Fletcher; Publications, Dave Harvey; Curriculum, Doug Tuckhorn.

The Blood Drive will be held in Rooms 108 and 110 on June 11 from 9 to 3.

The Treasury books have been audited and show a balance of $2799.73 ($1000 of which is earmarked for the Phoenix's spring budget). The Student Aid Fund has a balance of $936.

A motion to grant the Young Republicans Club their initial funding of $50 was passed, 7 for, 2 against, 3 abstaining.

Discount certificates for the purchase of Bulova Accutrons with the ERAU emblem on the face will be available soon through the SGA office free of charge to ERAU students, faculty, and staff. The timepieces will be sold by Tom Cook Jewelers.

The following individuals were recently dismissed from the Senate for poor attendance: Rafael Colon, James Zock, Tom Wilkinson, and Connie Strine. In addition, the following Senate seats have been left vacant--some recently, some quite awhile back--for the following reasons: Graduation: Gary Anderson, Dave Trucksis; Resignation: Ed Briggs, Dennis Cunningham, Larry Abbott, Dave Amstuts, Jim Frye, Doug Phillips; Change in program: Robert Knight, Dave Wilkinson; Poor attendance: Bob Weiser, Mike Hoyle, Terry McConogle, C. A. Peterson, Vic Nybalika.

Second Vice President. Ring sales will be held Monday, Wednesday, Thursday, and Friday from 12 to 12:45 in the SGA office. The jukebox is worn out after 24 years of steady use and is in need of replacement or complete overhaul.

Facilities and Food Service. Sands states that they cannot install another coffee machine at the new complex at this time because there aren't enough outlets. However, they are considering installing an additional coffee machine in the A & P department. As for the cleanliness of the machines, Sands has been under the impression that the school is responsible, while the school has thought it is Sands' responsibility. The Food Service Committee is working on "Out of Order" signs to place on malfunctioning machines to prevent students from losing their money.

CONTINUED NEXT PAGE
There have been many complaints about inadequate maid service at the dorms. It seems the maids are banding together in a large task force to thoroughly clean the rooms and can do only so many rooms per day. They will eventually get around to every room.

The AVION will be published every other week during the summer.

Publications. The new PHOENIX editor is Dave Conners; John Delafosse has resigned. There will be a PHOENIX, but more book sales and ads are needed. July 9 is the deadline, and many pictures remain to be taken.

Social Functions. Tentative date for the first social function is May 22.

Student Relations. At their meeting last week with Mr. Barrs and Dean Davis, the committee discussed SL-18 and the need for more practical projects. Also, the possibility of obtaining two surplus helicopters was mentioned.

New Business. President Widak adopted the policy of cancelling the meeting if a quorum is not present 10 minutes after starting time. A motion to move the starting time of the Senate meeting on Tuesdays from 12:15 to 12 noon for the summer was approved unanimously.

Dan Smock stated the need for a time limit for submitting excuses for absences from meetings—some individuals wait until they have three unexcused absences and then come in a month later with an excuse. President Widak added that excuses must be validated and may be accepted only by himself or the vice presidents.

The meeting was adjourned at 1:20.

John H. Schierle, son of Mr. and Mrs. Walter Schierle, 6 Clinton St., Newton, N.J., has been commissioned a second lieutenant in the U.S. Air Force upon graduation from Officer Training School (OTS) at Lackland AFB, Tex.

Lieutenant Schierle was selected for OTS through competitive examination. A 1961 graduate of Newton High School, he received his A.A.S. degree in 1969 from the Academy of Aeronautics at La Guardia Airport, N.Y., and his B.S. degree in 1970 from Embry-Riddle Aeronautical University, Daytona Beach, Florida.

USAF HOMETOWN NEWS CENTER
TELL 11,800 U.S. COMPANIES
THAT YOU ARE GREAT

At a time when hundreds of thousands of college graduates are entering a deflated job market, competition for the good career opportunities is keen. Any innovation that will attract both the job applicants and the personnel departments, flooded as they are with thousands of unrelated resumes and hundreds of college placement listings, is a newsworthy innovation.

The National Personnel Register has developed the Mini-Resume; twenty lines of basic facts about an applicant's goals, background and performance. These mini-resumes are listed by job title in seven categories and sent out to 11,800 of the largest industrial plants in the country. For those seeking employment, the cost, in time and money, of sending out this many resumes is prohibitive. Because the National Personnel Register lists the outstanding talent available in the national job market in a logical sequence, personnel departments can quickly find out basic facts about many promising applicants and effectively have at their fingertips a quick reference master list from which to fill available job openings.

The total cost, at this time is only ten dollars for each Mini-Resume—a quite reasonable investment. For those interested in being included in this national listing of available talent, prepare a mini-resume in the following format:

The Mini-Resume should conform to a twenty-line format with the job title description on the first line. The next sixteen lines pertain to education and experience: (vary the number of lines allotted each topic to fit individual backgrounds)

Education: Degree, Major, School, Year Graduation. Specialized Training: Military Schools pertinent to job title; vocational schools; correspondence courses. Unique experiences, work history, special projects. Performance, commendations, honors, awards.

The last three lines are reserved for the applicants' name and address. A line consists of 36 characters and spaces. Please specify category:

( ) Scientific/Technical ( ) Administration ( ) Sales ( ) Supervisory/Managerial ( ) Engineering ( ) Business Specialties

(Personnel, Accounting, Labor Relations, Finance, Marketing, Advertising, Data Processing, etc.) ( ) other.

Mini-Resumes and ten dollars should be mailed to National Personnel Register, P.O. Box 62501, Virginia Beach, Virginia 23462.

Good ideas are simple and effective. National Personnel Register is logically a good idea.

Safety Tips

by Curtis Poree Jr.

SEE AND BE SEEN

The following article, "See and be Seen", was taken from FLIGHT SAFETY FACTS AND ANALYSIS March 1971.

An experienced airline captain who has served as check-pilot and instructor on large jets passes on this tip.

He noted that many pilots, while climbing out of an airport, frequently refer to the horizon bar to check angle of climb. He says that in his airplane and in his normal seat position, placing the bottom of the windshield on the real world horizon gives a 15 degree angle of climb. This way he spends more time looking out for traffic instead of looking inside the cockpit at the horizon bar. Slight adjustments may need to be made for different models of aircraft and different pilot positions.

Usually, the windshield cutoff angle is 15 degrees from the pilot's normal eye position, thus simply lifting the bottom of the windshield to the real world horizon usually produces a 15 climb angle. We suggest you place the horizon bar in your normal climb position, observe where the bottom of windshield lies with respect to the real world horizon, hold it there and see how many more airplanes you spot before radar calls them.
WINSTON 500

Talladega Speedway in Talladega Ala. will host three different types of races on the weekend of May 15-16. The International Motor Sports Association and N.A.S.C.A.R. are both holding races with a total purse of over $175,000. Two sports car races, The Talladega Challenge and the Carter Hall G.T. Trophy race will high light Saturday and the Winston 500 will climax Sunday.

Saturday's race will be $2.00 instead of the usual $5.00. Students and servicemen who present their I.D. cards will be able to see the Saturday road races for $1.00 instead of the usual $5.00.

Talladega Speedway is located 100 miles west of Atlanta, Ga. on Interstate 20.

BASKETBALL

It's been rumored that ERAU has Intramural basketball this summer. The AVION has tried to find out what's going on in this respect but so far we have been unsuccessful in finding out many details. The only information the AVION has at this time is that they are three man, half court type of games and that they are played every Monday night behind Dorm I.

AUTOCROSS

On Sunday May 23, 1971, the Daytona Beach Sports Car Club will hold a practice Autocross at Embry-Riddle's Complex Parking Lot.

Course will open approximately 9:30 a.m. and remain open until approximately 2:30 p.m. All cars are invited to run as many times as you want.

No trophies or awards will be made, just a day of racing to improve your driving abilities.

$1.00 per entrant.

For more information, call Al Levenson 253-7590.

SPRING WRAPUP

by Spence Price

In spite of numerous financial and organizational problems, Embry-Riddle's athletic teams lasted their entire season and reflected admirably on the school.

The baseball team started off a little slowly, but with some hard work from veteran coach, Gary Anderson, some great and timely coaching from new head-coach Bob DeMoss, and some additional financial help from ERAU, the team rallied at the end to win the three of its four games while having an overall record of 4 wins and 6 losses. This was an extreme improvement as it represented the first time an ERAU baseball team had even won a game. The success of this years' team has helped establish baseball on the campus.

The tennis team, with not setting the world on fire, did well and is improving steadily. According to Coach Carl Brown, there are three members currently practicing for next year and, with a little financial help from ERAU, things should be bright in the future.

The soccer team was busy practicing just before school got out for the summer and they should be in good shape for the fall.

As of this time I have very little information on the basketball team, so I can only hope there will be something.

SUMMER JOBS

Several thousand summer jobs in Europe are still available on a first come, first served basis.

Most available jobs fall in the category of resort, restaurant, hotel, office, factory, construction and campground counseling work. The Student Overseas Service places you in a job of your choice and obtains your work permit, visa and other necessary papers before you leave for Europe. SOS also arranges your room and board in advance with the job.

Students for summer jobs may obtain job application forms, job listings and descriptions and the SOS handbook on earning a summer in Europe by sending their name, address, and $1.00 to: SOS P.P. Box 5173, Santa Barbara California 93103, or telephone 805-969-1176 between 9:00am and 9:00pm.

For What It's Worth

BIDS for construction of the GILL ROBB MEMORIAL AERONAUTICAL SCIENCE CENTER, have been invited. Those bidding must have their offer back to ERAU by 2 pm May 13, '71. This is by way of saying that construction should begin in the near future after the bids are opened and with the beautiful weather in Florida the Complex should be ready in the fall of '72.

JAMES M. GALLOGLY has assumed his duties as Chairman/Director of Training, Flight Technology. He comes to ERAU from Flint, Michigan.

STAN, I THOUGHT I TOLD YOU TO GET VIOLETS FOR THIS ROOM.
By Ralph C. Wicklund

Beginning Tuesday, May 25th, the Diving Eagles will again offer a SCUBA diving course to all interested persons. Classes will meet Tuesdays and Thursdays in room 108 at 8:00 pm.

The course will be seven weeks in length and students graduating will receive Diving Eagles and a nationally recognized certification. A very reasonable fee of $25 will cover everything--instructions, books, various handouts, tanks, regulators, and all certification cards--except mask and fins. Additional information and applications can be obtained from Ralph Wicklund, 8am to 5 pm, in the ERAU Print Shop. Evenings call 253-7201.

Try diving--it’s an experience you’ll never forget.

There will be a club meeting this Monday evening in room 108. All divers and other interested persons are invited to attend.

The faculty would also benefit. The mural would not be called on to give blood, nor would it demand forced entries into overcrowded classes. And it wouldn’t circulate “stupid petitions” asking to exempt A students from finals.

Yes, this mural would fit right in here at Embry-Riddle. It doesn’t think, it doesn’t act, it doesn’t complain. As a matter of fact, it is perfect except for one small drawback - it doesn’t pay, either.
