Mr. Jack Hunt, ERAU President, received a check for Embry-Riddle to be used for funding the Amelia Earhart Scholarship in a brief ceremony Tuesday, May 25, at a regular meeting of the Daytona Beach Zonta Club. Presenting the check was Mrs. Palmira Sherman, Zonta President, and Mrs. Hollywood McKnight, immediate past president.

The local Zonta chapter originated the Amelia Earhart Scholarship here at ERAU in 1967, following a tradition established by Zonta clubs everywhere. Vicki Smith is currently attending ERAU on the Amelia Earhart Scholarship. President Hunt and Mrs. Nan Green, Associate Director of Admissions, presented Miss Rena Harvey, long time friend and booster of ERAU, with a Distinguished Service Award for her interest in Riddle and her assistance in implementing the scholarship.

MISS RENA HARVEY RECEIVES DISTINGUISHED SERVICE AWARD FROM JACK HUNT AND NAN GREEN.

20-17 Vote

Impeachment Move Fails by Three

Ed. Note - An explanation of the difference between impeachment and conviction. According to Webster, "impeachment" is: "to charge a public official before a competent tribunal with misconduct in office. To be removed from office the official must be convicted of the charges."

A motion to impeach President Stanley Widak was squashed at the June 8 Student Senate Meeting. A role call vote was taken but the required 51% to initiate a trial failed. The motion, co-sponsored by recently elected senators Robert E. Lee, Roger Richards, and Frank Mayer, was presented at the end of the regular business meeting. After much discussion as to what information can be presented in a motion for impeachment trial, the vote was taken. The final tally was not enough and, for the time being, the motion is dead.

President Widak sat silently through the proceedings and when asked to comment later he only said, "I have nothing to hide!"

Senators against impeachment were 1st V.P. Dan Smock, 3rd V.P. Hank Cothran, Secretary Ralph Delitz, Treasurer Louis Arroyo, Fred Arzab, Dave Bonfield, Mark Lashua, Charles Matlock, Doug Tuckhorn, Paul Arnold Ron Bateman, Dean Battersby, Robert Beech, Harry Dawson, Dennis Ferguson, Mike Giraud, Spence Price, Robert Sullivan, Robert Thans; abstaining: Mike Levin.

"Roaring Twenties" Dance
This Saturday

The first dance of the Summer Trimester will be held this Saturday, June 12, at the Greek Community Center, on North Halifax Avenue (see map page 13). The theme of the dance will be "The Roaring Twenties." There will be a costume contest to find the couple and the individual with the best Twenties Era costume.

The band will be Raintree County, an eight-piece brass band. Starting time is 8:00 pm.

Dear Students

There is a Blood Drive today in room 108-110 at the academic complex between 9:00 am and 3:00 pm. A free McDonald’s hamburger, free dinner at Zeppe’s and a free cup of coffee at Lester’s, will be given to everyone who donates blood. In addition there will be door prizes given away throughout the day. So let’s get out there and bleed to make this the best Blood Drive yet!

The SGA Summer dance will be held at the Greek Community Center, 129 N. Halifax, this Saturday night. Dress is coat and tie or Roaring 20’s costumes to fit the theme of this summers dance. Prizes will be awarded for the best costumes.

A new Student Handbook is now being written, and anyone who has some new ideas they would like to see included in this years issue should contact Hank Cothran, Box # 4343.

Remember, one of the themes the SGA will be stressing is “total participation”. We heartily encourage participation in the varied services and affairs offered by this SGA. Get involved and join the movement, together!

Stan Widak
President

America-Police State?

In Part I of this article I raised the point that America was becoming a police state.

But one must go further in an analysis such as this, the one I have attempted. Some degree should be placed to explain it. If explanations exist, why we have headed toward the extreme right. To do this requires some examination of past political scenes in the United States.

The most recent example of right wing backlash against the civil rights movement is that which we are now experiencing, can be found in the early fifties in a period labeled “McCarthyism”. For many reasons, notable economic recession and the Korean War, there was a strong liberal movement in the United States. Many people feared the college of our democracy so they turned to the communist philosophy and communist party. Senator Joseph McCarthy put a stop to that. Today, since the late sixties, the trend toward the left is growing in numbers and speed. America is basically a conservative nation. Cries of “end the war”, “Save our environment”, are contrary to big business and national policy. America’s two chief policemen, Attorney General Mitchell and F.B.I. Director Hoover, are compelled to stop those cries. They would not be forced to take such drastic action were it not for the tactics of the “new left”. Our own generation is killing every move for positive, good change by utilizing tactics that are against those laws our society has established to ensure peaceful, orderly change. Massive civil disobedience is a tactic popularized in the U.S. by the late Dr. Martin Luther King. He violated unjust laws in order to have them tested and proved illegal. He did not throw trash cans into streets, slash tires, or bomb buildings. Some degree should be placed to explain it. If explanations exist, why we have headed toward the extreme right. To do this requires some examination of past political scenes in the United States.

Today’s counter-culturist red hots, says I am saying, is a police record for disturbing the peace. For every step forward taken by those groups seeking change within the system, the new left builds and almost an insurmountable wall. “Police brutality” is the cry of the “new left”. Policemen are human beings too. What would you do if you were confronted with...

Letters

It has come to my attention that a few people in the SGA have started a movement to impeach our President, Stan Widak. The students of ERAU and the members of the separate in particular, should be trying to unite the student body and mold it into an effective organization with a growing university. Bickering and fighting within the senate can only serve those who would like to see no student government. By this I am not implying that we as students of ERAU should ignore problems for the sake of harmony. I am saying, though, that we should reserve this type of action for times when we need it. We all have enough problems now without having to fabricate new ones.

George Kratzner
Traffic Fines--Where Does The Money Go?

How many students know what happens to the money they pay in traffic violations? The answer is, the funds go into a special account for the S.G.A. really exists.

There will be eight grants given to needy students each trimester. These are grants, not loans and they do not have to be paid back, so in essence, students are getting their traffic fines back. Each grant will be in the amount of $100.00.

Decisions as to who gets the grants are based upon student need, students' scholastic average, and the number of trimesters the student has been at Embry-Riddle. The decisions are made by the S.G.A. Student Aid Fund Committee with the advice of the school finance director, Mr. DeMoss.

Deadline for applications for the summer trimester is July 1971. We plan to issue the grants by the end of July. Applications are available at the S.G.A. Office. As of this date I have only five, so let's get some in before the deadline. If you cannot get to the S.G.A. Office or it is closed, leave a note in my box (232) with your name and box number on it, and I will put an application in your mailbox.

David L. Bonfield Chairman, S.G.A. Student Aid Fund Committee

VETS ASSOC.

Last Friday, June 4th, marked our first corporate business meeting. Special elections were held for three office vacancies. The newly elected officers are:

President: Carey Baxley
Executive V-P: Jim Daley
Secretary: Jerry Eisenbach

Congratulations to the new officers; and, also, to the old officers for a job well done!

Several weeks ago, a special promotion ceremony was held in conjunction with our regular meeting at the Boars Head Lounge. Two of Riddle's regular army students, Don Johnson and Mark Rogers were promoted from the rank of Captain to the rank of Major, so let's get some in before the deadline. If you cannot get to the S.G.A. Office or it is closed, leave a note in my box (232) with your name and box number on it, and I will put an application in your mailbox.

SCHOOL BEGINS THIS FALL TRIMESTER ON SEPTEMBER 1, 1971.

Fun-Past & Future

Tomorrow night's Roaring '20's Costume Ball promises to be one of Riddle's best dances yet. It will be at the Greek Community Center, 129 N. Halifax. Wear your costumes or coat and tie. Who knows--Elliott Ness or Al Capone may show up. BE THERE!

Our last barbecue was certainly one of our most unique to date. I think we can all agree that Bacchus did a really fine job and certainly gave us our money's worth. The steak ka-bobs (they were sirloin tips) and the corn-on-the-cob proved to be very popular with the students and their guests. And as most of you could see it was popular with many uninvited guests as well (as those of you who didn't eat can attest). WE, the S.G.A. obviously did not anticipate "crashins" to this degree (ID checks were out of the question, since many summer students had not been, at that time, issued their ID's). So for our next outing, we will insure tickets and thereby assure plenty of food for the authorized guests.

Gary Spangler.

IMPORTANT
The Eta Iota Chapter had a busy past two weeks with cleanup details around the house. After preparing for the summer pledge program, Brother Jack Barsin captured the coveted title of "The ugliest Hula Dancer" at the Sigma Chi SGA barbecue. When questioned, he remarked, "It was tough competition against my opponent but I worked like a dog to win!"

The ceremony was held at the Fraternity which was June 5 in New York. The couple will return to Daytona after a honeymoon in the Bahamas.

The brothers are proud to announce the initiation of four pledges for the summer trimester. They are: Gary Clar, John Gotwald, Ken Ellis and Roger Murphy. The ceremony was held at the Alpha Eta Rho cottage on Monday, the pledges having received Rho's full support. We'd love to have you contact our president, Larry Abbott, or leave a message in Box 1478, we'd be glad to have you come.

Pledge Class of Sigma Chi

The Epsilon pledge class of the Sigma Chi fraternity was initiated in ceremony Friday evening June 4, 1971. Our first pledge meeting, held Monday evening, June 7, was very informative and the beginning of what we feel as the Epsilon Pledge Class, to be a very rewarding experience. Though we are small in number, we hope we will meet and exceed the expectations of the brothers of Sigma Chi.

Following the meeting on Monday, the pledges held a short meeting in which we elected Ken Ellis as our pledge class president.

J. Gotwald.

Alpha Eta Rho

The past two weeks have been exciting for the Rho boys. To start things off, we had a great time at the barbeque, especially during the Hula Contest. We thought our entrant did a good job, but what can you expect from a dog?

This past Saturday, was fantastic to say the least. Our faculty advisor, Chuck Madison, invited all the brothers and pledges to his cottage on Lake Okeechobee for a good time. There, everybody got a chance to water-ski. With dangerous DeVoy at the helm, we discovered that some of us could actually ski. We'd like to congratulate the XI pledge class for their great skiing exhibition. They were so good they're going to the summer Olympic Games to be held in the Nova Road Canal. Once again, we'd like to thank our faculty advisor for the great time. Thanks a lot Chuck. We would like to congratulate Bob "Dudley" Duden for receiving Rho's most valuable player award. Good luck "Dudley".

Alpha Rho Omega

Alpha Rho Omega has been busy planning various projects to help us and all AP students.

Starting this week, Alpha Rho Omega is sponsoring a student tutoring program. With the help of several AP instructors, we are going to try to help those students who are having problems with their school work. Thus, the program, which will be free to all students, hopes to upgrade the quality of Embry-Riddle graduates.

Also in the next few weeks we are planning to raffle off a $50.00 gift certificate. The prize will be good at Sears for the tools of your choice. $50.00 of free tools! Look for our Alpha Rho Omega members around campus, they will be selling tickets.

If you are interested in our fraternity, please contact our president Larry Abbott, or leave a message in Box 1478, we'd be glad to have you come.
Delta Chi

As we approach the half way work on the summer it is best to clarify that a fraternity without a fraternity house is no more than a group of brothers. I never thought that you would miss that old run down dump the way we have. It’s nice to know that you have gotten a place to go and live. Your name is imprinted on ornate parchment diploma, gold, embossed seal, wood frame, for $10.00 post paid. Free brochure.

Young Republicans

At their last meeting, the Young Republicans elected Steve Barber as their new President. Terry Roberts, the former president, had to resign his post to assume the duties of first Vice Chairman of the college districts. Terry will remain as an active club member.

Future club events will include a membership drive voter registration drive, and social activities, plus state-wide activities like leadership training schools, and caucuses.

A secondary function of the club is to promote the name of Embry-Riddle. Real gains were made at the State Convention in St. Petersburg when a Riddle student was elected Vice Chairman of the college districts, a certificate of achievement was awarded to the ERAU Club and the club’s speeches were mady by Riddle students who were careful to mention the school name. Not only were college students present, but many influential figures in the world of politics.

The Young Republican Club gives you a chance to learn more about the people who represent you in government, get you chance to aid in their selection, and a chance to work within the system to promote change. Organizations like the Young Republicans prepare you to be a more effective citizen.
June 1, 1971

The nineteenth regular meeting of the Student Government Association Senate was held today in Room 106 with five officers and nine senators attending. The meeting was called to order at 12:10 by Speaker of the Senate Ron DeVoy. The minutes of the previous meeting were accepted as written unanimously.

President's Report. President Widak swore into office newly-elected Third Vice President Henry Cothran; Secretary-elect Ralph Dietz; and Senators-elect Dave Bonified, Randel Niemann, Jim Owen, Paul Arnold, Ron Bateman, Bill Bass, Lee Barnett, Dean Eidersby, Harry Dawson, Dennis Ferguson, Mike Graud, Reid Jewett, Bob Knight, Robert E. Lee, Frank Mayer, Tom Paradia, George Porter, Roger Richards, Richard Spicer, Bob Sullens, Bill Wallace, and Wayne Wedlake.

Secretary Ralph Dietz suggested that a committee investigate school policies on soliciting at the dormitories—all companies wishing to solicit on campus are supposed to have the administration's approval, but at least one company, Scholastic Studies, Inc., has succeeded in giving many students a very bad deal.

Coordinate. There was not a tie in the Air Science election, as was previously thought.

Food Service. Jan Nelson stated that "Out of Order" signs are being completed for malfunctioning vending machines. Individuals losing money in a machine should pick up an "Out of Order" sign and a request-for-refund form from the following areas: Flight Line, the dispatcher's desk; A & F section, Mr. Barrs' office; Jet Lab, Mr. Bolton's office; academic complex, Mr. Chism's office; Student Center, the snack bar (efforts are being made to bring back the hostess in the Student Center, although Sands feels business is too slow during the summer to warrant her presence).

Social Functions. There will be a Roaring 20's Dance at the Greek Community Center, 129 North Halifax, on Saturday, June 12, from 8:30 to 1:30. Guests are encouraged to wear 20's-type clothing, although it is not necessary. (Prizes will be given for the best outfit.)

Many complaints were heard about the recent barbecue. Late arrivals found no food waiting for them. In addition, many people were present who had no connection with ERAU whatsoever. A more thorough I.D. check through a ticket system will be employed in the future.

Reminder: Resolution forms are available in the SGA office. Anyone with a gripe or suggestion should fill out a Resolution form and leave it with the secretary for distribution to the appropriate committee.

Blood Drive. The summer Blood Drive will be held this Friday, June 11, from 9 am to 3 pm in Rooms 108 and 110. If everyone brings a friend who hasn't donated before, they'll double the total.

Traffic. Even limited parking on the roads surrounding the Student Center cannot be permitted. They are fire lanes and must be kept clear at all times.

June 8, 1971

The twentieth regular meeting of the Student Government Association Senate was held today in Room 108 with seven officers and 32 senators attending. The meeting was called to order at 12:10 by Speaker of the Senate Ron DeVoy. The minutes of the previous meeting were accepted as written, 36 for, 0 against, 1 abstaining.

President Widak swore into office Robert Thams from Pro Pilot and Spence Price and Bob Beech from Management. (Senator-elect Hallahan from Pro Pilot failed to attend last week's mandatory meeting and was removed from the rolls, thus eliminating the tie in Pro Pilot. Management Senator Jan Nelson resigned due to a work schedule conflict, thus eliminating the tie in Management. Pro Pilot Bill Schwartz did not attend today's meeting to be sworn in, and has been removed from the rolls.)
George Porter is the new Facilities and Food Service Chairman. Bob Beech is the Athletic Policy Representative.

Four members for the Evaluation Board were picked at random: Roger Van Luven, Frank Mayer, Lee Barnett, and Dean Battersby. They will work with Chairman Bill Norman in determining the current academic and disciplinary probation status of SGA senators and officers.

Hank Cothran, Richard Spicer, and Dan Smock will work with Dean Spears in formulating the new Student Handbook.

Vending Machine Notice: June 8, 1971 - Each day for the past three days vending machines have been damaged, sandwiches stolen, and condiment packages destroyed. The low-life individuals involved are about to eliminate this snack facility. Apparently other students are standing idly by, observing the vandalism, but doing nothing about it. All students will have an opportunity to decide whether or not they will permit a few vandals to cause them great inconvenience. THE NEXT OCCURRENCE OF VANDALISM WILL RESULT IN DISCONTINUANCE OF THE SERVICE. (E. M. Gervase, Assistant Business Administrator)

Committee job descriptions are available in the SGA By-Laws.

Student Aid Fund. Eight student aid fund grants will be given out this summer. Deadline for filing the application (available in the SGA office) is July 1.

Student Relations. The A & F section will not be moving to New Smyrna Beach. The aircraft repair station and pro pilot department might.

New Business. A report was received of an attempted theft in the Maintenance Department. One of the sailboats lodged next to the maintenance building was almost given away. Quick action on the part of several Senate members prevented the loss of the sailboat; the rescuers towed it away and it is now in hiding.

Campus Security. Dean Spears announced the termination of Wackenhut Security effective August 1. Security will be taken over by students. Wages are $1.75 an hour during training, and $1.80 an hour thereafter with a 50¢ an hour raise per trimester, up to $2 an hour. (This affects the campus; it may include the Nova Road Dorm eventually.) Students will work in shifts from 6 pm to 6 am. Applicants should contact Mr. Moody or the Placement Office.

The meeting was adjourned at 1:15 pm.

SPORTS

INTRAMURAL

The last two weeks have been little change in the intramural sports budget standings. The Bucs and the Faculty remain tied for first place. Alpha Eta Ro and the Bulls winning one each and loosing one each and the Bulls and Delta Chi loosing both weeks. The first week saw the Bucs beat Alpha Eta Rho, the Faculty around as Delta Chi didn’t have the 3 required places and the Bulls beating the Bulls. The second week saw Alpha Eta Rho beat Delta Chi, the Bucs beat the Bulls, and the Faculty beat the Bulls.

Next week the action should be tense as the season winds up with the Bucs playing the Faculty for first place and the Bulls and Delta Chi fighting it out to see who remains on the bottom.

Firecracker 400

The weekend of July 3-4 will be full of action as three races warm the asphalt at Daytona International Speedway.

The action starts at noon on Saturday, July 4, as the 3.81 mile formula Super Vee stirs the dust on the 3.81 mile road course. Twelve hours later, the Paul Revere 250 feature, Mustangs, Camaros, Firebirds, etc., gets underway in the infield party laden midnight race.

At 10:00 a.m. Sunday, July 4, the big guns roll out onto the 2.5 mile high banked Speedeway for the medal of honor Firecracker 400 as the 40 fastest qualifiers fight for the big money.

NOTICED!

ALL BLOOD DONATORS WILL RECEIVE A FREE SPAGHETTI DINNER AT ZEPPO’S.

Sports Budget Unsettled

With the 71-72 sports season approaching, Dean Mansfield has been holding meetings with the baseball, basketball, tennis, and soccer coaches to determine who gets what in the financial departments. The first meeting was two weeks ago and the coaches were sent out to collect data for another meeting the next week. Due to other problems, some of the coaches were unable to formulate complete reports so the next two meetings were canceled. Hopefully, the meeting and the reports will come and ERAU’s athletes can continue to compete with other colleges and universities.

that about $5,000 worth or jet airliner tires turn into smoke on touchdown. 2. A British Medical study revealed that driving a car on a 250 mile trip places more strain on the heart than does piloting a jet plane for 6 hours. 3. An “antique airplane” is one built at least 30 years ago, or a replica of one built at least 30 years ago. 4. A jet airliner cruises about the speed of a .45 caliber bullet. 5. A tire failure is more likely to occur during t.o on 15g. 6. United Air Lines claims to be the world’s largest commercial consumer of petroleum products. They use about 3,796,000 gallons of fuel daily (about 44 gallons a second)

FANTASTIC...maybe...The Avion.

FRANK SERCH (the administrator) brilliantly portrays an ex-security guard with a thirst for money, real estate and a life without human involvement.

JOHN MADD (of the faculty) stars as an amok empire builder unresponsive to the critical needs of the future.

THE STUDENT GOVERNMENT cleverly cast as thirteen representative harlequins clothed in gray flannel personalities.

$ THIS EPIC DISPLAY IS RATED MONEY -- IF YOU GOT IT, WE'LL SHOW IT TO YOU!

ANOTHER ECONOCENTRIC, EDUCATIONAL COMPLEX PRODUCTION
A recent study by the Council on Economic Priorities makes plain that most of the corporate profits from the Indochina war come from supplying ordnance and aircraft—in short, the goods and services used to implement military strategies aimed at pacification of the civilian population. These military strategies, of course, have resulted in enormous numbers of civilian war casualties throughout Indochina and in turning many millions of people into refugees. The report, entitled "The Business of War," is particularly important because any investigation of "War Crimes" would necessarily need to look into the role played by the management of these companies.

The Council study traces $33.5 billion in war-related contracts from January 1965 through December 1970. While some 500 companies are involved, more than $25 billion of the total contracts went to only 62 corporations, each of which received more than $100 million. Most of these companies were engaged in making shells or bombs or in the manufacture of aircraft, especially helicopters.

A main factor contributing to the high cost of the Indochina War has been the enormous amount of ordnance expended by U.S. forces. By the end of 1970 the U.S. had dropped more than five million tons of bombs on North and South Vietnam, Laos, and Cambodia—more than twice the amount dropped in both European and Pacific theaters in World War II. In addition, U.S. ground and Naval Forces fired five million tons of artillery shells into Indochina. Another factor in high war costs has been the heavy rate of aircraft attrition and the expense associated with replacing modern, sophisticated planes. From 1961 through 1970, the U.S. lost 7516 aircraft in Indochina, including 3275 fixed-wing planes and 4241 helicopters.

The Aerospace Companies are high on the list of war contractors; but hundreds of other firms normally associated with civilian consumer goods participated in the Indochina booty. AMP, which makes Harley Davidson motorcycles and Voigt basketballs, received $339 million for rockets and aluminum powder for demolition bombs. Eastman Kodak received $249 million to run the Holston Army Ammunition plant, where explosives are made. Bulova Watch received $89 million for the manufacture of detonating fuses for rockets and artillery shells. Augusta Bag and Burlap got $7.7 million for sandbags; Chesborough-Ponds's the beauty aid firm, received $2.2 million for camouflage bandages; Magnavox, Zenith, Motorola, Hammond and Westinghouse made fuses, radar, target detection devices, etc.

War is Good Business!

MARIJUANA EFFECTS STUDIED BY NAVY

If you are at all interested in your share of today and all of the tomorrows, read this carefully and then do the most honest "soul searching" of your whole life to date—it may well save it for you.

Here are some facts that are known about the effect of marijuana, researched by the Navy Medical Department.

Physical reactions include rapid heart beat and lowering of body temperature. The drug also changes blood sugar levels, stimulates appetite and dehydrates the body. It often makes the user talkative, loud, unsteady, and uncoordinated in movements—"whoever finds it harder to make decisions that require clear thinking and finds himself more easily open to others' suggestions (Let's try some LSD or Heroin is easier to accept). Doing any task that takes good reflexes and thinking is adversely affected by the drug. It is an unpredictable drug used by unpredictable persons.

Chronic users tend to lose ambition, goal directed behavior, achievement in life and personality maturity. With little or no gills he therefore misses the opportunity to mature to his full physical and mental potential. He is a danger to himself and to his fellow citizens, especially if he is involved in the use of moving equipment and particularly, etc.

CONTINUED NEXT PAGE
BUSINESS OF WAR continued

Some of the major Indochina contractors would be badly hurt by the end of the war. Norris Industries, Inc., for example, the eleventh ranked contractor, with 67 percent of its sales accounted for by the Pentagon, would be in trouble. Forbes observed, "In percentage terms Norris Industries may well be the biggest corporate beneficiary of the Vietnam War. Between 1965 and its fiscal year ending July 31, 1968, Norris Industries' sales will have mushroomed from $67 million to about $250 million. . . . By that time some $150 million of Norris's sales or around two-thirds of the total, will be derived from Vietnam." Well known for its Pyrene fire-extinguishers, Thermador ovens and Waste-King kitchen appliances, Norris spends most of its time and effort in the manufacture of cartridge cases and bodies for antipersonnel and flechette bombs.

The top ten contractors include: McDonnell Douglas, largest producer of jet fighters, with two active contracts - the Navy A-4 skyhawk and Navy/ Air Force F-4 - Phantom, Textron, Inc., major supplier of helicopters & helicopter parts (sales would be modest if it were not for General Westmoreland's search-and-destroy strategy); GM, producer of Sheridan tanks; M-16 rifles, helicopter & other aircraft engines, artillery pieces, explosives and various parts for weapons systems; E.I. duPont de Nemours & Co., manager of three ammunition plants; Lockheed manufacturer of C-5A and other transports for long-range shipment of troops and material from the U.S. mainland to Indochina; Olin, manufacturer of small arms ammo, including shells for the M-16; Ling-Temco-Vought, manufacturer of jet fighter bombers for Navy; Grumman, manufacturer of helicopters and maintenance of B-52's; and Honeywell, manufacturer of bombs and small-type projectiles.

MARIJUANA CONT'D
if he is involved in flying aircraft.

It is for this demonstrated unreliability, incapacitation of physical functions and willful infraction of state and federal regulations that the marijuana drug user is dangerous and utterly inconsistent with the normal responsibilities of every person in the Aviation Industry. It's use is grounds for immediate dismissal from the University and also immediate notification to the Federal Aviation Administration, looking toward revocation of any certificate issued by them. Think about this - under Federal Law to have, give or sell marijuana in the U.S. is a felony, which by reason of a serious crime. Conviction can prevent a person from being able to enter a profession such as medicine, law or teaching. It can make it difficult for him to obtain a responsible position in business or industry and virtually "shuts the door" in the aviation profession.

Soul searching - you better believe it!

William B. Davis Dean, College of Aviation Technology

A word about all drugs----
What are harmful drugs?----

Barbituates cause more death than any other poison.

Glue can't walk or talk; nausea, death.

Marijuana can't control emotions, muscles amnesia.

Barbiturates cause more death than any other poison.

Amphetamine - insomnia; sweat, suicide.

Heroin pounds the heart...
ten thousand people who would throw fire bombs, bricks, sticks and even shoot you? Those Americans who fought for this nations' independence did not cry unfair when British soldiers shot them. They were revolutionaries who realized that death was part of the price they had to pay for change.

So I must lay the blame for todays' right wing repression on the "new left". To them, I say that there are two channels for change. One channel is long, hard, safe, legal and it works. The other one might work. It too is long and hard, it is illegal. One of the prices that must be paid is death for many revolutionaries. The end results of the first choice invariably leave things better. The end results of the second choice leave things at best, the same. More often than not, the common man is worse off than before. Success is the exception, not the rule.

I feel I must take pen in hand to reply to Mr. Spangler's article concerning last weeks' barbecue. I fail to see why he feels this outing was so unique, ERAU had steak barbeques two years ago and I can't see how cutting them up and putting it on coat hangars makes it unique. The idea of a luau is nice but certainly not different, people have been having them for years. I am certainly not convinced that Bacchus is giving us our moneys' worth. The band was the same as it's been for the last year, the beer was warm up until 2:30 p.m., there were less than usual amounts of dispensing outlets, and the food ran out early. Don't get me wrong, I have no complaint with Bacchus, I think they are a fine organization, I do think the Student Senate should take a good long look at the book, as Bacchus has yet to present them with the figures they asked for.

I have one final comment on this issue: I wonder who Mr. Spangler is trying to convince, everyone else or himself.

Spence Price.
Inertial Navigation Made Simple

by Joe Clemson

The following explanation in simplified terms is typical of all inertial navigation systems. The location of dance, Joe Clemson is considered to be a significant factor, it too may be corrected by the use of the Doppler System; however, the aircraft must know where it was, also. The "thought process" of the system is as follows: because a variation has modified some of the information which the aircraft has obtained, it is not sure where it is. However, it is sure where it isn't (within reason) and it knows where it was. It now subtracts where it should be from where it wasn't (or vice versa) by differentiating this from the algebraic difference between its deviation and its variation, which is called error; it computes the correct information to compensate for all factors supplying accurate navigation information.

In the event the position where it now is, is not the position where it wasn't. If the variation
