ERAU Prescott Aviation History Program

“SAC Drone History”

by Colonel John Dale, USAF, Retired

Learn about the previously classified Strategic Air Command drone reconnaissance program covering targets in China, N. Korea, & N. Vietnam, from the pilot who was in charge. Specially modified C-130s launched the drones that were then recovered in mid-air by helicopters. They went where manned aircraft could not and some wouldn't make it back! This program contributed to the amazing UAVs of today.
