SGA BRIEFS

The SGA has just purchased 200 tickets for a performance of the "ANIMALS" (House of the Rising Sun, etc.) on September 27th, Friday at the Peabody Auditorium. The price of tickets downtown is $4.00, but they may be obtained through your SGA office for $2.00. These tickets are going fast so make it to the SGA Office now. This show is complete with a light show - top entertainment for a low price.

One ticket at $2.00 per student. Second ticket $3.75.

Last warning - vehicles without parking stickers plainly visible from the rear will be subjected to a $10.00 traffic fine and/or towaway. Towaways cost the owner about $25.00.

Don Nichols, SGA Vice-President and Traffic Committee Chairman, suggests that all individuals without stickers on their cars come to the SGA Office immediately to obtain them. They are free and may save you $35.00.

Let's tell it like it is. The '68 PHOENIX has now come to a screeching halt. It lacks leadership and a staff of workers. Sixteen pages of the color section have been sent to the publisher, but that's it. The SGA will discontinue funding of the yearbook if a staff does not present its plan to get the PHOENIX rolling.

Since the yearbook is partially finished, it is a shame to let it stop now. All people interested in working on the PHOENIX please attend a reorganization meeting Thursday, September 26th, in Room 210 of the Academic Building at 11:30 p.m.

FLIGHT LINE'S NEW CESSNAS

Twenty of these new Cessna 172 Skyhawks are part of the growing inventory at Embry-Riddle's flight line. The 172's are larger and more powerful than the Cessna 150's they replace.

Thursday, September 19th, Cam McQualid, SGA President, is scheduled to meet with the residents of the Nova Dormitory and offer SGA assistance in their quest to liberalize the dorm regulations. Hopefully, the Nova dormitory will be able to establish a self-governing body to carry out this liberalization.

FLAGLER COLLEGE HOSTS ERAI

Student Council members of Flagler College, the newly organized girls school in St. Augustine, met with 14 Embry-Riddle students Sunday, September 16, at their new campus, the former Ponce de Leon Hotel.

After an informal meeting between Embry-Riddle and Flagler delegates, a tour was taken around the campus, followed by a swim in the pool and a dinner at 4:00 p.m.

Everyone left with the hope that the relationship between the schools would be continued to the mutual benefit of both.

COOLING IT

The air conditioner repairmen are hard at work around the campus to meet the winter deadline.
Dear Students,

Elections will be held Tuesday, September 24. The campaign posters are up and the candidates are talking about the issues. Since all students are members of the Student Government Association, it is important that everyone vote in the election. Both will be placed in the Student Center.

The reason why everyone should vote is quite apparent. The Student Council next year will be composed of the people you vote in. Care should be taken to listen to the candidates, being sure that they represent your ideas. The Student Council is continuing to grow in strength and prestige and this growth is the direct result of good representation.

Keep up the good work, vote, and let's have a record turnout for the elections. Good luck, candidates!

SOME CANDID COMMENTS

BY JAN COLLINS

For those of you who are wondering why Mr. Mondshein drives the school station wagon home and back, we were told by the powers that be that it's because it might be broken into if it was left at school overnight.

If anyone finds an air conditioner that doesn't work or a burned out light bulb in a classroom, or any maintenance problem, simply follow these steps:
1. Obtain a work order.
2. Give location of defect.
4. Draw diagram of how it should be fixed.
5. Send it through the proper department head.
6. See that it goes to Mr. Mondshein for an o.k.
7. Then to the maintenance department.
8. All orders work on a first come first serve basis.

This system is guaranteed to cut down on maintenance costs, increase maintenance tim, and generally discourage most requests for maintenance action. Sounds like the military.

Happiness is the invigorating walk to building 14.
Happiness is a full parking ticket on every car but yours.

FEMALE STUDENTS PROTEST HOUSING

BY GARY ANDERSON

Most of us have been in school for a little over two weeks now and we're beginning to hear the first rumblings of discontent. Most of the rumblings are coming from the women's section of the Nova Road Dorm. About the best thing that can be said for the girls's quarters is that they are safe. Then again, so is the maximum security cell at the state pen.

The school has devised several ingenious methods of keeping undesirable characters out. The most effective of these are two big wooden doors for which the seven girls received no keys. At last report the girls had kidnapped the dorm janitor and are holding him hostage until the keys are turned over. A rescue attempt to get him out through a balcony failed when he pushed away their ladder.

Almost as effective as the doors, though somewhat less stable, is the dorm staff, all 37 of them, who are assigned the somewhat dubious task of watching the women. Naturally, this has led to some tension between the girls and the staff. Having no other
er form of protest open to them, the girls have developed a form of passive resistance. It seems that last Sunday the girls started yelling, "Man in our room!" and staff member Lester Dingbat immediately called the police and rushed up to investigate. When the cops arrived they found Lester diligently searching a closet in one of the rooms and promptly hauled him away. Friends wishing to know the location and visiting hours of Lester's chain gang should drop by the INFORMER office.

FOREIGN STUDENTS

The West Volusia International Affairs Club, which includes membership from among the foreign students attending Embry-Riddle, Statson, and Bethune-Cookman, will open its Fall meetings by a picnic and party at the residence of Mrs. Wendell Jarrard in DeLand, Florida. All foreign students now attending ERAI will receive separate invitations and free memberships. This party will take place on the 22nd of September, and individuals intending to attend are requested to so signify in the Office of the Dean of Students. Transportation will be arranged according to the number of students involved.
Alpha Eta Rho are the Greek letters which stand for Air. The fraternity was organized at the University of Southern California on April 10, 1929, and after recognition by the University, the first election of officers was held on May 23, 1929. Professor Earl W. Hill was the founder and national president until his death in 1950. The fraternity has continued to grow in size and now has alumni distributed throughout the aviation industry both in the United States and abroad.

Alpha Eta Rho serves to actively associate the interested students of aviation with leaders and executives in the aviation industry. This close association, strengthened through trends of an international aviation fraternity, establishes opportunities for every member in his relation to aviation and inspires interests and cooperation among those in the profession who are also members of Alpha Eta Rho.

Alpha Eta Rho will continue to grow in the future as it has in the past and will serve as a lasting tribute to the far-sighted understanding and vision of its founder, Professor Earl W. Hill.

Purposes of the fraternity are:

1. to further the cause of aviation in all its branches.
2. to instill in the public mind a confidence in aviation.
3. to promote contacts between the students of aviation and those engaged in the profession.
4. to promote a closer affiliation between the students of aviation for purposes of education and research.

The constitution of Alpha Eta Rho declares that the success of aeronautics depends upon its unified development in all the countries of the world and upon the cooperation of different phases of aviation with each other. It affirms its character to be international and declares eligibility for membership not dependent upon race, religion, nationality or sex. It proposes to its members from the commercial, legal and technical fields.

Rho men are active in campus affairs. Members have been officers and active members of the SGA and flight council. Many of the members have lettered in soccer, wrestling and baseball. Others have worked on the newspaper and on community activities.

The fraternity also maintains high academic standards, which its members must meet to maintain an active status.

All in the know:
by Stan Podlasek

SIGMA PHI DELTA
BY DON NICHOLS

An error was made in the last issue; the date of Sigma Phi Delta's "smoker" is September 20, 1968.

Seven new Brothers will be initiated on September 28, 1968 at an Initiation Banquet at the Holiday Inn North. These men are:

Bruce Rozett
Dennis Holmes
Duane Overvaag
Michael Smith
Charles Pittinger
Requinald Przybyl
Boyd Curry

This will bring our present active membership to 23 men. We believe that is a good accomplishment for a campus of this size. Congratulations are in order for the above listed men, as they did work hard to obtain membership.

Pi Chapter is busily engaged in many activities at the present time. Along with working to establish a Chapter of Sigma Phi Delta at the University of Florida, we are working on plans to build a completely new and elaborate Fraternity House.

Any second tri-semester and above engineering stu-
dent who is sincerely interested in making Pi chapter the finest ever, is invited to attend the "smoker" at the Frat House, 204 South Street, at 7:30 p.m. Need a ride or information? Call 252-9374. Drop in and see how our Fraternity can benefit you.

PI SIGMA PHI
BY FRANK ALEXANDER

This week's article is devoted to acquainting all you Freshman & transfer students with Embry-Riddle's first social Fraternity. The Fraternity was officially recognized on our campus in November, 1967. There were five original brothers who wrote the constitution and carried out the initial Fraternal operations. In January, 1968, our first pledge class began with eight pledges, five of whom completed the program and were inducted as brothers.

The Fraternity is an active, interesting organization, having brothers who serve on the SGA, and also the PHOENIX '68, our school yearbook.

The Fraternity has cooperated with the SGA in helping to set up and operate social functions, and, of course, we have had our share of parties and barbeques.

We are a young organization with future plans for the Fraternity, for the school, and for you.

Pi Sigma Phi begins its third trimester under the able guidance of Rick Cook, newly elected president, and returning officers, John Cook, Secretary, and Stan Czarnik, Treasurer. At our last meeting it was decided to actively support the proposed self-government of the Nova Road Dorm. Our on-campus brothers are stirring interests at the dorm, and making efforts to get people to attend the Thursday night meeting. We feel that self-government of the Nova Road Dorm is a highly worthwhile objective and are fully behind Dean Spears and Cam McQuaid, SGA President, in their efforts to accomplish this.

TELL THEM RIDDLE SENT YOU
The first soccer game of the season is to be against the Brevard Soccer Club and will take place at the Cocoa Beach High School at 1500 hours, Sunday, the 22nd of September. Practice sessions have been on a catch as catch can basis because of the various schedules of the players. The first real practice took place Saturday, the 14th of September. It looks as if we have considerable talent, but it will be necessary to work hard to have a team as such. After this initial test the team will fly to Atlanta on the 27th of September to play against Georgia Tech. Saturday morning, the 28th, and then fly to Brunswick, Georgia, and play a game against the Naval Air Station on the 29th. Of course, the flying will be done in our own Embry-Riddle aircraft and the game against Georgia Tech will have an aftermath as they will be down to play against us in the last game of the season on the 7th of December. This last game will be played in the Memorial Stadium and will be the only game during the season for which a charge will be made. Student tickets will be $.50 apiece. Start planning now to be there! The remaining schedule for this Fall is:

NEW ADDITION TO SS DEPT

The Social Science Department has increased its personnel by 50% (from 1 to 2), with the addition of Ann A. Apperson to the staff. Mrs. Apperson, who was born and raised in Virginia, attended William & Mary College for her A.B. degree, and William & Mary Law School where she got B.C.L. in 1950.

Mrs. Apperson worked as a Federal Attorney for the General Services Administration in Washington, and taught high school in her home town of Hampton, Virginia before coming to Embry-Riddle. In addition to her activities as a teacher here at Riddle, she is also pursuing her Masters Degree at Stetson.

She will be a welcome addition to the staff, won't she Mr. Campbell?

SOS FROM INDIA TO THE PRINCIPAL OF ERA!

Sir,

Please excuse me for taking up your precious time and kindly permit me to introduce myself.

I am a teacher in the local High School. Besides my regular work, I take up "Air Wing" classes also.

I have to teach Aeronautical subjects for these students. I am sorry to say that we don't have good books on the above subject. Foreign exchange is not allowed for small schools. As such, I request you to kindly help me by sending some books as complimentary on the subject so that I can improve the standard of these students.

I am a graduate teacher and my pay is only $35.00 per month. As such I am unable to buy good books from foreign countries. With a missionary spirit, we are pooling our work for the benefit of our students. Hence, my request is, please send me some complimentary books on the subject. You may kindly send them by surface mail. (single copies)

1. All About Aircraft
2. Physical Science in Air Age
3. The Physical Nature of Flight
4. Aeronautics at the Mid-Century
5. Aeronautics Education Text
6. Aviation Education (Miami University)
7. Fundamentals of Aviation
8. Facts of Flight
NOTE FROM THE SUGGESTION BOX DEPARTMENT

The suggestion boxes have received a few letters but only one was signed. We will be glad to check on the unsigned letters but we are unable to print them. All letters must be signed to be printed. However, upon request, names will be withheld and kept in strict confidence.

I am a candidate for Engineering Representative. My qualifications are:

One semester as SCA representative.

A cumulative Honor point after 3 semesters of 3.08.

An active interest in the problems of my fellow students.

I would appreciate your vote in the upcoming SCA elections.

Jan Collins

DORM #2 - PHONE MESSAGES

The office of the dormitory will no longer accept personal phone messages, unless of an emergency nature. Students are advised to give the pay phone numbers to those people they wish to have contact them. The numbers are 252-9136 and 252-9533.

HOW TO SUCCEED IN ENGINEERING

Wandbuch fur uplounen des laboratiewerke und upercovern des gross goofups.

Finagle's Law: The first four laws are the only ones distinguished by number. Note the beauty and simplicity of the first law. Also note that the remaining three refer to man's reaction to nature; not to Nature itself.

First Law: If anything can go wrong with an experiment, it will.

Second Law: No matter what result is anticipated, there is always someone willing to fake it.

Third Law: No matter what occurs, there is always someone eager to misinterpret it.

Finagle's Creed: Science is truth; do not be misled by facts.

Finagle's Motto: Smile! Tomorrow it will be worse.

The Law of the Too Solid Goof: In any collection of data, the figure that is most obviously correct, beyond all need of checking, is the mistake.

Corollary I: No one whom you ask for help will see the mistake either.

Corollary II: Everyone who stops by with unsought advice will see it immediately.

Compendium of Ground Rules for Laboratory Workers:

a. When you don't know what you are doing, do it REALITY!

b. Experience is directly proportional to the amount of equipment ruined.

c. First draw your curves, then plot your data.

d. Experiments must be reproducible. They should all fail the same way.

e. A record of data is essential. It indicates you've been working.

f. To study a subject best, understand it thoroughly before you begin.

g. In case of doubt, make it sound convincing.

h. Do not believe in miracles, rely on them.

i. Teamwork is essential in the laboratory. It allows you to blame someone else.

Thomas' Theorem: If an experiment works, you must be using the wrong equipment.

The Finagle Factor: That quantity which, when added to, subtracted from, divided by, or multiplied by the answer you got, gives you the answer you should have gotten.

Yablick's Axiom: When all else fails, read the instructions.

Lloyd's Law: The probability of an event occurring is inversely proportional to its desirability.

The Ordering Principle: The quantities of material necessary for yesterday's experiment must be ordered no later than tomorrow noon.

The Compensation Corollary: An experiment may be considered successful if no more than half the data must be discarded to obtain correspondence with your theory.

The Consolation Corollary: No experiment is ever a complete failure. It can always be used as a bad example.

Easy Guide to Modern Sciences:

If it's green or if it wiggles, it's BIOLOGY.
If it stinks, it's CHEMISTRY.
If it doesn't work, it's PHYSICS.

IS THERE A BETTER WAY?

OF COURSE THERE'S A BETTER WAY.

WE CAN'T BE AS CLOSE TO YOU AS YOUR HOME TOWN BANK--BUT WE'LL TRY. HAVE A NICE DAY--BANK BIG "C" ALL THE WAY.
Mr. and Mrs. Douglas Bostwick, 211 2nd Street, are parents of a daughter, Karen, weighing seven pounds, nine ounces, born at 4:10 p.m., Thursday, September 12, at Halifax Hospital.

Douglas Bostwick is a student at Embry-Riddle. He reports that mother, baby, and father are doing well.

EMBRY RIDDLE VETERANS ORGANIZATION

ERVO welcomes all new veterans to our campus, and would like to extend an invitation to our first meeting on September 26, 1968, (Thursday), Room 210, at 7:00 p.m.

Last trimester ERVO worked diligently in conjunction with the SGA to get the school administration to adopt a realistic approach toward tuition increases. The result was a $50.00 savings over a period of eight (8) months to all students in the academic programs. Also in conjunction with the SGA, the $10.00 increase in the monthly tuition payment plan proposed by the school administration was shelved and resulted in no new increase. This organization would like to thank the SGA for its efforts on behalf of the Student Body. In particular we thank Cam McQuaid for his personal efforts in scaling down the tuition increase.

The Embry Riddle Veterans Organization needs your support so that we may continue to represent veterans interests at Embry Riddle. Be sure to attend our first meeting Thursday, September 26, 1968.

CONCERNING PARKING

Mr. Charles Booth, of the Airport Manager's Office, informed the SGA office that he intends to have all illegally parked vehicles in the terminal area towed away at the owner's expense.
