Your yearbook, the 68-69 "Phoenix" is back on the drawing board, after a long lapse of help during the spring and summer trimester.

The 68-69 "Phoenix" proposed delivery date is for the end of the spring (69) trimester. Those students who will not be returning after the spring trimester will receive this yearbook by mail, providing they have paid the full purchase price.

You may purchase your yearbook starting Monday, November 4 at the Student Center. The yearbook sales desk will be open throughout the trimester.

The cost per book will be five dollars, a deposit of two dollars is required to reserve your book. As a bonus to those paying the full amount of five dollars, you will receive a free copy of the '67 Phoenix on a first come first serve basis. Don't delay, as the supply is limited.

Your yearbook is sponsoring a Miss Phoenix contest. Next Monday, November 4 cast your ballot at the Student Center for the nomination of the top three finalists, the following Monday, November 11 you will pick Miss Phoenix 68-69 and her court.

---

On Tuesday, Oct. 29, the Institute played host to a most distinguished visitor. Mr. Grover Loening of Key Biscayne, Fla., whose aviation career as a pioneer designer and builder of aircraft dates back to the days of the Wright Brothers expressed keen interest in the facilities at Embry-Riddle. Mr. Loening holds the distinction of being the first man (in the U.S.) to obtain a degree in aeronautical engineering. This distinction was awarded to him by Columbia University in New York in 1910. He was a pioneer builder of flying boats and amphibians, the most famous being the Loening Air Yacht.

Author of many books on aviation, his most recent is entitled "Take Off into Greatness" which traces in a most interesting manner the growth of the aircraft manufacturing industry from the early days of Kitty Hawk to the present and into the future. Loening modestly leaves out a good deal of his own tremendous part in the expansion of aviation.

His new book is a fascinating history of 60 years of problems and successes in airframe and powerplant development. A limited supply of the book is available at the book store. It is recommended very highly to the students at the Institute.

BLOOD DRIVE

November 1st - 9 AM to 4 PM - In the Student Center. Now is your chance to give blood. Help yourself and the School.

BAR-B-QUE

November 2nd - 1 PM - At Ponce Inlet. Sirloin Steaks - Entertainment - Big Door Prizes - You must bring ticket to be served.

BUSES TO KISSIMMEE

November 3rd - Free transportation to the Kissimmee Airshow - Leaves Student Center at 10:30 AM - Sign up in the SGA Office.

---

YOUR SGA PRESENTS

---

IT'S EITHER A CAMPUS IMPROVEMENT PROJECT OR A VICTORY GARDEN.
the president's corner

Today, Friday November 1st, is the blood drive and tomorrow, the 2nd, is another SGA Bar-B-Q. There seems to be a tendency to pass these and other functions of as just that, "another SGA function." Why bother?

First of all, the blood drive took an awful lot of time, effort, and energy on the part of the Blood Drive chairman, Cam McQuaid, all for the benefit of the Riddle students. The Social Functions Chairman, Brent Bruns, and his crew have put in many hours, planning and preparing the Bar-B-Q all for the enjoyment of the students. Those who attended the dance know what good times the Social Functions Committee puts on.

The point is these are not just "other SGA functions," they are carefully planned and well-organized. In the past attendance has been so-so but the word is spreading. Riddle's spirit is growing just as the school is. There still seems to be a few loners left but they are turning out to be the losers. With so many things going for ERAI students, how can a person help but have pride in his school.

In most cases, campus dormitories are named after a person whose donation to the school is the largest. Couldn't Embry-Riddle forego this tradition and name our new dormitory after the late John Logan Smith, former Maintenance Technology Instructor?

Mr. Smith's position in the A & P department was vitally important to the start of an A & P students career in the Maintenance Technology program. He will be greatly missed by those of the faculty and student body who knew him.

Students, faculty and friends of Embry-Riddle, please contact an S.G.A. Representative or myself, and let your ideas concerning this matter be known.

Shades of Snoopy and the Red Baron.

Keep the Stearman. As originally planned, this aircraft was to be utilized for dual student instruction purposes. It would be beneficial for the pro-pilot students to have at least 5 hours in a conventional gear airplane with stick-type of control.

If properly utilized, this vintage aircraft could be of great value in our public relations and publicity program.

If more than just a few people were allowed to fly this aircraft, the Stearman could be a great asset to our school in terms of operational aircraft.

Sincerely,
John H. Heemsath
Instructor-Maintenance Technology

FROM THE SUGGESTION BOX

A Letter For All to Read

During these troubled times, where gross national product rules supreme, couldn't we for once dispense with placing monetary value over the worth of our fellow man.

Shades of Snoopy and the Red Baron. As originally planned, this aircraft was to be utilized for dual student instruction purposes. It would be beneficial for the pro-pilot students to have at least 5 hours in a conventional gear airplane with stick-type of control.

If properly utilized, this vintage aircraft could be of great value in our public relations and publicity program.

Dear Suggestion Box:

All of the students at the world's most famous flying school appreciate your never-ending battle to make our beautiful campus even more of an attraction in Florida. If your tremendous effort to stamp out parking continues, I'm sure Embry-Riddle will indeed become the "Busch Gardens" of the East Coast. However, the latest request that there be no parking on the grass around building 14 is perhaps carrying it too far. If you can suggest a way to park all the students' cars in the vicinity of the building without getting on the grass, I'll carry my car to class on my back. Perhaps Embry-Riddle has plans for a multi-story parking garage for the new campus???

I know it's in the plans for 1978!??

Respectfully,
Tom Robertson
AM & F
SUGGESTION BOXES (Cont)

The land that we at Riddle call our campus is owned and maintained by the city of Daytona Beach. The city allocates parking areas here on the campus. We were given the choice of monitoring our traffic here or the city police would take over.

The city told us where we could and couldn't park at Building 14. The grass along Catalina St. was not to be parked on. We have to abide by the decisions of the city while we are on their land. There will be more provisions for parking on the new campus, we hope.

By the way, if you want to carry your car to class on your back, there are no regulations against it.

J. Collins
SGA Traffic

SGA BRIEFS

A detailed financial report of the Phoenix was presented to the SGA by Doug Glick, Business Manager of the yearbook. Also under discussion was the inclusion of undergraduate and faculty pictures in the '68 Phoenix. Mixed feelings were expressed by SGA members concerning the pertinence of a yearbook without the undergraduates pictures. The extra expense (a reported $3 per picture) is the main reason for dropping the pictures.

The Embry-Riddle blood drive scheduled for Friday, November 1st, 9 a.m. to 4 p.m. is progressing.

It was reported that Mr. Caswell and Mr. Ford were helping actively in their sections. The SGA is expecting a victory in the collegiate competition along with a record breaking blood drawing.

Dean Mansfield and Dean Spears both attended the SGA meeting, October 29th, wearing black mustaches. The mustaches were reported to be symbolic of a new movement on campus - "Dean Power"!

The SGA has arranged to provide bus transportation to Kissimmee Airshow on Sunday, November 3rd. The bus will leave the Student Center at 10:30 a.m. The trip will be free of charge to ERAI students.

SIGMA PHI DELTA

BY BOB NAWROCKI

Things are really starting to show progress in the way of inter-fraternity relationships on campus once again. It is one thing to have rivalry but it is harmonious rivalry that we are striving for.

Last Sunday night a delegation from Pi Sigma Phi, headed by Rick Cook came over to our house to discuss plans for a joint social function between our two fraternal groups. Different ideas and suggestions were brought up. Nothing definite was planned, but the social committee of both groups will meet this coming week and establish some concrete plans for the upcoming weeks.

Tuesday night two brothers from each fraternity gathered at Alpha Eta Rho's new house to try and re-establish plans for an inter-fraternity council. If this campus organization can be set up to operate efficiently, it will provide for much better relations between the groups and more inter-fraternity functions can be planned to benefit all.

Many activities are in the making and we need all fraternities to participate. A "Greek Week" is in the making, possibly next semester. All brothers interested should tell their officers about their ideas for future planning. Only if we all work together can we make the inter-fraternity council a big success.

Jack Sherdel, one of our brothers is hosting his fiancee to-be, Miss Constance Cutitta and his sister, Miss Susan Sherdel for the entire week. All the brothers of Sigma Phi Delta extend a warm welcome to these girls and hope they have a pleasant stay in Daytona Beach.

I must add that I am glad to see the fraternity spirit around campus increasing and the warm relationships building. Let's make this the best fraternity year on campus.

Well, "Greeks" and students, "Auios" to all until next week from the Professionals, "Sigma Phi Delta."

ALPHA ETA RHO

BY RAY LEE

Happy mid-term, fellow students from the Epsilon Rho's. Only seven weeks left until we can go home for a couple of weeks and see what Santa Claus has for a couple of weeks and see what Santa Claus has to offer to a hard working, diligent, prudent, and probably by then poverty stricken college student. We hope everybody has made it through mid-terms without too much despair. The members and pledges had a football game Sunday at noon with the losing team providing refreshments at an important meeting that was held the following evening. The pledges who were bigger than most of the brothers were extremely outclassed in brain power, speed, and agility. It was a great deal of fun however for all who participated. The final score was 18 to 8 in favor of the brothers. We are very happy to report that at the mid way mark in the pledge period all the pledges who are presently striving to become brothers were voted to be able to continue and no one dropped. There are now ten prospective brothers.

PI SIGMA PHI

BY RICHARD COOK

The scavenger hunt and cookout last Friday evening was a success. A good time was had by all. The thirty item scavenger list included 1 horseshoe, 3 sheets of Aqua toilet paper, 1 petal from "Crescet" and other goodies. It takes a lot of ingenuity to get this kind of stuff in a 90 minute period. The winner was John Cook with 27 of the 30 items. First prize was a brick with $5.00 attached. Last place went to Ray Palant with 21 items. His prize was also a brick without the "mula" attached.

The cookout included hot dogs, beer, potato chips and marshmallows. All kinds of combinations were tried including marinated marshmallows. Ever seen a marinated marshmallow with a head on it?

CONTINUED
A thanks goes to Marty Pegelow for a fine job of organizing and setting up this social function.

It felt a little strange not playing football this weekend. For one Sunday we got to sleep late. Frank Alexander was interested in playing just for the fun of it but he was not able to interest anybody else.

Pi Sigma Phi and Sigma Phi Delta are now in the process of organizing a mutual social function for the weekend following the SGA Bar-B-Q. Tentatively scheduled is live music and a limited number of outside invitees. This type of function should go a long way to building strong inter-fraternity relations.

Speaking of fostering inter-fraternity relations, Don Nichols, President of Sigma Phi Delta, Shanon Dunlap, President of Alpha Eta Rho, and I met last night to establish an inter-fraternity council. The general objective is for better coordination among the fraternities.

More on this later.

See you on campus!

EMBRY-RIDDLE AERONAUTICAL INSTITUTE BUILDING FUND DRIVE PHASE 1

HOWGOZIT REPORT

A well planned and conducted flight has a howgozit chart to give the pilot a running record of where he is and what he must do to get to his destination. We have a similar situation, and we want to keep everyone aware of where we are and what we have to do to get to our destination.

On the surface it would seem that we have not progressed much since my last report. Attendance at the organization meetings was poor. Those of you who attended were interested and determined. Those of you who could not attend, I hope, will plan to work with us on the short, hard hitting campaign.

While there was little evidence of our progress on the surface, much has been accomplished in basic preparation. Skip Wahlin and his associates have finished writing the 35mm presentation and the material for the brochure. The brochures will be put together. Jim Killough has been diligently working with us to organize the campaign. His recommendations have helped tremendously. Bill McElroy, Jay Adams, Phil Elliott, students and staff members are putting the campaign together.

We have adopted a slogan from the school. "The question is not Can we do it, but rather how can we do it?"

With your help, we can and will do the job. Soon we will have the materials. All we need is you and your determination.

Charles L. Proctor
Chairman,
Building Fund Drive Committee

HAVANA, Cuba (FP) — Stanley Aardvark, a professional pilot at Embry-Riddle made a forced landing in Havana today. He attributed his departure from his planned crosscountry to Jacksonville as equipment failure in the Cessna. After calling Mr. Ford on the Swiss embassy telephone, Stanley requested asylum from Cuban authorities.

BANK BIG “C” ALL THE WAY.
SOCCER SCUTTLE
BY ED POTTER

Last Saturday afternoon the Eagles smashed through Florida State's defense to give us a 7 - 2 victory. It was a tight game at halftime with the score ours 3 - 2. The Seminoles put on a good show in their brown and gold, although they were overpowered by the Eagles' fast breaks. Wolfgang Hoene (center forward) powered by the Eagles' fast breaks. Wolfgang Hoene (center forward) came through and was credited with four of our goals. Jim Gilbert and Keith Leach, who were both injured early this season are both expected to be back on the line soon.

The whole team welcomes their coach, Dean Mansfield back from his tour of Mexico.

In the past the crowds at the soccer games have been far from what could be called spectacular. Let's get out and show some school spirit. The Eagles would really appreciate your support at our next soccer match. It will be held at Saint Leo (Monarchs) College on Saturday, November 9 at 3:30 p.m. The team will be out in full force backed up by our cheerleaders to bring home another victory. This should be one game you won't want to miss.

SKIPPERS CORNER
WALTER CANTREL

Ahoy there! The skipper's corner has been absent for a couple of weeks due to those wonderful tests the teachers seem to come up with. But rest assured the ERAI sailing club has kept moving on.

We have purchased an Aqua Cat. The Aqua Cat is a 12 foot catamaran that can be used for racing, day sailing or surf sailing. It can be transported by trailer, and is beachable, which makes it very versatile.

Plans are now being made as to whether or not the "Bullseye" should be sold. If it is sold, a racing boat would replace it. This would allow the club's members to test their skills against other sailors.

The club officers for 1968-69 were elected. They are:
Pres. - Van Probascow
Sec. Treas. - Jeanne Fitzpatrick
Commodore - Walt Cantrel
Vice Comm. - Larry Gallagher

For the future we have been invited to the Halifax River Sailing Association's meeting. We also plan to enter races that are being held throughout the state.

If there are any sailors, or non-sailors who would like to learn to sail, the ERAI Sailing Club meets every Thursday evening at 6:00 p.m. in room 115 in the academic building.

GUTTER TALK CONTINUED

397 series. A newcomer to our league, but certainly not to the game of bowling, Mr. T.C. Clay bombed the pins for a 528 series, helping his teammates to win 3 points.

The most improved bowler of the week goes to Kave Lowe who increased his average by six pins when he hit 531 in last week's competition.

In the HI average department, things are still quite close. The five leading bowlers are?

Gil Gauthier -- 179
Jerry Coffman -- 171
Doug Watkins -- 172
T.C. Clay -- 169
Roger Magurus -- 168

Feast your eyes on this section of the INFORMER every week for news of the fierce but friendly competition at Halifax Lanes.

COURSES AT ERA!
BY BOB Nawrocki

This week's course description includes one from the Engineering Curriculum once again. It is ET-301, Aircraft Drafting, taught by Dr. Donald J. Ritchie.

Aircraft Drafting includes general conventions, layout drawings, detail drawings and assembly drawing, local and general notes, linework and lettering quality, dimensioning conventions, drafting of formed sheet metal parts, welded tube structures, mechanical parts, extrusions and standard aircraft parts.

This course includes six (6) hours of drafting each week. It has as a prerequisite, ET-102 Engineering Graphics II. It is not a required course in the Aeronautical Engineering Curriculum but makes for an excellent elective and also a very good forerunner to ER-302, Aircraft Detail Design which is a required course.

Dr. Ritchie tries to touch on all points of importance. He strives to instill in the students the importance of good linework and lettering quality. Neatness is also a guiding rule in this course. There is ample time given to complete each project which is given special consideration by the instructor. No one is rushed. The projects are also varied so the student gets a good and thorough understanding of Aircraft Drafting Procedures in today's modern industry.

It is a course well worth the time spent and one by which the student can benefit greatly. Good drafting procedures are always important to understand, even by an engineer, who has to spend much of his time reading and working from prints.

HAPPINESS IS.............

SATURDAY NIGHT
AT THE
KRISPY KREME

BY GARY ANDERSON

Saturday night in Daytona is generally very interesting. Being the fun people that they are, the Daytonaans like to see to it that Riddle men never have a dull moment.

A typical Saturday night starts off with dinner at the Holiday Inn West. It was in this very dining room that Columbia Pictures shot the action scenes in "Guess Who's Throwing Up Breakfast".

Usually if you eat fast you can catch the sewer crew at the corner of Volusia and Marion Streets as they come off work. No one should miss this exciting (and odorous) experience. Many students that have seen it call it a breathtaking moment. Personally I always get chocked up when I see it.

From there, one generally moves down to Main Street to watch them raise the drawbridge.

The climax of any Saturday night in Daytona Beach takes place at the Krispy Kreme where old friends get together for a congenial session of moth stomping. I don't think any Embry-Riddle student will ever be able to forget the thunderous applause of his fans as he landed full weight on a particularly elusive moth. Not to mention the excitement that occurs when one misses the moth and lands on the foot of a 250 lb. woman at the end of the counter.

Don't miss my next article, "Twenty-One Things to Do While Waiting For the Ambulance at the Krispy Kreme".

Bob Nawrocki proudly holds his five dollar check. Bob is the Informer's most valuable staff member. He has also been named Co-Editor.

If your pizza is perfection, it's from Shakey's Pizza Parlor and Ye Public House.
The rumor is probably around campus already that there was a question of the elimination of undergraduate photos, this rumor is false. The undergraduate shots will be included in the 68-69 Phoenix.

"Remember this is your yearbook," it's coming about cannot happen without your help, so stand up and be noticed, by showing us your interest in yourself, future memories your college and your yearbook staff.

Steve Gay
Editor-in-Chief

Astounding little-known facts:

Due to the fact that a cow has four stomachs, if it eats too many apples it will get drunk.

Words of Wisdom?

Love is the square root of a minus tomato!

Security is the radius of a broken celery stalk!

Mr. Greg Allen, Embry-Riddle's First Director of Alumni Affairs.

Mr. Allen came to Embry-Riddle with the intention of getting his commercial pilot rating, but when Dean Mansfield heard that he holds two bachelor of Science Degrees in journalism and history, he lassoed Mr. Allen into his office and put him to work.

CONTINUED
Mr. Allen estimated that from Embry-Riddle there are some 65,000 alumni who have graduated since the school began in 1926, but only 1700 are registered with the Alumni Association. There are presently 3 active chapters located in West Palm Beach, Vero Beach, and Windsor Locks, Connecticut. New chapters are proposed in Atlanta, Miami, St. Louis, Wichita, and Chicago.

"The Alumni Association is here for the benefit of both the students and the alumni," said Mr. Allen. "The student benefits because he can easily obtain connections in the business world through the alumni Association, and the Alumni benefits because they have use of the school's placement service, are kept current on school happenings, and are assisted in their professional careers."

Mr. Allen firmly believes that "the best way to sell Alumni is through personal contact," and as a result, he has traveled throughout the southeast, meeting Alumni, and helping to establish new chapters. He places strong emphasis on PROFESSIONALISM in the operation of the Alumni Association, and works closely with Mr. Harold Kosola, President of the Association to help achieve it.

In their first attempt at fund raising, the Alumni Association raised over $1,000 in contributions for last year's brick drive, and dues and donations bring that total to over $2500.

Future plans for the Alumni Association now in the works are a National Convention held annually here in Daytona to bring back Alumni to their Alma Mater, and see how much it has improved. Mr. Allen is also constantly working to form new chapters wherever 10 or more Alumni are located and interested and he also has plans to organize a chapter in England for British pilots who received their training at ERAI.

At this rate, I don't think it will take too long until Mr. Allen and his team uncover the "lost" 64,300 Embry-Riddle Alumni, and set up a fine organization into which future graduates can become proud members.

1. SITUATION

A modern dormitory and academic complex specifically designed for Embry-Riddle Aeronautical Institute are under construction on the new campus site. Total cost of these buildings is $2,700,000. The sum of $2,375,000 is being provided by various government grant and loan programs. The remaining $325,000 must be furnished by the institution. To date, approximately $80,000 has been raised, leaving some $240,000 to be obtained.

The government has released the loan for the dormitory in the amount of $1,400,000, and contemplates releasing the sum of the grant and loan on the academic complex, over $900,000, at such time as the institution share of $325,000 is on hand. These sums are needed no later than November 15, 1968 in order that the contractor may continue construction according to the present building schedule. This schedule will permit completion of the academic complex in time for the winter trimester starting January, 1969.

2. OBJECTIVE

The objective of the Embry-Riddle Building Fund Campaign Phase I is to raise $245,000 by November 15 to assure occupancy of the academic complex in January, 1969.

3. EXECUTION

a. Concept It is proposed that this campaign will be conducted by personal calls on prospective subscribers by volunteer team members. The organization of the campaign in the Daytona Beach area consists of Board of Trustee members, Board of Visitor members and team members as depicted in Appendix I.

b. Responsibilities

(5) Student Government Association: Solicit from within student body to include student parents, relatives and friends.

(6) Embry-Riddle Faculty Association: Solicit from within Embry-Riddle faculty, relatives and friends.

d. Subscriptions

The following subscription plans may be used:

1. Donation in cash ($1,000 or more)
2. Signature on a note for $100 to be paid at the rate of $100 a month for eleven months, without interest.
3. Signature on a note for $1200 to be paid at the rate of $50 per month for twenty-four months, without interest.
4. Any combination of cash and installment payments for a total greater than $1000
5. Large gifts may be in monthly installments for a period of more than two years at the discretion of the donor.

e. Donation Citations

A person subscribing to the Building Fund will be entitled to recognition as the donor of a dormitory room, classroom, laboratory or an entire building, depending on the amount of the subscription. Citations will bear the name of the subscriber and one other person, if requested, as shown in the following example:

DAYTONA TRAFFIC COMMISSIONER ALBERT FREEN WAS ASKED TO ASSIST EMBRY-RIDDLE AUTHORITIES IN IMPROVING PARKING FACILITIES ON CAMPUS. AFTER VIEWING THE PARKING LOT HE SAID, "IT'S OUT OF OUR HANDS AND INTO THE COAST GUARDS."

A Riddle student is ... truth with a Funk & Wagnal faith with a six-pack and a prog check in the morning.
determination with 10 cuts in English.
frugality with no money.
Punctuality after turning off the alarm clock at 7:00 a.m.
alertness caught sleeping in class.
Happiness is. . . no curfew.
Happiness is. . . turning in your meal ticket.
Happiness is. . . having a visiting soccer coach from Mexico, in Mexico.
Happiness is. . . a bicycle.
Happiness is. . . having Dean Spears recalled to active duty.
Happiness is. . . a picnic on the beach.
Happiness is. . . bleeding.
Happiness is. . . having your coffee cup fall in the right place.
Happiness is. . . breaking out at 200 and finding the runway.
TO ALL CONCERNED:

THE STUDENT CENTER WILL
BE LOCKED AT 5 P.M. WHEN
SUPERVISORY PERSONNEL
LEAVES IF BREAK-INS ON THE
TIoga MACHINES PERSISTS.
THIS WILL REPRESENT A LOSS
OF SERVICE TO MANY STUD-
ENTS.

DEAN SPEARS

The Daytona Beach
Sports Car Club is spon-
soring an auto cross on
November 10th. An auto
cross is an open course
run against the clock.
Practice will take place
at 10 a.m. Registration
will close at 1 p.m. with
the time runs beginning at
12 p.m. The course is set
up at Samsula Airport in
Spruce Creek. Trophies
for best time will be pre-
sented with a dash plaque
for all entries. A $15
gift certificate will also
be raffled. Embry-Riddle
students are very welcome
as participants.

FRUSTRATION IS ....... .
knowing it's raining
outside, while in class

FRUSTRATION IS ....... .
the nurse giving you a
bandage when you are
bleeding internally

FRUSTRATION IS ....... .
getting a coffee from
the machine without a
cup.
