Accreditation by the Southern Association of Colleges and Schools as a special purpose institution is here unofficially, according to President Hunt. He received unofficial word from Atlanta where the annual meeting has been taking place. A letter containing the official verbiage about accreditation will be received by the end of the week.

The Student Conduct and Grievance Committee, headed by Don Nichols, obtained a reasonable revaluation of the disciplinary action against the coeds. Don stated that progress had been made with all concerned discussing the events and circumstances of the case.

TO THE INFORMER:

As a casual observer (a member of the clerical staff), I have noted with some interest the flood of letters from students testing the proposed adoption of a campus dress code. Without getting into a discussion as to whether or not long hair, beards, turtle-necks, and other extremes of current fashion are appropriate for this or any campus, I would like to know what everyone is so upset about. Apparently, it is the idea that the Administration would dare to make rules governing student affairs without the permission of the Student Body. This I just don't understand.

First, let's check a few definitions of terms. According to Webster, a "student" is one who studies, or seeks to learn from another. Synonyms are "pupil" and "disciple". On the other hand, a "teacher" is one who gives instruction and direction. Synonyms are "guide" or "master". To continue with our vocabulary drill, the "administration" of a school or other such agency is a group of persons charged with the performance of executive duties. Synonyms are "management" and "directoriate". Now, that locates everyone on the scale, doesn't it?

As students, you applied to ERAI for admission. Your applications were accepted on the basis of certain qualifications and subject to certain conditions - namely, payment of tuition and fees, maintenance of satisfactory academic standards and compliance with the rules and regulations of the Institute. In other words, as long as you pay your fees, keep your grades up, and obey the rules, you have the right to attend classes and, hopefully, one day to graduate with a piece of paper stating that you are qualified for employment in the particular phase of the aviation industry which you have selected. In other words, as long as you pay your fees, keep your grades up, and obey the rules, you have the right to attend classes and, hopefully, one day to graduate with a piece of paper stating that you are qualified for employment in the particular phase of the aviation industry which you have selected. The Institute, meanwhile, is obligated to provide you with instruction and/or training which, in the opinion of the Institute, will fit you for such a career.

This is a privately operated, non-profit, educational institution. This means that the stockholders of the Company select a Board of Trustees who, in turn, elect the President and other Administrative officers charged with running the school - that is, hiring faculty and staff, making rules and regulations, setting tuition charges and fees, and determining various programs of study to be offered - subject to the approval of the Board of Trustees. Faculty members are responsible for preparation and presentation of course material, for setting standards of acceptable achievement in their particular courses, and for maintaining order and discipline in the classroom as necessary - subject to the approval of the Administration and the Board of Trustees.

Nobody said you had to like the rules, the course work, or the teachers. Nobody promised to change anything or guaranteed you your money back if you were unhappy. You pay the fees, you do the work, you obey the rules - or you suffer the consequences. It isn't "military". It isn't "kindergarten". It's just common sense.

What's all the fuss about?

Mrs. Bradley (Library)

The trimester is rapidly drawing to a close with only two full weeks of classes left. All the brothers of Sigma Phi Delta are preparing for exams, knowing that the reward of a two week Christmas vacation follows.

The fraternity party held by Pi Sigma Phi and Sigma Phi Delta on November 23 turned out well. Everyone there had a good time from the looks of things. At least the ice was broken for future functions of this sort. With the inter-fraternity council going strong, possibly our next affair will be sponsored by all three campus frats. We are all aiming for closer relationships with the rest of the student body. Students - expose yourself to these different campus fraternities and see for yourself how your college years can be enriched by some extracurricular activities. At the same time you will be gaining experience in leadership and dealing with other people.

I cannot emphasize enough the rushing plans being made for perspective pledges by Sigma Phi Delta. We have many irons in the fire for 1969 with most of them ready to explode at any time. Be a part of these plans and at least come and see what we have to offer the engineering student at Embry-Riddle.

All I have left to say is "Good Luck" to all students in their final exams.

See you in next week's INFORMER.

The Professionals.

---

The last week has definitely been a week which will be long remembered by many of the brothers of Alpha Eta Rho here at Embry-Riddle. The Thanksgiving dinner party was a tremendous success. Everyone must have gained at least five pounds during the day. There was no official party planned for Thursday evening, but as it turned out the house was jammed full of guys and gals. At one point on Friday morning it seemed as if the celebration of the holiday would last all weekend. Due to the fact that several of the brothers are such diligent and prudent students, the throngs of people finally dwindled as the break of dawn gradually appeared.

The newly developed pictures of various events that the pledges encountered in the pledge period created much interest throughout the evening and seemed to be enjoyed especially by many of the feminine guests.

On Saturday night we returned to the beach for a party. This was the same thing we had done the week before, but because we all had so much fun previously, it was decided that all had an even better time than the week before, if that's possible.

All members are getting deeply involved with school work now and are cramming for the finals, which are rapidly approaching. Pre-registration is also making time very short.

The plans for a rush party in the spring trimester are already well underway. It is going to be the best one yet if the plans for it can be carried out. You had better make plans now to attend or you could be missing a great opportunity. It is very possible that it will be held in our new fraternity house.

I have to mention our banquet scheduled for this week. All our new members are really looking forward to this. I might add that this is a highlight of the reimester for old members. We hope to see you all at the SGA dance Saturday night. That's all for this week from Alpha Eta Rho, Embry-Riddle's professional Aviation fraternity.
SOCCER SCUTTLE
BY ED OTTER

Soccer season has finally come to a close. The game scheduled against Florida State was cancelled because of one overweight DC-3. The match against Georgia Tech was also cancelled due to circumstances beyond our control. We will see you next season with more exciting soccer games that are now in the planning.

EMBRY-RIDDLE SAILING CLUB
skipper's corner

Well, what a weekend for beach going but not sailing. It was terrible, terrible.

Well your sailing club finished fifth of nine boats. We were stuck in an under 150 Sail Area class. We didn't expect too much, but we tried hard. We were so far out-classed it was pathetic (calm winds did the most damage). Sunday December 15th we hope to race on the Halifax River. Between now and then many ideas will be tried.

There were a total of 195 boats and approximately 35 different classes of boats at the Davis Island Regatta, Tampa, Florida. Tampa Bay this weekend looked like a Giant Pin Cushion.

Happiness is... Accreditation.
INTERNATIONAL YEAR OF HUMAN RIGHTS

The Volusia County Observation of the International Year of Human Rights takes place Sunday, December 8, at the Peabody Auditorium. The time is 7:45 p.m. and there is no charge for admission. The principle speaker will be Paul S. Geren, President of Stetson University. The program includes a United Nations flag parade sponsored by Embry-Riddle and supported by students from all four colleges in the area. Many of the flag bearers will be natives of the country represented and in native dress. The rest of the program will include some dramatic presentations and musical entertainment.

All three fraternities are furnishing ushers and the Veteran’s Association is assisting with the flag bearing duties.

Ushers are reminded to be at the west entrance to Peabody Auditorium at 5:45 p.m. Flag bearers are to be assembled at the same location at 6:00 p.m., for a dress rehearsal.

The bus schedule for those requiring transportation is as follows: Leave Dormitory #1 at 5:30 p.m., proceed to Dormitory #2 then a pick-up stop at the Howard Johnsons and Mount Vernon and on to Peabody Auditorium.

INSTRUCTOR OF THE MONTH

Hats off to Mr. Ramzey Selim for the most outstanding presentation in November.

Mr. Selim’s presentation was characterized by valuable, meaningful, and technically correct information imparted in an interesting and intelligent manner. Common errors made by students and rated instrument pilots were realistically portrayed in a simulated airport departure problem.

Superior knowledge of the subject matter was presented at student level. Mr. Selim used many analogies to clarify teaching points. Empathy was established early, showing that Mr. Selim has the ability to put himself in the student’s place and look at a problem from their point of view.

In the simulated departure problem Mr. Selim took full advantage of contrast. This was evident when he dramatized climb differences between a high performance Lear Jet and a conventional propeller driven airplane.

This was an instrument course presentation. In the simulated departure problem, IFR shorthand (previously taught) was used for chalkboard abbreviations. This technique was effective in requiring mental participation on the part of the student.

A proven method of motivation was exploited with immediate results. The instructor stated that the teaching point to be imparted “would be in the examination.”

Another effective technique used was the answering of a question which had been asked in a previous lesson. It insured complete coverage of an important point and helped the student-instructor relationship.

The use of imagination in the planning of the presentation resulted in excellent transfer of learning.

Mr. Selim’s experience includes 10 years as an air traffic controller with FAA and Air Force.

In Air Science Department he carries the extra duty of course scheduling. He is also a husband, father and a student.

The presentation won the beautiful piston ash tray for one month. Mr. Selim’s presentation showed a high sense of responsibility toward his students, his family and his co-workers at Embry-Riddle. Congratulations for an important job well done. Lesson objectives accomplished. We are glad he is on the Air Science Department team.

THE LUCK OF THE EAGLES
BY GARY ANDERSON

Through all the disagreements that we have at Riddle, all of us students and faculty as well have one very strong common bond. That bond is a long history of ridiculously bad luck. Call it the "luck of the eagles" or whatever you like but it is there and like the dickle finger of fate it is inescapable.

It doesn’t take long for one to notice the luck of the eagles. I saw it the first day I arrived here. Charley the school welcomer was going to give me a tour of the campus in the school station wagon. While backing out of the school garage he started to explain the meticulous safety measures that the school takes. About that time we backed into the garage doors which he had forgotten to open.

Who will ever forget the day Clyde the Campus Cop parked his prowl car in front of the fire hydrant. If the car hadn’t caught on fire or if the fire department had been able to get at the hydrant, Clyde might still be employed.

Or how about the day 17 student radicals took over the school store and Millie sold them at a 10 percent markup?

The luck of the eagles even seems to be dogging Spad our school mascot. It seems that some of the students have been training him to swoop down on a chipmunk during half time. The principle is sound enough but lately Spad’s aim has been a little off. They gave him a dress rehearsal yesterday on the soccer field. The drums rolled, Spad took off and the chipmunk was released. Spad swooped down, missed the chipmunk, and hit a Volkswagen. The chipmunk became frightened and bit the coach. Meanwhile the V.W. driver panicked and ran over the chipmunk.

The chipmunk, Spad, and the coach are all recovering nicely at the Halifax Hospital where they are sharing a room.
STUDENT BANK LOAN PROGRAM

Arrangements have been concluded with the Westside Atlantic Bank of Daytona Beach, Florida to underwrite a student bank loan program on a trial basis for the Spring Trimester 1969.

The student bank loan program will replace the Deferred Payment Plan currently being administered by the Institution.

For all intents and purposes the basic procedures to obtain a loan from the bank remain the same as obtaining a loan on the Deferred Payment Plan. The main difference is the student must enter into a legal contract with a bank and meet scheduled payments. Failure to meet these payments on a timely basis can result in the student incurring late payment penalties, loss of credit and eventual legal recourse.

Bank service charges and procedures for the loan program are as follows:

a. Minimum $10 service charge for all loans $500 and under for one Tri.

b. Six percent interest charge for all loans $500 and under for one Tri.

c. Students enrolled in the College of Aeronautical Studies and in the Division of Maintenance Technology may take out a loan which can not exceed three fourths of the total charges for tuition, flight laboratory fees and other fees repayable in 3 equal monthly installments on February 15, March 15, and April 15, 1969. Newly enrolled students are required to pay 50% down.

d. Professional Pilots undertaking flight courses of ten weeks or longer may take out a loan which can not exceed one half the total charges for flight laboratory fees and other fees repayable in two payments within sixty days of the date of the note.

d. Loans will be approved for those students whose accounts are current and fully paid.

Students are reminded of the current payment policy:

a. Payments in full for the current Trimester and the Spring Trimester must be made by December 29, 1966 to avoid penalties.

b. Payments for the Spring Trimester financed through the Student Loan Program must consist of a minimum 25% down payment of total charges for tuition and fees. This is cash in hand with no extensions or exceptions permitted.

R.H. Pierce
Controller

Procedures for payment of tuition and fees and/or obtaining a student bank loan are as follows:

a. Students will receive in the mail on December 9, 1968 a statement of charges for the Spring Trimester which may be paid directly to the Cashier or remitted by mail. Payment in full by cash or a combination down payment and loan must be made by December 29, 1968 to avoid penalties.

b. Students applying for loan bring copy of billing statement to Deferred Payment Plan Office (located on West End of Student Lounge adjacent to Flight Account) where applications will be filled out and loan processed.

c. Student remits to Cashier down payment and approved loan for the full amount of the trimester charges.

d. Students will receive in the mail on December 9, 1968 a statement of charges for the Spring Trimester which may be paid directly to the Cashier or remitted by mail. Payment in full by cash or a combination down payment and loan must be made by December 29, 1968 to avoid penalties.

b. Students applying for loan bring copy of billing statement to Deferred Payment Plan Office (located on West End of Student Lounge adjacent to Flight Account) where applications will be filled out and loan processed.

c. Student remits to Cashier down payment and approved loan for the full amount of the trimester charges.
FAA AT ERAI

BY BILL OBERLE

The Federal Aviation Administration will administer pilot, instructor, and maintenance written exams on December 17th and 18th, starting at 8:30 am at the Jet Laboratory.

Individuals wishing to take pilot or instructor (ground/flight) exams should contact Mrs. Presser, Air Science Department, Bldg. 35. Those desiring maintenance exams should contact Mr. Caswell, A&P Department.

Anyone who has previously taken an exam and intends to take a retest must bring form 578. If this form has been lost, a copy may be obtained by sending $1.00 (check or money order) payable to FAA from:
Federal Aviation Administration
P.O. Box 25082
Oklahoma City, Oklahoma 73125

Arrangements to take an exam must be made in advance of the exam date. Should there be a change in the examination schedule, notices will be posted on strategic bulletin boards on campus.

THINK ABOUT IT

BY GENE LECLAIR

On Wednesday, December 4, the Southern Association of Colleges granted Embry-Riddle full accreditation. The impact of this news will affect all of us very much. Most of you will feel proud to belong to a new growing institution, but many of you will use the accreditation to transfer to a bigger college with a well known name.

I would like you to consider the following: because a college is big and well known, it does not mean that once you graduate you will have instant success and companies will be flocking to you to come to work. In today's well known universities are classes of 60 to 100 students. These classes are usually taught by assistant professors and sometimes by the recorders.

By the same token, there is no opportunity for you to really sit down with your professor and iron out your problems for the course you take, and ask pertinent questions. Finally, you will be a number in a computer, filed among thousands of students enrolled at the school, and that's all!

I believe that the term used is "megaversities". This would describe just some of the things you will face in your transfer. Also, just how much knowledge would you absorb and take out of the universities?

Now consider staying here at Riddle, a growing school. Sure it's got a lot of things wrong with it, but isn't it true that our President has an open door policy? Where else have you seen that?

The classes are relatively small and the professors teach them. We can approach our professors not only scholastically but usually talk to them about our problems. We have a decent student government, a good school paper for communications, and now we have accreditation. On most matters the students can be heard through their representatives, and have their ideas, grievances, and opinions listened to by the administration and faculty.

To me these are assets that cannot be found in "megaversities". Now that we are accredited wouldn't it be better to stay here and help develop a good school?

The communication at this school is good, and instead of looking at its shortcomings, why not look at its accomplishments? Why not look at the advantages and pride we can receive if we stay and help develop this institution into one of which other college students would love to be a part.

The bigness and the well known names of a school may get you into an organization, but its been my experience in the business world that, if any thing, all it will do is to get you in the door. Then you will have to apply your knowledge. If you've ever been in a difficult curriculum with classes of 100 plus, how will you learn anything? When it comes time to prove yourself, what will a big name and a big school get you? Think about it!

Happiness is...the Christmas break.

Happiness is...the Magnificent Men and Their Flying Machines.

Happiness is...Christmas Shopping.

Happiness is...Professional pilot training.

Happiness is...the Peace Pilgrim.
COMING EVENT

The Asolo Theatre Festival - a professional repertory company - will be in Daytona Beach December 11, 12, 13, and 14 at the Junior College Auditorium.

Sponsored in this area by the Junior Service League and the News-Journal, the Asolo Theatre is on an educational enrichment tour. To be successful it will need the support of the citizens and especially the students of the area.

Love and War - two important topics in today's world are the themes of the theatre festival's two presentations. One play is Shaw's comedy - Arms and the Man. The other play is Moliere's comedy The Misanthrope.

The tickets for these professionally staged plays are, to say the least, inexpensive. Students tickets sell for $2, $1.50, and $1 depending on the seating section. Faculty tickets are twice the student rates. Since the performances will be staged in the small DBJC auditorium, it is safe to say that there are no really poor seats.

Your student government Lyceum Committee is making these tickets available to students, faculty and other interested persons. A booth will be set up in the student union the first week in December. If you wish to purchase tickets before then - please leave a note in ER box 171 - Richard Cook - we have only a limited number, and I will be most happy to help you.

Mr. Boaz came to Embry Riddle this past August to serve as Chairman of Flight Technology Division. Mr. Boaz supervises and coordinates three principle departments, Flight training, Air Science department, and Aircraft Maintenance.

Mr. Boaz has spent the past 30 years in the Air Force, and not being the retiring type, came to Riddle because of his great interest in flying and aircraft maintenance and his interest in youth education.

Mr. Boaz is an undergraduate in Engineering, a graduate of the Armed Forces. Mr. Boaz has spent the last 5 years as professor of Aerospace studies at the University of Florida and headed the ROTC program. He has his Masters in Business Administration and his major in Management.

Mr. Boaz is impressed with Riddle and has known about it since 1942. He expects that Riddle has a good future. Mr. Boaz's only disappointment was to see the deterioration of the standards of dress and appearance of a very small minority of students.

Mr. Boaz was born in Missouri and spent most of his boyhood years in Kentucky. His hobbies include flying, classical music, swimming and golf.

Mr. Boaz is happy to settle in Daytona and devote his energies to the World's Most Famous Aeronautical School at the World's Most Famous Beach.

Happiness is... watching Charlie Stump.
DRESS CODE

The heated discussions and furor still surround the Embry-Riddle dress code. The history of this latest push for a dress code began in a Presidents Council meeting some weeks ago. At that time it was decided to form a committee, headed by Dean Mansfield, to submit a proposal to President Hunt.

This committee met and began the arduous task of formulating a dress code. The committee members included Mr. Merle Hardin, Administrative assistant from Maintenance Technology, Mr. William Boaz, Chairman, Division of Flight Technology, Mr. Everett Chrisman, Associate Professor of Mathematics, Richard Berezanski student in Management, Joe Rogers, student in Flight Technology and Roy Skinner student from A & P. Dean Mansfield stated, "We discussed the issues with care. A lot of thought went into the proposal." At first some of the committee members refused to sign the document but later signed it to get it out of the committee; it was reported by a committee member.

Dean Mansfield then came before the November 12th SGA meeting and read the dress code to the representatives asking for ratification at a later date. The code as read by Dean Mansfield included no beards, no canvass shoes, etc. That week several SGA and Informer members began work on an alternate proposal. They formulated the Embry-Riddle Dress Statement, which Cam McQuaid, one of the drafters, stated, "would take care of any dress 'problems' while still treating the students as adults. Both proposals came to a vote in the November 19th meeting of the SGA. Ratification was extended to the Dress Statement while the Dress Code was defeated. Also the Dress Statement was sent to President Hunt for his consideration.

At the November 25th meeting of the Presidents Council, President Hunt acknowledged receipt of the Dress Statement from the Student Council along with a letter from the Veteran's Organization endorsing Dress Statement with some minor changes. President Hunt then turned the proposal back to Dean Mansfield's committee. Dean Mansfield was contacted on December 3rd and said, "the new committee proposal generally follows the lines of the Dress Statement with some changes to the mechanics to meet the institution's present procedures, and one addition in specific." Dean Mansfield preferred not to comment any further at that time, however further information is forthcoming soon.

NOTE FROM THE DEAN OF STANDARDIZATION

In the interest of upholding the fine standing that Embry-Riddle has earned with the local community, prospective donors and the aviation industry, Santa Claus will not be allowed on campus this year. Since he has decided to present himself in contrast to Embry-Riddle's dress standards (i.e. beard, crazy hat, odd mod of dress), we cannot have Mr. Claus on campus bringing serious harm to the students of this school.

Olaf Huptwo
Dean of Standardization

TELL THEM RIDDLE SENT YOU
VETERAN'S ASSOCIATION TO OPERATE BOOKSTORE
BY BILL OBERLE

The Embry-Riddle Veterans Association is planning to operate a used bookstore. It is intended that the bookstore will operate approximately two weeks a trimester; the first week, at the end of a trimester, to take on consignments, books and study materials for sale, and the second week, at the beginning of the next trimester, for the sale of these items.

PRESENT OPERATIONAL

1. Items for sale will be presented and evaluated, a receipt issued for each item and placed on sale.
2. When the item is sold, the seller will be notified through his ERAI post office box.
3. The seller may then collect his money, less a small percentage (commission).

Note: a commission sale will be posted prior to taking materials on consignment and will be a graduated scale dependent upon resale prices.
4. Any items not sold during the sale period may be reclaimed by the seller. Any items not redeem-
ed by seller after notification will become the property of the Veteran's Association.

5. Because of limited operating capital, the ERVA bookstore cannot purchase any items outright. However, any contribution will be gratefully accepted.

The proceeds (commissions) realized from the bookstore will be used to develop and further programs sponsored by the Veterans Association. The ERVA is hoping to obtain office space on campus when it is available. This would allow regular operation of the bookstore throughout the trimester. But for the time being, the operation has to be limited to approximately two weeks a trimester.

Needless to say, support of this endeavor on the part of the Student Body (faculty are also invited) would certainly realize a considerable saving to all concerned.

Ormond Beach Airport 677 6650
FAA and VA Approved Flight School
In an effort to help all students buy and sell used books at various prices, the Veterans Association will operate a used book store on campus starting the week of final exams.

The store will be located on the campus and will operate during the week of finals and during the first two or three weeks of classes each trimester.

Books will be collected at the book store during hours of operation. If you have books to sell use the following procedures:

1. Bring book(s) to used book store. (Time and place to be announced at a later date)
2. Set your price and fill out Book I.D. Card.
3. Check periodically with store to see if book has been sold and pick up money if it has been sold.

The book store will accept books for only those courses that are being offered each trimester.

The Veterans Association will charge a fixed percentage for handling the transaction. The proceeds will be used to cover operating expenses of the store. Excess funds, if any, will go to the treasury of the Veterans Association. CHARGES ARE: 10% for all books under $5.00, and decreasing 1% for each additional $1.00 to a minimum charge of 5%.
