What do I need to enter the country?

Where do I get a test?

Do I need a vaccine?

Do I need a paper or digital certificate?

What about for re-entry?

How do I send my COVID-19 test certificates to the airline?

How do we let passengers know what they need to travel?

How can we cope with the amount of paper processing that will be required for paper testing and vaccine certificates?

How can we ensure passengers have the correct COVID-19 requirements?

Are the COVID certificates being presented legitimate?

How can we be sure the COVID-19 test or vaccine belongs to the traveler?
Passenger processing and waiting times have increased +100% from pre-crisis levels during peak times — up to three hours. Yet travel volumes are only at 30% of pre-COVID-19 levels.
Without urgent improvement, process delays could reach **5.5 hours per trip** at 75% pre-COVID-19 traffic levels, and 8.0 hours per trip at 100% pre-COVID-19 traffic levels.
Risk of fraud with paper certificates

Private hospitals issue fake Covid test certificates

Group caught making fake Covid test results at Paris airport

The falsified negative test results were being sold for between €150 to €300

High level data privacy and security

‘Decentralized Technology’ means there is no central database holding passenger information

Rights
Passengers have the sole right share to their data
Users can delete their data anytime on their app

Compliance
Country regulations on access to passengers’ data will be respected (eg France & Germany)
Current Planned

76 Airlines - 219 Routes
(As of July 2021)
Current lab coverage

Number of labs accessible to passengers 1433 (as of 13 Aug)
Government acceptance

Travel Pass must be accepted as a valid presentation of test/vaccine results upon arrival, in lieu of a physical copy of them.

IATA has been engaging States across the world.

In Asia Pacific, Singapore has confirmed acceptance of the IATA Travel Pass.
Inform IATA Timatic team of any change in entry regulations for timely update: timediting@iata.org
Thank you
