POW SPEAKS

Since Easter, when the North Vietnamese launched their current offensive, and President Nixon offered a new peace proposal, the POW question has flared anew in the U.S. It is, and will continue to be a big campaign issue for both candidates.

While politicians argue over the best way to settle the war, our men are being held in bamboo cages in Indo-China; some have been held since 1965. Have you ever wondered what it is like for a POW? Mr. Charles Kasler, Director of Financial Aid here at Embry-Riddle, spent four years as a prisoner of the Japanese in World War II. He was captured in Corregidor and subsequently was interned in twelve different concentration camps in various parts of the Far East. He granted me an interview and gave me a small idea of what it is like to be a P.O.W. Perhaps we can gain some insight into what it might be like for our men held in North Vietnam by hearing some of Mr. Kasler's thoughts and opinions on the subject of P.O.W.s.

AVION: "Do you think we should publicize the plight of the P.O.W.s more?"

Mr. Kasler: "Our country made a bad mistake when they held us in the Far East as long as they did after our liberation. We were such pathetic looking characters that they did not want to expose us to the American public until after we had gained a considerable amount of weight and presented a better appearance. I say that our country made a mistake because we should have been returned immediately in the condition we were in and publicized highly to show the American public what happens to a man when he becomes a P.O.W.

I think that Americans sort of lost their perspective about how a man is treated when they saw parachute jumps. He made it clear to me that he bears no resentment against the oriental people and as a result of the harsh treatment he received, but only against the leaders who were responsible for approving and encouraging such a policy. In fact his last duty station was in the Republic of China.

Mr. Kasler had many fascinating stories to tell about his four years in captivity. Unfortunately, we could not allow me to recount all of them, but I have tried to set forth some of the feelings, as former P.O.W., on our P.O.W.'s today.

Charles McMahon

Expanded Public Relations

Embry-Riddle Aeronautical University has expanded its Public Relations Office to include an additional liaison among students, on-campus organizations, and the news media, both local and national. Vaughn Lane, an ERAU student, is working under the direction of Bob Cessna, Director of Public Relations. Vaughn's assignment is to gather on-campus news of interest to the general public and to release this news to the various media. The emphasis will be to accent the individuals who extend themselves for their organizations and their university. All too often, these individual contributions to ERAU's worth go unrecognized. This trend will definitely change in the future as the active members of the student body now have a working source for local and national recognition. Should any student or organization need help in getting their activity publicized or wish to expand public relations, Vaughn can be found on campus or at extension 33.
I have received a letter from Mr. Bill Nock, Manager of the Student Conduct Committee, and he has informed me that no longer will the County Sheriff's Department issue warning tickets. From this date on tickets will be issued for speeding. There is the possibility that electronic timing devices will be set up on the airport. Speed limit on the airport is 25 mph, unless otherwise posted. There seems to be quite a few confusing reports as to the date of establishment. The date established is August 15, 1972. For any further information contact Mr. Jerry Fry, Senior Class President.

Currently, we are looking for two persons to sit on the Faculty/Student Conduct Committee. Anyone expressing an interest, please contact Charlie Matlock, Vice President of the SGA.

To further communication and to have additional inputs into academics, we have established a committee with Mr. Chrisman, Chairman of the Aviation Management Division, and Mr. R. Brown, Chairman of the Air Science Division. This committee will meet with these two department heads to discuss inputs or deletions to courses within these curriculums. Please feel free to contact the SGA Office to voice any inputs or deletions as you see necessary.

Remember the upcoming Barbecue on July 22, behind Dorm I. The time will be from 1 to 5 PM. All Faculty and Administrators are cordially invited.

RESUME RULES

Once again it is nearing graduation and it is time for everyone to be preparing forms for resumes to be typed. As you know this is a free service from the Placement Office and is one which every senior should take advantage of. Because of the large influx of persons as graduation draws close we have set up just a few ground rules which should be observed if everyone is to receive their completed resume when they want it.

1. Complete the resume information sheet and set a date for the paper to be picked up. Do not expect one day service as there are others who have been waiting longer. If a special form for preparing the resume is preferred by you, be sure you inform the person typing it so that it will be done to your satisfaction. The date for the resume to be ready for pick-up should be agreed upon with the person typing it, no one else.

2. Allow at least a three day wait for your completed resume as they are done only when time permits.

3. When handing in the information sheet make sure that everything on it is correct, spellings, names, titles, anything you put on it will be typed that way and if you happen to be careless on the information sheet it will be wrong on the final copy. Also, be sure that everything you want on the final resume is on the information sheet because it will be typed only once.

4. When the final copy of the resume is ready and you have come in to pick it up, do not leave the Placement Office until you have proofread it. It is hard for a typist to proof their own work so it will be left up to you to do. Once you leave the office with your resume we will assume that your approval has been placed on it and there are no typing errors in it. We will not retyping it after you have left the office and given us the word it is satisfactory. You are given the chance to read it over so do it carefully, two or three times won’t hurt any feelings, just make sure before you leave the office.

5. If the final copy is done to your satisfaction and you would like to have it printed, the Print Shop on campus will be glad to do so at a small fee. It is up to you to have the copies made, not the Placement Office. A copy should, however, be returned to the Placement Office to be kept on file for future reference.

Now that we have given you the ground rules or procedure for having a resume completed, do not hesitate to come by. We are also prepared to help with cover letters, but like resumes we can only type one of these. The Placement Office is in building 9, room 4, across from the Student Center.

DID YOU KNOW THAT?

Jets make less air pollution than propeller planes they replaced. (Jet engines produce less than half as much pollution by weight as piston engines.)

by Ron Murphy

Who said there isn’t anything worth fishing for in the Halifax River? Last Saturday, July 8, I was plugging for trout about 11:00 o’clock at night when I felt a strike that felt a bit heavier than the average two or three pound sea trout. When the tarpon jumped, I knew it was no trout. I was fishing off the middle of the Seabreeze Bridge and had to play the tarpon off the bridge and down to the shore where I would have a chance landing him. He fought long and hard, but eventually I landed him. He weighed 17 lbs and was 38 inches long. I was using a light pinning rod with a Mitchell 300 reel. The line was 10 lbs test and the plug used was the familiar sea hawk in yellow and black colors.
Grads, Now Hear This,

An unusual address delivered in 1969 by Eric Walker, President, Pennsylvania State University.

This ceremony marks the end of an important phase of your life. It is an occasion in which all who know you can share in your sense of pride and accomplishment. No one has more pride in your accomplishment than the older generation. But I am not going to say we have made a mess of things and you... the younger ones... are the hope of mankind. I would like to reverse that process.

If you of the graduating class will look over into the bleachers to your left or right, I will re-introduce you to some of the most remarkable people ever to walk the earth. People you may want to thank on this graduation day. These are people you already know... your parents and grandparents, and if you will bear with me for a few minutes, I think you will agree that they are a remarkable people indeed. Let me tell you about them.

These... your parents and grandparents... are the people who within just five decades, 1919 to 1969...have, by their work, increased your life expectancy approximately 50 percent....who, while cutting the working day by a third, have more than doubled per capita output. These are the people who have given you a healthier world than they found. And, because of this, you no longer have to fear epidemics of typhus, diphtheria, smallpox, scarlet fever or measles that they knew in their youth.

Let me remind you that these remarkable people lived through history's greatest depression. Many know what it is to be hungry and poor, what it is to be cold. And because of this they determined that it would not happen to you, that you would have a better life...you would have food to eat, milk to drink, a warm home, better schools and greater opportunities to succeed than they had.

Because they gave you the best, you are the tallest, healthiest, brightest and probably the best looking generation to inhabit the land. And because they are materialistic, you will have more leisure time, travel to more distant places and have more of a chance to follow your life's ambition. They are also the people who fought man's grisiest war. They are the people who defeated the tyranny of Hitler and who, when it was all over, had the compassion to spend billions of dollars to help their former enemies rebuild their homelands.

They built thousands of schools, trained and hired tens of thousands of better teachers and, at the same time, made higher education a real possibility for millions of youngsters. Where once it was only the dream of the wealthy few, they also held the dubious record for paying taxes, although you will probably exceed them in this. While they have done all these things, they have had some failures. They have not yet found an alternative for war, nor for racial hatred. Perhaps you, the members of this graduating class will protect the social mechanism by which all men may follow their ambitions without the threat of force...so that the earth will no longer need police to enforce the laws, nor armies to prevent some men from trespassing against others. But they...these generations...made more progress by the sweat of their brows than in any previous era, and don't you forget it. And, if your generation can make as much progress in as many areas as these two generations have, you should be able to solve a good many of the world's remaining ills.

It is my hope, and I know the hope of these two generations, that you find the answers to many of the problems that plague mankind. But it won't be easy. And you won't do it by negative thoughts, nor by tearing down or belittling. You may and can do it by hard work, humility, hope and faith in mankind. Try it!
The third regular meeting of the SGA Senate for the 1972 summer trimester was attended by the Officers and 18 Senators.

PRESIDENT: Mr. Linn Henry intro-duced a motion of June 29, 1972, dealing with attendance at the Executive Board meetings. Mr. Fry feels that there is not true representation of all groups on the Board. It was explained to him all officers on the Board are elected by the student body. President Henry emphasized that anyone desiring so may receive an invitation to the Executive Board meetings.

PRESIDENT: Mr. Linn Henry intro-duced the Agenda. He u;ged pass-ing around the information needed to fulfill their duties as assigned. The recommendation to the Dress and Appearance Committee has been forwarded to President Hunt. A report was made about his trial period satisfactorily to receive six credit hours allowable and will be responsible for submitting a term paper on some phase of the work period or an evaluation report of the total work period that is acceptable to the Cooperative Education Committee. The Co-op student, considered a full time employee, must accept the responsibilities of his work period as a full time employee.

At the present time, we have a firm commitment for two Co-op slots in management with a local business, which will start this fall. If you are interested please complete an application.

Metropolitan Life Insurance Company representatives were on Campus last week to inform of opportunities with their Company. If there is enough student interest they have a recruiting film they would like to present. Stop by and let me know.

The AROQT will be given on July 21, 1972, on campus. If you are interested, please contact the local recruiting office at 253-9671. Students nearing graduation need to stop by the Placement Office and complete a form prior to leaving school. Also, if you are interested in the GRAD System, please come by for an application.

The Marines will be on campus recruiting on August 2, 1972, in the Student Center. All interested persons should go there to talk with them.

The Air Force ROTC Officer Qualification Test will be administered at Embry-Riddle Aeronautical University on July 21, 1972. The test will begin at 8:00 am in Academic Building A, room 105 on the University Campus. Interested students should notify their local Recruiting Office prior to taking the test.

Captain Wickersham of the United States Marine Corps will be on the Embry-Riddle Campus August 2 and August 30. Interested students may discuss career matters with the Officer Selection Team in the Student Center during school hours.

Dining Out

Occasionally, one finds a restaurant where everything is good, the food, the service, the atmosphere and the price. Gill’s Bar-B-Q on South Yonge St. (US 1) in Ormond Beach is such a place.

In addition to serving basic Southern Bar-B-Q items such as ribs, pork, beef and chicken, Gill’s also features delicious Brunswick Stew, smoked turkey, French fried corn on the cob, and all the bread and pickles you can eat. The price of a complete dinner is $2.50 (sandwiches are less). This may be a bit steep for a student’s budget, but the portions are enormous and more than make up for the price.

The food is strictly delicious and with Gill’s own mild or hot Bar-B-Q sauce made with 16 exotic ingredients, it’s even better.

The service is always speedy and courteous. The atmosphere is uniquely rustic. The walls and ceiling are covered with old license plates from around the world interspersed with historic front page newspaper stories. I definitely recommend Gill’s Bar-B-Q for an enjoyable meal. The dress is casual and everything is right.

FREE TUTORING

Beginning Friday, July 14, a free tutorial service will be offered by the Department of Mathematics to students taking the courses indicated below. This service will run through Friday, August 11. Tutoring will be done by our own student graders, whose office numbers, office hours, and areas of competency are indicated below. I strongly urge all students who feel that they need additional help to take advantage of this service.

Michael Dealey, Acting Chairman
Division of Math and Science

book & tape worm
Dear Friend:

Because President Nixon has received over 100,000 expressions of support from Americans such as yourself, it is impossible for him to personally respond to each one of them individually.

The President has asked me to thank you for your message about the decisive military action he has ordered to hasten the end of the fighting in Vietnam. As he stated in his May 8 address, the enemy can bring these measures to an end by returning our prisoners of war and joining in an internationally supervised ceasefire throughout Indochina. The United States will then begin a full withdrawal of military personnel from Vietnam, to be completed in four months.

This has been the longest, most difficult war in our nation's history. All our citizens look forward to a lasting, honorable peace. That day is near—and will surely be brought ever closer if the great majority of the American people who support the President's decision convey these views to their elected representatives, friends and neighbors, and local newspapers. Such a display of unity will make it unmistakably clear to the world that our country will not falter in its just commitment to South Vietnam or in its resolve to safeguard the lives of 60,000 American servicemen and secure the release of U.S. prisoners of war held throughout Indochina, to include a complete accounting of those missing in action.

With the President's deep appreciation for your words of encouragement,

Sincerely,

Roland L. Elliott
Deputy Special Assistant to the President

---page 7---
I think I went through the change of life one night last week. It seems I had barely outreached puberty when I went to bed a swinging single...awakened the next morning a confirmed bachelor.

I noticed the first symptom when I went back to my home town for a visit. My Mother and I were out shopping for a bun warmer when we ran into a neighbor lady friend who's known me all my life.

"Ciel," the blonde lady hollered to my Mother across appliances "Is this little Rickie?"

"Rick, you know Mrs. Plumb, don't you?"

"Of course, I'd know him anywhere," she cackled and continued as if I weren't there. "Tell me, how is the ho"?

"As well as can be expected."

"Is he healthy and productive?"

"Considering."

"HOW proud YOU and Morrie must be. Tell me, is the boy still single?"

"Yes, Edith."

"A regular Sherlock Holmes, aren't I? You know -- what did you say your name was? -- my single daughter Marjorie is also single. Still."

"Yes, I know. I read it in the paper."

She grabbed my celery and continued. "Well, don't think she couldn't have been a married lady a hundred times over and then some. And I know what you're thinking--that it's because of Grandma Stacher's anique and heavily insured brooch. She took a bite, "Not true. So consider yourself lucky! "Lucky?"

"That she's saving herself for you."

"I didn't know she was."

"She doesn't either. But the lady who does my feet, who also dabbles in tea leaves, told me that she saw Marjorie's star ascending over your Toyota. Which reminds me," she said, fumbling around in her purse, "did I ever show you the professional photos we had taken of Marjorie after we had her nose fixed?"

The next incident occurred when I was buying a silver tray for my parents' golden anniversary.

"You registered, kid?"

the salesman asked. "No, I already graduated."

"Are you married, kid?"

"Not yet."

"What're you waiting for--the right girl or something?"

"It just never occurred to me to get married."

"Never occurred to you? Now take my sister Gilda..."

"Yes? What about her?"

"Nothing. Just that. Take my sister, Gilda. You know, kid, you guys are the ones who are really lousing up the silver business. And it's not only me--it's Manny the monogrammer and Lilly who puts your name on limens."

"You eligible types are putting us all out of business. You're ruining us. Sleep well with that one on your conscience."

"Oh, I'm sleep well at night. I am the proud owner of a monogrammed sterling tea service for twelve which looks quite elegant on the board that covers the radiator in my kitchen."

SPORT PARACHUTE CLUB...
**Alpha Rho Omega**

Action has been good in Alpha Rho Omega Fraternity this summer. Our membership has almost tripled from what we had last summer. Films are featured at all meetings when we don’t have guest speakers. Capt. Kim Scribner addressed the fraternity early this summer with an interesting recap of his life in aviation. Last month, two representatives from the British Aircraft Corporation gave Alpha Rho Omega a presentation on the Concorde SST, including a film, some slides, and a question and answer period. It was basically the same presentation they gave the airlines for sales purposes.

Elections were held last Wednesday evening. Scott Engler was elected the new Secretary. Four new members, elected to the Executive Council are Gill Hadden, Ron Cheshire, Ray Ringhoff, and Butch Chastain. Congratulations gentlemen.

Two new members were accepted to the bonds of Alpha Rho Omega at the last meeting also. They were Mr. William Hudson and Mr. Bruce Campbell. Mr. Hudson will pursue the AMER program after he completes the AS and Mr. Campbell will pursue the AME program. Both are currently in SL 14. We welcome you both as brothers. Alpha Rho Omega and Alpha Beta Rho are planning a joint banquet to be held at the Carnival Motor Lodge on the 29th of July. Two speakers will be featured. Banquet notices will be sent out to all members.

Our Vice President, Jim Baerwolf, has been selected to serve as the student representative on the Board of Directors of Embry-Riddle’s new fixed base operation located on the Ormond Beach Airport. He is the only student to serve on the board of six people, which include Attorney Phil Elliot, Vice President of Chesebrough and Mansfield, Mr. Al Barks from aircraft technology, Lee Spence-President of Spence Chevrolet, and Assistant of Dr. B. Odom Insurance.

Anyone interested in Alpha Rho Omega Fraternity is welcome to visit our meetings which are held in the Lakeview Mobile Home Recreation Hall at Nova and Reed Canal Rd. The next meeting will be Wednesday night, July 26th at 7:30 PM.

**Mansfield attends Training Sessions**

Vice President of Student Affairs N. V. Mansfield has been selected to attend three training sessions to be held in Madison, Wisconsin, in accordance with that state’s University. The program, entitled “Project on Design Strategy Training for Educational Systems”, will focus on development, design, and planning of educational products and procedures.

Dean Mansfield has selected a project on which he will work during the program, one which pertains to his normal course of duties. The idea is to develop a ‘University Club’ concept which might establish a break-even student/faculty/staff center for the entire campus.

**DID YOU KNOW THAT?**

NASA has requested proposals for a waste disposal system for its space shuttle. An important specification is that the system be suitable for male or female astronauts. This is the first indication that NASA is considering women astronauts on shuttle flights or for space station duties.

Lippisch Research Corp., Cedar Rapids, Iowa, is developing an airfoil “boat” that will cruise from 92 to 178 mph. It will be a winged, dynamic air cushion vehicle that can actually fly over water like an airplane within or just above the ground effect region.

Recently-released FAA statistics show that of the 720,028 US pilots, nearly 42% are private pilots. There were 299,491 private pilots in 1969 compared with 140,573 ten years ago.

"The Making Of A Pinko President" or "McGovern Through Rose Colored Glasses"

The opinions expressed are not necessarily that of this Military-Educational Complex, its hierarchy, the peasants who support it or the rich uncle who supports them.

This means: the school, the AVIONS, the students, the staff or the writer, ed...

Four years ago the People's Pinko Party held a fund spending to determine who the people would elect. The PPP chose the home of their strongest member, Daley. They spent their money and decided on their man but a funny thing happened. A stray newsman wandered outside and saw police rioting against some rock throwing "peacefully demonstrating" weirdos. Well the Pinko had elected a real talker. He proceeded to explain it away. Well, this Motor Mouth explained everything away, including the election.

That same year a few flat Entrance Fat Cats held their Propaganda Parade in sunny Miami. These Fat Cats nominated a 2 time loser. In Miami the peaceful demonstrators tried something different; they demonstrated peacefully. Old garbage mouth of the Pinkos layed down such a barrage of jabber, that the people decided 4 years of this noise pollution would be too much to bear and elected the Fat Cats loser.

A power hungry Pinko from South Dakota watched all of this and said if the loser can win with the help of some misfits, it'll a landslide with the malign contents. He worked his way into Chairmanship of a committee to review the Process of Picking the Pinko. In the true spirit of our "long haired" forefathers, the Pinko threw out all the rules and added his own. Now all the weirdos, women, blacks, wops, polacks, fairies, and ever more malcontented deviant are included. Then a year early the Pinko announced his candidacy for president and hired speech makers to teach him to say all the right things to these misfits. The writers taught him to be an overaged adolescent who runs around talking about the establishment, chauvinist pigs, whitey, and all the other "bad" things of America. Pulling troops out, cutting the defense budget, and sticking his head in the sand trying to ignore the commies are only a few more of the Pinko's little games.

That Pinko held his coalition together and steam rolled the People's Pinko Party Parade and the Propaganda meeting in Miami. The Pinko is now hoping he can hold the deviants from deviating from the Bandwagon after shooting down their proposals on, grass, science, peace and more free money.

My factual conviction is that Pinko should be ground up and fed as "Red" meat to the commie Panda Bears.

After serving with the Student Government Association for over a year, I have noticed a vacuum has developed in the upcoming presidential election. I wish to run for that office.

I realize many feel this is an early date to announce, but the election is just slightly less than 2 months away, and I'll need the time to build my backing and let the people know my strength and platform.

Thank you.

IF YOU HAVEN'T PURCHASE A "1971" YEARBOOK NOW IS YOUR CHANCE TO DO SO AT 1/2 PRICE. THEY ARE ON SALE IN THE SGA OFFICE FOR $3.90.

DID YOU KNOW THAT...

In 1970 the top 600 airline pilots (salary wise) grossed an average of $58,400, including fringe benefits, while spending an average of 48.5 hours per month on the flight deck.

The US Department of Agriculture and the National Aeronautics and Space Administration are developing a satellite which will be used to detect the presence of marijuana crops from orbit.
BUT HONEST SIR, I CHECKED
THE WEATHER BUREAU, THERE
IS NO LIFT TODAY.
DID YOU KNOW THAT:

Every 100 new jobs in the aerospace industry generate another 160 or more jobs in unrelated fields.

There is no truth to the rumor that out of 100 recent ERAU graduates, only one is unemployed; his father could not use him this year.

SUMMER OF '72 AUTOCROSS

SUNDAY JULY 23, 1972
