Supported by Student Body

Paying Jobs In Europe Available

How any student can independently earn his or her trip to Europe by simply obtaining a paying job in Europe. A few weeks work at a resort, hotel, or similar job in Europe paying more than twice the previous trip costs or even traveling by air allows spending the same price for the new trip cost. A couple more weeks on the job earns enough for traveling the entire round Europe before returning to the United States. Thousands of paying student jobs are available in Switzerland, France, Germany, Italy, Spain, and Portugal. Whether previous working experience necessary or not, the language is not required for many jobs. How to make certain every student gets to spend a good time on their trip to Europe by Europe.

AIR FORCE ROTC TWO AND FOUR YEAR SCHOLARSHIPS AWARDED

Air Force ROTC, Detachment 157, at Embry-Riddle Aeronautical University has awarded two-year scholarships to three members of their Advanced Program. Recipients of the two-year scholarships are James A. Danby, Jeffery B. Harris and David A. Schants. These scholarships will provide each student full tuition, books, incidental fees, and a $100.00 a month subsistence allowance while he is attending Embry-Riddle. Upon graduation from E-RAU, all will be entering Air Force pilot training.

Society of Hispanic Students

A €tudents enrolled in APROC scholarship benefits.

The Detachment also awarded four-year scholarships to Embry-Riddle students enrolled in APROC. Freshmen students George D. Clark, III and Matthew M. McCombs both received three-year scholarships by Col. Clinton L. Hilton, Commander of Detachment 157. These scholarships provide the same benefits as the two-year scholarships and will amount to approximately $9560.00 for each student. Both students plan to enter Air Force pilot training upon graduation from Embry-Riddle. David S. Jasinski, who has a three-year scholarship, transferred to ERAU this fall from Case Western Reserve University. Starting Air Force ROTC's first trimester at ERAU, we have six students receiving APROC scholarship benefits.

Qualified freshmen and sophomores ERAU students enrolled in APFOC will be competing for two and three-year scholarships this coming spring.

Members Sought For Student Flight Safety Council

by Robert Beebe

As you well know, safety has a positive position, and plays an extremely important role in aviation. Unfortunately, aircraft accidents and incidents occur every day, ever increasing the need for new safety procedure developments and safety education. We, the students of Embry-Riddle, in an attempt to do our part in this vital aspect of aviation, are establishing a Student Flight Safety Council. The purpose of this council is to create a council of the students to work with the students, with the objective of making available, through various programs, safety information to produce more safety conscious pilots. One area in which the council will participate is aircraft accident investigation. Also, other programs are being established which will prove to be most interesting and, hopefully, useful to you and your cooperation, most effective.

May I now take this opportunity to urge and invite all interested Aero-Science and Pro-Pilot majors to serve as members and officers on the council. I'm sure you will find your participation to be very beneficial and knowledgeable in your career as a professional pilot. As a pilot, you have an obligation to the concept for safety, so if you're interested in serving as a member or an officer on the Flight Safety Council, please attend the meeting Friday, Sept. 15, 5:00 PM in room 112, Building H, Gill Robb.

Are You Liberated

We're not quite that radical, but if you'd like to get out of the house occasionally and meet some new faces, come and join the Vets Assoc. Wire Auxiliary at an open house on Tuesday, Sept. 19 at 7:30 p.m. at the Academic Complex, Building A, study hall.

There will be refreshments and lots of good gab. All ERAU veterans' wives are welcome. Your husband need not be a member of the Vets Association. So don't be a stranger for you to join us.

College seniors preparing to teach school may take the National Teacher Examinations on any of the seven different test dates announced by the Educational Testing Service, a nonprofit, educational organization which prepares and administers testing programs.

New dates for the testing of prospective teachers are: November 11, 1972, and January 27, April 7, and July 23, 1972. The tests will be given at nearly 800 locations throughout the United States.

Results of the National Teacher Examinations are used by many large school districts as one of several factors in the selection of new teachers and by several states for certification or licensing of teachers. Some colleges also require all seniors preparing to teach to take the examinations.

The school systems and state educational agencies which use the National Teacher Examinations may provide two- or three-year scholarships for their two-year or three-year teacher examination candidates. Some colleges provide partial scholarships. See Related Article Page 6

The SGA President's Corner

The biggest news item this month is McGovern's recent statement. The former senator, who has truly gone international: the residence center in Germany is now in operation. I imagine that this will really give a sense of accomplishment to those students who have been here for a long time and the few who were here before the Kielii. Possibly a renaming of our university to "Embry-Riddle Intercontinental Aeronautical University" might be in order.

Again, I want to stress that the elections are coming up on September 27. Many petitions have been picked up already, but there are many more senatorial openings that have come up, and they got involved and begin campaigning.

I have been informed by the Traffic Department that they will start giving out tickets to traffic violators. Let me urge you again to read your traffic regulations carefully and abide by them.

Your SGA is presently working to eliminate some problems in the parking lot with the Student Center and the Academic Complex.

Your President,
Stan Steecken

NEWS & VIEWS

The Olympic games have always been truly the "field of friendly strife" where individual achievements are the goal, in a peaceful way. Years of hard work, sacrifice and practice can be on display for mankind to see. Any hostility that exists in these different nations, languages and races are brushed aside as we come together for this purpose for the benefit of our sons and daughters. They have helped to ameliorate some of the better things as witnessed by the triumphs of Jesse Owens and Bob Swift and other Negroes in 1936. We have attempted to turn these games into a glorification of the human spirit - to show the "non-Aryans" who competed, that Hitler's "master race" theory was a lie. And the contributions of Owens and his teammates made toward equality will always be remembered.

Tiny Finland's mastery of the games during the 1920's led by the famous Paavo Nurmi - was the forerunner of the Finn's historical struggle against the takeover by Finland's neighbor's.

But the Olympic flag continued to fly. With this in mind, we have presented a copy of the first issue of The Avion to the student body. We appreciate the fact that most faculty members recognize the importance of intercollegiate cooperation and good will.

WANTED
All Vets, Reserves, and active duty men are invited to attend the Veterans Association first meeting Thursday night at 8:00 p.m. at The Roxy's Head Lounge, adjacent to Howard Johnson on I-95 and 92. Memberships will be available, and beer will be $4 for a can.
What's A Jaycee

The Jaycee Creed

As Believers

That faith in God gives meaning and purpose to human life;

That the brotherhood of man transcends the sovereignty of nations;

That economic justice can best be won by free men through free enterprises;

That government should be of laws rather than of men;

That earth's great treasures lie in human personality;

And that service to humanity is the best work of life.

This Creed is thought to be the perfect expression of the spirit which lives in the hearts of young men who want to better the world in which they live.

The actual purpose of the JayCee's is to improve and develop the community in which they live, and to improve and develop the individuality of the members of the JayCee's and train them for civic leadership, and business advancement. The JayCee's are non-political, non-sectarian, and do not have any political affiliations.

The young man of the JayCee's, age 18 to 35, learns by doing. They gain courage, convictions and enthusiasm by pulling together for a worthy cause. At the same time they gain leadership skills that cannot be learned from any school in the world. No job or task is too small, or too large.

The JayCee's have sponsored such things as the Miss Daytona Pageant, blood drives, the Round Dog Derby, and are active in combating drug abuse and other projects too numerous to mention. In the last few months they plan a surfing contest and a vote drive to get out the vote.

This article isn't sponsored by the JayCee's and it is not an inducement to join them. However, if you think you'd like to better yourself and the community in which you now live, and between 21 and 36, go down to the Chamber of Commerce and get some more information.

On yes, the JayCee's also have activities organizations in almost any city in the United States. They even have chapters in most state prisons at the present time.
The Embry-Riddle tennis team this past year finished their regular season in April. Now they are faced with the task of finding tennis players to replace half the team, which has graduated. This is Coach Carl Brown’s problem.

The team improved tremendously in the last two years and there are many excellent candidates to fill the positions. The team is coached by Dean Spears.

Inter-Collegiate Intramural Athletics

Inter-collegiate sports include soccer, basketball, volleyball, tennis and baseball. These teams, known as the Eagles, play nationally ranked colleges, universities, and junior colleges from all over the United States.

Soccer-N.V. Mansfield Basketball-Eddie Worzbach Baseball-Dr. Bob Brown Volleyball-Eddie Worzbach Tennis-Carl Brown Golf-John Spears Intramural programs provide an opportunity for all students, faculty, and staff to participate in the sports of their choice.

The first match of the season is against St. John's University in Palatka on Sept. 19. This is followed by a match against P.I.T. at Melbourne on Oct. 5. So the team is looking forward to a good season.

For you guys who are more athletically inclined, you can go one step higher and try out for the fall intramural sports of soccer, volleyball, or basketball.

So, there's going to be fun and health this winter if you just get out of the house or dorm and put in some effort in organizing a team or trying out for one.
DELTA CHI
by J. Hunter

All the brothers are back for another trimester, and things seem to be going better than ever before. First of all, we got our old house back, thanks to Kd. We were able to have a lively monthly party. This past Saturday the brothers got together and did a complete over-ruling of the old place, and it is now ready for the most outrageous rush party ever. The party will be held Friday night, September 22 at 525 South Ridgewood Avenue. Bill Nison, our new rush chairman, has been planning this one for weeks, and he guarantees it to be "the finest rush party in our history." We have had some great ones!

For the past two weeks the new "Delta Chi Jets" have been out on the field practicing for the upcoming intramural football league. The Delta Chi team has been undefeated in football for the past two years now, and under the supervision of Skip Stone we are hoping for another equally successful year. We lost a couple of five players since last year, but some of our new members and older one are beginning to get the plays down really well—so it looks as though we are in pretty good shape.

Congratulations to Brother Ed Puceo and his new wife Philam who were married on August 12th. Best of luck! That's it for this week. See you all at rush.

Sigma Phi Delta

by Mark Dessendorf

What is a rush? There are many ways to find out. Tonight, Sept. 16, come to 518 S. Ridgewood Ave., to the happy halls of Sigma Phi Delta. An enjoyable time is your starting at 8:00 PM until... Don't listen to all those rumors about pledging until you talk to us. The days of hell night and degradation are over. Instead, everyone, brothers and pledges alike, work and play together, study together. Sounds good already, huh?

In the Avion last week, the inmates of E-RMU were asked to contribute their vast artistic skill to design the new school seal. The brothers have put their heads together (a most monstrous occasion in itself) and have come up with several designs. Space is too limited here for any detailed descriptions, but one design showed a student perched upon the wing of a 172, sadly stuffing $20 bills into the fuel tank.

During this week the huge yellow machine (Sigma Phi's football team), worked on their new plays, only to upset everyone when they ran their plays in the right direction! This came as such a shock to the team they broke off the practice for a little over a couple six packs. All kidding side, the team is in good shape for the upcoming season.

Be sure to come tonight to the Rush. After all, "you deserve a break today..."

In class today sitting still Pondering over how I am going to pay my bill Listening to the instructor teach There we should wash society with a little bleach Telling us that non-violent people are yelling "kill" which reminds me, I haven't paid my bill I hear that people of America should stick together and start spreading a little love on your brother So with love in my heart I went to a gas station and thought I'd check on this brotherly love in this great nation I pointed a gun at the attendant and said "brother open the till" The attendant laughed and said "what's the matter, you didn't pay your bill?" And then he hit me in the head with a wrench The next thing I know I am sitting on a Police Station bench In court today sitting very still Pondering of a better way to pay my bill Listening to the judge preach The I should be washed with a little bleach Telling me that violent people should be killed Which reminds me that I still haven't paid what I was billed.

The first meeting of the trimester for the American Institute of Aeronautics and Astronautics will be held. The meeting will begin at 7:30 P.M. in room 306.

Two movies will be shown: "Space in the Seventies — Aeronautics" and "Space in the Seventies — Man in Space, the Second Decade." The AIAA is a national organization whose purpose is to help keep everybody in the Aeronautics field abreast of new developments and to help encourage new ideas in the field. They do this with monetary rewards and annual conferences for anyone interested.

The AIAA puts out monthly magazines for the entire AIAA membership and quarterly student magazines. Anyone interested in Aeronautics and Astronautics will be welcome next Monday night in room 306 at 7:30. I hope to see you all there.

There is no truth to the rumor that the Journalism class is a bunch of idiots.

The first regular meeting of the SGA Senate for the 1972 fall semester was held on Monday, September 10. The meeting was conducted by Three Officers and 14 Senators.

President: Acting President Stemmick suggested that the Senate form a delegation to meet with the Senator's appointees on Monday, September 10. Mr. Merriam informed the Senate that the student center now and after 11 a.m. are available for planning some technical difficulties will be in operation.

Treasurer: Mr. Arroyo discussed his financial statements and expenditures for the incoming students' barbecue.

Social Functions: Mr. Merriam and Mr. Merriam also discussed the social activities for the coming weeks.

 resolutions were passed by the Senate.

The meeting was adjourned at 11:15 PM.

Afro-Roman Recipient

Colonel Alton L. Hill-tom, Professor of Aeronautical Engineering at Embry-Riddle Aeronautical University, reports that Detachment 197 has received notification from Air Force ROTC Headquarters that they have received their first four-year College Scholarship recipient. Matthew N. McComb, a freshman from Ingham Falls, N.Y., was selected from nationwide competition to receive a four-year AFROTC scholarship. He will be en- tering Embry-Riddle Aeronautical University this fall to pursue his Bachelor's Degree and an Air Force commission. The Air Force ROTC Scholarship will provide full tuition, laboratory and incidental fees, and a book allowance for all four years. As a scholarship recipient, he will also receive a $1,500 monthly subsistence allowance. Matthew will be a member of the Air Force ROTC Corps of Cadets and an undergraduate student at Embry-Riddle. According to Col. Hillittom, Matthew should make a fine addition to the Air Force ROTC Corps of Cadets established at Embry-Riddle. The detachment has 12 students in Field Training this summer and anticipates an enrollment of approximately 50 students in Air Force ROTC this fall.

Intramural Athletics Cont'd.

Intramural Flag Football

There will be a meeting of all team captains on Monday, September 19, in Room 108, Building A at 7:00 p.m. to discuss rules and scheduling. Play begins Sunday, September 24, for league games.

A student may play on any team only if all his others teams and submit their rosters to the Department of Athletics. Further information will be released as each event comes into season.

Flag football:
- Entries open-9/7
- Entries close-9/20
- Play begins-9/20

Volleyball:
- Entries open-9/25
- Entries close-10/5
- Play begins-10/10

Hi! My Name is Jeff by John Derven

The assignment really is that everyone has problems. What has to be done is to recognize where these problems interfere with a student's "living."

Jeffery Ledewitz, Guidance Counselor, recently outlined goals which include: increasing self-reliance, personal productivity, reduced fear, and helplessness. Students need realistic plans for the future. "I think one reason that many students don't come in is they don't know what services are available," said Ledewitz who began counseling at E-RU in February.

"When we talk about counseling and guidance we're not just talking about problem-oriented things," Ledewitz continued. The counseling center helps students find graduate schools and offers career counseling. Through this office it is possible for students to integrate programs from different universities. There are a number of various job classifications the student can learn about by coming in and talking about his career goals.

Besides career information and personal problems, assistance is available in study habits. "Where a faculty member has only X number of hours to work with his students...a student who comes in here is in for a much longer period of time on an individual basis," Ledewitz feels that the roommates are not going to be a case in this office. "There is a lot that the counselor can do here."

"Counseling and guidance is separate from Psychology," Ledewitz stressed. "The student who comes to the counselor is not trained in the deep psychological problems the indivi-

Just might have. If students feel they have these problems, Volusia County has The Guidance Center. The approach of this office in regard to problems being normal, not abnormal...we start with the idea that these problems are there."

The student, because he is directly involved, often loses the objectivity and doesn't see the various alternatives he can select from. The counselor doesn't take the responsibility of making decisions for the student but rather needs to make his own decisions...learning is growth, and this is what counselors are interested in.

Jeffery Ledewits is available from 8 a.m. to 5 p.m. Tuesday through Friday. His office is in Building 5, Room 8, phone extension 55.

Placement Office has the following employment offers:

- E-RAU is looking for a person with a mind for finances. Regional Manager with the University at Embry-Riddle has an opening. The guidance center has received notification from the University for Engineering graduates in the following areas:

  - Advanced Propulsion
  - Airframe and Power Plant Design
  - Aerospace Mechanics
  - Avionics
  - Controls Systems Analysis

The Guidance Center has opened an office in the deep psychology in planning. The approach of this office in regard to problems being normal, not abnormal...we start with the idea that these problems are there."

E.R.A.U
Thanks Student Photographer

Jerry Erickson, Air Science senior, has been a photographer for The Avion since last spring. He is now a photographic editor. The Avion photo staff spends a minimum of 8-10 hours weekly and usually more, trying to provide the photographs needed for the weekly Avion and for other miscellaneous school functions.

This trimester The Avion and all other student publications were incorporated into a 2 credit journalism course, supposedly at no extra cost to the students who volunteer their time every week and had already registered for the full trimester with full schedules.

Well, someone in the school's hierarchy doesn't see it that way. They want $90.00 from Jerry Erickson because he has carried fewer than 18 credit hours this trip. They want $90.00 so he can carry the 8-10 hours of his time a week.

The school says they can't just give away 2 credits. Well, every other staff member who has registered for the course has not paid one cent extra. Yes, the school really appreciates guys like Jerry!

Concerned student

Is there any truth to the rumor that E.R.A.U is Co-education?

BIGOT VIEWS

The patriarch of the Pinko Political Party has softened! The Pinko is desperately trying to keep his nominating de-legation of Devente by saying his position has not changed and is trying to send everyone through the redefinition. This Pinko politician passed judgment on a poor first choice only to find a Democrat that hasn't any enemies, experience, or guts to say no.

McGovern's other stand? He has softened his stand on capitalism to his Commie friends. He tries to live down his promise to crawl on his knees and has shot down the inaspicious free money he promised.

The issue in this campaign is strictly personal. Do the American people want someone who takes action first and speaks later, or someone who takes a stand, then doves its meaning.

Pinko McGovern demonstrates poor judgment and no spine. He verbalizes the Radical Unworkable Ideals of the New Left. Then compounds the consequences trying to change America with his right foot and hold position with his left.

The Panda Bear still needs some good "red" meat.
