Dual Degree Program Offers Diversity For Students

The Dual Degree Program of E-RAU and Georgia Institute of Technology offers a variety of courses for E-RAU students. The program which combines three years of academic work at E-RAU and two years at Georgia Tech culminates in the issuance of a degree from both E-RAU and Georgia Tech.

Undergraduate degree offerings at Georgia Tech include a Bachelor of Science in Civil Engineering, Electrical Engineering, Industrial Engineering, Mechanical Engineering, and Engineering Science. Civil, Electrical, Industrial and Mechanical Engineering, and Technology degree programs are also available.

In addition to the Dual Degree Program at the undergraduate level, highly qualified undergraduates may be considered to enter Georgia Tech after three years of undergraduate study at E-RAU with the intent of seeking a master's degree at Georgia Tech. Upon completion of the undergraduate years, the student would receive a bachelor's degree from E-RAU and a master of arts degree from Georgia Tech.

Wang Family Receive Citizenship

The Wang Family became citizens of the United States on September 12, 1972. Mr. Wang is an Associate Professor of Mechanical Engineering at the Aeronautical Engineering Division. He came to E-RAU in September, 1965, and has been in the United States eleven years.

When Mr. Wang was asked what was the most difficult part of becoming a citizen, his reply was, "waiting for the five year residency requirement to pass". When asked about the oral exam she said, "the whole family had prepared together in learning American history and civics and were very excited and enthusiastic about it. When the time came to take the exam it was easier than we thought it would be." 

Mr. Wang is very proud of his American citizenship. He says "We all have a great feeling of pride in becoming American citizens. We have looked forward to this day for a long time and now it finally came. We are very proud to be Americans." Congratulations are definitely in order for the Wang family.

Last Day

The last day to register to vote for the November elections will be Saturday, October 7. Anyone not registered and desiring to vote should contact the County Supervisor of Elections at the Volusia County Courthouse on City Island.

S.G.A. New Officers

Dick Reilman, Mike Lomori, John Irvig, and Jim Halley took their oaths of office last Tuesday, followed by 9 of the 10 persons who were elected to the Senate. Bob Harrelie gave the new officers a warm welcome.

Dick Reilman took the stand following the John Williams Airtransportation speech. He had planned the little surprise to aid the goals of the Senate during his term, but had to shorten the message to only congratulatory remarks and a thank-you note together... "Forget the details of the past and forge ahead toward better things."

The lecture will begin at 8 PM in Elizabeth Hall Auditorium.

The University Artists and Lecturers Committee in cooperation with the Stetson Student Government Association.

The Lecture will be at 8 PM in Elizabeth Hall Auditorium.

On the contrary, it is the main communicators that link between student and administration. We are here to protect the student body to not only the administration and local community, but also to the leaders of the nation so that they recognize the importance of their role.

Ralph Nader To Speak At Stetson

Consumer advocate Ralph Nader will speak at Stetson University October 26 as part of the university's fall calendar for the coming months.

Nader's appearance on campus is sponsored by the University Artists and Lecturers Committee in cooperation with the Stetson Student Government Association.

President's Inaugural Address

The Dual Degree Program of E-RAU and Georgia Institute of Technology offers a variety of courses for E-RAU students. The program which combines three years of academic work at E-RAU and two years at Georgia Tech culminates in the issuance of a degree from both E-RAU and Georgia Tech.

Dean of Continuing Education, Dean Wilson said that his office would be available to assist any student who wishes to investigate these programs.

F.A.A. To Enforce Security Rules

At D.B. Airport

During an airport security meeting last Monday, F.A.A. agents announced which involved Enhanced Aircraft Screening, we have a few students that are boarding National and Eastern Airlines aircraft without prior permission.

The Federal Aviation Administration has imposed more stringent regulations pertaining to aircraft security. Any student in turn will effect those students that do not understand the importance of looking over commercial aircraft at D.B. Airport. New regulations are in effect that relates to parking ramp unless you obtain a reservation from Mr. Blackburn or Mr. Bryant of the airline office.

It is now necessary to request a reservation in order to remain clear of the commercial aircraft at D.B. Airport.

However, if you do not follow the above procedure, your name may be placed on a list of those students that are suspected of theft.

If you are arrested for violation of federal, state, and local regulations,
News
And Views

The Term paper Arsenal ad has been the subject of controversy since it first appeared in this newspaper four weeks ago. If any student is interested in using this service, hope you had previously taken note of the address as the ad will no longer appear in the Avion.

Last spring some 600 students of the University purchased term papers which denied their degrees after being suspected of submitting purchased term papers.

Academic plagiarism is a serious offense on a University campus and this paper will no longer condone cheating at Binary Riddle. Whether you choose to use the service of this company or not, it is up to you. If you do, be careful.

May I make it perfectly clear that the decision to remove the Term paper Arsenal ad from this paper was in no way influenced by the administration or faculty of E-Raw. After studying the effects of other campus term purchased material, I feel an ad of this kind could be detrimental to the honesty of the students. It would be wise to refrain from using any of these "papers" you have four or five term papers to write in a trimester, but the Avion does not want to bear full responsibility of a student who was denied a degree because his campus newspaper "advocated cheating."

Letters
To the Editor

Talking about our problems seems to be a common point of interest amongst us, but when it comes right down to solving them, no one wants to be first.

I am biased in this article because I live in the dorm, which will be the main topic.

After being shifted around from the dorm to motels, to motels to the dorm, room to room, the dorm was less appreciated by the students. Problems like these could have been solved by "proper management".

A major complaint of the residents in Dorm I is the cross-country run for a decent meal at a local restaurant. Money wise, you will go broke fast. Who, I ask you, can afford the luxury of dining out every day? Not many of us.

How can this problem be solved? Certainly not by putting a hambur-
gar grill close to the dorm. "You'll still pay for it, money!" House should be transformed into kitchens. Why don't we have the same rights as our female students. Are we less? I urge some people to read the "Bill of Rights".

Another strong discussion of interest are the washers and dryers. Even with the work, you can see the guys standing waiting, sometimes for the past week. Isn't there a better solution?

Many a time I've seen students trying to get those vending machines to deliver its pay for one of the machines. Often one doesn't get what he has paid for sure. But if we can get rid of the machines, has anyone ever thought of replacing the faulty machines?

Changes must be made. The question is: "WHEN?"

A Spirited Campaign

by Curtis J. Forces, Jnr.

An old country boy once said, "ain't no pol-
tician ever got licked that didn't do no cam-
paigning, 'cept when folks didn't do no votin.'"

From the candidates' point of view the SGA election campaign was a very spirited campaign, and ranks among the best we have had at E-Raw. Everyone involved, including those that lost, should be congratulated for the spirit and enthusiasm displayed.

On the other hand, students' agent was reflected in the voter turnout, which was indicated by the 49.5% of all eligible votes that were cast. Even so, this was the best voter turnout we have ever had.

Student participation in student activities is part of the extra-curricular activities that make the University more great than it already is. Everyone involved, in turn makes your vote count. After all, don't we want this school to turn into just another "diploma mill?"

If the candidates are interested, I would like to add one other thing to that old country boy's saying "Folks that don't do no votin' don't know nothin' about nothin'."

Inaugural Address

(reprinted from page 1)

I am privileged to protect the students' interests. I can assure you that I will take the time to research any decision I have to make before I take action.

I will promise you that I will work on getting that worthwhile and long-needed compensation for those SGA representatives who demonstrated an outstanding performance of their duties.

I stand here making this address in an attempt to impress upon you, the Senate, that it is in fact you that make this Senate tick. Your predecessors have made it the respectable organization that it is today, and it will be with your efforts that we will become even better.

How is the time to forget all old grievances. Now is the time to throw away any immature feelings for each other which we may now. Now is the time to put together the knowledge, experience, and eagerness which is needed in an organization to be productive and efficient.

In conclusion I would like to appeal to you for your support of my job. I promise you my support, together we will be successful in accomplishing our goals.

Thank you,

Richard B. Reimann
SGA President

Bigot's Views

The American Commies have finally come home: "Moscow Mc Govern", the Pinnochio Party's Presidential candidate, believes the South Vietnamese government would leave when he is elected. Then a cosmic coalition would take control! The "Murduring Coop" has given up the idea of dealing with a Commie dominated South Vietnamese government. This means the American Commie leans more to the left than the blood thirsty Viet Cong.

Any right-thinking, freedom loving American knows a vote for that "Pin Head" is a vote for a world dominated by Reds.
A small group of archaeologists digging in the mountains of Peru have made a large manuscript concerning life and times before the Inca. While painstakingly transcribing the cuneiform script, they have noticed striking similarities to the account of the BATTLE OF THE BALLOT.

In the Kingdom of the Painted Peasants, there lies a small realia near the capital known as "The Realm of the Ballet." It is a place of mystery, trance, and rather peculiar traditions. The community lives in harmony with nature and each other. They hold a ceremony each year called "The Great Payk." The ballet itself is a series of events where performers enact the story of their ancestors, weaving tales of their history and culture into a sacred dance.

The ballet begins with the selection of the "King of the Painted Peasants." This role is passed down through generations, and the current King is known for his wisdom and leadership. He is chosen by the community through a series of rituals that test his ability to lead and make decisions that are in the best interest of the kingdom.

The ballet is a deep reflection on the cyclical nature of life and the importance of community. It is a celebration of the past, present, and future, and a reminder of the interconnectedness of all beings. The performers are skilled in a unique dance style that combines movement, music, and storytelling to convey the narrative of the ballet.

The ballet is performed in an open field, surrounded by the mountains, and is open to all members of the community. It is a time of purification and renewal, and all who attend are deeply moved by the beauty and depth of the performance. The ballet is not just a performance; it is a living tradition that connects the past, present, and future, and is an integral part of the community's way of life.
Sunday Morning
By Robert Arbia

The Vets football team has been chosen the team of the week. This is the second season for the Vets. Fortunately most of last year's team was able to return to the field. This season finds the Vets an experienced and spirited team. To be sure last year was not very inspiring to the team. Their offense was not up to par and the Vets lost many games. The defense was strong last season and only eighteen points were scored against them.

After a long hot summer, the offense has gotten it together and started the season off with a bang. The first game of the reason found the Vets victorious over Sigma Chi. Last week the Vets played a beautiful game against the Cowboys and again found the nectar of Victory sweeter than defeat. This Sunday the Vets play Lambda Chi Alpha at 10 AM. The Vets are looking forward to meeting the Delta Chi Jets in the last game of the season. It would be the Yale eleven game of the South.

The Sport Parachute Club

The Sport Parachute Club was having their meeting again at the RSA Bar-b-Que. Ten members of the club jumped into the big field behind the dorm. The first load of five jumpers left the aircraft at 4,000 feet. The second load went up to 7,000 feet. It was a great demonstration, and we hope some day you liked it enough to join our ranks.

The National Collegiate Sport Parachuting Meet is coming back to Deland for its third year. Those of you who will be here during the Thanksgiving holiday would get a big kick out of watching this thrilling event while cheering your team on. We have a good team in the making and will, in the meantime, improve the Avion, introduce them to you.

At our last meeting we had the good fortune to have a talk given by Capt. Kim Schmitz. He was a jumper in those days and has always been in the Air Force as a sports officer.

If you're interested in our club, drop a line to Box 1417 or see Jim Nordeen at the Administration Office.

By the way, if you're curious, why landed on the runway during the Bar-b-Que jump? Apparently, it was because I was conducting a top-level research project on the weight-bearing capacity of runway 16. I am unhappy to report that the experiment maintained its structural integrity and happily to add that I did also.

It's bad enough when his head is here...
Today's Music
by Rory Donnelly

Ordinarily, unless a live album is done with exacting precision and control, it just doesn't make it. Somehow, all of those things that make up a real and true live album fail to capture the mood of the audience and the excitement of the show, and it just doesn't work. Here is a live, improperly double album that is the finest. It is clear that the feeling and some of the excitement that the concert hall has been captured on tape.

The name of the group is the band and the name is Rock of Ages. Robbie Robertson, Garth Hudson, Rick Danko, Richard Manuel, and Levon Helm make up this remarkable group of instrumentalists. They have been together eleven years. Several of them were working with Dylan. Who could ask for a finer tuning?

Rock of Ages is an out-of-the-ordinary album, with a unique mixture of rock, country, jazz, and classical influences. It is my opinion that The Band is headed in the same direction that rock music is inevitably evolving to.

The mood is American. If you will. The words are chosen to go, and the style is so varied that it can't be put into one category. The tempo seems to be toned down in an effort to slow down the album. This technique is not always successful. As far as the vocals are concerned, the Band can only be called unique. There is one characteristic of this album that stands above all the others, however. It is that tremendous asset of the horns to the production. The horns are not short of superab when added to the keyboard operations of Garth Hudson.

From the beginning to the end, there is one hour and ten minutes of enjoyable music. I'm sure it's worth the price.

Don't Get Involved!
by Charles Motham

Last June, David J. Hanley, 30, tried to stop an airplane hijacking at St. Louis' Lambert Airport. He drove his own 1972 Cadillac convertible through an airport fence and rammed the hijacked American Airlines 727 to keep it from taking off. The hijacker with his ransom and his hostages just switched to another aircraft. He parachuted and was captured later.

Hanley now probably wishes he had kept out of it, for he now finds himself in deep trouble. His medical insurance will not fully pay for his injuries. His auto insurance will not pay for damage to his car, the plane, or to the airport fences he drove through. And to top it off, the Federal Government has charged him with interfering with an aircraft.

All students, staff and faculty members, University groups are invited to submit a design that will symbolize E-Ruby-Riddle. The conventional design shown may be used by any student group. The University name and date of founding (1926) must be used.

Designs will be judged by a committee comprised of representatives of the University's Board of Trustees, Faculty, Student Government, and Administrative Staff. The contest was sponsored by the Special Activities Office of the close of business on October 31, 1972. The person or group whose design is adopted by the University will be awarded $150.

PLACEMENT

The following are employed or in communication with the Placement Office and have current information on the

Cooperative Education

Cooperative Education, which has been in the planning and implementing stages for nearly a year, became a reality this trimester at Embry-Riddle. It is our desire and intent to expand the program as quickly as is feasible. However, the success of Cooperative Education is inter-dependent on several factors: The student; the participating employer; and the overall try Joy Luck when the program through the university. There are benefits to be realized for all parties involved but this article will be concerned with benefits which can be realized by the student.

Some benefits to the student are very real and obvious, and of course, these are important. Some of these are salary earned while on the training assignment, higher earning capability upon graduation, actual work experience in your chosen career field (for one that is closely related) and the opportunity to earn twelve credit hours for elective credit towards your degree requirements. Some of the less measurable benefits include the opportunity to gain industrial experience, which will help you to determine your vocational interests. The college requires that students have a basic knowledge of the field in which they work.

Lean Approval Needed For Student Center

Upon approval of a H.U. S. loan, R-RAU will begin construction of a permanent Student Center in June of 73.

Frank Forest, Vice-President of Development and Planning, stated the major objective in starting construction of the new Student Center is the financing of the building.

Initial plans have been drawn and are under HUD study for possible financing. If this loan is not approved, the school must find private financing for the $1,388,500 complex cost.

The time schedule is as follows:

March 1, 1973 - final plans approval.
June 1973 - bids and construction permits.
July 30, 1974 - complete construction.
July 15, 1974 - occupancy.

When completed, the 30,000 sq. ft. complex will contain a book store, cafeteria (seating over 800), post office, health facilities, placement office, barber shop, a laundry and dry cleaning establishment, game room, and student offices. The complex will be placed between Dorm I and the Gill Robbins Wilson Complex on the north side of the Flight Instructors parking lot. The architect estimated a need for 340 additional parking spaces. It has been stated that a 200 car capacity lot will probably be added. Of the 200 spaces, one-half will utilize the present taxi-way area and 122 spaces will be shared with Gill Robbins Wilson.

Touché Foiled Again

All Embry-Riddle students are invited to join a feminine tennis team (foil, saber, épée). Advise your interest by a short note to Mr. Baker (Room 225, Academic Complex) via mail. Times and place will be established as soon as interest is evaluated.
Student Views
On 1972
Presidential Election

With this attempt at getting the student's views in the Avion, it is obvious the students who would rather not get involved. Despite anonymity, over 40% declined to answer or said they didn't know what the responses received varied greatly; the following is a sample.

"...McGovern is thinking it's just cutting back on the aviation field...in other aspects. I favor McGovern, but as far as my profession is concerned, I will vote for Nixon..."

"...McGovern may have been hurt worse by dump- ing him than he would have been by keeping him (Eagleton). But he didn't have the guts to stand up to the articles in periodicals and newspapers..."

"...I'd like to see Nixon stay in, but only for one basic issue. I like McGovern's attitude and opinion as far as some of his welfare programs are concerned, and I think he would do more for racial equality than Nixon has done. At the same time, it's McGovern's national defense policies that I really can't go along with...Although I hope Nixon is elected, I hope the pressure put on him because of the fact that McGovern was running will cause him to have better welfare programs (educational) and improve the welfare situation..."

"...I disagree with a lot of McGovern's platform, but the main thing I disagree with is the fact that he doesn't seem to be able to make a decision. He has vacillated several times initially in the selection of a V.P., which I think is critical. Because of this type of personality, I don't think he has the decision making ability to be in that office. There's only one other choice, either be forced to abstain from voting or vote for President Nixon..."

"...I think Nixon's got it, but I'm voting for McGovern. It seems like Nixon's just fooled around for the past four years, and now all of a sudden he's getting on his toes and starting to do something..."

"...If McGovern gets elected, the aviation industry will fall flat on its face. That's what we're here for..."

"...I'm sick of Nixon's not doing anything for the common people. He favors the corporations; I think he should take more people into consideration rather than just the few. Also in the area of credibility, people just don't trust him any more. He says one thing, then acts in a different direction..."

"...Nixon will win. I think any man who has done his job that well shouldn't even be up for election. Why should he be choosing his job? But I don't think he'll win anymore..."

"...I would prefer the president be allowed to run while in office; I don't think he should be allowed to waste a year of my life every four years...The guy plays president for three and then plays games for one year, and when he's not running he's playing for whoever his party is running..."
