New Changes May Force Students To Return Early

by Jim Oven

Effective the Spring Term, the University of Florida will have a letter from the University Registrar, containing the above paragraph, outlining their views.

In addition, the feature provides procedural changes and reasons for their return.

The first paragraph explains that instituting Dr. Fene's proposal will not reduce the number of registration periods from the spring. However, a short mini-registration for the second half of the semester will be available.

The second paragraph states that it received during pre-registration is not sufficient for the amount of work involved.

The third paragraph notes that students are not returning as far in advance that it generates additional changes of registration.

8 list procedural changes that should be made, including:

1) A person from the flight department will help schedule students flight periods.
2) A person from the Cashier's Office would take checks from those who wish to pay immediately.
3) Financial Aid Office is to complete all financial arrangements and continue students before registration begins.
4) Wider coverage among school publications is needed. Registration by class preference will be possible with GAA papers will be instituted.
5) Cease paragraph request comments on the proposal.
6) You should contact your senator, Mr. Campbell, Mr. Chrisman, Mr. Yokely, Mr. Kasler, Dean Wilson, Dean Clay, or Dean View's expressing your views, which are needed to make a more qualified decision.

by Curtis J. Poree Jr.

According to Jack R. Hunt, Daytona Beach will be the university plans to buy Daytona Beach Aviation as a fixed base operation managed by E-RAU graduates. In addition, the facility will be utilized as part of the existing cooperative education program that is currently functioning with other business organizations.

Daytona Beach Aviation will be retained; however, the new manager will be a subsidiary corporation of E-RAU. Student employees will be retained.

The method of selection for the new manager will be by an appointed board, the manager in turn will select the new employees.

The executive committees of E-RAU have appointed a board of directors to be responsible for the operation of Daytona Beach Aviation. Members of the board will include Captain Kimball Scribner, Phillip Elliott Jr., Mrs. David Goddard, Jack Hunt, an engineering student and a faculty member.

Students or faculty members interested in becoming board members should submit their names to Mrs. Phyllis Cornelius, the Corporate Secretary in Mr. Hunt's office, for consideration by the Selection Committee.

Also, any student interested in becoming part-time employees should contact Barbara A. House at the Student Placement Office.

Proposed Changes
To SGA By-Laws, passed

by Ron Nyhan

The Congress has passed a 25.7% increase in Veterans' benefits under the GI Bill. This increase is to be retroactive to September 1972.

The increase was disappointingly short of the proposed 47% that the House of Representatives passed in July. Congress has rejected the House's increases, and the GI Bill will remain with a more modest increase of 25%.

The increase is significant for the nation's veterans, who have continued to support the GI Bill since its inception in 1944. The increase will provide a small, but important, boost to veterans who rely on GI benefits to help pay for college tuition and other expenses.

The House of Representatives passed a 17% increase in March 1972, which was retroactive to January, also. The increase gives a single Veteran $41.96 more a month. A married Veteran without children can expect $52.68 more.

The minutes from Congressional Record concerning the entire passage and the names of those Congressmen who voted for or against the increase is available upon request from the Used Bookstore.
President's Corner

"Eau Gallie School Trip". If anyone should see Senator Andy Anderson walking around campus this week, he should put him on the back to show appreciation of a well done job. Approximately 100 miles from here, in Eau Gallie, there are high schools that sponsor junior ROTC programs. A couple of weeks ago, one of the school board members of that area told me that they were almost 70 percent aviation oriented in that area. In reply to him, I said, "What do you know about Embry-Riddle Aeronautical University?" His reply was "Nothing." Afterwards, he assigned Senator Anderson as the chairman of the Embry-Riddle Aeronautical University sub-committee. Chairman which falls under interest of SGA in the SGA. In a period of weeks, Senator Anderson has contacted the school board in Eau Gallie high school interested in the administration, and has come up with an SGA sponsored tour of K-R Air Force for approximately 40 to 50 Eau Gallie high school students. I say, not only will this be a great public relations project for the administration, but we feel sure that an Eau Gallie student will be offered a favorable mention of E-R-A-U. Thanks again to Anderson Lane.

The Dorm Council has decided to cooperate rather work directly with the administration in order to solve the problems inherent in the Dorms. In order to them, we have in the last few weeks, a committee which comes under HEM and is headed by Senator Randy Winters. He will be more than glad to assist the Dorm Council in any way in order to help fulfill their action for their requests.

The A & P grievances, of which there are many, are being handled by a committee. This committee is headed by Senator David Clasen. If you have any requests, grievances, or solutions to the multitude of problems, please contact Senator Clasen through his E-RAU Box No. 548.

My congratulations to the SGA this week. For the first time in almost a year I have just witnessed a very efficient running of last Tuesday's Senate meeting. There were items on the agenda which were previously controlled yet somehow in record time, leaving no moment without the necessary changes to the By-Laws put through. Briefly, the new change outlines guidelines that the president, in the future, will follow in appointing a second member to the University Board of Trustees. Congratulations to Paul Mercadentini. You and your SGA Nominating Committee have done a great deal to ease the case of some Senator. All amendments to the new change were not put through at this Senate meeting. However, I am sure that during next Senate meetings everything will be handled in a much more efficient manner. Last it would like to remind all the students that the annual Blood Drive will be held November 19. If you can help support it! Also, the Halloween Dance is scheduled for November 28 and will be held at the Armory. Both dances are in accord, prizes will be given out, and the band will be great (Cinderblock).

President

SGA

Tuesday, Oct. 24th, 5:30 p.m., Room 108. This is the date of an open Student Council meeting, in which Mr. Jerry Fry, president of the senior class, will present his case against SGA president Richard Reimann.

Why is there a need for a court session? Mr. Fry will, at this time, defend the rights of his fellow senators and students.

How did this all come about? E-RAU's Board of Trustees allows two students to be members of the board. The first student is the president of the Student Government Association. The second is a member appointed by the president. The procedure for the appointment is as follows: 1) the appointment is made by the SGA president; 2) it is presented to the SGA senate for approval. If approved, the appointment is officially in office. Last summer, Mr. Fry was appointed and approved. Mr. Reinaman is the chairman of the Board of Trustees. All procedures were official and according to my interpretation of the constitution.

On Oct. 5th of this trimester, President Reimann announced the appointment and called a special meeting of Vice-president Mike Leonard to the president of the Student Government Association for the appointment of a member of the board. The members present for the meeting were: President Reimann, Mr. Leonard, and a student. The meeting was held in Mr. Leonard's office. At the end of the meeting, it was decided to call for a second appointment to the board. The president of the student body from the college has not been invited to the board.

This case has brought much disgrace to myself, Mr. Reimann, and the student body. It is very important to me to decide the appointment of an SGA member. The date for this appointment is November 28.

Further, Mr. Leonard has received a new copy of the constitution for the SGA and has been asked to study the constitution. I am hopeful that this will be the end of this appointment matter.

The opinions expressed in this paper are not necessarily those of the University or all members of the student body, nor do they necessarily reflect the opinion of this newspaper or its staff.

LETTER TO AVION

Dear AVION:

I have very strong feelings about our excellent grade of student drivers. When I returned to school in August, my car was still parked, around the campus. Each one had left a good size dent which will be costly to repair. This person is responsible for this were not caught and it is up to me to tell them.

My car was not designed for a demolition derby and I sure don’t want it to look like it has been in one.

What we need around here are people to look before putting their cars in gear. These things could be avoided and the economy would be saved.

I am thoughtful enough to watch out for other cars and all I can ask is the same respect from you. Remember only you can help prevent this from happening again.

Dining Out Goes To Fritze's
by Charles Mahon
Fritze's Old Timers is a little different. Travel 4 miles south of the Orange Bridge on South Atlantic Avenue to find this unique restaurant and night spot.
You enter Fritze's dining room through the lounge where the walls are covered with autographed straw hats, setting the mood for the old timers theme. The dining room contains large picture windows facing directly on a deserted stretch of ocean beach. The whole atmosphere is rustic, and dress is strictly casual.
The meals served at Fritze's (mainly seafood and other casual foods) are well prepared and delicious. You salald lovers will enjoy the salad bar which features eight or nine different salads and dressings. Help yourself to as much as you like! Another nice touch is the hot loaf of homemade bread served at each table.
In addition to serving great food at very reasonable prices, the Old Timers also has entertainment.
Everyone joins in the fun with a lively zige - a lone creating a frondider atmosphere where you're likely to find at any other night spot in the Daytona Beach area.
Give Fritze's food a try, and don't let the name Old Timers mislead you. Fritze's caters to all age groups, and all age groups join in the fun!
Sullivan Receives ROTC Student Award
by Jim Owen
William (Mike) Sullivan spent six weeks of his summer vacation at the Third Army R.O.T.C. Summer Camp, and received the Distinguished Military Student Award for his efforts. The award is given to the Army R.O.T.C. cadet who shows outstanding military leadership and a high aptitude for military training at the summer camp. It is usually given to someone in the top 10% ("walk on water" category) Mike Sullivan, who is well known for his war stories, came back from camp with a whole new group telling how he got to use the classroom lessons.
His hosts, the 82nd Airborne (all-male group), first showed the cadets how to operate the equipment and then stepped back and let the cadets take over. The cadets got "hands on" experience in serving tanks and A.P.C.'s, firing the tank, howitzer, 105 and 155 in both direct and indirect mode; dropping 81 m.m. mortars; blowing hand grenades; and shooting the 45, M14, M16, M79, and L.A.W.S.
Space and editorial policy prevents me from repeating any of the stories, but if you want to listen for a couple of good Friday night cadet Mike up with a few well placed questions and then relax. He careful enough; he almost talked us into joining Army R.O.T.C.
Scholarships Awarded For Fall
The Scholarship Committee has selected the following scholarships for the Fall Trimester: Elinor Krueger ($1000), Vicki Smith ($1000), Nancy Johnson ($1000), William Woody ($1000), Darius Daranji ($1000), and Elizabeth Bartling ($1000).
Congratulations to all recipients of these scholarships.
COINS
The Death of the Convertible
by Bob Butterworth
There was a day, Ingrid Jay's father bought a new Ford convertible. If questioned then, or even now, about which I liked more, Ingrid or the car that smelt of new leather and even never canvas that I would be permitted to use when escorting Miss Jay, I would be hard put to come up with an honest answer. An all-convertible—a Ford convertible—has the mores and morals in which the time was much a prosperity like a girl whose brown eyes glinted like tidal pools. and whose unturned nose supported a light dusting of freckles. Sitting in an open car under a star-filled sky, mooting lines cribbed from an unpromising Hugger movie hasn't left any psychic scars. Too bad my kids won't be doing the same thing.
Today it would necessitate a long journey, presumably back in time, but not the far distance, to a place where the air is clear enough so that you can see the stars, and lonely enough so that you aren't afraid of being picked up. It's a problem, I'm glad I don't have to work cut, all of which may have some bearing on the decision of the major automobile manufacturers to discontinue building convertibles starting with the '73 model year.
The computers say that the Mr. Jays are dead. He flew fighters during the Korean War, and that may have colored his approach to automobiles. In an open car you can't fly things, but there are a number of reasons why the convertible will no longer be produced in the U.S.
The industry watchers talk about the increase in popularity of the hardtop, on top of which came the vinyl roof that gave a car the very look and texture of a convert
**SPORTS WORLD**

**SIGMA CHI TEAM OF THE WEEK**

Soccer Team Wins Again

by Rory Donnelly

Embry-Riddle Aeronautical University ran their winning streak to four games in a row with a 4-2 win over Florida Institute of Technology last weekend. The game, played in Melbourne, enhanced the Eagles chances of repeating last year's undefeated season.

From the first goal scored by Riddle's Honolua Johnson, the outcome of the game was never in any doubt. Johnson was the only regular that started in the game. It was his third goal of the season.

All of the other goals for E-RAU were scored by a new player on Coach Mansfield's front line, Albert Nhaba, from Namibia, South Africa, is sure to add strength to the already well-balanced attack of the Eagles.

Next Saturday, the Embry-Riddle Eagles will play host to Oglethorpe University of Atlanta, Georgia at the airport field. Game time is two o'clock.

---

**TEEN TENNIS**

There will be a tennis movie on Tues., Oct. 11th at 11:15 in Room 110, Building A.

The movie will be covering the Kempter Tournament. It is open to anyone interested. It is about a 40 minute film.

---

**SIGMA CHI**

Fraternity continued a fine winning streak by blanking Lambda Chi 20-0. The team was led by Mike Plants, quarterback, who passed for two touchdowns and ran for one more. Mike's favorite receiver for the day was unstoppable Terry Gardner who caught everything thrown his way.

The defensive squad continued to be the strong point of the team. Captained by Mark Rodgers, they have been scored on only once the entire season. Dan Rees managed to snag three interceptions for the day and one punt return to help set up the scoring.

Sigma Chi is much improved over the beginning of the season and will be a definite contender for the number one spot in the league.

---

**FOOTBALL**

by Bob Argila

The intramural football league is getting tougher every week and this past Sunday there was a lot of hard fighting, as each team tired to stay in contention.

The Delta Chi Jets set the Sunshine Company in the 9:00 AM opening game and both teams went into this week, undefeated. The first and only score was a safety by the Jets when they punted and caught the Sunshine Company runner in the end zone. Both defenses would not budge the rest of the game and the final score wound up at 2-0.

A vastly improved Cowboy team routed over the Sigma Phi Delta squad 25-0. An interception by Gene Cumber, and another one by Brian Melch were returned for touchdowns and started things off. Melch also ran for a touchdown and hit Jack Hutchinson with a pass for the final score.

The Vets also remained undefeated as they beat the Coyotes, 8-0. This was another close game for the first half but a touchdown by Mike Tylor broke the ice for the Vets Club. The sturdy built Vets also racked up another safety this time lineman Stan Steenhoek caught the Coyote runner in the end zone. The Vets remained tied with Delta Chi for first place honors.

Sigma Chi, who has been really surprising everyone this year, got together to whip Lambda Chi Alpha 26-9. Three interceptions by Dan Rees and fine passing by quarterback Mike Plants to his favorite receiver Terry Gardner, put the pressure on Lambda Chi. The win moved Sigma Chi to 2nd place and left Lambda Chi in last place.

The standings after 4 games are as follows:

- **Team**
- **W L T**
- Delta Chi Jets 4 0 0
- Vets Club 4 0 0
- Sigma Chi 3 1 0
- Sunshine Co. 2 1 1
- Cowboys 2 1 0
- Sigma Phi Delta 1 0 3
- Lambda Chi Alpha 0 4 0

No games will play this week because of the holiday on Monday. The games will be rescheduled later.

by John Miller

The following is the sequence of events that occurred when Riddle student Don Kent vs J.M. Fields.

Don Kent began shopping for a color model of a television set in September of last year. When he visited J.M. Fields, Don was told that an item that was being written proof (such as a C.O.D. slip) that he was able to purchase the same model elsewhere for less money. Fields would "double the difference" between their cost and the lower cost and subtract the amount from the original J.M. Fields cost.

20 Sept.—Don went to K-Mart and ordered the set on a C.O.D. basis for $28.00. Don returned to J.M. Fields and showed them the proof of purchase to the salesman. The salesman claimed the difference between the K-Mart price and the J.M. Fields price ($2.50) and arrived at a new cost of $25.50 (plus tax). Don and the salesman proceeded to the credit department to arrange financing. Don was told that the set would be delivered by Saturday, Sept. 21 or Monday at the latest. 21 Sept.—Don returned to J.M. Fields. Credit department personnel told him that they had not yet handled his paper, but would handle it the next day. The television department salesman said that the set could not be ordered until credit was approved. Don told them he was short in cash and wrote a check for the set. The salesman accepted the check and told Don that the set would be ordered the next morning.

22 Sept.—Don deposited the money in his checking account at 8 a.m. At 4 p.m. he called J.M. Fields to ask if the set had been ordered. He was told that the check had not cleared the bank and that the set had not been ordered. At 5 p.m. Don visited the bank and the amount was handled to his account. Don returned to J.M. Fields and was told that he had been undercoated $1.50. He wrote another check which was accepted. The salesman told Don that the set would be ordered the next morning.

25 Sept.—Don called J.M. Fields, asking if the set had been ordered. He was told that it was and told Don to return it on 27 Sept. 26 Sept.—Don called J.M. Fields and told the set would be delivered the next day. Don was told that the time was not known because the set had not arrived at the store.

27 Sept.—Don called J.M. Fields to ask if the set would be delivered on that day. He was told no. Don then called the television department manager and told him the situation. After conferring with the department manager, the salesman told Don it was his intention to try a "pull a fast one" and said that he was not, in fact, not contacted by the television, and that J.M. Fields was only stating. The store manager told Don that he would settle the situation one way or another and Don would get either the set or his money back. Don said that he wanted the television set. This ended the conversation.

28 Sept.—Don called J.M. Fields to ask if the set had arrived. He was told that it had not, but that it would be delivered later that day or the next day.

30 Sept.—Don called J.M. Fields and was told by the television salesman to call the store manager. The store manager told Don to come to the store. When he arrived, Don was told by the department manager that the store manager would not allow him to leave because the sales slip from K-Mart was not valid. Don told the department manager to call K-Mart to verify its authenticity. The department manager called K-Mart for a few minutes and upon returning told Don that J.M. Fields was not going to sell him the set any more (implying that authenticity had been established). The department manager said that it was the store manager’s option to deny sale and Don’s money would be returned. Don said that he wanted the set and asked to see the store manager. Don was told the store manager did not want to see or talk to him.

Deciding that further efforts to communicate with J.M. Fields would be useless, Don took the issue to small claims court. At this time the issue is pending until court hearing on November 2nd. Further comment on the situation will not be published until a decision is reached.
Dr. Pence has suggested that E-RAU students who return to E-RAU because they are required to return would continue to return instead of facing the hassles and frustrations of registrating.

6) The advanced registration retards the long and tiring lines. If 900 students trying to register in one day causes great problems, just imagine what 1700 students would do to registration.

For Dr. Pence’s study was to determine the case of over 2000 add/drop processes. This is the reason as to why it is concluded that registering in March for a trimester is most advantageous. September caused the majority of them to add/drop. Therefore, this study suggested to do away with the advanced registration. A more correct suggestion would be to make advanced registration closer to the start of the trimester.

I made a small unfounded statement that some add/drop slips I received. The dominant reason given: “I first registered for anything to get into the system.”

As an improved further most stated, “my class was closed, but something else in its place, then waited for add/drop to open in my class of my first choice.”

Citing they open classes after pre-registration, so I just registered in a class which fits my schedule better.” Surprisingly, a high percentage of people said, “They changed my class time so I moved to another class.”

"Last March I registered to stay on Spring quarter tuition, then took part of the summer off.”

From this survey, the majority for early pre-registration should be dropped and replaced with a later “advanced registration session.”

Finally, the problems of closed classes may be dealt with changing class time must be stopped.

If any comments for or against any of the plans, either the present system, Dr. Pence’s plan, or mine, please let me know. Dean Spears, Dean Clay, Mr. Easler, Mr. Campbell, Mr. Chism, Mr. Koyley, your senator or especially me.

Jin Owen

Air Science Senator

Emby-Riddle Speech Forum

by John Miller, Jr.

A speech forum will be presented here on Thursday night, the 30th of November. The forum, sponsored by the Division of Humanities and Social Sciences, will be researched, organized, and presented by another student chosen from the speech classes. (From 20 classes.)

Divided into two teams, the students will discuss a particular aspect of contemporary society. Topics of past forums have included drug abuse and consumer problems.

The exact time and place of the forum and the names of the chosen members will be announced at a later date. The forum will be open to the public and refreshments will be served during intermission.

December Graduates — Please come by the Dean of Men’s Office to be measured for your cap and gown.

by Joe Green

Embry-Riddle did it again! That’s right, another outstanding educator has been added to the University’s academic faculty. He is Mr. Donald J. Kemeriit, who will be instructing Management and Law.

Mr. Kemeriit is in directly a native of Dayton, although he originally came from Ohio. He has been here for 15 years. In 1967, he left to attend the University of South Florida to complete his degree in Management. While at South Florida, he was a graduate assistant and taught several courses.

He is married and has four children. Mr. Kemeriit expressed his desire to teach at the college level because of the dedication and enthusiasm of the students. He considers his vocation and teaching important, and he is an excellent Riddle ideal, and is more than happy to be here.

Let’s extend a hearty welcome to Mr. Kemeriit!

Sat., Nov. 11 — IFC Road Rally.

Sat., Nov. 18 — DBSCC Regional Rallies on the Road.

Check the Avion for further times and dates.
by L.E. (Andy) Andersen

One of the closest attractions to Embry- Riddle is Marinelind. It is reached via Interstate Highway 95, a 30 minute drive from Daytona Beach. The drive along the ocean isCharms and scenic. An alternative route is via International Highway 95, but the hustle- bustle of the traffic seems to detract from the outing.

For all the avid tourists or any one who has an unusual disire for human life, hundreds of species can be viewed, photographed, and studied in near natural habitat.

The admission to Marinelind is reasonable and would not particularly stress even the smallest budgets of the college student. One admission ticket covers the doors of the entire Marine Tank. Within the complex, one will find sufficient attractions to keep him for a couple of hours or a full day.

The main attraction at Marinelind is the pool show. This 30 minute show demonstrates a fraction of the various talents of these remarkable mammals. During their entertaining half hour, they will jump, sing, dance, play ball, and retrieve rings while blindfolded. This last demonstration very clearly points out the "Sonar" of the porpoise and demonstrates his ability to find objects without seeing them.

The Marine Tank is complemented by the building tanks. Suspended over the circular tank is a movable platform. The attendant eats into this bucket type platform and moves it out over the pool at a height of 10 feet. He is equipped with a generous supply of fish, which he gladly feeds to any porpoise that is willing to jump up and take the fish from his hand.

Adjacent to this tank is the rectangular tank, and it contains nearly every imaginable species of salt water fish. The feeding method in this tank is somewhat different from the circular tank, as the attendant is now equipped with a "hard-hat" diving suit and physically walks around the bottom of the tank, hand feeding the various species. As the shark is one of the occupants, this man uses extreme caution in his feeding circuit.

A very interesting side-light about this tank and its inhabitants was brought to light by their announcer. Many of the species within the tank come from tropical waters. Therefore, the water in the tank has to be heated during the winter months to sustain proper temperatures for these fish. I thought this rather unusual in Florida.

There are other displays and tanks at Marinelind which will have to be seen when one visits this interesting and educational attraction. Your time spent in the restaurant will be rewarded not only with enjoyment but also with knowledge.

**Placement**

The Marine Corps Office of Selection Team will be on campus at the Student Center, Monday and Tuesday, October 30 and 31, from 9 a.m. - 4 p.m.

Good luck to the Airframe and Powerplant Technicians who are completing course requirements this week. If you haven’t been by the Placement Office to check on employment opportunities and to complete your graduate placement form, please do so on time. There are approximately 30 available jobs listed for Airframe and Powerplant Technicians.

For those seniors graduating in December, please fill out the graduate placement form on your earliest convenience. If you desire assistance with a resume and cover letter, please don’t wait until the last minute to accomplish this.

We have received the 1973 College Placement Annual which you may borrow to reference. Also, I have available for handout, a brochure on interviewing which may give you some helpful guidance.

The new Aviation Employment Report should be arriving around October 20.
Loans Are Available For You

The Educational Opportunity Grant Program provides federal assistance to those not financially able to attend the university without a grant. A new program, the Florida Student Assistance Grant Program, is available for qualified Florida residents who have an exceptional need for educational assistance. The maximum grant available is $1,200 per academic year with priority given to entering freshmen and transfer students.

Pursuit of a college education is very taxing in effort, money, and time. The rewards and opportunities for college graduates are increasingly attractive, especially in aviation related fields. Embry-Riddle Aeronautical University serves the needs of both students and industry as the world's only totally aviation oriented university with six degree disciplines: Aeronautical Engineering, Avionics Engineering, Aerospace Engineering, Business Administration, Computer Science, and Professional Pilot Program.

Green Action "SUPER HACK" MISSING
By Gene Wages

(irgend jemand erfuhr eine Niederlage) translated means someone got destroyed and that's literally what happened during Sunday's intercollegiate match between Embry-Riddle, St. John's College of Palatka, and Florida Institute of Technology of Melbourne. Paul Loughrey, Stan Bartlett, John Bishop, and Gene Wages turned in a blazing four man total of 333 to beat John's and F.I.T. by 17 and 36 strokes respectively. This was the first time that a three way match has been won in its entirety by the E-RAU golf team. Gene Wages had a splendid day on the greens and sank a total of four birdie puts.

Bill Georgette has gained the distinction of being the most likely to succeed and has been playing extremely well during the past two weeks. Bill participated in today's tournament and played a nice round. (You should see his caddy.) Today's action was blessed by the presence of Mrs. Patty Bartlett, Thel Georgette, and Janice Bishop who enhanced the attitude of all golfers, especially their husbands. A special thanks goes to Thel Georgette for staying with Coach Spears during the final rounds and helping to suppress any anxieties that he may have had prior to the score being posted. Dean Spears intended to present a "Super Hack" award this week but Walt Guy has suddenly disappeared. Additional tournament results for 17 October at Statton and 20 October at Sugar Mill (New Smyrna) will be concluded in next week's Avion. Anyone desiring to participate in competitive golf, contact Dean Spears at his office in the administrative building.
