NICARAGUA FLIGHTS: ERAU PILOTS RELIEF FLIGHT

BY MIKE TALLMAN

Mr. Walter Green and Mr. Charles Horstman, both of whom are ERAU flight instructors, and Mr. Charles Spelman, an ERAU student, made up the crew of a DC-3 which left Daytona Beach Jan. 13 with $3,000 and 6,600 pounds of food and clothing to aid the victims of the earthquake in Managua, Nicaragua.

The money and supplies were collected by the students of Seabreeze High School. The Air freight was donated for use by Marian Scott of Savannah, Georgia.

The flight to Nicaragua was plagued by maintenance problems. While refueling in Key West, fuel leaks were discovered in both engines. After repairs had been made the flight was continued, only to have the navigation equipment fail, making it necessary to return to Miami for more repairs.

The flight continued from Miami at 8 a.m. Sunday and landed in Managua at 6:45 p.m. The return trip was much less eventful. After spending a restful night in Managua, the plane and crew arrived in Daytona Beach at 9:05 p.m. Monday, Jan. 15.

Mr. Green said that he had been approached by a member of the E-R-G club about making additional flights with supplies donated by ERAU students.

MORE RELIEF BY SGA

BY MIKE TALLMAN

The embryo Riddle's Student Government Association has formed an ad hoc committee of four students, Mike Leonard, to collect and transport relief supplies to Nicaragua to aid earthquake victims there.

Collections have already begun, and items most needed are staple foods such as rice, corn meal, dried beans, clothing, and, of course money.

For those who wish to contribute money, according to Leonard, checks should be sent to the SGA office, P.O. Box 2411 Daytona Beach, Fla. 32111.

Good clothing, blankets, etc. can be taken to the following collection points:

Daytona Beach area
Daytona Beach Aviation
DAB Regional Airport
Gray's Aviation
St. James Episcopal Church
New Smyrna area
St. Paul's Episcopal Church
Church 369 Downing Ave.

If contributors have no means of getting donations to the collection points, the SGA will pick them up. Call them at 252-5561 Ext. 26 and leave your name and address.

The committee has requested that franked letters be sent to the collection points to contact the SGA office. In the event that supplies are collected, they will be flown to Nicaragua aboard a DC-3 donated by Marian L.V. Air Spray, Inc. of Savannah, Ga.

LIBRARY HAS NEW LOCATION

BY PETER MINO

Twenty four people, including 16 students, have joined the administration in moving the library across campus and reassembling 15,000 books during the Christmas break. According to Mr. Marlin Sch all, SGA Director of Library services, the job was completed without having to hire outside help. Mr. Russell Lucas, Director of the Physical Plant at ERAU supervised the project.

AUGUSTANNA NEWS

The library now has a new location and is currently being processed. The new location is in the former student union building, now the Student Center.

The library now houses a larger collection of books, with a total of 15,000 books. The new location also offers a larger reading area, with 12,000 square feet of space available for reading.

The library is open from 8 a.m. to 5 p.m. Monday through Friday, and from 10 a.m. to 5 p.m. on Saturdays. The library staff can be contacted at 252-5561 Ext. 26.
President’s Corner

"Happy New Year All Students!" I would like to welcome all returning students back and the hope that you will have an enjoyable, productive year. While you were gone, the admissions office set a record and enrolled many more students than expected.

There are several things under consideration by the various committees on this page. One of the more interesting ones is that Professor Foltz requested a study to be initiated in a way which could authorize AAP students, except those in the College of Nursing, to receive credit for flight training. A pre-registation committee has also been formed which will be convening shortly to discuss different means of pre-registration. Another area under study are the graduation policies of the University.

You have probably heard of the plans, and from other news sources across the country, to send a flight to NASA to both train and compliment the students of Seabreeze High School, especially Rick Karl, for his fine job. Since he announced that they were going to sponsor only one flight, we in the SGA, decided to keep the ball rolling. A committee was formed, which is headed by the Vice Chancellor, along with members of the SGA, Mike Leonard, to collect funds and/or goods to be sent on future flights sponsored by the flight program. If you can help in any way the response has been excellent.

All students should take note of Tejinder’s Noviana. He has taken upon himself to locate all films which were available and technical in nature and has volunteered his time to interested students. The showings are at 8:00 p.m. every Thursday night in the large class room in Building A.

Last semester we had approximately ten senators graduated some of whom were holding major committee chairmanships. The following new committee chairmen have been appointed: Mr. Jan Nelson, Finance Committee; Mr. Rick DiPinto, Social Functions; and Mr. Bob Weikel, WRE. Also, Mr. Joe Moore was just recently voted in by the Senate as the second student member of the University Board of Trustees.

I would like to take this opportunity to congratulate Drew Rassell and Gary Rice for their successes in the recent elections.

A note on security especially for new students on campus and alumni who may return because of the policies that were outlined in your Student Briefing.

Unfortunately, last semester we lost one of our students to a traffic mishap although he was able to escape in the nick of time. He was careful and stayed alive.

"The SGA President’s Interest Club Fact of the Week" The tuition at ERAU is one of the lowest in the country allowing students to gather and socialize. The business of selling and/or buying used materials among ourselves.

The advantages are obvious: the list of many students gathering at one place at one time would make potential book availability excellent; second, obtaining the books you need direct from the owner would mean savings; third, anyone wishing to sell their textbooks would be paid immediately.

Anyone wishing to comment on this proposal should contact the editor.

The AVION is a publication for students enrolled at ERAU. The funds for the publication are raised by the Student Activity Fee through the student store and class budget. Articles may be submitted to the AVION for consideration for the administration, the faculty, and the students to read. The deadline for class time is Friday afternoon. We have no desire to see all items AVION, and do not desire to see the trailer, inside the tractor, or ERAU box filled.

A Proposal For Books Buying And Selling

Now that the books buying is over for the semester, I find there is a need among students to go to buy, sell, or trade used textbooks and materials without paying third parties the hassle of turning in your books without receiving payment when you need it is the most, immediately.

After having visited in line at the Textbook store, I was informed they were out of the text I needed. Having overlooked the conversation, a student behind me, carrying a book wanted to sell, said he had the book I wanted and probably more. At that point, I proceeded to do business and ended up with two textbooks and saved ten dollars compared with new book prices and seven dollars compared with used book prices, I got the books I wanted, the student got the money he wanted. Everyone happy.

My experience gave me the idea for a "Book Exchange", a place set aside the first week of classes for the purpose of allowing students to gather and socialize. The business of selling and/or buying used materials among ourselves.

The advantages are obvious: the list of many students gathering at one place at one time would make potential book availability excellent; second, obtaining the books you need direct from the owner would mean savings; third, anyone wishing to sell their textbooks would be paid immediately.

Anyone wishing to comment on this proposal should contact the editor.

Letter To The Avion

To the Students, Staff and Faculty of ERAU,

This is a critical evaluation of the Academic Administration and Division of Flight Technology. Founded on my experiences as an Air Science and Aviation Management student.

The Academic Division offers excellent college courses, however, there are certain departments that have courses that cannot be equaled at any other university.

The Air Science Department offers underwater aircraft building in History of Naval Aviation, numerous hard work experiences in Flight Physiology and the unequaled training in Aircrew Performance. The Humanities and Social Sciences Department offers good quality courses from instructors who really love to teach. I believe that these courses seem to be TV soap opera stars.

The Management Department offers courses of excellent quality from instructors who will genuinely challenge them.

The Math and Science Department offers courses of excellent quality from instructors who will genuinely challenge them.

The Administration of ERAU measures the success of the administration by the number of students, who have a degree. This fact has a large effect on the way the university operates. The most frequent complaint about the administration is that the students are not paid to stand in line and hate to pay for the privileges to stand in line. Non management students, the administration is a classic example of a bureaucratic machine with a puppet show. With "WRITE IT DON’T EAT IT" on each puppet’s mouth. The puppet head, who dance to the tune of "I'm President" is the head puppeteer.

The Division of Flight Technology offers flight courses and airframe courses from instructors who have had an all time flight training at E-RAU. However, the majority of flight students, who come from other schools, are in a life time hassel. The instructors have too many students to devote adequate attention to each student’s progress. The flight courses are allowed to fall out due over an extended period of time. The student becomes frustrated and lacking motivation. There are an excessive amount of instructor changes due to these facts. The flight line is run by a combination of military operation and fixed base operation which is part of the purpose of the flight line needs a person who has it run smoothly.

I don’t have any first hand experience of the Flight Training and Powerplant department. They seem to have second hand knowledge which I believe that students are having their problems also.

My recommendations to the university are that they try to overcome their students and they try to overcome their students and they try to overcome their students and they try to overcome their students and they try to overcome their students.

My recommendations to the faculty are that they should concentrate on quality education instead of watchdog education. I hope that this will improve the quality of the students and the quality of buying FBO’s in the Daytona Beach area.

My recommendations to the administration are that they should start treating the students as human beings instead of treating them as students. That they attempt at improving the quality of the students and the quality of买到FBO’s in the Daytona Beach area.

My recommendations to the students are that they should concentrate on quality education instead of watchdog education. I hope that this will improve the quality of the students and the quality of buying FBO’s in the Daytona Beach area.
Elections

Hello Students, your favorite political jargon, here with a new enemy of the common people. This January 31st, there will be a Student Government election, which in which the eventual winner can be accurately forecast before the ballots are cast. Those elected shall be the winners of the "Paper War".

What ask you is the "Paper War"? Look about you this next couple of weeks. Honestly, under all those layers of paper, the doors made of glass, the walls are of brick, and the posts are concrete.

Those elected shall be of the money aristocracy, elections cost money. Past campaigns have cost upwards of $6,000. It is likely that money has been frittered away in order to litter the landscape, not for a couple of weeks but for months. Look about you as you throw away your bumper stickers from elections past (and other past events) on wall doors, buses, trash cans, and urinals.

James T. Bigot, propose a limit be placed upon those trying to join the race covered and hated collection of characters on campus. I propose the Student Government Association. This limit would be twice the SGA fees in effect at that time of the election. (Thus allowing for inflation.) Will the students put this in place today, will the SGA fees be doubled? I see a three-fold increase. Will this movement affect the students? Is there a basis for campaigning?

These interested can reach their Senators and Candidates. Let them be supposed to be in the Student Center.

U.S. Marine Corps Coming To Student Center

The U.S. Marine Corps Officers Selection Team from Jacksonville, Fl. will be here 29-30th January 1973 to discuss Marine Corps opportunities for men and women.

The Team will be available between 9:30 a.m. to 3:00 p.m. in the Student Center to interview, counsel and test those persons interested in earning a commission in the U.S. Marine Corps.

Available programs include Officer School, for seniors and graduate students.

New Ring For Riddle

The HERIFF-JONES Co. will now be in communication to the students to make rings for interested individuals. We encountered numerous delays and uncorrect deliveries with the previous company and the SGA decided it was time to take action to remedy this unfortunate situation.

Mr. Adam Sowell will hold a ring day sometime during the beginning of February inorder to display his company's products. Design and cost of the rings are expected to remain approximately the same; the major improvements in the field of quality and customer satisfaction. We're looking forward to seeing and talking to Mr. Sowell here on campus.

Daytona Beach Aviation Turns Over A New Leaf

Since the purchase of Daytona Beach Aviation by Embry Riddle, the operation of the FBO has been completely independent of the school. Daytona Beach Aviation is still run as an independent company, just like it was before, but with Embry Riddle grades running the show, and the university as the sole stockholder.

The president of DAB Aviation, Mr. T. Jones, stated that there are still a few bugs to be worked out in the operation of the FBO, but they seem to have the problems well in hand.

ERAV airframe and powerplant classes are held on the second floor of their hangar and there are plans to start a work study program between the school and DAB Aviation. This may offer positions at a later date for certain ERAL students, such as management, mechanics, and other various job opportunities.

It has been described as a way for students to give graduates, and soon to be graduates the opportunity to find him or herself involved in the real world of aviation, not just studying about it, but actually working with it as it was done with various other programs ERAL offers. This will definitely be a landmark for the students of this school and their future achievements.

New I.D. Cards Issued

BY JOHNPOTTER

All students MUST come to the Dean of Men's Office and pick up a Certificate of Registration and a new I.D. Card.

Old I.D. Cards WILL NOT be accepted on campus after Jan. 26th. All local merchants in Daytona are also being notified of the I.D. Card change.

The reason for the change in I.D. Cards is due to the excessive misuse of the old I.D. Cards.

The new I.D. Card had no expiration date on it. With the new I.D. Card system now being incorporated, I.D. Cards will be issued as long as a student continues as a registrant student.

To be sure and get your new I.D. Card, come to the Dean of Men's Office before Jan. 26th.

January 26, 1973

old I.D. Cards WILL NOT be accepted on campus as valid and local merchants will be advised not to accept the old I.D. as any form of identification.

MA 111 Led By "Blackbelt" Of Quadratic Equations

BY BILL LEEDS

A former ERAL student is the latest edition to the full time Math Department. Mr. Jim Las descrases, who came to ERAL when the university was inaugurated in Miami back in the Fall of 1964 is now teaching in the full time Math Department. He is teaching some of the more advanced courses that are fortunate enough to be in his new General Aviation class.

Mr. Las descrases graduated from the University of Florida in 1957 with a B.S. in Astronautical Engineering. Not being fond of the draft duties that particular period of American history he secured an interesting job with the Hamilton Standard Co. in Conn. His duties were varied and numerous and included working for the propulsion Mechanics and aero engine Dept., and was later in charge of the Underwater Research for the Underwater Sound Lab Project.

Mr. Las descrases managed to migrate back to Fla. in January 1971 where he entered the University of Florida in a Mechanical Engineering Curriculum. Finding that Mechanical Engineering was not as personally rewarding as he had originally thought, he moved back to Daytona Beach and began teaching the Math 111 course on a part time basis during the summer of '72 he transferred to the Daytona Beach Branch of Florida Technological University in the subject of a Masters Degree in Engineering Mechanics and Material Science. As is evidenced by his past educational background he is very much interested in Structural Design, especially in the fields of this fills the dimensions of 36-24-36.

His hobbies include working on his Masters Degree, working on a re- denial Math course to the 60-60 dancers from Broadwater, and attempting to get into the Faculty Housing by building C using his skate key.

When asked what his thoughts about ERAL students he volunteered that the student body here works very hard, not only in class but in class. I look forward to expanding my knowledge of math, so that the student body and the University can learn together.

I know Mr. Las descrases and I can only hope that this individual gets your vote as Teacher of the Year!
Buddy Baker, one of the nation’s fastest and most successful automobile race drivers, will begin a new profession on Dec. 15.

Baker, the first driver to break the 200 mile-per-hour barrier on a closed course and winner of the recent season-ending 500-mile NASCAR Grand National Race at Texas World Speedway, will join the public relations staff of the Internal Speedway Corporation.

An announcement of Baker’s appointment was made by Jim Foster, vice-president and director of corporate communications for the company which operates the world’s most prestigious race tracks, Daytona International Speedway, Talladega, Ala. and Alabama International Motor Speedway at Talladega, Ala.

“We are very pleased to have Baker join our staff, even on a part-time basis,” Foster said. “He is one of the brightest and most per- sonable men in the racing profession and we feel he has a great future in public relations.”

Baker will work with the speedway publicity staff on weekends he is not involved in Winston Cup Grand National competition. His initial assignment will be in the media room at Daytona Speedwy. He will also assist in poster and brochure distribution, writing and editing, as well as make public appearances.

“This is a good opportunity for me to learn public relations from the ground up,” Baker said. “It’s something I’ve wanted to do for several years and I am pleased to be associated with the group at Daytona.”

Baker emphasized that the team had no new professional does not mean he is thinking of retiring as a race driver. “I have a lot of competition ahead,” he said.

He will compete in 1973 in the K&K Insurance Dodge prepared by Harry Hyde of Charlotte, N.C.

Baker won two major Winston Cup tracks in NASCAR regional races in 1972 earning $97,540. He has won over $280,000 in his last two seasons.

Needed: Tennis Players

We need tennis players with experience. All players are invited to join the tennis club. The pair will begin competition under the direction of Chance, a driven and experienced tennis player. The pair will be in the main room at Daytona Speedwy. They will also assist in poster and brochure distribution, writing and editing, as well as make public appearances.

Fencing

24 of Daytona

Vince Gimondo and Bill Dingman, both “featured” over Daytona International Speedway’s track course, have filled the first entry for 1973 24 Hours of Daytona set for Saturday and Sunday, Feb. 4-5.

The Orlando, Fla., duo has a remarkable record over the demanding 3.81 mile road-track circuit. The pair will co-drive a Camaro 5-28 powered by a 305 cid big powerplant in the World Manufacturer’s Championship event.

Dingman co- drove with Vin and the other winners in the 12-hour Sebring race and the six-hour IMSA race at Mid-Ohio during the past season. Gimondo, considered to be one of the best road racers in the nation, also spearheaded victories in the Mid- night Challenge race and Paul Revere 250 at Daytona during the 1972 season. Gimondo was also a class winner in Daytona’s 24-hour race in 1971.

Gimondo, a broad- shouldered athlete who sports a shaved head, has one of auto racing’s most outstanding performance records. Since he entered competition five years ago he has posted two international victories at Daytona and two at Sebring. He also has two second-place finishes at Daytona and Sebring.

The upcoming 24 Hours of Daytona is set for a 3:00 p.m. starting time, Feb. 4, tradition- ally kicking off Daytona’s annual SPEEDWEEK. The Winston Cup NASCAR Grand National Daytona 500 stock car classic will windup the festivities Sunday, Feb. 18.

Entry forms for the $50,000-plus 24-hour event were recently mailed to drivers in the United States, Puerto Rico and 18 foreign countries.

Last Chance

Just got to Daytona Beach and found out not all its cracked up to be? Been here a few times and you know Dorn 1 life is a drag? We can’t solve all your problems, but we do of- fer a partial solution. Break your marriage and join the E-R Bowling League. We bowl every Wednesday night at 9:30. The location is Halifax Lanes, 669 Racoon Ave. Need a ride? Contact Frank or Joe in Room 743 at Dorm 1. Besides the usual fun, we will give trophies for a variety of accomplishments. At

the end of the term we have a party for every- one with plenty of beer. Think you have to be a great bowler to join? No, we’re a handicapped league. If you can pick up a ball, come on. We’d like to see a team from each major dorm, the鱼类 and the Vass club. Your wives and girl friends are welcome too. Our last night to join is Wed. Jan. 31. Be there by 9:15. We use four man teams so if you want to have your own team all set, be our guest. See you there.
Volleyball: NCAA, Intramural

by James Hunter

This trimester KRAU intramural volleyball is really going places. Aside from the regular intramural volleyball games, which will be held in the old gym next to the student center, Coach Wurtzbach is organizing the first Varsity Volleyball team. Toward the end of the intramural season the best players will be picked from each team to form one varsity team. After a few more weeks of practice, this team will travel up to the University of Florida at Gainesville to compete in the invitational volleyball games. This will take place sometime in March. Anyone interested in forming a team should get at least six people together and elect a team captain. Coach Wurtzbach is holding a meeting Wednesday, January 24th at 7p.m. in building A room 100 to discuss the rules and make up a schedule for each team. Each captain is urged to attend this meeting in order to get his team on the roster. The first game will be held Wednesday, February 7th, and don't forget everyone is invited.

Baseball Warms Up

by Jim Hunter

In the past the KRAU team has done very well considering all the injuries they encountered, but this trimester under the direction and supervision of Coach Brown, the Eagles are really looking strong. With the exception of a few good men from last year, the team consists all new blood. Each man has had much previous experience and it shows in their practices. Already, with only one week of practice, there has been much better hitting and stronger catching than in the previous seasons. Thus extra efforts by the team alone, such as selling light bulbs and asking for donations from small businessmen in town, the team have added a new pitching machine to their practicing equipment. Now, that's team spirit.

The Eagles' first scrimmage is against Saint Johns Junior College on Saturday, January 26th, at home. These scrimmage or pre-season games are nothing more than practices where every man on the team gets a chance to show his ability. After these practices games are over, its down to business for the Eagles, for this trimester involves some tough competition. They will be playing schools such as Wabash College, University of Delaware, three games against Harvard and the tough Florida Southern team who are the NCAA champs.
