Hitchhikers Playing "Russian Roulette" As Toll Of Rapes, Beatings Mount Alarmingly

From News Release by Readers Digest

Mounting evidence of police and highway officials across the nation indicating growing concern among youthful hitchhikers-especially girls-has become a major crime wave.

Consider just these chilling statistics noted in a July Reader's Digest article: the July 70 percent of all rap victims in Boulder, Colorado, last year were hitchhikers; in Boston the figure was 75 percent.

In Berkeley, California, 30 percent of the rapes committed in the first two months of 1973 followed the abduction of hitchhikers.

Write author Nathan Adams in the article: "In the case of a girl who hitchhikes, the odds against her reaching her destination un molested are today literally no better than if she played Russian roulette. Police estimates, victim interviews and a polling of young hitchhikers reveal that one out of every six will become the victim of some category of sex crime, ranging from abduction to forcible rape."

Nor is rape necessarily the worst fate a ride-hunter can suffer. Boston recently, seven girls were murdered in as many months; six had been abducted while hitchhiking. And more than a quarter of the hitchhikers victimized by or as criminals were beaten, slashed or shot. Since last fall, six young women in Santa Cruz, California, and one in a suburb of Miami were among the victims of grisly murders.

"So tempting a target is the single hitchhiker that some criminals regularly patrol roads frequented by hitchhikers, usually near cities where major universities or colleges are located. The nighttime telephone, some highway rapists will call their 'bait' or "bese," their victims by removing inside door handles from their cars to prevent girls from escaping by breaking the glass; scouting remote locations to which they can drive their young victims..."

Despite the mounting fear, a number of experts say Adams, girls are turning to greater numbers than ever before, motivated by lack of funds for scheduled transportation, and sometimes naively about what could happen to them.

Although every state has some form of anti-hitchhiking law on its books, legislation that would ban the practice entirely has been vigorously opposed by lobby groups, and many lawmakers are convinced that an outright ban would be unconstitutional. Moreover, enforcement would be a nightmare for a lawman. A better answer would be to improve public transportation services near colleges and universities. The Digest also recommends overhauling legal procedures to improve the rape victim's sense of security, so that when they report the crime, an estimated four out of every five criminals (who have been raped do not even report the incident) to pay attention to police investigators, and to courtrooms and the eyes of bystanders who might help.

Finally, the article urges a nationwide educational campaign should be undertaken to familiarize young people with the chilling statistics of hitchhiking hazards. The money for such a campaign is available under the Highway Safety Act of 1966.

ERAU Grad Receives Commission

ERAU-ANTONIO—Stephan L. Avery of R. R. 1, Michigan City, Indiana, an Embry-Riddle graduate, has been commissioned a second lieutenant in the U. S. Air Force upon graduation from the School of Military Sciences for Training at Lackland AFB, Texas.

Lieutenant Avery, selected through competitive examination for attendance at the school, is being trained as a pilot at Lackland AFB, Arizona, for pilot training. He received his B.S. degree from Embry-Riddle Aeronautical University in 1972.

ERAU Students Receive Awards

Stephan Fitzgerald, a student of the Division of Maintenance Technology and John Bergman, a student of the Division of Aircraft Technology, were each awarded a $100 scholarship. Fitz received the award as a result of the Scholar-Ship Committee's selection of him as the outstanding student of the respective division for the summer trimester.

ERAU B. Jolley received his Bachelor of Science degree from Embry-Riddle Aeronautical University, Daytona Beach, Florida, July 19, age 28. He is the son of Mr. and Mrs. Thomas E. Jolley of Weirton, West Virginia. Presenting Jolley with his diploma was Dr. Wallace Prophit, director of the university.

Oran B. Jolley received his Bacheelor of Science Degree from Embry-Riddle Aeronautical University, Daytona Beach, Florida, July 19, age 28. He is the son of Mr. and Mrs. Thomas E. Jolley of Weirton, West Virginia. Presenting Jolley with his diploma was Dr. Wallace Prophit, director of the university.

Students Insurance Rates Increase

Effective August 29, 1973, the University Student Insurance rates will be increased. The increase in insurance rates is directly proportional to experience factors as per data collected for the last past year. Increased medical costs and increased incidence of accidents, i.e., motorcycle accidents, were contributing factors.

Bids were requested from 15 different insurance companies and the greatest rates with the most coverages for the same amount were received.

The new insurance rates are:

- Student: $15
- Student & Spouse: $30
- Student & Family: $50
- Children: $30

New brochures are available for the next policy year in the Insurance Office.

FAA Exams Scheduled

Federal Aviation Administration Pilot Written Examinations are scheduled to be conducted at Embry-Riddle Aeronautical University July 26 and 27, 1973.

In order to advise the FAA of the number and types of pilot examinations required, students MUST sign up for the correct examination. The FAA will conduct their exams at 8:00 a.m. on Monday, July 20, 1973. Examinations will be conducted in 200 Robb Wilson Room at Grant Hall.
ON THE LINE

By Rod Castro

The thought of fishing when you have grown tired of fishing in this area and then returning to Lake George and Lake Woodruff makes you wonder if there is anything you might do to improve your chances of catching trout. Lake Okeechobee has some of the best trout fishing in the state and is the home of the biggest trout in the state. It is perhaps the most dependable spot for consistent catches of ten- to twenty-pound trout. The trout conservationists say that the world record belongs to the Lake Okeechobee trout. If you enjoy fishing for trout, you might want to try Lake Okeechobee. Located in southern Florida, Lake Okeechobee has some 720 square miles of bass and trout fishing.

Interview

By Bernie Palmer

Dean Motzoll, Growth Oriented

Dean Motzoll has asked that the new Program Management Committee look into development of the university's Flight Attendant and aviation programs. Several Subcommittees have been formed to examine these areas and make an analysis of each.

The Academic Committee has proposed several areas by academic policies to include USIF and CLEP examination requirements for admission. A recommendation has been made to lower the USIF and CLEP requirements but this is no way is to be construed as a lowering of university standards. Recent experiences of the students at Rollins show that students with scores lower than 70th percentile but not less than the 70th percentile can still pass examination requirements. The student should, however, study his academic requirements carefully and work towards meeting the requirements. He must graduate with grades higher than the 70th percentile. The student should use the bulletin that he uses for his admission requirements by submitting to Motzoll stresses that a student should not be worse off than he was at Rollins. He should not look for credit when he should graduate with grades higher than the 70th percentile. The student should use the bulletin that he uses for his admission requirements.

The amount of credit for the lower level classes, Dean Motzoll points out, can be transferred to another university as a lower level course even if the same course were classified as the upper level course.

Dean Motzoll pointed out that students frequently arise during the transition and these requirements should be evaluated individually.

Avion and Phoenix Relocate Offices

Last week the Avion relocated its offices from the old trailer to a room on the third floor. The Avion is to be found in the office downstairs from the Phoenix.

The new office provides more space and an opportunity for a more efficient build between these two activities. Plans for the office darkroom and professional darkroom and planned layout facilities.

The Avion and Phoenix continue understaffed and anyone interested in a position is urged to apply. The Avion Box number is 1565. Drop us a note or stop over.

New members of the Phoenix staff include:

Jim Kossman - Editor
Non Soprak - Business
Dade Cathcart - Chief

EUA Grad Receives Commission

Joseph P. Gamarano III, son of Mr. and Mrs. Joseph P. Gamarano Jr., of Dix Hills, N.Y. has been commissioned a Second Lieutenant in the U.S. Air Force upon graduation from the Military Sciences for officers at Lackland AFB, Tex.

AN ADVISORY COMMITTEE from the Southern Accrediting Association visited EAU to complete evaluation of the new masters program in Aviation Management. The committee reported that everything went well and the committee appeared impressed with the program. The report should be returned to the university within a few days.

Fall. When asked if he thought EAU was ready for a masters program Dean Motzoll answered with a warming note added that he is hopeful that EAU can provide the program in several different areas in the next few years.

Dean Motzoll is primarily growth oriented and wants EAU to expand into other aviation oriented areas. He feels that the growth of these areas is not possible until the students' programs are developed in any of these areas can be expanded into degree producing programs.

By taking course of action, he feels that EAU can meet the demands of the aviation industry today.

DINING OUT

By Bernie Palmer

In an effort to keep the Dining Hall more interesting, EAU students informed the President of the quality of the local food. This information was utilized to present a series of articles on the quality of the "Dining Out" facilities in the Daytona Beach area.

This week my wife and I dined at the Captain's Choice on the south east side of the Dr. Martin Luther King Bridge. This unique restaurant offers a beautiful view of the ocean and the beach. You can enjoy the scenic view and relax while selecting from a wide variety of seafood or other dishes. The prices are moderate (you can feed a family of four for under twenty dollars) and they don't skimp on the cocktails. The hostesses are colorful and friendly and helpful. I would suggest that if you wish to dine there you choose a time other than the normal meal times. At the same time when there was a crowd it became crowded and because the waiters were not supposed to cover this period, some of the food we ate was cold or not well prepared. The atmosphere was pleasant and we enjoyed the cocktail lounge on the lower floor. After dinner we watched the dolphin show and a combo was presented for entertainment. Overall, however, I was not particularly impressed. On a rating scale of one to ten I would rate the Captain's Table five.

If you have a favorite eatery you might enjoy, let us know and we might be glad to pass it on.
EDITORS COMMENT

The opinions expressed in this paper are not necessarily those of the University of Arizona Student Body, nor do Letters Appearing in The Avion necessarily reflect the opinion of its News Paper or its staff.

Notes from The Senior Class President

In what I hope, will become a tradition at EAU, I will be making periodic reports to the Senior Class in order to keep you informed. Because of the structure of the Senior Class, regular reports are not feasible. Therefore, I hope that these reports will fulfill the role of informing the Senior Class and make it possible to keep the desires of its members.

There will only be one meeting this trimester and all seniors are urged to attend.

The meeting will be on Monday, July 23rd at 12 noon in Room A-108.

The following business will be covered:

1. Report from the social functions committee on the upcoming graduation party.

2. Report on the site for graduation.

3. Election of a senior class spokesman (former state valedictorian) for the August graduation ceremonies.

In order to be considered for the senior class spokesman, you must be a member of the August graduating class and place your name in nomination at the SGA office by Friday July 20.

The senior class spokesman will speak for the Senior Class during the August graduation ceremonies. In order to vote you must be present.

The graduation invitations are now available in the SGA office at 30 cents each.

Dr. John Wheeler, a local Baptist minister, and instructor at Emory Riddle, will be the chaplain for the graduation.

I have a mail box in the SGA office and my EAU number is 4874. If you have any suggestions, complaints, please let me know.

Ronald C. Ryhan
President

Placing function includes:

- Administering on campus student employment service;
- Assisting with the preparation and typing of cover letters and applications; maintaining reference literature; compiling lists of handwritten and typed letters of recommendation,
- Assisting the writer in the preparation of employment opportunities;
- Assisting in the preparation of good journalistic practices.
Student Body Senate Notes

The Senate began by passing the proposal presented by Ron Nyhan at the last Senate session. Mr. Nyhan, President of the Senior Class, presented additional information and cost figures about the proposed Senior Class Party. They were voted to be acceptable to most of the Senators present.

When other issues were introduced, two resolutions were brought to the floor for debate and vote. The first was a proposal for a Senate Hall and Farewell/Awards Party. It was reported it could be held at the University House and total cost would be about one hundred dollars. The resolution was passed.

The second resolution was a proposal to accept a revised set of traffic and parking regulations and subsequent penalties.

"EDITOR'S NOTE—These sets of regulations comprised about six typewritten pages. They were neither published, distributed nor properly researched in committee before presentation on the Senate. When the Senate Session was brought to order, copies were distributed so the measure in some form must be passed immediately. This can be printed in the new Student Hand Book.

When the floor was opened for discussion, the consuming debate ensued. A motion was made to end further discussion, which was accepted, and then the matter was put to vote to be accepted.

(Ohan Jolley Cont.)

some degree, ERAU awarded him credit based on his aviation experience enabling him to reach his goal in a shorter length of time.

Jolley spent approximately three years working towards his degree. According to him, he took the minimum of two courses each quarter. During his first two years he said he did not miss attending class one single night.

Jolley and his wife Katie live at 965 Cedar Avenue, All丁. Mrs. Jolley has worked for the past seven years as a Link Observer for Ross Aviation. The Jolley’s have two sons, Mike, an Air Traffic Controller in the U.S. Air Force and John David, a student at Birmingham Southern.

as written. It was passed.

Shortly thereafter, President Heimann announced that the body would hold a special session to convene about 45 minutes after the close of the present session to further discuss the matter.

"EDITOR'S NOTE—It is by my firm opinion that if reasonable decisions are to come from these sessions the Senators must be given the groundwork on which to make them. This is an excellent example of poor legislation on the part of the Student Body President. One man does not make an organization.

During the special session, which lasted an hour, the resolution was further revised and the regulations revised. Because of time constraints our several Senators had to leave before all of their suggestions were considered by the Senators for a quorum. The resolution was further revised and will be discussed further at another special session to be held on Friday the 26th.

Students Interested in Co-Op Program

The concept of Co-operative Education was based on the knowledge that fl a student is not limited to academic achievement, but is dependent on practical work reinforced by practical work.

It is a universally accepted fact that relevant experience is an important factor in the selection process when considering employment. One of the keys to gaining this relevant experience is through Cooperative Education.

Cooperative Education is a program whereby interested students work for one full trimester in a position designed to give them experience in the field of their interest. These positions are approved by the university and school credit is also given.

Established criteria for eligibility for participation in the Co-op program is as follows: the student must not be on probation; the student must have sufficient credit hours to be considered a full-time student; the student must have sufficient credit hours to be considered a full-time student; the student must be enrolled in the Junior or Senior class; and the student must be enrolled in the major program.

For additional information on the program and available Co-op slots, contact Barbara Lyons in the Placement Office. She will be happy to answer any questions you may have.
