E-RAU Chooses Cessna Skyhawks for Training Fleet

WICHITA, KANSAS
Embry-Riddle Aeronautical University offered Cessna Skyhawks for use in its Pilot Training Program. Delivery of the 1978 model to the school in September will bring Embry-Riddle’s total Skyhawk fleet to 57.

The university, which is the leading school of its kind in the world, chose the Cessna model after conducting a six-month, head-to-head evaluation program between the Skyhawk and the Piper Warrior. Seven 1977 Skyhawks were flown almost 4,000 hours during the competition, on routine, day-by-day training flights by Embry-Riddle students. The comprehensive evaluation included such criteria as scheduled and unscheduled maintenance, aircraft availability, and response to service problems.

Embry-Riddle President Jack H. Hunt said the evaluation program planned special emphasis on product support. "The project was extremely important to Embry-Riddle personnel," Hunt said, "because it allowed us to test maintenance and aircraft support systems in addition to evaluating the aircraft." Hunt said his staff was very impressed by the support provided by both Cessna and Piper during the competition.

In addition to the Skyhawk performance, E-RAU has entered into a long-term agreement with Cessna to provide wing Engine Model 1520s to the university for advanced training in multi-engine aircraft.

Cessna Chairman Ross Meyer said he was pleased with the results of the competition. "We're very happy that Cessna will be continuing what has been an excellent relationship with the world's foremost aviation school. We are looking forward to working even more closely with Embry-Riddle in the years to come."

NOTICES

PLACEMENT INTERVIEWS

Cessna Aircraft Company, Wallace Division, has a need for Experimental Sheet Metal Mechanic, Final Assembly Mechanic and Avionics Electronics Technician. Persons interested in these positions should contact the Personnel Office on the second floor of the Student Center. Opportunities may be set up with Cessna if qualified students and alumni are interested.

MAILING CORPS RECRUITING SERVICE

The Marine Corps Officer Selection Team will be on the campus in late September to interview college students and graduates in Marine Officer Aviation and Ground programs. For further information, call 214-420-6461 in Orlando.

This is the AVION. It is your newspaper. It is made by and for the students who attend Embry-Riddle Aeronautical University. The paper comes out weekly during the Fall, and Spring Semesters and is published to meet the needs of the campus.

This newspaper can mean much to you. It provides a place to gather new information in a variety of aviation and non-aviation oriented news events. The AVION provides a medium for clubs and organizations to inform people about upcoming events and recently past happenings.

Students may use the AVION as a means of selling, buying, and inquiring for services and objects in the Classified Ads sections. This section is free for students to advertise in. Clubs and organizations may also place an ad for the paper for advertisement purposes. The AVION provides a quarter page of free advertising space to each organization. However, two clubs cannot get together to double their advertising space.

There are just a few of the many interests in reading and using this student publication. But more importantly, there are advantages to you, the student, for becoming part of the AVION staff and helping put out this award-winning weekly newspaper.

Money, pressure and pride, learning experience, development of your sales skills and fun are all end-products of working for the AVION.

Vacancies will also occur in editorial positions. Now is the time for all interested students to come in the office of the AVION. The workers in the newspaper now could well become the leaders of the university newspaper in the future.

During the next year as you are initiated in training for positions of leadership, this time will prove valuable with the experiences, knowledge and skills that you know you will need.

If your interest is in the paper more than just a casual interest, skills, such as your experience in writing articles, take photos, sell advertising, work as a layout artist, or act as a copy reader or as a columnist.

All of these functions provide you with leadership opportunities and a chance to share broader marketing and information know-how and background.

If you are interested in working for the AVION come by the office, fill out the right on the second floor of the University, three weeks before the date you want to do for us with Alan Kays, the AVION editor or Jean candy, the AVION secretary. Then remember to come back and work with the student newspaper. Staff meetings will be HELD EVERY WEDNESDAY at 5 PM. PEOPLE INTERESTED IN THE PAPER SHOULD ATTEND AND ARRANGE THEIR SCHEDULES SO THAT THEY CAN COME TO THESE STAFF MEETINGS.

STOP CRIME PROGRAM CONTINUES

E-RAU's Security continues their sternest program for students.

The expensive equipment is available at all times and all students are urged to have their belongings marked with this equipment. Each marking is not a 100% guarantee that no one will steal; however, a thief is far less likely to steal a piece of property that is easily identified, and the likelihood of recovery is greatly increased.

Those who have their belongings engraved will be issued Crime Stopper decals, which clearly state that the item is engraved and that the likelihood of recovery is greatly increased. Students desiring to participate in the program should contact the Security Office at Ext. 444 or 445. The staff of the Security Office, and all telephones on campus, will have this equipment and be able to mark any student's belongings.

The AVION is proud to proclaim again, that this past Spring, it took the First Place Award in the 1976 Annual Southern Regional Press Institute newspaper competition, held this year at Savannah State College, Savannah, Georgia. This is the second consecutive year that the AVION has won an award from the Institute.

A Fall 1976 issue was submitted to the Institute last January, and the judging took place in March, 1977. Judging was based on fulfillment of basic journalism categories including Content and Coverage, Writing and Editing, Layout/Photography, Graphics, and Advertising. The AVION scored 90 points out of a possible 100, with a perfect score in Advertising and Edging.

It'll be first place for this year, too.
We're Going Through This Together

helps you the new student, and
those of us who have been here a while and find that bond of togetherness.

WELCOME BACK!! to those of you returning. Welcome to Embry-Riddle!! to those of you here for the first time.

Now that it's been said, (and I'm sure you've all heard it to the point that you don't really feel welcome any more) let me say a few words as a fellow student. First, and probably most important - sitting here watching it all go by isn't going to help anybody.

Get involved, even if it's only with your own studies. Spending time on the beach, after paying so much for tuition, makes for a rather expensive version. If you have some free time, there are numerous organizations that can make your education go a bit easier, or as in the case of the AVON or any of the other S.O.A. organizations - we need your help.

Which brings me to my next point - the S.O.A. and all the organizations that are part of it need your support to continue functioning. The AVON needs staff members, so if you have any talent, or if you talent, the desire to learn, come see us. The AVON isn't the only organization in need of members, Social Functions Committee, Phoenix, and even, WERU, are also looking for personnel. It doesn't matter if you are a first year freshman, now is the time to get involved.

My last point is in regards to the upcoming Referendum. I can't tell you how to vote, only that you should vote. The AVON will attempt to publish any and all data that would be pertinent to the issue, as well as any letters to the editor expressing opinions on the subjects. We'll try not to be biased, but we've here to keep you posted about the going on around campus.

And here I booked a seat on the Concorde!!

We'd like to welcome you to this issue of the AVON.

We're going through this together. We're all here for the same reason, to get an education at Emory-Riddle.

This descriptive set of passages helps you the new student, and those of us who have been here a while and find that bond of togetherness.

INFO ON REFERENDUM

I want you to read the following sentences and then stop, read it again, and remember them. On September 18, 1977 there will be a referendum for the new constitution. Many of you might wonder what it is, what it means, or what it contains. The referendum will be a schoolwide vote either to accept or reject the new constitution drawn up by the SGA (Student Government Association). These are laws, regulations, and guidelines that the student body and their elected representatives will have to follow in the future.

I thought it might be easier to note the major changes between the old and the new constitution, rather than reprint the entire document. I assure you that it would be difficult to make a fair assessment without seeing a comparison.

Student Court

- Chief Justice
- Chief Justice, elected from 5 justices
- Justice elected by Senate with nominations from Executive Cabinet as well as Senate

Executive Cabinet

- President/Vice President (selected as a ticket)
- The Cabinet
- SGA Chairman
- Academic Affairs Division
- Senate
- Student Court Justice
- Associate Dean of Students or Designee (ex officio)

Students

- Senators from Arts, Business, Science, Engineering, and Technology
- Student Court
- Vice President/Elected at Large

SGA Constitution

Addendum

Many items have been simplified and made more writeable, like in the case of the Senate, for example - trimmed from a maximum of fifty Senators down to ten. The Judicial branch used to consist of seven justices, but now has six groups. Groups are made of four or five. Items were added to the Constitution and some were taken out. These changes are reflected below in the major changes.
The closest plane name ever brought to Federal Aviation Ad- ministration attention is "K" with the radio voice giving them "K" for landing instructions. To help introduce some familiar names to students in the same, the Cincinnati Regional fuselage Tony DiGiammo managed a reunion of FAA Marketplace fluff consisted of 70 onlookers assembled to Embry- Riddle students, and one was signed up for the tour. That proved a temporary question for FAA Specialist Bill Vearis, who had the center’s larger radio tower and floor "call" only accommodated a radius of 15 miles. It is the very time when the FAA’s Daytona Beach Regional Airport council in the same year. The FAA’s Panama City office is located in the central tower’s smaller radio tower and floor "call" can only accommodate a radius of 15 miles. A LOOK AT THE CLUBS

A variety of clubs, fraternities and societies are active and lively at Embry-Riddle. You're invited to get to know them and if you like just join them that interest you. To get a feel for the clubs on campus the following provides short glimpses into the activities of each of the different groups on campus.

The Kiddle Packets, the morning group who love to nap in the woods have tied down the mighty, upholsteryless Rover (beer in hand); padded off the教授's corner along the Withlacoochee River, were unable to get permission to spill off the Dormitory Building, went on several wildlife sanctuary camping trips to blend with the wild life, enjoyed sound in their parcel better than living in the out-of-doors, passed in a spectacular 100-day hike on the Appalachian Trail, and came in a respectable 5th place in a canoe race using such fictitious names as Captain "Sea Dog" Marley, "Anchors Away Americana" and "21st Sail" Yachts.

The Packets continue to hold meetings, check with the Student Activities Office to find when the next gathering takes place.

LAMBD A CHI ALPHA FRATERNITY

Lambda Chi Alpha Fraternity has held house parties, mouse conclaves, field trips to various hotel locations including Beach Club, has provided free beer for everyone during a party at the UC in the beginning of the year. The club has also been active in Sports and in community related activities including supportive help at the Speedway during two week.

LAMBDA CHI

DELTA CHI

DELTA CHI Fraternity on the other hand has embarked on a campaign of social, athletic, and academic progress. "Brookmen", pirates and a wine and cheese party. Designing water-right sails, the fraternity rowed away with two trophies in a raft race held in October of last year. In addition, the frat won the ever coveted trophy along with five other trophies during CCO's Greek Week, to become the year's champ. This spirited along with other essentially activities makes Delta Chi a frat to watch.

SIGMA

THIS IS NOT A MACHO CRUSH THE CAN CONTEST - This, rules is ERAU's Interfraternity Council infamous beer changing contest. Each year hundreds wait to see the latest and perhaps the thriftiest feat change in the illustrious bunch.

THE TRIFLUM OF SUCCESS - Sweet and teen spirit must have inspired this exhilarating moment in interfraternity competition. (AVON photo)

NO, THIS IS NOT A MACHO CRUSH THE CAN CONTEST - This, rules is ERAU's Interfraternity Council infamous beer changing contest. Each year hundreds wait to see the latest and perhaps the thriftiest feat change in the illustrious bunch.

BROTHERS OF THE WIND

Brothers of the Wind is another RBAU organization that has been busy, in the administration "Brothers" means togetherness. The women and men who belong to the association believe in helping others, acting responsibly and maturely. The club has had activities like basketball tournaments, special Olympic games, social and campus activities, and not mentioning parties. If this club appeals to you contact the Student Activities Office for further info.

ARNO LD AIR SOCIETY

ARNOLD AIR SOCIETY, affiliated with the AFROTC cadets, has held dinners, parties, participated in National Conclave in New Orleans, La., and has been involved in the March of Dimes 30 Mile Hike during the Spring semester. In order to join Arnold Air, you need a 3.0 G.P.A. in ROTC Class; 2.0 G.P.A. overall, and a minimum of 12 credit hours. See the Student Activities Office for details on meeting time and place.

Cheese Party... er... I mean Beer Change Contest.

AAAA (Army Aviation Association) is another military affiliated organization on campus. Their activities have included air shows, birding, and aviation related sports. Helpful members aid in an area Optimist Club by selling Christmas trees last year. They've got a pet lamb, Skaggs and a '50s party. The Association will continue its activities this fall. For further info contact the Student Activities office.

AIRLINE NEWS

Winston-Salem, N.C. - Piedmont Airlines is offering an agreement with the Civil Aeronautics Board respecting authority to provide service to Boston, Massachusetts.

The regional carrier's Boston entry application proposes a route extension into Boston's Logan International Airport. All flights would be operated with Piedmont's Boeing jet equipment.

The company's proposed answer to many requests by various Piedmont cities for direct service to Boston. One of the most significant benefits of this service would be the fact that thousands of travelers would be relieved of the current necessity of changing planes on their trips to Boston.

Since the application, Piedmont said the proposed flights would serve 170,000 new passengers in the first year including 77,000 in markets that now have no single plane service to Boston.

Piedmont President H. Deve, commenting on the application, said, "There is a real need, and we are sure our passengers agree, for single plane service linking many of our communities with Boston. We hope the CAB will move speedily on our request and we know our friends in the area we serve support us in this move."

Piedmont Airlines currently serves over 90 cities in 12 states, plus the District of Columbia, with a fleet of 33 Boeing jet aircraft.

There's a new Sun at Volusia Mall...

Our newest Sun Bank is now open at Volusia Mall giving you the added convenience of banking while shopping. Don't forget...you get a SunBanker 24 Card free with a Sun Bank checking account. It lets you bank anytime...day or night...weekends...or holidays. And when you're out of town you can use your SunBanker 24 to get cash out of your account...anytime...at any SunBanker 24 in the state and more on their way.

MALL BANKING HOURS:
Monday-Thursday 10 AM-6 PM
Friday 10 AM-4 PM

Demand Increases for Flight Courses

Based on projections made by several University Commit- tees, the "demand" for EIU's flight courses will increase again this fall. While we are cautiously putting pipe in to increase our student utilization and service, we will not compromise the quality of our programs, and therefore we will be limiting the enrollment in the flight program, and therefore we will be limiting the flight programs this fall. Space will be allocated on a first-come-first-served basis until the quotas are filled.

The Flight Division has structured the fall offerings to be the same as this summer; in that we will have all the flight courses offered twice during the trimester. We will start a group of students at the first of September, and another group the middle of October. Both start dates have advantages for the student, and depending on your personal preference you can make a reservation for either first or second half of the trimester to take your flight course. In some cases you will be able to register for two flight courses during the trimester, and thereby modify the flight portion of your program. If you have any questions on the possibility of asking more than one flight course, see the Flight Division.

YOU TOO CAN HELP KEEP FOOD COSTS DOWN

The Food Service Department is making an all out effort to keep food prices as low as possible in our cafeterias. We are facing a serious and potentially expensive problem. We are using an average of 120 pieces of silverware a week, over half of the beer glasses and many regular china plates are sunken. The Food Service operation has spent over $2,000 in replacing silverware, glasses, and plates.

There is no money wasted. If you take out of the cafeterias please take a plastic eating utensil or take back the regular utensils. Help us keep food prices as low as possible.

WELCOME INTERNATIONAL STUDENTS

For those of you who are continuing at Belk-Riddle, you should know that Embry-Riddle has established the International Student Office. If you are a new student, this article is written especially for you.

The International Student Office exists, with Mrs. Noni Garrett, Director, to solve any problems that international students may encounter while studying on the Daytona Beach campus of En-

This office is aware of the cultural adjustments and other problems that are imposed on an international student. Th is is the place to visit if you have any questions on the procedures, or if you are encountering these problems, be sure to talk to Mrs. Garrett, or let Mrs. Garrett know what you are experiencing.

As the saying goes, "the office only works when you make it work." If you have your cooperation, therefore, is highly needed. If you have any questions, or if you need help, do let Miss Garrett know. You also have another contact to Mrs. Garrett, who is in your office.

However, if you feel that you need help, this is the place to visit if you have any questions, or if you need help. It is a very big help to us to know what the problems are, so that we can solve them before you have any trouble. It is also a big help to us to know what we can do to help you.

In the case of the International Student Office, is located in the University Center. You can stop by there to see how, they are able to help you. As you can see, we are not just here to help you, but we are also here to help you. Therefore, be sure to visit Mrs. Garrett and let her know what your problems are. She will be able to help you. Finally, the International Student Office wishes you a safe and pleasant year at Embry-Riddle. Visit Mrs. Garrett and let her know what your problems are, she will be able to help you.
UNIVERSITY STUDENT STORE, OR

Where the Textbook Dollar Goes

STATEMENT
The Student Store is one of several major auxiliary service facilities which Embry-Riddle Aeronautical University provides for the benefit of the students, faculty and staff. It is owned and operated by the Student Store primarily for the benefit of the University community, and all assets, obligations and policies are under administrative control.

PURPOSE
The Student Store is a service-oriented organization with the primary responsibility for providing students with all the "tools" necessary to continue their education.

HOURS
Monday through Friday 9:30 a.m. to 4:35 p.m.

TEXTBOOKS
Textbooks, both new and used, produce over half the dollar sales of store. These carefully selected "tools" of the trade" are expensive, but not excessive in price when compared to required "tools" of other professions. These high prices do not produce excessive profits for the store. In fact, the gross margin is 20% (not including freight) and the average cost of operating a college store is 22%. Simple arithmetic reveals that a 2% deficit would prevail if other factors did not exist.

To help reversing your textbook dollar, the Student Store proceeds in many used books as possible. We purchase books from used book companies and Embry-Riddle students, and place them on shelves along with new books. Our purchasing procedure is the same as followed throughout the country, namely, buying a book at one-half the current new price (whether it was originally new or used) and reselling it at three dollars of the new price.

It is the policy of the Student store to price textbooks according to the publisher invoices as they are received.

On occasion, this will cause books of the same type to have multiple prices. This is due to the fact that it is a Student Store Policy not to raise the price of the books currently on the shelf, but to add new ones. All textbooks are subject to being returned to the publisher the week following any price change.

STORE POLICY
DO NOT write your name or put other marks in a book until you have attended class and are certain the book is the correct title for your course. Ask your instructor immediately make the book used and proceeds receiving a full refund.

KEEP YOUR CASH REGISTER RECEIPT. All refunds must be made within 10 days of purchase.

FULL REFUNDS WILL BE MADE ONLY UNDER THESE CONDITIONS:
1. A current cash register receipt is presented.
2. Book is in an unaltered, new condition.
3. Book is returned within 10 days of purchase.

Ask your instructor or other marks in a book until you have attended class and are certain the book is the correct title for your course. Ask your instructor and the book is returned within 10 days of purchase.

**RIDDLE SPORTS**

**GETTING A FEEL FOR SPORTS EXCITEMENT AT E-RAU:**

"Propelled by six men in their last three at base and anchored by outstanding Nolan Solich pitching, the Eagles were able to experience the "joy of victory" for the first time in many moons Friday as they crushed the Winter Scotia (Rhode), 7-2, at Exposition Field, No. 6." 

"In bowling action the High Rollers maintained 1st by winning 4 games from the High Flyers with the help of Tom Tarr's 337 series. One more Time moved into 1 game of first by taking 4 from Vermont. Walt Stimato rolled a 212-214 series for them. The Horse Rollers stayed close in the lap by taking 3 from the Wing Pot. Brian Richard rolled a 330 series for the Horse Rollers and Clay Sanders had a 302. Pairs-Cheat got back on the winning track by taking three from Peak Brace." 

This is just a small taste of the sports available at E-RAU. E-RAU is a member of the National Collegiate Athletic Association and the NAIA, participates in intramural competition in soccer, tennis, basketball, baseball and golf. Students who are on academic probation may not compete in intercollegiate athletics. 

Interscholastic and/or league competition is available in baseball, basketball, bowling, flag football, golf, softball, volleyball, wrestling, fencing, tennis and swimming. Come and join the fun! 

**ANOTHER COLLEGIATE EVENT - E-RAU continues its spirit of competition as intermural basketball is played each year. Guest, pass and shoot see the names of the pass.**

**WORLD'S HOTTEST SPORT - success is played with great and as hundreds of international students have translated to intramural and intercollegiate competition from E-RAU's field.**

**CO-EDS ACTIVE IN SPORTS**

The number of co-eds active in varsity sports at their colleges has doubled in three years. In addition, athletic scholarships for women has also risen in number. In 1973, the number of girls involved in college varsity sports was 500,000 and in 1976 that number had risen to 136,000, according to the Association for Intercollegiate Athletics. The association also reported that 200 women's athletic scholarships were awarded in 1971. In 1977, 360 colleges and universities are handing out loans to 60 women's athletic scholarships.

**A TRUE RUNNING GAME -** flag football in all its varied man- turns continues to delight lookers and the participants. (Acton Historical Photo)
MAINTENANCE TECH IMPLEMENTS STUDENT REP PROGRAM

The Maintenance Technology Division has implemented a student representative program to provide a better line of communications between the students and the administration.

Each MT and AMT section has elected a representative who will meet periodically with the Chairman of Maintenance Technology. This agent assists the representative who has immediate access to the Chairman, and, of course, the "open door" policy is still in effect for all students.

But, there are those students who do not bring problems and grievances to the student's attention but, instead, harbor resentment and initiate detrimental rumors. Hopefully, the "representative" approach will reduce student dissatisfaction by surface problem areas so that prompt corrective action can be taken.

An additional purpose of the program will be to provide creative feedback on course presentation and content.

CAREER PLANNING AND STUDENT PLACEMENT

PLACEMENT ACTIVITIES... DID YOU KNOW THAT...?

The Career Center activities include placement, career planning, and cooperative education efforts.

ESSEX SELECTS SPERRY FOR TDRSS WHEELS

PHOENIX, Ariz.--Sperry Flight Simulation and the ground has received a $1.12 million contract from the TRW Defense and Space Systems Group, Redondo Beach, Calif., for gimbaled reaction wheel assemblies (RWA) for the Tracking and Data Relay Satellite System (TDRSS).

TRW is under contract to Western Union Space Communications for the Tracking and Data Relay Satellite System (TDRSS) which will include a series of data relay satellites and a ground control center at White Sands, N.M.

TRW will use up to four Sperry RWAs for stabilization and control of each TDRSS satellite. Current plans call for production of four satellites. The first is scheduled for a September 1979 launch, with two more to follow in orbit by mid-1980. TDRS will relay data to and from the Space Shuttle, unmanned spacecraft, and the ground control center. NASA is Western Union's customer for use of TDRSS.

**If you complete a Qualification Record, it registers you with our center for all services.

* Current job listings are maintained.

* We will type a resume master copy and that the point shop will reproduce for a nominal fee.

* Assistance is given in the presentation of your cover letter.

* Reference literature and resume are administered for your information.

* Copies of the College Placement Annual, the Unemployment, and Business listings are available for you.

* If you are actively job or already employed and the information is still needed for statistical data, it is available.

* Current telephone directories of most major cities are on file.

* All services are available to you as an alumni upon request (contact must be maintained at least every three months).

DON'T FORGET - TO REGISTER WITH THE CAREER CENTER.
