The Varieze
By Daniel Kaiser
AVION Staff Reporter

Keep your eyes open! If you happen to see a Suddenly-looking airplane flash by you in the pasture you won’t be imagining things, just seeing one of the few Glehns varieze aircraft in the area. He is a private pilot with over 200 hours in light aircraft, being frustrated by high flying costs and the inability of Joe Bode to ship all the B-64 kit. Bill turned his attention to a different type of aircraft, the varieze. This airplane was designed by Bert Rotan and has a unique concept. This will be the only time to order your varieze. This trimester will be the only time to order your varieze. The full price for the step bike building program is $5,900.

The speakers, Stavion T. Friedman, a nuclear physicist, and UFO researcher gave an enlightening and revealing talk. The lecture covered five large essays scientific studies including Air Force data generally not discussed. Flying saucers, "real" reports, led to the material, and false arguments by educated nonbelievers. About 60 slides of UFOs from all over the world and data pertaining to them were shown during his presentation. An interesting and provocative question and answer period followed. The lecture was sponsored by the E-RAU Student Activities Office.

The preceding two weeks have seen the Eagles travel to St. Petersburg, Tampa and back and play a total of eight games. The University of Tampa Saturday double header was an exciting one. The陌生 birding E-RAU eagles have faced, and our single victory over St. Pete behind the strong pitching of Steve O'Sullivan was our lone bright spot of an every trip.

The pregame for the game started with a double-header against the Florida Institute of Technology at Melbourne. Steve O'Sullivan threw a strong game in the first contest, but came out on the short end of a 6-1 upset. The loss was scored by first year starter Spyder Dykas, but despite the loss the eagle was the Eagles most consistent, hardworking, and most dependable runner on the field. The second game was a close one as the Eagles scored the Eagles 3-2. Though the game was not as good points are hard to find in such a game, late inning reining teams such as Daytona Beach, Bill Muslarik, Ken Naegel, and reliever Jeff Bode. The Eagles job and held the Eagles to one run in the top of the ninth inning.

The Eagles will be back at the race track March 17, with more information about this exciting event.
Dear Editor,

I realize that there is a lot of pressure to get this letter into the paper. I have almost given up on submitting letters due to the fact that I have not been able to get mine into the paper. However, I have been thinking about the situation and I believe that it is important to express my concerns.

Recently, I have noticed a significant increase in the number of late assignments and missed deadlines. This has caused a great deal of stress for both students and faculty. I believe that this issue needs to be addressed immediately.

I also want to express my concern about the lack of communication between the administration and the students. It is important for the administration to be transparent and to keep students informed about important decisions and changes.

I hope that you will consider these issues and take action to improve the situation.

Sincerely,
[Your Name]

LETTER TO THE EDITOR

Dear Sirs,

In regard to last week's letter concerning the removal of Mr. Beville's name from the AMT contract with AMT, there are several points that I believe need to be addressed. It seems to me that the decision made by the administration to remove Mr. Beville's name was a shortsighted move that did not take into account the positive contributions he made to the department. Mr. Beville was a respected teacher and a leader in the field, and his removal is a loss for the department.

Furthermore, it seems that this decision was made without proper consultation with the faculty. This is not in the best interests of the students, who rely on the expertise of their professors to guide them through their studies.

I urge the administration to reconsider this decision and to find a way to honor Mr. Beville's contributions to the department.

Sincerely,
[Your Name]
Summer Mountain Journeys

Grandfather Mountain, North Carolina

"You can literally step across the granite edge of the mountain top, hanging perilously between heaven and earth. The wind ripples through your clothing, and far below the tree tops you see the vast expanse of water and exhilaration streams through your being." 

You lean into the rope, and as you start to float, you can feel the rushing of the river on your face. As you come closer to the water, the water dips and the rope guides you toward the rushing river. The water is cold and refreshing, and you can feel the rush of the current as you pull yourself up to the safety of the rope.

This is one of the many experiences you will have on this four day trekking expedition. During the first part of the trip, you will experience the beauty of the Grandfather Mountain State Park, and the second part will be spent trekking to the summit of the mountain. At the summit, you will have the opportunity to enjoy a picnic lunch while overlooking the beautiful Blue Ridge Mountains.

The Adirondack escarpments are the easternmost of the mountain ranges in the United States, and they are known for their stunning beauty and rugged terrain. The Adirondack Mountains are home to a variety of wildlife, including black bears, moose, and deer.

The program is open to all underprivileged and other interested adults, and welcomes non-credit applicants as well as those seeking credit. Further information can be obtained by writing the Adirondack Institute, Dunn Hall, Stephens College, New York 12801.

Feedback

SUGGESTION:
In regards to the traffic bumps in the parking lot, I have a theory. I have seen a member of the faculty drive out of the parking lot, and when they come back, they are always talking about the bumps in the lot.

ANSWERS:

Dear Corny Driver,

I was surprised to hear that you have noticed the traffic bumps in the parking lot. I would appreciate it if you could call me at 316 in order for myself and the Director of Traffic to meet with you in order for you to demonstrate the problem to us.

Thank you for your cooperation.

Michael With a "J"

An Evening with Mr. Weener

"The Mr. Fingers Show"

The nationally known right-hand试剂, Mr. Weener, will perform in the U.E.D. of the Eckley-Bridge College on Saturday, March 18 at 8:00 p.m.

For weeks before the appearance, Weener mailed a sealed package to campus! Hints! Hints! Social Functions Chairman of the E.G.A. This package was accompanied by a date sheet listing the events of the week. The packet also contained instructions on how to prepare for the performance.

The performance will be held in the student center, and will be followed by a reception where the audience can meet the performer and other campus guests.

Mr. Weener has been a speaker and entertainer at schools, industrial groups, and schools for a number of years. Last year, he developed a program that was so successful that he was invited to perform at the University of California, Los Angeles. This year, he is scheduled to perform at several other campuses around the country.

In addition, students can purchase copies of Mr. Weener's book, "How to Prepare for Success," which is available at the campus bookstore.

The program is open to all underprivileged and other interested adults, and welcomes non-credit applicants as well as those seeking credit. Further information can be obtained by writing the Adirondack Institute, Dunn Hall, Stephens College, New York 12801.

V AFROTC

Last Saturday AFROTC held its annual football game in the annual football game in the University Center. The event was a huge success, with plenty of spirit and energy on display. The cadets played a spirited game, cheered on by the crowd. The event was a great way to bring the community together. On Sunday, the AFROTC softball team played against another school, and the team did well, but their opponents played even better. The next week, the AFROTC team will host another event, and all members are encouraged to attend. The spirit and energy of the university community was on full display at this event.
Candidate For SGA

WE’LL MAKE IT HAPPEN FOR YOU!

The purpose of the Student Government Association is to serve YOU, the student. To accomplish this goal, we have established the following five-point program to make the S.G.A. function for YOU.

1. Establish an S.G.A. office in the Academic, Administrative, Technology, and Flight Technology buildings. Each office will be staffed by the sufficient number to make the S.G.A. more accessible to the students.

2. The office will be made of each S.G.A. Senate and committee meetings will be posted in each academic and dormitory complex and established in the Administration Building. This system will allow the student of S.G.A. activities and allow the student to make his voice heard on issues being considered.

3. Establish a committee to invigilate student complaints and suggest positively. By means of a student organization, the entire student body will benefit.

4. Active representation in every campus committee to insure that students are aware of pending change policies and have the opportunity to voice their ideas and suggestions. This will ensure that every student knows the goal, function, and purpose of the S.G.A. and the student body.

5. The internal workings of the S.G.A. need to be improved to better serve YOU. The true major area is need of immediate attention.

Any election only twenty percent of the students voted. This poor turnout is one of the greatest problem creators of all. Action brings solutions and without voting, apathy prevails. Please don’t let that happen. Get involved, not bored.

JOE GODLIN

Joe Godlin or better known as “Bill” around campus, I’ve been at ERAU since Jan. ’77 and I have three ‘Dos to go. I’m originally from New York but I have since moved to Daytona Beach. I served with the U.S. Army in Vietnam as a helicopter pilot and I have flown with two National Guard Units.

I am running for the office of Vice President of your S.G.A with Carl Duncan running as President.

Joe has been involved in many functions at ERAU and I’ve seen administration come and go. I’ve heard every campaign promise that could be made. I mean, who hasn’t seen too many promises kept?

When Carl approached me to run with him I first asked what his platform was and the answer served to answer all the questions I had about the campaign. I felt that the fall of ‘79 would fall back in our government and to do this you need people willing to work for you and not just believe in the concepts of a few, because it’s a funny game which seeks to take away government from where it belongs, the student government.

MICHAEL WITH A "J" JAWORSKI

Aviation Management G.P.A. - 1.76

Background: High School soccer, track, swimming teams, U.S. Army - Honorary Discharge, Manager - new car Fleet sales/owner/supervisor - delivery service.

Board of Directors, Spring ’78, U.S. Army - Radio General Manager Fall ’77 to present, Detachment Valuable Stores - Spring ’77, military (Student/Former Clubs), Athletics and Communications Board member Fall ’77, Spring ’78, S.G.A. Executive Cabinet member Fall ’77, Spring ’78, S.G.A. Club Activities and Communications Board member Fall ’77, Spring ’78.

Present Outside Involvement: Member Halifax Optimist Club

WILL RUNNING FOR OFFICE OF S.G.A President

In time to get you into the S.G.A. the main problem with the S.G.A. have always been, and still is, lack of positive ACTION. Those who have seen me and my record shows that, I have always looked results of my involvement in any organization. My motto - "PERSEVERANCE & PROFESSIONALISM".

PAUL LENNON FOR SENATOR

The Student Government Association offers opportunities for interested, conscientious student representatives. As a candidate of the student government you will gain experience and academically. The Student Government Association is responsible for controlling student oriented activities and that means being in charge of student conduct. It also has two voting members on the University Board of Trustees.

In May 1976, I served two years in the U.S. Army, one of which was in Vietnam. My work experience covered several years and included a number of different jobs before coming to Embry-Riddle where I am a junior in the Aeronautical Science program.

I hope you will vote on March 15, and when voting please remember that your vote is important. Thank you.

OPEN VOICE FOR STUDENTS

Note Klicked-On: Communication & Technology

Having been a student at Embry-Riddle for five consecutive semesters, I have been exposed to the mental and spiritual values of the student body. I have witnessed how an individual with a genuine insight into the student body can make a difference.

I believe that as an individual who has a genuine insight into the student body, I have the chance to make a difference. I have realized that the student body has the opportunity to voice their ideas and opinions. This will be my way to accomplish this goal.

The time for commitment is NOW. More than anything else the S.G.A. needs greater communication with you, the student body.

I have decided to run for the student body on this commitment to the voice of the student. My policy is open door, with a constant response to the requirements of Embry-Riddle students. Remember to vote your choice on March 15.

YOU GAVE A CANNY

By Howard E. Kates

I am a damn about your school? If you do, get out
and vote for me, I'm the best thing that has ever happened.

(1) Prerequisite to make myself available to all students to hear what you feel should be done and to turn your vision to the Student Government Association. The senate is the tool for the students of the government and not just for the minority of the student body.

(2) Prerequisite to be a very active, participating member of the senate. The S.G.A. has been troubled by many students who do not attend meetings and have no interest in the student government. If you are not interested in the suggestions I will be more than willing to bring them up at our next meeting.

I am presently a sophomore in the Aeronautical Science program and want to run this spring with the S.G.A. senator, thanks for your time and please vote for Dave Bidewicz for senator at large.

DAVE BIDEWICZ FOR SENATOR

The position is very important to me because I enjoy getting involved with the school government and that is why I am running.

I am presently a sophomore in the Aeronautical Science program and want to run this spring with the S.G.A. senator, thanks for your time and please vote for Dave Bidewicz for senator at large.
Facing the University of Tampa on Monday brought junior starter Nelson (Snake) Zierhoff back to the mound, where his last three starts had sawn 33 men, while giving up only 11 hits in 24 innings. Unfortunately, his successful efforts fell to two losses, both by 3-5 scores. Against Tampa he and the rest of the Eagles didn't fair as well. E-R.A.I. was better 6.64, unable to get enough bats into the game.

Coming home saw no rest for the team and a new addition to the pitching staff. Second baseman UWirth started this night game and made one surreal performance considering he's not a regular pitcher. Bunting two runs in the first inning, he looked like the Eagle bats would finally erupt for their much anedoting game. Unfortunately, that was not the case and Wirth gained a 7-2 advantage. The Eagles warmed up in the eighth and ninth, but only came up one run short. The ninth saw singles by Longmier, Dewhirst, Lｍeen, Heaven, and Solari knock in two runs with the last out coming on an exciting play at the plate that cut down the leading run.

The last two games of the week were against Widener College, which saw the return of Solari and O'Sullivan in the mound. Nelson Enloe went 10 long innings in the first game, giving up the go-ahead run in the ninth before being relieved by Jeff Ryan. Before losing in 11 innings, the Eagles rallied for four runs in the eighth for what looked like the winning run. Widener had other plans through and came back in the ninth with four runs of their own, starting Er-R.A.U. to score again and in their half to keep the game close. Solari, taking after approximately 200 pitches, gave up what proved to be the losing run to the better of the eleventh.

Steve O'Sullivan went the distance Saturday night at City Island, facing slightly better than his Jersey buddy, but still coming out on the short end of a 6-2 score. Eagle hitting was infrequent, though Ken Higgins and Rob Jenkins came up with two hits each; with the two RBIs going to Jenkins and Howie Taylor.

"EAGLE SHORTS" Needles to say, hosting is not a pleasant feeling, and it's compensated when you don't get at least a little school support. Enough can't be said for the hospitality that take a bag of your money to Strong on an easy trip, paying for both buses and meals. You'll see more on this subject later.

Moros should be put up of some fine performances by third baseman - outfielder and all around ballplayer Spyder Dykes.

Though the Eagles have been plagued by a lack of hitting in many of their last 10 games, Spyder has come through with a good number of hits and knocked up defensive plays that have kept life in the Eagles. Steve O'Sullivan has also become a consistently good pitcher, coming through with two strong performances in losing efforts. Add to the starting lineup situations of Nelson and "Spyd", one short relief assist...
Meet The ERAU Eagles

Donald (Spyder) Dykes
CLASS: Freshman
HOMETOWN: Columbus, Fla.
AGE: 19 years
MAJOR: AMS
YEARS WITH CLUB: 1978
POSITIONS HELD: 3rd Base, Outfield

• Travel
Bill Cook was on to give me the specs on his aircraft. Every bit of information he gave me surprised me a little because it varied drastically from the airplanes I’ve flown in, in weight, design, climb performance, etc. (He refers to Conning Activity as other factors made planes “storebought.”)

The rear wing is made of styrofoam, and polyethylene foam covered with fiberglass cloth. It has a number of advantages. There are only four strips of wood in the entire aircraft and the only steel is on the engine, firewall, and the front fairing-nose gear. (The rear gear is fiberglass.) Bert Rutan says jokes that the lack of metal is great for flying through restricted areas, just turn off the propane and there’s not much to detect on radar. (A fact I’m sure the FAA will appreciate.)

The rear wing is 22’2”, and the front wing, called a “canard”, is 12’6”. The 85 hp Continental is mounted on the rear, nose as a pusher prop and spins a 58” fixed-pitch prop. The aircraft looks like it flies back-wards, but with a well-under-gross-climb of 1,900-2,000 feet per minute (fpm), a cruise of 138 mph and a top speed of 100 mph, there’s no question as to which way it goes — fast. The rear wings are selected like an upside down V, and Cook says this increases stability, also on the top wing. (This increases low frontal stabil-
1. EVERY REGISTRANT IS DIRECTLY RESPONSIBLE FOR ANY VIOLATIONS COMMITTED BY HER/HIS UNIVERSITY VEHICLE, REGARDLESS OF WHETHER OPERATING THE VEHICLE.

2. Parking on the grass, medians, sidewalks, and places not designated as parking areas is illegal.

3. Designated parking areas have been indicated on campus maps.

4. Faculty only.

5. Faculty parking spaces are for students, staff and faculty only.

6. Parking in the rear of the University Center (circle) and at the dormitory parking lots may be utilized by any person with a valid B-U sticker unless that area is otherwise designated against parking in some way, means, or manner.

7. Ten (10) minute parking spaces are provided along the entrance to the University Center.

8. This hour parking spaces must not exceed ten (10) minutes.

9. Certain traffic regulations will be enforced 24 hours a day.

10. These include the regulations prohibiting parking on the grass, parking in fire lanes, excessive speed and reckless driving/exhibition of power, parking or driving on sidewalks, grass, medians or medians.
