AUGUST 1978

SGA Elections

Three weeks ago SGA elec-
tions were held deciding who would fill the offices of student government for the upcoming year. This election is probably best remembered by most of the stu-
dents because of the airplane problem. And the airplane problem will no doubt continue for some time to come. After all, the Consti-
tution of the SGA states that anything getting out of the student govern-
ment is to be re-elected on the first Wednesday of March. Howev-
er, the Student Senate election re-
commended that a new election be held on the first Tuesday of March.

This was an excellent job by the elec-
tion committee. By Bob Schaffer, and counting with Paul Warm, Dave Schmidt, and Dave Gallagher, it is to be com-
pined that this was the excellent job they did running the elec-
tion. That job provided a very successful assemblyall petitions signed, getting out and students are coming in to register.

In the Student Senate election 1977-78 class, a total of 3,000 Skyhawks all produced in 1975-76 with the Lockheed 0-202-HAA engine. So our fate will be a commendable and speedy job by the aircraft maintenance depart-
mament. By the end of the week our entire fleet should be in their rightful place, under

17 DAYS TO GO!!!
Here I am, second week of school and I've already read blues and lines of student complaints concerning the new Senate office. There are several provisions to the new Senate office that I don't believe either you or I'm looking into these items at this time.

Most complaints come from the Senate office and from students who have volunteered to work in the Senate. This has been noticed, and will be distributed and handled. I'm hoping that you can see the Senate office as looking more for new students to work there.

I'm a member of the Senate, and I look forward to the new Senate and the new Senate office.

By Christian and Nandy Schurmert

Chile is one of the smallest countries in the world, yet it is a land of great diversity. The country is situated in the western part of South America and covers an area of approximately 200,000 square kilometers. With a population of around 20 million people, Chile is the most populated country in South America. The country is divided into 16 regions, each with its own unique characteristics.

**Chile: Between the Andes and the Sea**

There are many reasons why people come to Chile. Some come to visit the Andes Mountains, which are considered one of the most beautiful mountain ranges in the world. The Andes stretch from Peru to Argentina and are home to the highest peak in South America, Aconcagua. Other people come to see the beaches and the coastline, which is home to some of the most beautiful and peaceful beaches in the world.

Chile is also known for its wine, which is produced in the coastal regions. The country is home to some of the best wine regions in the world, such as the Casablanca Valley and the Maipo Valley.

The country is also known for its rich cultural heritage, which includes influences from Europe, Africa, and Asia. The country has a long history of political and social struggles, which has led to a rich and diverse culture.

Chile is a country that is rich in history and culture, and it is a place that is worth visiting. Whether you come to see the mountains, the beaches, or the vineyards, you will be able to experience a truly unique and fascinating country.
The Phoenix Arises

By Linda Mayberry

I know that some of you are wondering about the 1978 yearbook. This article is to inform you of the progress we have been making.

This year's Phoenix will have 28 pages of color which has been completed and sent to the publisher. The seniors and all the underclassmen have also been sent. We've had a little trouble with the clubs and organizations because of a lack of pictures. So... if you belong to a club (or an organization), please bring in any pictures you might have that could be included in the yearbook. The faculty and administration are working along. There's more faculty than I thought there was.

The 1978 Phoenix will be distributed in September. If you have not yet received E.R.A.U. for three times, then you'll be notified by a yearbook. Every semester you pay an SGA fee. Part of this goes for the yearbook.

This year's staff includes Linda Turner - editor, Cathy Wilkins, Linda Mayberry, Joe Babos, Dick Baker, Paul H统统 and Chuck Hendrix. Many members in the staff will not be enrolled and a great effort will be needed. Anybody who's interested can come up and see us on the second floor of the U.C.

We hope you will like the 1978 Phoenix.

NOTICE TO STUDENTS

It is vitally important to the professional future of every Embry Riddle Aeronautical University student that he or she get proper attention from the administration in its capacity as a total representative of every academic instruction and technical training. Equally important is each student's personal welfare, and the associated requirement for Embry-Riddle to provide every opportunity for the student to achieve his academic and related work undertaken. Only through adequate counseling and by regulating the total number of academic hours and courses for every student in a given time - is the student allowed to progress outside E.R.A.U. - on the University provide the necessary support to meet these goals.

In keeping with this, students are reminded that E.R.A.U. regulations require every student wishing to take volunteer or academic courses outside the University - including all types of flight instruction - to write written permission to the Office of the Dean of the appropriate E.R.A.U. College. E.R.A.U. Academic Counselors are available for assistance and advice in determining optimum courses and credits toward graduation.

Students currently enrolled in any academic or flight course outside the University, and who have not received proper authorization must notify the Dean of the appropriate E.R.A.U. College immediately or April 14, 1978 to avoid disciplinary action. Any E.R.A.U. student failing to comply with these requirements will not be eligible to receive credits for outside courses taken, and will be subject to dismissal from the University.

Graduation Reminders

The graduation ceremonies will be held at the Gaylord Ransom Complex on Sunday, April 23, 1978 at 3:00 p.m. If you want to participate and haven't already been approved for your cap and gown, hurry yourself to the Dean of Students' Office and get matters - you might make it.

Candidates need to pick up their caps and gowns, in person, in Room H113 of the Russell F. Holdeman Building (Gill Roberts Wood Complex) on Friday, April 21, 1978. Caps and gowns are distributed only during the following hours:

8:30 a.m. to 12:00 Noon
1:00 p.m. to 4:00 p.m.

On Saturday, April 22, 1978, assembly in cap and gown on the sidewalk on the East side of the Russell F. Holdeman Building (Gill Roberts Wood Complex) not later than 8:00 a.m. Graduates are requested to meet at 2:40 p.m., in the gear, dark shoes and socks for men and white shirt, dark sweater, and dark shoes for women.

Procedure: Briefing: Assistant Dean Smith (Sommer Murdy) will give instructions in some cases, marching, seating, everything, turns in cap and gown, and diplomas.

The ceremony has been completed, return cap and gown to Room H113 in the Russell F. Holdeman Building (Gill Roberts Wood Complex). Diplomas are not released until both cap and gown are returned.

President's Reception: Family and friends will be held immediately after the ceremony. Family and friends who want to take pictures during the reception should be advised that seats are provided in the front row and that they should not stand in the traffic pattern.

If you have any questions regarding your cap and gown, times, dates and places, please do not hesitate to call the Dean of Students' Office at extension 316 or 317. 'Money Zink will be glad to assist you.

FLIGHT TEAM

By Jim Sanders

The list of things that Embry-Riddle students have to complain about is now four items. The fact that the summer pool was to be opened around May 1st, but now we aren't operating till mid-soft or late August. However, the administration would like the pool to be opened to the students and we are told that since the weather is so good now, the pool will be opened, but it is because of bad weather that changes in the construction plans that the opening of the pool is delayed.

The pool itself needs only three more weeks of construction to be finished. All that remains is to put the pool deck (including area in front of the pool) and the installation and connection of the filtration system. The actual construction of the filtration system will be completed by this time. The opening of the pool is expected to be within the next 10 days, and we will open the pool until Labor Day.

The original plans called for the filtration system to be added at a later date. However, this was not feasible for the contractors because of the labor shortage in the food service area for pool crew, and the money spent on swimming is too much for students. Therefore, the swimming pool will not be opened until this summer.

First, plans and 192 pages of specifications were developed and then sent out to various contractors, who will be asked to respond and look at the bids. If everything proceeds as planned, a contract will be awarded to the lowest bidder, and the construction on the building will be completed by the end of the month. It is expected that at least 50 days of construction will be necessary, so we will be ready to open the pool by the third week of the school year.

In closing, it's been officially announced that the pool is still open and will start construction. And we are all excited for the people who can start swimming this summer. The pool now will be open from now on every day that the weather will allow, and we will have a new pool next year.

POOL DELAYED
This week the brothers of Lambeth Chi participated in the Greek Intramural Games. During the course of the games we won a few, lost a few more, and over all had a pretty good time. A few of the events against were dirty hay, tug-of-war, chariot races, and of course the egg toss. One would only consider the hay to be a little tough, not so considering that was just about the time the cold beer came in, pretty much higher. Lambda Chi would now like to thank all the players who helped make the games possible and they include both students and faculty.

By Bob McGill

What could be better than good competition to generate spirit. This was quite apparent this last weekend during the Greek Games. We were more than enough to come out on top by doing very well on most over Sigma Phi Delta. They did an excellent job and should be commended for their fine team effort. They certainly made us work a little harder to be number one, especially in the flour bowl event. It isn’t for the intense desire of Victory that Paul and Paul we could not have won. The games certainly could have been won by us but the point results are not only out there strong spirit and the competition spirit created a result. All Greeks were not only out there strong spirit of their own group but all Greeks as a whole gave their best - a tremendous benefit for this school. Let’s all try to further this in the future. After the games, in the spirit of friendship, we got together with Sigma Phi Delta for a barbeque and party.

Many thanks for a job well done as the brothers of Sigma Phi Delta did much of the preperation and planning of the party.

The following afternoon we went to meet on the half field for our softball game with none other than Sigma Phi Delta. It was quite unfortunate that we were unable to make any showing since it would have been a good game. The forfeit Sigma Phi Delta took off spot and the brothers of Sigma Chi would like to wish you all back in your future games more exciting friendly games. They have been charged with the responsibility of keeping the fraternity to our long and short term goals. The future looks quite promising. Also discussed at our “week meeting” were the pledges but more about them later.

The games did not go so well as we would have liked, although it was a trip to a few bright spots in our line-up: Tom Reeser, manager Paul O’Leary, and Tom Reeser. We started things off Friday night after the Greek games, with a parole party. Then, after a sliding speech about a cause we pose of our final day and pre-reformation day. Usually we, the case, all they have some unique dining, welcome the PC to the fraternity for a good round of competition.

Now we go to the main event of the weekend, (enter the pledges). We had the pledges competing for their chance to get on the line to the brotherhood: Joe Goodfellow, Carroll Sexton, Mike O’Leary, and Tom Reeser. We started things off Friday night after the Greek games, with a parole party. Then, after a sliding speech about a cause we pose of our final day and pre-reformation day. Usually we, the case, all they have some unique dining, welcome the PC to the fraternity for a good round of competition.

As this week comes to a close the Scuba Club is col lecting with a “Clothes Drive” this Sunday evening at Talbot Beach. This is an un成功的 attempt to give the poor and underpriviledged the chance to wear the PC’s “clothes” during this event.

By Linda Higby

What are you looking for last week’s article? You say you didn’t see one - are you sure? I hope you weren’t fooled too much April 1. By the way the Greek Games were April Fool’s but since everyone comes they decided to have the games. We may be having another dinner meeting before the term ends. If you think this is not a good idea let us know immediately, Allen Motter knew.

Final notes: Kaid and Mad have the dancing to天才’s, Kaid’s looks nice, Well this is the last Palm Coast!!

By Linda Higby

I know that seems simple enough - but from whom? Oh yes, the Dean’s last last week with a 3.5. He is also one without his orders but he is still in charge. He is in Vandenbos ABF for Medical Sciences. They are still on the Minotaur III weapon system. The whole thing of the military Order of the World, was a real treat. Paul Okeefe, the Chief of Personnel in SATC, was in SATC, he has the AAF’s appointment and is a member of the Reserve Officer’s Association.

This military history I have this story that date for correct identification of each military aircraft. He also flies various related aircraft. He flies all the NAA’s for various fighter pilots. Brad had better become. It is a trip to do in its favorite (quote) “Hey, let’s see we’ll do the M’s all right - you might want to think about that!”

Here is a note to - Kaid and Kaid have the dancing to tonight. Please don’t miss the Vail at the Dance at the Unit!!

By Linda Higby

The meeting will start at 7:00 pm.

Only 17 days till graduation! It’ll be gone before you know

**Bowling News**

*By Tye Westover*

Things were looking much better this week. The normal gang showed up and they were bowling their 200's. I would like to make a request to the men, though. Your opposites are hitting a slump and need some assistance. Anyone who is willing and able please respond!!!

The standings shifted around a little and the team that made this happen, Kevin Twiffle with his 201/200 scored the team into first. Second place goes to Bob Aller's team for 247/556. Richard Freedman positioned two men into third place with a 201/201. A few other classical scores were Rick Holmen with 351/468 and Carol Terenae with 305/466. These scores look not feel much better.

The total standings are as follows:

<table>
<thead>
<tr>

**Frisbee at E-RAU**

*By Chuck Henry AVON Sports Editor*

The summer term is fast approaching and there doesn't seem to be an intramural sport that excites enough people. How you ever thought about Frisbee? Frisbee for competition between two teams? If not, you should consider the possibilities. There are two different games organized for Frisbee that have been popularized by colleges throughout the U.S. These two games, GUTS and ULTIMATE, are highly competitive and require skill, stamina, accuracy, and a great deal of teamwork.

Guts Frisbee is played with five players in a side. The Team Goal Field is 15 yards long and 10 yards wide (the width of five players with some room stretched). The upper limit is the unrestricted area of the players at the goal line, about eight feet. Any throw that passes through the 35-40 ft goal yord is good, and there is no behind the goal limit (catches can be made any distance behind the goal line).

The object of the game is to throw the Frisbee in the air through opponent's 30 by 30 goal "uninterested" for a score. Twenty-one points is a game. On 20-20, winner must win by two points.

Ultimate Frisbee is played with teams of seven players on each side. The competition field is 60 yards long (with 40 yard-wide goal line). The point should be ended (as in Guts). The object of Ultimate is to place the Frisbee in the opposing goal. A goal is scored when a player successfully passes the Frisbee beyond opponents goal line. Playing the game begins with the throw from the defending goal line. All players play behind respective goal lines until the Frisbee is in the air. Receiving and other catches in Ultimate, two-fisted catches are allowed – or allows Frisbee to fly within bounds, untouched to obtain possession. If touched but not caught, throwing team gains possession of the Frisbee. In Ultimate, the Frisbee is advanced only by throwing. In attempting to make after a catch, a player is allowed a few steps. If Frisbee is advanced over your object in flight other than a player, possession goes to the defending team. Defenders also take possession on interceptions. Guarding is allowed, but no contact with the thrower of the Frisbee is allowed.

Fouls are called by officials, if present, or else by gentle agreement. Defensive fouls such as inappropriate contact with the thrower results in a foul being taken over. Defensive fouls such as pulling defenders give possession of Frisbee to defenders at the place of foul.

If defenders gain possession of Frisbee in the red zone, they may throw from that spot or advance in the goal line to begin their attack. Goals are not awarded for interceptions or possessions gained in the end zone, since only play begins just outside and zone.

Time in the official clock is two minutes, with 15-25 minute half-time rest. Second half begins with a throw-off by teams that received throw-off in first half. The clock runs during active play as in football.

Timekeeper will estimate five minutes in length with throw-off determined by a coin (or Frisbee) toss. Time over can be called by an official at the time any time or after goals by either team. Each team has three time-outs per half and one per overtime. Substitutions can be made only after a goal, for an injured player, or when clock is stopped.

Ultimate is a very fast game that requires stamina, accurate throwing, and the development of creative running tactics. One of the highlights of the game is high jumping for Frisbee in flight.

Now that you've got a general idea of what Guts and Ultimate Frisbee is about, it's up to you to voice your opinion for either or not at all. I hope you see a shot of good "gut" people out there, so let's get together and do something about it. Anyone interested in forming intramural Frisbee games, please contact me through E-RAU. Box 1050-1056 with a short note stating your desire in Frisbee, or come up to the AVON office and see me personally.

 J - Is like English H in house.
 LL - Sounds like English Y in Years.
 N - Like English NY in canyon.
 U - Is always trilled. Vibrating the tip of the tongue with strong contractions of the jaw.
 X - Sounds like KI or G.

DAILY VOCABULARY:
How much does it cost?
What time is it?
What date is today?
What's for breakfast?

For favor.
Let's go to the movies!
Vamos al cine?
How old are you?
Cuanto anos tiene?
You are so beautiful.
Eres muy bonita.

BEL-AIRE MOTEL

February 27, 1978

Invitation to Embry-Riddle Students

For the past two years, the Bel-Aire Motel has offered to ERAU students attractive living accommodations during the Fall Triesten at reduced rates. In anticipation of student housing may be scarce this year in the Fall of 1978, we are issuing this invitation for continuing students to visit us and make advance arrangements for the Fall Triesten.

We have a variety of rooms, efficiencies and apartments, all completely furnished, utilities paid, color cable TV, and pool service; all for very reasonable rates. We are AHA approved, our units are unusually large, air conditioned, and parking at your door is provided. Since last Fall, we have added a new solar-heated swimming pool for the use of our guests.

In addition, for the first time during the Fall 1978 Triesten, we are offering to those students in need of same, free transportation to and from the 100 campus on a scheduled daily basis. Time schedules will be established to serve the requirements of student class schedules.

If you are looking for a way to eliminate the uncertainty of housing accommodations in the Fall, visit us anytime and make a firm reservation if you wish, we can book space you our accommodations after April 10th, but we will be happy to discuss your needs with you anytime. When you visit us, be sure to bring your ERAU Student Identification with you.
