**Linbergh To Work With New Image**

By Leonor Johnson

AVON Staff Writer

Walt, not Walt! But Em- 

by-Riddle is the new tem- 

porary possessor of the engine from the first transatlantic flight. The engine, which has been on display for some time at the museum, was loaned to the university for use in a new art project. The engine, which is on display in the university art gallery, has been restored to its original condition and is now being used as part of an exhibit on early aviation.

Have you noticed something missing from Riddle's campus recently? If you said a uniformed police force, you are right. The Riddle cops are no more. The term was used to describe the uniformed security force that patrolled the campus. The new organization is called The Department of Safety, Traffic, and Security.

Student union is instru- 

mental in bringing about the change. The president of the student union, a junior, said that the new organization was necessary to provide better service to the students. The union has been working on this project for several months and has been involved in many discussions with the administration.

The Depart- 

ment of Safety, Traffic, and Security is a student-run organization that will take over the responsibilities of the former security force. The department will be responsible for maintaining order on the campus, as well as providing transportation services.

**New Students Insurance Rates**

For a dollar, a half-dollar, drive or walk.

The winner of last week's Riddle Riddle is Matthew Doegerman and the correct answer for last week's Riddle is $115.40. Thanks to all those who tried and failed, or came to late to use your answer.

**Riddle Question for the Week**

What is the largest unit of money, all in current coins, without any silver dollars that I should have had if I had been able to give change?

By Jonathan Bailey

News Editor

Dave Gilbert displays new safety patrol uniforms.

Dave Gilbert displays new safety patrol uniforms.

The Safety Officers will still give traffic tickets, but their attitude has changed sig- 

ificantly. They're happier to see them than to give them a ticket. The department is also down from thirty-five to twenty-five full-time officers, which means a savings of $40,000 a year to the school.

I'd like to thank John Walbridge for his comments on the "TAKE TIME OUT" column. Student feedback is vital to the Aeronautical University and is key to its success. We hope you will continue to share your thoughts on this and other topics.

Of the six major staff members working on the AVION, these will be running after 9 AM. This will leave the AVION editors mostly unavailable. We need your help. You don't need any special talent, just a little enthusiasm and a desire to get involved.

My hat's off to the individuals who maintained the newspaper's reputation for excellence. As you prepare to replace our current crop of editors, I hope you will appoint someone as qualified as the past editors. We need your staff as soon as possible.

A LETTER TO THE EDITOR

There are a couple of things that need to be done to improve the AVION. These issues are not unique to us, but they are particularly relevant to our situation. We need to address these issues now to ensure the continued success of our publication.

A LETTER TO THE EDITOR

Opinion...
PAKISTAN: Proud Country

The S.C.A. is sponsoring two concerts this week. The first is an all-day trip to Busch Gardens, and the second is a night out at the S.C.A. dance. While these events are usually well-attended, the S.C.A. has had to cancel its trip to Busch Gardens due to the high costs involved.

Poteau: 171,000

The temperature in Poteau ranges from 150 to 150 degrees Fahrenheit, and the humidity from zero to zero degrees Fahrenheit.

Longitudes: 80 to 10 West

The S.C.A. is planning to host a concert in Poteau on Saturday, June 15th. The concert will be held at the S.C.A. dance, which is located on the outskirts of the city.

The concert will feature a variety of music, including jazz, rock, and classical. The S.C.A. will also be hosting a dinner following the concert. The dinner will be held at the S.C.A. restaurant, which is located in the heart of Poteau.

The S.C.A. is also planning to host a dance following the concert. The dance will be held at the S.C.A. dance, which is located on the outskirts of the city.

The S.C.A. is looking forward to hosting these events and hopes to see many of its members in attendance.

Lunken, the lake of Cleveland, you and Jacksonville exist on the outskirts of the city. The lake is beautiful, and the parks around it are wonderful. A boat ride on the lake is a must-do activity.

The lake is 1,300 miles long, 1,000 miles wide, and can hold 70 million cubic feet of water. The lake is also home to a variety of fish, including walleye, largemouth bass, and smallmouth bass.

The water in the lake is crystal clear, and the air is fresh and inviting. It is a great place to visit, and I highly recommend it to anyone who is looking for a relaxing getaway.

The lake is surrounded by beautiful mountains and forests, and there are many hiking and biking trails to explore. It is a great place to go hiking, biking, or just enjoying the outdoors.

The lake is also famous for its water sports, such as boating, fishing, and water skiing. It is a great place to go on a family vacation, and there are many hotels and resorts around the lake that offer a variety of activities.

The lake is a great place to visit, and I highly recommend it to anyone who is looking for a relaxing getaway. It is a beautiful and peaceful place, and I am sure you will enjoy your visit.
WW I A/C ENGINES VISIT RIDDLE

WWI aircraft engines at Riddle! Not being flown of course! However, Embry-Riddle has two WWI vintage engines on loan from the Smithsonian to be displayed.

The engines, a 7-cylinder Gnome and a 9-cylinder Latimer, were built in France and due to an alternating structural design, their power to weight ratio was an improvement over existing aircraft engines at the time. The design is one employing a stationary central cylinder and rotating radial cylinders - in other words - a rotary engine. The engines are distinctly different from the conventional reciprocating engine with it's moving crankshaft.

Photo by Henry

Sailplane Program By Two

In 1930 the three Schweizer brothers, Emil, Paul, and Rudi, built their first primary glider. In 1978 Schweizer Aircraft Corp., at Elmira, N.Y., produced their 2,000th sailplane. Since 1970, the three brothers have been joined by a second generation of Schweizers, Leslie, Stuart and Paul Hardy, all aeronautical engineers and business managers of the company and will continue the tradition of producing quality sailplanes, aircraft, aircraft components and light metal structures.

Photo by Henry

SAILPLANE PROGRAM BY TWO

GENERATIONS OF SCHWEIZERS

The 2,000th Schweizer sailplane is a high performance "Club 35" model, the 9th FAA approved sailplane model designed and produced by the company. Another version, the 1-35A, was the Sportsman Cross Country Derby and holds the National Distance Record with a single flight of 510 miles. This ship will be displayed in the National Air and Space Museum in Washington, D.C.

SAILPLANES AND crop DUSTERS

The two major production lines at the Schweizer factory offer a study in contrast. Buck, aerodynamically clean Schweizer sailplanes, and big, rugged, utilitarian C-66A crop dusters for Grumman-Avco is made come down the lines together. Following WWII, the company diversified its production. In addition to sailplanes and the Ag-Cat now in production, the company produces major components for Grumman, Bell, Beechcraft, Lear, Lamp, Fairchild, Piper, E System, and Martin.

DEALER ORGANIZATION:

Schweizer Aircraft is the first sailplane dealer organization in America. The dealers operate under the trade-mark, ed, "Soaring Centers of America." The basic requirement for a Schweizer dealer center is to have a full-time soaring school which provides introductory rules, instruction and sailplane rentals. There are 20 Soaring Centers of America throughout the country.

Schweizer also operates an open soaring school at the Cuming County Airport, where sailplane pilot courses and introductory rides are given. Also, special courses are available for those planning to start a commercial soaring school.

FOR PLEASURE FLYING AND RECREATION:

In the nearly 50 years since Schweizer Aircraft built their first gliders, there have been many changes in the sport of soaring. Gliding angles have increased from 8:1 to more than 48:1. Many contests have been won by pilots flying Schweizer sailplanes. They have also set numerous national and world records. For sport, speed, altitude and altitude.

The 2,000th Schweizer sailplane is a historical milestone for both Schweizer Aircraft and North American soaring.

Arne Heynder
AVION Secretary

Summer visitors to Embry-Riddle and full vacationers in particular bring capacity numbers to the present dormitory summer and even 450 motel accommodations open for students in early fall.

According to Robert Van Riper, Assistant Dean of Students, this summer will bring greater numbers of visitors for the Upward Bound, Early Bird, and Sun Serenade programs to come visit a few. With those record numbers crosses the question of where to house these guests. According to Van Riper the dorms will be used to full capacity to accommodate these short-term students.

However, there will be a longer term student increase when the Fall Term arrives and the new Dorm Complex is not completed until mid-October.

Van Riper said that the entire Scholl Inn facility on Victoria Avenue and 90 rooms at the Days Inn, also on Victoria Ave., will be utilized by the U.S. military to house students this fall. This will, according to the administrator, allow the dorm students to be housed in those motel facilities. Within, at the first, the new dorms being used, these students going into these dorms can be easily housed.

Robert Van Riper, in lieu of sharing his responsibilities in formal this report is sent Klyde Morris may find these new dorms better equipped to accommodate them. There will be three rooms in the dorms specially designed to aid handi capped people. "Klyde can be put in one of these," Van Riper said. "Although Klyde didn't get reservations on time!"

DORM NEWS

By Peggy Pease

Well, it's been a while since we last wrote about dorm life in the
campus newsletter. A lot has been
happening in the dorms and we
thought we'd give you an update.

The new dorm is due to be
completed by the end of next year.

In addition to the new dorm,
the old dorms are being
renovated. The old dorms are
scheduled to be finished by the
due date of the year.

The dorms are all located on the
third floor. The new dorms will
be completed by the end of the
year. The old dorms will be
