NEW 310S

By Jonathan Bailey
News Editor

Last trimester Embry-Riddle replaced its old Cessna 310’s with new 310S. The new aircraft which are leased, would have cost approximately $125,000 each had they been purchased.

All three aircraft are fully IFR equipped and are capable of a two-hour flight range and it is expected that they will fly a total of 100 hours this summer, 1000 in the Fall, and 1100 in the Spring.

There has been no major problems to date with the exception of an airworthiness directive which necessitated the replacement of the alternator.

WHADDYA MEAN "MY U.C."

By Bill Dowe

At last the end of all of this debate as to the displacement of our $50 per trimester student fee. The question has been asked, what is the thinking of our students if they were paying more than $500 for it over an average twelve trimester enrollment?

The only explanation of the Student Service Fee offered in E-RAU’s 1979 - 80 General Catalog is that it covers $50 per term. Any student entitled to a better understanding of the fee than that is at liberty to make his own decision. In fact, is it is the legal tax since only 16% of its total goes towards direct services? If payment of this fee is considered to be voluntary, then should we also expect to be charged separate fees for contributions towards costs for payment and maintenance of the other buildings on campus.

The question also arises as to what will happen to this fee when the bond issue is finally repaid. Perhaps profits should also be used directly for student services. This could be the University’s intent, but unfortunately the financial projections are left in the dark on this matter.

The essence of the bond issue gives the University center nameplate for the construction of the U.C. in return for a payment of repayment by the student (student) plus interest. Perhaps the student wind is now assuming that this is a bonded, a student will be left facing the rate of interest. Student fees, however, the question also arises as to why this can not be calculated, and whether or not the student (student) has the right to determine the rate of interest. This is a non-profit organization.

Regarding the accounting department, all of the revenue generated is used for construction of the U.C. (except the books there which somehow magically escape you directly into the sinking fund). These payments came from revenues generated from student organizations, thereby subtracting the student from the student center’s equity in this project. The university itself also pays $1,000,000 monthly to the U.C. account for rental of the space which we utilize.

About $700,000 annually go into the sinking fund of which student contribution amounts to an average $500,000. There is no way to determine your obligation to the U.C. by the date when the student fee was paid. Student services are a separate issue and is not considered part of the sinking fund.

A U.C. is a non-profit agency that provides the students and the University Center. As a student you are paying for, let’s use the support it needs it properly.

AVION

EDITORIAL

Will my time here at Riddle be drawn in a close? My degree requirements will be met at the end of this semester? It looks like it's back to Army career. Being editor of your paper has been an enjoyable and educational experience. I'd like to introduce you to Jonathan Ben, who was elected to the position of editor effective Monday 13 June. Good luck, Jon. I know you will do a fine job.

The SGA increase suggested on the front page needs your response. The SGA is a viable organization only as long as you support it with your comments.

The fine discount may not be necessary. If it should be necessary, it may not be too close to $200. Because of the difficulty of placing your opinions in this matter, it was felt that providing a "weekly" section to you would be of your best interest. An estimating station has many advantages when viewed from a distance. I do not, however, say you have this problem. Your serious consideration of this matter is requested.

All comments must be in by 8 July; don't delay.

I'd like to thank all of you who have given me your time and support. Goodbye and good luck to you all.

Dear Embry-Riddle students, faculty, and staff:

According to the "sideline" student who does not know the policy of dorm residents. If this person would have just asked Judy or Larry, they might have been straight. Kathy would have been, of course, in the dorm and "the First Floor" for the wing girls, and inter the "confused," that was the First Floor. R.A. was on leave at the Royal Scottish Inn. Then we do not know until now from that, I am not to get back and monthly salary and free housing. I am working as a desk clerk and am receiving pay for "for that," right in front of that activity. There is no winning in the dorm life or two people. Hopefully, Randie-Endless-Sunday will be a success. But it is difficult for I.A.s to plan activities. They have had numerous classes to express their ideas or wants. Let nothing creep on their development. The attendance at the R.A. is very poor; I.A.s are here to do the students. They don't do it themselves, but they have to do many unpleasant tasks. It's not a bad job, as we feel like nookkeepers. Quite frequent duties include taking student to stop hanging, asking them to turn down their stereo at 10:00 in the bank at 4:00 o'clock. After the last hours of the night because the student has to kick himself out. The R.A. does try to enforce the rules in the handbook, but it seems to me, and I don't know if it's just the other students to our jobs. That's why their applications are available at the dorm front desk.

Dear Editor:

We are working hard to improve the flight scheduling, and feel that by next September, this problem will be solved. We do not plan to expand the E-R AU student body. As previously stated, the university's flight program is "capped-off" (we will not accept any new students as a result of improved efficiency of operations.) The flight program has been capped off so that when the University reaches its "capac-

TAKING TIME OUT

For a Movie! Imagine that! The United States successfully lands three men on the surface of the Moon! Did you? "Captains One," starting El- liott Gould, H rift Howk and D an增 Brofun, explore the pos-

ibility of feeling a nation. Although the plot sometimes tends to get unmanageable, I found the movie to be

really exciting and susp ensing. H rift Howk portrays the NASA chief who tries to pull off the first landing on the moon to go in Dayton, "Good Company" at 250 Min Street gets my highest recom-

mendation! Do you know where
every disco and bar begins to
look the same, "Good Com-
pany" stands out and above the

crowd. They combine fresh
natural foods (salads, sandwich.

deal, and delicious food fresh
drawn with, good, live music. It's not
the standard rock or disco,
just slick, safe, tubeless

music. If you want to
relax, try the perfect stag-

dant! Do any of your

friends (or someone you

want to get to know), climb
the ladder to their unique
left, get cozy on the pillows,
have a glass of wine or beer,

and maybe play some back-

gammon while you listen to

PRECISION HAT CUTTING FOR GUYS & GALS
**FRATERNITY CORNER**

By S. F. DeGrooto

A quiet weekend for us, no scheduled activities were held. We all got a well deserved break. Most of the brothers wish to send their best wishes to Steve, Steve, Mark and Dan. The new associate members. We now have an active role for them in the chapter. We are glad to have you here.

AHP

By E. F. DeGrooto

This is a late welcome to all the new members of our chapter. Our congratulations go to the officers and members that graduated last trimester. The following members have been elected to the Presidency: Craig F. Juris, Secretary: Jack Cherrett, Treasurer: Randy Freeman, Historian: Steve DeGrooto.

Business meetings are held on Sunday evenings at 8:30 p.m. in the Common Purpose Room. All members are requested to attend. We have planned various fund raising activities and the dates for these should be announced this week.

A fall of active members is being planned and should appear in your mailbox soon.

**Saturday Soccer**

By Simon F. Poupart

If you are interested in soccer, as a player or a spectator, come to the field by the airport next Saturday at 5:00 p.m.

**RIDDLE PACKERS**

By J. E. Cleland

One of the many activities in which you will participate is a number of the Packers is Hitting.

Hitting is basically the operation of moving by moving Naturally, paths while keeping in contact with a group of guys who enjoy the sport as much as they do. The game is basically fun, but they keep you on your toes. They are probably not the kind of running that will make at perfection of the rest of your body. They if the hike is in warm weather your clothes that will keep cool. Also use a good bottle of water or some other cool drinks. Rinse, then you'll be out of water.

**SIGMA CHI**

By J. L. Janss

Last weekend turned out to be a real weekend. There was not a single event all weekend once again! There was very little organization at all. There were many events that were going on around us.

Saturday morning we met at 9 a.m. at the house on Veneta and Deadwood and proceeded to the park. There were several events that were going on around us. There was a band, people, the rain was not so bad. Our two main Sigma Chis and the others that were located from various places were not able to get there on schedule. The wash proved to be a success.

Thanks to all the participants!

That Saturday evening our social functions chairman Brian Hendrix hosted a great social activity. "SATURDAY NIGHT AT THE MOVIES" featured films like Charlie Chaplin, the Keystone Cops and our very own side show shade "the Chue Chune!" The punch was great and everyone had a really good time through the night.

The next day (Sunday) was the biggest event of the weekend. We invited a few guests over from the daytona Blind Center to spend the afternoon with us. We had a lot of fun in back of the house and everyone had a great time. We know we did! We really enjoyed the experience and we hope to have a good time next week.

Thinks to Dave Campbell for planning all the events of the day. Dave, it's my understanding that you have a better reputation 15, 15, 15, 15.

Oh, and to the brothers of Lambda we wanted to be sure that you all come to realize the truth that Sigma Chi is the best fraternity on campus! We enjoyed having little stays with us but we were just wondering why he didn't stay at the Lambda Chi, Alva House?

The upcoming events for the weekend are "highlights" by our trip to the "Dark Continent", Beach Gardens. It will be a big event and powdy time this Saturday and I am sure Brian has some sort of refreshments available for us.

"Don't you Belch?"

The current semester is coming along well. All the boys are getting healthy except for a few. They are doing a good job. Their health and energy are some that make us stand out from the rest. Here's a tip on the back for all those who do not feel recognized as an officer, as they should for a job well done. Not doing the right thing is right! Keep it up, Guys!

**DORM DOODLES**

By D. D. Pinner

Sunday Saturday is over. Gone. Painted out. If you are trying to make the most of it, read it! It was lots of fun. A special thanks goes out to Steve, Proctor, who made it all possible to make it this wonderful event possible.

The Dodgers broke their winning streak last Tuesday when they were defeated by the Underdogs 4 to 7. Remember folks, no one who played so well will last well! Well he's back to his old self now. He made two errors, possibly causing the upset. Nothing personal though, Low.

There seems to be a hidden conflict over the door, in the girl's wing. Parking the doors to be locked outside. It is a good thing for a purpose and has not been used to be kept locked. There have been strange people going up to the door knob, the door is being locked. Therefore the management feels it is the "girl's" advantage to keep it locked. See all the outside doors will be locked at all times. It does not excite everyone making it more convenient for those entering the door open.

Do you have any photographs that the rest of the dorm might be interested in seeing? Then contact Dave Rottafeld in Room 200 to put them in the glass case in the lobby.
