From the Senate

As regular AVIOD readers will recall, there was an article published on the front page last week's paper soliciting student response to a poll. SGA has increased the number of students who are interested in the poll. The poll is part of a larger study being conducted by the American Council on Education and is designed to gauge student satisfaction with various aspects of the university.

Last Sunday, the Sigma Chi Fraternity sponsored a barbeque and pool party for visually disabled people who are residents of the Rehabilitation Center of the Division of Blind Services. Ms. Carolina Adams, a representative of the center, brought a dozen residents over to the house, where the fraternity brothers then assisted them as they swam in the pool and ate lunch.

The people were all of different ages and different disabilities. While some were totally blind, others were limited in their vision. The Center's goal is to help these people live as normally as possible by having classes in current craft, braille cooking, mobility, and personal care. But beyond this, they also attempt to ease the painful loneliness of the blind by sponsoring activities such as this picnic. They also have special groups that they can participate in if they desire such as football, basketball, outings, and music classes.

The third session was recommended for their attention to rehabilitation and the intensity for their help.

Riddle Evaluating Bendix Avionics

By Jonathan Bailey

Emory-Riddle is in the process of evaluating a Bendix avionics system in one of the school's hangars.

The system features an ADP (automatic direction finder) which has a "homing" function. This means that this ADP can fix the station's location when most ADP's can't receive a station at all. It receives alphanumeric and binary while the aircraft is on the ground and in the air.

Emory-Riddle is interested in the Bendix avionics system in order to evaluate its potential for their own use.

The NEXT/Now system has a frequency feature capability and also a plug to tune in one frequency and store it for later use. It may be instructed at the touch of a button and the system's built-in memory stores itself. The NAV features an electronic course decision indicator which uses light bars instead of the conventional needle.

Some of the benefits include:
- No need for an additional electronic system
- All electronic functions can be performed simultaneously
- Easy to use and easy to read
- No need for an additional electronic system
- All electronic functions can be performed simultaneously
- Easy to use and easy to read

The RIDDLE attendee?

With your answer, No airline will call.

This week's question: Where has Bay Rogers gone to his deep on the old Bay Rogers T.V. show?

The winner of the RIDDLE question will receive one free bottle of wine from The Hanger, Hugards.

Dr. Pimm introduces us from the University of Illinois where he has done both a flight instructor and an A&P instructor. This background includes Computer Science and Aviation in the wildlife industry, and university environmental studies.

We would appreciate your support in helping Dr. Pimm get on board, and in welcoming him. His wife, Jan, and their daughter, Jennifer, look forward to hearing your questions and will be happy to answer them.

Welcome on board, Dr. Charles R. Pimm on Dege, the Professor of Aviation Technology. Dr. Pimm holds a master's degree in Flight Management (AME), CFII-IA, A&P, MSE, Master (Chicago), and CSSI (Chicago) certificates. He received his flight and electrical engineering degree from the University of Illinois in 1972.

Employees Get To Know EAU

Unfortunately, for many EAU employees, these turn-up experiences with this unit of the Personnel Office involve one particular building in which they work each day.

It's very easy to get into a rut and never go beyond that. In any case, each employee's unspoken and unarticulated concerns about the activities at EAU are usually ignored.

You, too, may not realize that EAU offers a new in-service training program that will expand your horizons.

The program is designed for EAU employees who need to expand and understand their duties. It may be taught by in-house instructors, or others from the university.

The third session is devoted to training employees in the specific responsibilities of their job.

The final session involves the graduation dinner to which each employee will be invited.

Each session is limited to 15 employees. All new employees are automatically enrolled in the program during their first week at EAU.

Emory-Riddle proudly presents plans to make the in-service training effort a step further by offering a complete in-service training program for all employees. This program is currently working in supervisory capacity to provide a more comprehensive training effort. The program will include such topics as leadership, training, management and decision-making, and job-related counseling, and employee development.

The employee development program requires each participant to spend five hours a week for a period of six weeks after which the work is completed in the classroom and at work sites.

All major divisions within the university have contributed to the program, and the program is designed to meet the needs of employees.
In order to provide Embry-Riddle students, faculty, and staff with widespread awareness of the Student Government Association's (S.G.A.) recent developments and the AVION will print questions and answers related to S.G.A. events.

If you have a question, you may present it in person at the University Center, Common Grain, Embry-Riddle Aeronautical University. Wednesday through Friday from 10:00 a.m. to 1:00 p.m. Student Government Representatives will be on hand during these times for personal discussion. Or if you are unable to visit the University Center, write to S.G.A. via mail at the following address:

Embry-Riddle Aeronautical University
Student Government Association
5000من
Daytona Beach, FL 32114

QUESTION:
If there is a Students' Handbook, where can I find it?

ANSWER:
If there is a Students' handbook, you should have received a copy of it in your orientation packet when you were first accepted as a student. The handbook contains university policies, procedures, and a listing of the services, clubs, and organizations available to students. The handbook has been recently revised and according to Dean of Students Robert Room. It should be available to students by May 21st. The handbook should be printed in pamphlet form.

QUESTION:
What are the Student Research Funds?

ANSWER:
The Student Research Funds were established in 1976 to encourage student involvement in research. The Student Research Funds are available for students who wish to conduct research projects that are not part of their regular coursework. The funds can be used to cover expenses such as travel, supplies, and equipment. The Research Committee reviews applications for the Research Funds and makes recommendations to the Dean of Students. The funds are administered by the Research Committee and are available on a first-come, first-served basis. The Research Committee meets monthly to review applications.

QUESTION:
How often are Research Funds awarded?

ANSWER:
The Research Committee reviews applications for the Research Funds on a monthly basis. The Committee considers the quality of the research proposal, the feasibility of the project, and the potential impact of the research. The Committee makes recommendations to the Dean of Students, who approves the awards.

The Student Research Funds were established in 1976 to encourage student involvement in research. The funds are administered by the Research Committee and are available on a first-come, first-served basis. The Research Committee meets monthly to review applications.

QUESTION:
How do I apply for the Student Research Funds?

ANSWER:
To apply for the Student Research Funds, you must submit a proposal that outlines the research project and the expenses that will be covered. The proposal should include a detailed budget, a description of the project, and a list of the expenses that will be covered. The proposal should be submitted to the Research Committee. The Committee will review the proposal and may request additional information before making a decision. The Committee will make recommendations to the Dean of Students, who will approve the awards.

The Student Research Funds were established in 1976 to encourage student involvement in research. The funds are administered by the Research Committee and are available on a first-come, first-served basis. The Research Committee meets monthly to review applications.

QUESTION:
What is the deadline for submitting proposals for the Student Research Funds?

ANSWER:
The deadline for submitting proposals for the Student Research Funds is usually set by the Research Committee. The Committee may set a deadline in order to allow time for the review process. The deadline is typically announced on the university's website or in the Research Committee's newsletter. It is important to submit your proposal by the deadline in order to be considered for the funds.

The Student Research Funds were established in 1976 to encourage student involvement in research. The Student Research Funds are available for students who wish to conduct research projects that are not part of their regular coursework. The funds can be used to cover expenses such as travel, supplies, and equipment. The Research Committee reviews applications for the Research Funds and makes recommendations to the Dean of Students. The funds are administered by the Research Committee and are available on a first-come, first-served basis. The Research Committee meets monthly to review applications.

QUESTION:
What are the eligibility requirements for the Student Research Funds?

ANSWER:
The eligibility requirements for the Student Research Funds may vary depending on the specific fund. In general, students who are enrolled in a degree program and who are in good academic standing may be eligible to apply for the funds. The Research Committee reviews applications on a first-come, first-served basis. The Committee considers the quality of the research proposal, the feasibility of the project, and the potential impact of the research. The Committee makes recommendations to the Dean of Students, who approves the awards.

One of the music scenes is the environmental aspect. This is a popular trend and one that is often overlooked in film. The sound of the music can set the mood and tone of a scene, and it can help to evoke emotion in the audience. However, it is important to balance the music with the rest of the production to avoid creating a jarring or distracting experience for the viewer.

Another aspect of music in film is its ability to enhance the story. Music can be used to emphasize important events or to create atmosphere. It can also be used to foreshadow future events or to reflect the emotions of the characters.

In conclusion, music is an important element of film production. It can enhance the viewing experience and add to the overall impact of a film. However, it is important to use music in a balanced and thoughtful way to ensure that it does not detract from the other aspects of the film.
Aeroplane, Student Records, from full. The I'D LIKE to students required payment paid by June 15, explained Bob Pihlaja, are tion process. Analysts, go to the present registration system. Although the originol advance Registration, there was no deposit. Now that deposits paid, transcripts received, projects, that credit may enable them to receive life experience credit any equity in the Office of Registration and Records for evaluation of those qualifications or experiences. The awarding of any life experience credit currently is explicitly based upon the approval of the particular Division Chairperson involved.

STUDENTS HAD A LOT OF QUESTIONS CONCERNING THE HOUSING FACILITIES AND THE FUTURE PLANS FOR DOMES. DOES THE HOUSING OFFICE HAVE ANY WORK ON THIS yet?

Robert Van Riper, the recently appointed Director of Housing and Assistant Dean of Students, has provided some additional answers concerning student housing facilities received in Green's office student evaluations.

The majority of the students involved around the need for more facilities and the information of the three-man rooms. Those needs are being filled. Several projects have been under- taken to expand the University housing.

One such project in the Apartment Complex, west of 1-40 on Ed. Rd. This is an example of university housing with no expense spared to provide the student an attractively furnished, spacious apartment in close proximity to campus at a price comparable with private, off-campus accommodations.

Another facility under construction is a Residence Hall next to the present one. This complex will house 440 students and facilitate a substantial increase to the student housing. However, demand for University housing will still exceed our supply even when these new facilities are completed.

Registration with the fall term figures for three-person rooms in the Residence Hall will be converted back to two-person rooms.

Van Riper also reviewed several other comments concerning the Residence Hall:

- The problem of "too hot or too cold" was a temporary one, resulting from the installation of the solar energy system. Now that it is in use, it will help keep operating costs down.
- In response to concerns of dormitories being "too expensive" Van Riper explained that all Residence Hall are operated break-even or even though operating costs are increasing. Resident Hall prices are kept competitive with off-campus accommodations.
- Every effort is being made to replace the carpet in the Resi- dence Hall with a more appropriate replacement.
- Better weekend bus service and study rooms will be provided with completion of the new co-op Residence Hall.

why don't you contact the appropriate Education De- partment and see what kind of jobs they have open, or talk to people who are in your field of work and tell them you are interested in aviation. They will know what you can do.
FRATERNITY CORNER

Sigma Chi

By James L. Amptick

We are now in the hotst part of summer Term and I am sure everyone has shifted into high gear in preparation for the upcoming exams on Monday and Tuesday. Since this weekend will most likely be used in preparation for the exams, we decided to live it up last weekend instead. We really needed to burn off some stress! It all began with our traditional Sigma Chi get together at the Pub. At about 3 p.m., some ping pong, dink a little beer and had an overall good time. The next morning we rose at about 2 a.m. and led 60+ to experience the Dark Continent, Beach Glide. Those kids were great, everyone raced alot of balls and the animals that they had made us feel right at home. Thanks to Brian for another good one.

The week thus far seems to be moving around and see a Sigma Chi with a Blue and Gold football jersey on, and ask him what we're all about. If you don't see any of us, however, we're located at 520 North Flagler. Our phone number is 352-2377. Give us a call or stop by and talk to us. We will be more than happy to answer any of your questions.

DORM DOODLES

By Peggie Powers

Only two more days to go. I hope everyone can hang on just a little bit longer. For those of you who won't be staying for Winter, have a nice summer, and a "correction" goes out to the people who have completed their studies.

The dorm dining teas are not last Tuesday, The Volunteers were dealt for the second week in a row by the Dawgs. The game was pretty close with a final score of 27-26. There were no head-up plays, and hitting seems to be fading. Inside, the Dawgs leader was heard saying, "That was easier than before."

The next time you're a Sigma major this term, please make sure you tell him or her about it. The dorm dining teas were on January 7th and they will be performing numerous well-known plays. For someone when you have nothing to do, tomorrow, do something worthwhile and catch a play.

BOWLING

The Bowling League's statistics for this week are as follows. The actual field scores are listed first and then the overall standings are given.

INTERNATIONAL FOLK DANCE

By Susan J. Hoffst in Department of International Folk Dance, Daytona Beach Resort Area

CHRISTMAS IN JUNE!

The E-RAU SIGI and WROD Radio (1400 AM) have combined forces to celebrate Christmas in June! You may think this is strange, but we have a simple reason why not! Santa hits in his summer outfit July 25th, to break into the A.S. Let's see how good Christmas music is at the beach, drink some good beer, and enjoy some hot jazz music!

Just think of it: sitting in the warmth of the sun, sipping your beer with a cold drink and listening to the Beach Radio Singing "Little Santa Nick."

Visit the "Foodie Deli- drums" by taking a Christmas Break on Sunday, June 25th. Remember, Christmas starts at noon, just south of the Daytona Hilton on the beach.

E-RAU & WROD RADIO COMBINE TO GIVE YOU CHRISTMAS IN JUNE & ON THE BEACH OLDBIES MUSIC BY: WERU - Riddle Radio WHERE: Just South of Daytona Hilton on the beach WHEN: JUNE 25th WHAT: CHRISTMAS BEACH PARTY
