Six New ERAU Trustees

Thomas Stand of Daytona Beach owns a consortium of hotels in the Daytona Beach area. He is a member of the Florida and Volusia County Bar Associations and received the Silver Tullio Award in 1969 as the Outstanding Daytona Beach Lawyer.

Stand is one of the Board Directors of the First National Bank of Daytona Beach and in 1977 was a member of the Florida Governor's Task Force on Economic Development.

Douglas Wall of Flagstaff, Arizona, is a partner of the law firm of Mangan, Wall, Sipes and Wulsten. He is assistant to the president of Northern Arizona University and a member of the Board of Trustees of the Children's Health Service in New York. He earned both his B.A. and L.L.B. degree from Harvard University.

Senator James Kolbe, 42, is the youngest of the new Board members. Kolbe, of Tucson, was selected as the state's Outstanding Peace Officer in 1977. He serves on the Judiciary, Natural Resources and Appropria-

Dr. James Schamadan

Schamadan is President of the Whittaker Corporation Life Sciences Group in Los Angeles. He formerly served as Director of the Arizona State Department of Health Services and as program manager of the Arizona State Department of Health Services and as program manager of the Whittaker Corporation's Health Care Program in Saudi Arabia. He has authored various articles on the topics of health care delivery systems and hospital administration. He received his Physician Recognition Award from the American Medical

Student Body President

Douglas Wall

The winner of this week’s Riddler will receive one hour from The Hangover, the styling shop for men in the University Center.

The week’s Riddler question comes from the famous and much loved Star Trek episode, “Court of Beta,” where the race did the top from who struck Captain Kirk? And there was the winner found on who and how? Also where was the first creature to be stabbed and killed by this ray?

John Rice

The New Engineering Science Laboratory at Embry-Riddle Aeronautical University will open its doors to students in October. The 11,000 square foot facility will house engineering test laboratories, offices and three engineering workshops.

Two New Staff Appointments

Two new staff appointments have been made at the Embry-Riddle Aeronautical University, E-RAU- Programs at Prescott, Arizona. Mark Valley will be Director of Admissions and Records and Stephen Adams as Director of Development.

Wollen presently is an Admissions Department Coordinator at the main E-RAU campus. Before joining the staff, he had Graduated from the University of Arizona in 1970. He says he is looking forward to the admissions process at Prescott as well as recruiting, marketing and public relations activities.

The former Tucson, Arizona resident assumed his new post on July 31.

Mark Valley

Ecuador: Land of the Equator

By Michael Jaworski (SGA President)

The Andes, perhaps the best area, is a dry region, with temperatures in the range of 50-70 degrees F, and even agricultural land is in the most remote areas. This region where most of the miners, and rich land is pared, much gold, silver, etc., are mined and to go! The official language is Spanish. Ecuador's Indians speak Quechua and other dialects. The local Ecuadorian currency is the Sucres. One 50 centavo coin is equal to 24.95 Soles.

Ecuador started as a Republic in 1830 and is governed by democratic rules and cultures. There is a lot of criticism composed by the Army, local from the It and they are from the Air Force until elections are held the coming July.

A lot is to be said about Ecuador's culture. We still come to our traditional and local culture. Ecuador's culture, as long as our culture, is going to be long and it does not rain. The altitude in the mountainous region (Sierra) of Ecuador range from 9,000 feet in some cities to about 12,000 feet. In Quito, the capital, the altitude is around 9,000 feet above sea level.

Ecuador is on Eastern Standard Time between October and April; if you want to call Ecuador, the differences will be the same as for the following purpose.

The predominant religion in Ecuador is Roman Catholic. Ecuador has a lot of special customs. For example, the Christmas Festival, held December 7th as a celebration of Foundation of Quito, is a fun event because of the bull fight season.

Some Indian tribes, such as the Quechua Indians, use a ritual dance to cover the essentials. The rest of their bodies is covered. Women do not cover their breasts. These Indians dye their hair and bodies and do with a plant called "Achica". This will also warped to a mosquito repellent as well as protect the body from the sun. Oliveleaf Indian dress in white pants (Gaucho types) blue poncho, a black hat, and "charcoal" (wood-like from the same material as rope). Men wear their hair in a long braid. These Indian are called "Achicu" with embroidered costumes and many bracelets and earrings.

All this makes Ecuador a beautiful place to see.

---

Dear Mr. Editor:

I read your editorial about the student sit-in and I agree with your points. There are several students who are being treated unfairly and I believe they should be heard. I support the student's right to express their concerns.

Sincerely,

Jonathen Bailey

---

Dear Mr. Editor:

I am writing to express my concern about the recent events on campus. I believe that the administration is not doing enough to address the issues that students are facing. I urge the administration to take immediate action to ensure the safety and well-being of all students.

Sincerely,

Michael Jaworski (SGA President)
I'm Dad - Fly Me

By Eric G. Anderson, M.D.

I've been wanting to write this story for years. I have wanted to share my experiences with others. Writing it down will give me an opportunity to share these experiences with others. It will also allow me to capture these memories and create lasting memories for my family.

I'm a pilot, and I've been flying for over 40 years. I've flown all over the world, from the bustling cities of New York City to the serene landscapes of Hawaii. Each flight is unique, and I've learned so much from my experiences.

I've flown during times of war and peace, and I've seen the world from a bird's-eye view. I've flown with people who have changed my life, and I've flown with people who have taught me valuable lessons.

LAMBDA Chi ALPHA

By J.R.

Not much in planned social activities this past week. Most of the brothers and associates patronizing a few of the local establishments.

We pushed around the fraternity house in the AVED office. Telephone... well who needs them! Gee is going well done to Aunt on getting his new job. Thinks I heard someone say? We all love you! Associates make sure you check the activities board daily. Big brothers get with your little brothers and make sure things are being accomplished. All well enough until next time.

AHP

By Steve DeGarme

Our congratulations and thanks go to Mr. Tom Connolly, our new chapter president. He has replaced Mr. Ron Lewis who has left for his new assignment in Europe. All of us would like to extend a warm welcome to Mr. Connolly.

AHP is again proud to sponsor the ERAU Flight Team. We hope to raise enough money to send the team to the NIFA meet. The outcome of it having the use of an airplane is good. We hope to make arrangements to sell a pilot plane for the flight team as well as all members.

Sandy Martell has offered the use of her home for a work party. This will be the first of the end of July. Each member will bring a platter of food or something to share.

The exact date will be announced soon and a notice will appear in the newsletter.

Several amendments were written for the AHP By-Laws. They were read at the meeting held on last week. Please be sure to attend the meeting tomorrow (July 20) to vote on these amendments.
