Special Shows At Museum

August 9 and 10: SKYLAB - AMERICA'S FIRST SPACE STATION

This enthralling movie on man's first experience with living and working in space for long periods of time, is certainly a must see. Be sure to view the highlight of the Apollo Program's landing of the first man on the Moon.

The double feature celebrates the accomplishments of the two Gemini Missions which led to the design of the Apollo Project and of the highlights of the Apollo Program's landing of the first man on the Moon.

Top on everyone's list is the chance to view the Apollo Program's landing of the first man on the Moon.

FLIGHT WITHOUT WINGS

Both of these movies deal with man's attempts to fly higher, faster, and into the edge of space. The films are interesting and provocative.

August 23 and 31: FIRST K-15

A FREE MILLER

EERAU Women
Set Air Force Precedent

Two women students at ERAU are setting precedents in the U.S. Air Force as Hermes Officer Training Corps (OTC) cadets. Janet Allen and Katheryn (Kitty) Blaisdell, both members of the first group of women to be commissioned through Air Force ROTC into the pilot training and missile launch schools of the U.S. Air Force.

Although there are women pilots in the Air Force now, they were already on active duty before achieving flight status. This is the first time that women still in college could apply for the slot of Pilot, Navigator and Missile Launch Expert. Upon their graduation from Embry-Riddle in 1969, the two will enter active duty in the U.S. Air Force as second lieutenants to attend their career schools.

"This is really a large step forward for women in the Air Force," said Capt. Chuck Loggett, Administration Officer of the AFFTC program here. "Embry-Riddle is one of the first schools to have female students selected for these positions. Until this year, the Air Force only commissioned women from pilot training and missile launch schools. But now women have made breakthroughs, so ROTC is responding to the demands of the USAF and channeling women into those career fields.

"I'm so glad they're letting the ROTC girls compete for these positions," said a breezy Miss Allen. "This is the first time they're allowed to try for these spots.

Allen, a native of Johns Island, N.C., holds a Bachelor's in Science and has learned more than 80 hours of flight time. She recently changed her major from Aeronautical Science to Astronautical Studies with a concentration in Computer Technology. "The Air Force will give me the pilot training so I'm trying to broaden my scope with the Computer training while I'm at Embry-Riddle."

Blaisdell is enrolled in ERAU's baccalaureate degree program in Aeronautical Engineering. The 23 year old student from Victoria, N.Y., said, "The idea of doing something different, plus the fact that the position had just been opened up made it pretty appealing to me."

It's a big step and I'm thrilled about it. I think it's pretty significant that they're letting these girls to compete for women's positions."

Graduation Reminder

The graduation ceremonies will be held in the University Center on Saturday, August 12, 1978, at 9:00 a.m. If you want to participate and haven't already been noticed for your cap and gown, hustle yourself to the Dean of Students' Office and get noticed.

Grads need to pick up their caps and gowns, in PERSON, in the Counseling Center in the University Center on Friday, August 18, 1978. Caps and gowns are distributed ONLY during the following hours:

9:00 a.m. to 12:00 noon (9:00 p.m. to 8:30 p.m.)

On Saturday, August 19, 1978, the ceremony will begin at 9:00 a.m. on the sidewalk in front of the University Center. Graduates must report to the University Center by 9:00 a.m. on the day of the ceremony, for their assigned positions. There is a full dress uniform appropriate for the occasion.

President's Reception for Family and Friends will be held immediately following the ceremony. Family and friends who desire to take pictures during the ceremony should be allowed to do so provided they do not obstruct the view of others.

If you have any questions regarding your cap and gown, shoes, dresses and pants, please contact the President's Office at 573-2377. In addition, the ramp leading up to the University Center will be reserved for guest and family of the graduates.

THE RIDDELL

THE RIDDELL

Two women students at ERAU are setting precedents in the U.S. Air Force as Hermes Officer Training Corps (OTC) cadets. Janet Allen and Katheryn (Kitty) Blaisdell, both members of the first group of women to be commissioned through Air Force ROTC into the pilot training and missile launch schools of the U.S. Air Force.

EDITORIAL

By Jonathan Bailey

Dear Editor:

As the Staff Secretary for the Avion and the Phoenix, I have been honored to work with such an alert and competent team.

I know the history behind your school to a certain extent but would like to introduce Mr. Paul Sharp of the E-RAU Safety Department who comes to us from the University of Arizona. Mr. Sharp will be doing a series of staff columns which I feel prove to be funny and good reading.

Everyday: good and good luck wherever you go.

Jonathan Bailey

BUSINESS IN ACTION

By Michael Andrews

President's Corner

One item that is always on my general impression of Jy . before physically capable, a great facilitation is to go around there.

Another paying a confession should be just the same advice. But as you have shown many years as a student, you have patience, and the best advice is always the same.

The thought of the paper is to reconcile your maturity. But you have shown the best advice is always the same.

Venus Exploration Proposed

LITCHFIELD PARK, Ariz. - The more space enthusiasts find out about Venus, the more operations they have about the earth's sister planet, which with its cloud-covered atmosphere, has become a likely target for airman.

From orbit around Venus, the radar could look down through the dense clouds of carbon dioxide to provide imagery of the planet's surface that would be transmitted back to earth 25 million miles away.

Goodyear Aerospace's Ari

One thing that cannot be substituted for is that the Phoenix flight program was the need "professional." The students are there to be treated as professionals as in "What can I do for you right?" instead of "shut-up and listen!" Too often I feel as if I am imposing on people here. I admit that I can be a headstrong at times but we are supposedly being treated as professional pilots here and also paying a lot of money and I feel that simple training to be professional should be given to all people, not just the pilots here.

My final criticism is of the amount of paper work generated by this University. I don't expect it to be any different at Phoenix but just the same I don't think it should be that way. One piece of paper going around is enough to keep one running around for a week trying to straighten out the problem.

That is enough criticism. I hope to continue to be of no trouble to you.

Chris Johnson To Be Hung

August 13th, at the sun was rising, a 30-year-old woman was found in her apartment, from on one who was known to police for days before. The cause of death is still under investigation, but it is believed that she was the victim of an attack.

The woman had been seen leaving her apartment at 8:30 p.m. and was last seen walking down the street. She was last heard saying, "I'm going to Dayton Beach to attend class and get some money for my plane ticket." She was seen with a man who appeared to be a student of Florida State University.

The man said that he had been asked by the woman to accompany her to Dayton Beach to collect some money that she had promised to pay him. He said that he had collected the money and was preparing to leave when he was attacked.

The man said that he had not known the woman very well, but that she had asked him to help her with some things. He said that she had told him to meet her at the specified location and that she had given him a message that she would be there.

The man said that he had agreed to help her and had met her at the specified location. He said that she had told him to bring some money and that she would give him the money in return for his help.

The man said that he had brought the money and had asked her what she wanted it for. She had said that she needed it to pay for her plane ticket and that she would give him the money in return for his help.

The man said that he had given her the money and that she had promised to give him the money in return for his help. He said that she had not given him the money and that he had left her at the specified location.

The man said that he had left her at the specified location and that she had not given him the money. He said that he had left her and had not heard from her since.

The man said that he had reported the incident to the police and that he had been asked to identify the woman. He said that he had not known the woman very well and that he had not seen her since.

The man said that he had not known the woman very well and that he had not seen her since. He said that he had not known the woman very well and that he had not seen her since.

In conclusion, the man said that he had not known the woman very well and that he had not seen her since. He said that he had not known the woman very well and that he had not seen her since.

If you have any information about this incident, please contact the police at 911 or your local law enforcement agency. Thank you.

AHP

By Steve DeCicco

Last Thursday Mr. Conolly attended our meeting and afterward was asked to have a talk with one of our advisors and an AHP member. Congratulations are extended to Dave Waldron who received his right instructor's certificate last week. Great work!

Che

By James J. Jareck

Only three more weeks of school and we should be finished with the summer and ready for a good vacation. We have an activity planned for every weekend and this should help us pass the time away.

Last weekend began with our traditional End Crash Brunch here at the University. We had quite a few brothers donate blood, and many other members who were able to find time to donate to a good cause.

By Paul Little

This past week we've been keeping in touch with our associates preparing for fraternity. This is the time for us.

The brothers would like to congratulate J.S.C. on being inducting president of our Crescent family. Fred has informed us that the next Crescent sister initiation will be the first Tuesday at 9:30. All the brothers are working hard to get our group.

Last Friday Sigma Chi hosted a blood drive here at school. We are very happy we could contribute over a dozen pints of blood. This is our competition between the fraternities that everyone wins at.

LAMBDA CHI ALPHA

p.p. please in all categories.

The categories and prices are:

- Singles (four teams)
  1st place = $12.00
  2nd place = $8.00

- Doubles (three teams)
  1st place = $15.00
  2nd place = $10.00
  3rd place = $7.00

Tires are available at the registration table.

The event will start at 9:30 and go through the available tires. The event is located in the University Center.
