NASA CELEBRATES 20th ANNIVERSARY

Surprisingly as it may seem, we can benefit from investigations of the sun, moon and planets. Studies of the sun, for instance, shed new insight into solar physics and its impact on Earth's weather, as well as new information on high temperature gases that control electricity and interaction with magnetic fields, holding forth the promise of new energy sources here on Earth such as fusion power. These findings would give us an inexhaustible supply of cheap, non-polluting energy.

Studies of the unexplored atmosphere of Mars, Venus and Jupiter are providing views of evolutionary trends, weather patterns and radiation effects impossible to distinguish from Earth. It was the Van Allen atmosphere that first set us on the presence of choice on Earth's upper atmosphere and its effect on our ozone shield which protects us from the harmful effects of ultraviolet radiation.

(Afollowing article will be continued in next week's AVIONICS)

E-RAU WESTERN FLEET GROWS - The first twin engine aircraft to join the E-RAU western fleet was ordered by 11 universities during a recent presentation near E-RAU's Prescott campus. The twin, Damey Rumsfeld, was to be 132 E-RAU Prescott President Billy Middendorf, was the keynote ophthalmologist, present the keys to his Cessna 330 to E-RAU Prescott President Will Middleton, at E-RAU Prescott's Conference Center on Oct. 9. The plane, an 850-mile home, will provide the University's new western campus opened in September with an affluent approach to freshman, sophomore, junior and senior students and a fleet of 13 new American Typos. The E-RAU "signer" brings to 93 the number of training aircraft in the E-RAU. Mayfield Davis at Prescott and the University's western area campus in Daytona Beach, Florida. In January, E-RAU aviation Administration and Aeronautical Studies undergraduate academic programs will be added to the Aeronautical Science curriculum now taught at E-RAU/Prescott.

WHAT'S HAPPENIN'
LETTERS TO THE EDITOR

Dear Mr. Kollreich,

I write to you in hopes of assisting the Air Force with its training program. I have been involved with the Air Force for several years, and I feel I can offer some advice on improving the training process.

Specifically, I believe there are several areas that could be improved. First, I think the current training schedule is too rigorous. The pilots are being pushed too hard, and this can lead to burnout and mistakes in the future.

Second, I think the emphasis on theoretical training is too heavy. I believe that more time should be spent on hands-on training, where the pilots can actually experience what they are learning.

Finally, I think there should be more emphasis on the psychological well-being of the pilots. The stress of flying high-speed, high-tech aircraft can be overwhelming, and I think more should be done to address this issue.

I hope you find these suggestions helpful. I am confident that if we can improve the training program, we will see a significant improvement in the performance of our pilots.

Sincerely,
[Signature]

Mr. Kollreich

 RESPONSE

Thank you for your letter. Your suggestions are valid and well-taken. I will pass them on to the appropriate authorities.

C.A. Brown
Youths Enthusiastic Over Embry-Riddle Sun Seminar

By Paul M. Sharpe

A Man of Many Talents

Paul M. Sharpe - A Man of Many Talents

Paul M. Sharpe, Editor of Special Projects, E·RAU Regional Airport, Daytona Beach, Fla., 32114. Or call toll free (1-800-474-1914, in Florida, (904) 335-2553.

教育 was all about, and to get flight experience at the same time. They did just that - and more, before completing the 1976 special flight program. Sharpe-Riddle's unique program introduces youth to professional aviation and highlights various careers in the field. In addition, participants receive flight instruction sufficient to take them through solo flight. Strong response to the 1977 program led to the creation of back-to-back Seminars this July and August. The 53 sessions were presented in the same manner.

Students from throughout the county, plus Naples and Fort Myers, attended the program. Before the final Sun Seminar, more than 3,200 Dusty s, the individual classroom hours flew, 3,300 air hours and both have been logged. All but one of the 60 students sailed.

Sun Seminar was developed specifically for the rural and satellite communities. However, any 16 to 21 year old is eligible to attend. Sun Seminar students represent six states including Allegheny, Eastern, Florida, Mississippi, TWA, Flying Tiger, Air France, Delta, Piedmont, Braniff, and Aloha. Enrollment also included the sons of two corporate solution pilots, a UAF pilot, and an FFA examiner, said Bob Wherpehn, E·RAU Director of Sun Seminar.

"It's been a total success," said Wherpehn after evaluating the students. In each case, participants learned flight essentials they could not have learned from textbooks alone.

According to the director, plans are underway for next summer's presentation. In addition to E·RAU/Orlando, Sun Seminar also may be offered at the University's new western campus in Pensacola, Florida. And for those interested in a unique career opportunity, a special aviation-related scholarship is offered to college-bound seniors and graduates.

For more information write to Bob Wherpehn, Director of Special Projects, E·RAU Regional Airport, Daytona Beach, Fla. 32114. Or call toll free (1-800-474-1914, in Florida, (904) 335-2553.

NOTICE TO ALL FIGHT STUDENTS:

There are a few rule changes which are mandatory for "B" tests this fall. If you are interested in the Air Force or would like additional information write Barry Allison, 12200 A, Advanced Training Center or call 385-5961, Ext. 417, 411.

SUNRISE CLUB ACTIVITIES

The Sunrise Club offers many activities for the busy student. Members can be seen cruising the streets of Daytona Beach in their bright orange and white sun suits.

The club is an informal group of over 300 young adults who enjoy and promote the sport of parasailing. It is a fun and exciting way to spend an afternoon in the ocean.

LOCATION OF THE SUNRISE CLUB:

The Sunrise Club meets most evenings in the Sun Orange Center, 11220 A, Advanced Training Center, or at the Sunrise Bar, 12200 A, Advanced Training Center.

NOTICES

RECORDS OFFICE NOTICE

In accordance with the University Calendar, students anticipating December, 1978 graduation are required to fill out graduation applications on or before Friday, October 13, 1978. Check with the Records Office if you have any questions.

April Graduation '79? Why not fill out your graduation application now so we can begin planning for the April graduation. This will help us in our efforts to make graduation a successful experience for everyone.

NOTICE TO ALL FIGHT STUDENTS:

There are a few rule changes which are mandatory for "B" tests this fall. If you are interested in the Air Force or would like additional information write Barry Allison, 12200 A, Advanced Training Center or call 385-5961, Ext. 417, 411.

The Horizon Series

The Horizon Series is a series of mini-seminars, workshops, and programs sponsored by the E-RAU Office of Student Activi- ty. The purpose of the program is to offer meaningful learning experiences to the student; faculty, and staff of E-RAU with the goal of increasing personal awareness and development through a variety of program offerings. All programs will be offered free of charge. Staff and program sponsors are held responsible for attendance.

For information or to register for a particular program, call 322-6551, Ext. 200, Office of Student Activities, Texas Forest Bacter, Director.

"BLOOM WHERE YOU ARE PLANTED: A GROWTH GROUP"...an ongoing group which will meet weekly during the fall semester to explore one's personal and interpersonal styles; to share thoughts and feelings with other group members; to receive feedback about one's self from the other members of the group; and to become more aware of one's directions.

DATE: Weekly, October 6th - December 6th.
PLACE: October 4th - Introduction Common Purpose Room, All other Sessions: Faculty/Staff Lounge.
TIME: 3:30 p.m. - 5:00 p.m.
FACILITATOR: Mark Keller
"DIET AND EXERCISE WORKSHOP FOR WOMEN"...the workshops today are full of miracle diets and weight loss programs. Although most of them are effective, it is confusing to someone trying to make a decision and fasting in trying to follow through with it. The workshop will consist of education, exercise, and again a common sense diet to follow. Now is your chance to get in shape! Enrollment may be limited so sign up now in the Student Activities Office.

DATE: Wednesday, October 4th, Orientation and Information, Weekly for Monday and Wednesday through December 6th.
TIME: 5:30 p.m. - 7:30 p.m.
PLACE: Common Purpose Room, Common Purpose Room.
FACILITATOR: Mark Keller

DEAN ROCKETT PUSHES AEROBICS

In a conversation with the Dean of Students, we learned that he has some of the plans he hopes to carry out in the near future. Depending on various circum-
stances, he hopes to begin a physical fitness trail put in an area on campus that the students can use. Dean Rockett eventually hopes to have a complete Aerobics program available for physical education credit. Aerobics are a variety of exercises that stimulate heart and lung activity for a period of time sufficiently long to produce beneficial changes in physical fitness.

Aerobics involve a variety of exercises that contribute to maintaining a healthy lifestyle. By maintaining a healthy lifestyle, you can help prevent disease, improve your overall health, and feel better about yourself. The physical fitness trail would have a running path with a number of stations where a motor can start to perform exercise that develop strength and flexibility in specific areas. Each station has a sign explaining various exercises that can be performed on the equipment located there. An example of the fitness trail can be seen at the DBU.

The exercise program would include swimming, running, tennis, cycling, weight lifting, and other exercises. This program would help to increase one's physical strength, flexibility, and cardiovascular fitness.

By Jeff Barrow

This year, Embry-Riddle is growing at such a fantastic rate that it is hard for the students to avoid some problems with the system, whether it be with scheduling, fluid, fees, or any of the small things that plague students in an expanding school. However, the faculty cannot be overwhelmed by such a
task.

Mr. Frank Wensel serves as a good example of faculty quality. In the classroom, he is demanding, and at the same time, I feel that his lectures are always stimulating and to the point.

Mr. Wensel was born on May 20, 1930. After going to school, he entered the US Air Force in 1953. While there, he served as an meteorologist and also was rated "Master Navigator." He flew in many types of planes, including C-54's, T-39's, and C-130's. He served a tour of duty in Vietnam, flew 192 missions (C-130's). While in the USAF, Mr. Wensel earned a Bachelor of Science degree in meteorology at Texas A & M University and also a Master of Science degree in meteorology at the University of Oklahoma.

After retiring from the Air Force in 1975, Mr. Wensel came directly to Embry-Riddle, starting work in the fall. In just a few years, he has been at Riddle. Mr. Wensel has taught classes in meteorology, radar, and atmospheric physics. He now teaches both meteorology I and II courses. He is interested in comment on how he feels about the present system of classes. Though the quality of education here is very good, the students don't really benefit from being very early or late classes because they are too tired. Mr. Wensel confirmed this view by saying, "Maximum learning is achieved between 8 a.m. and 5 or 6 p.m." He also felt that most of the other alternatives suggested so far (mainly Saturday classes) are inadequate.

Mr. Wensel is always eager to answer questions related to his field and is very in touch to, as are the majority of the faculty members. Though Emb-
ry-Riddle may be delayed with a variety of problems, each of them demanding prior- ity, the faculty remains one of the biggest assets to this school.
DORM LIFE
By Mr. D.L.K.

Well, this tax has turned out to be a battle between the wing on the field of battle known as top-wing. For those of you who haven't participated, you don't know what fun it is! The winner receives a jug of beer and the loser receives a refreshing dip in the moat! Fun! You tell! One dip in the moat is like a fresh breath of gasoline air. The loser can always imagine that magic moment forever.

The grand champlion top-wing team should be decided in the near future.

As far as future activities go, your advisers have laid the plans for a behind the doors B-40. With plenty of oil and that magic elixir of life to keep the spirits at a wild and woolly level. This event is guaranteed to drive the barracks blue away. Ask your advisees about this and other upcoming events. Their work for you. Any suggestions in this area are welcomed.

One MAJOR problem we have around the dorm is called littering and it's very bad. Everyone complains about the dorm living conditions while they live there, but not there. Everyone knows it's only a handful of people who litter, however those people will please you more than pleased to know there is a $20.00 fine for littering and it will be enforced. That's right. For all you lucky people who get caught you'll probably lose your bonus. If you happen to be a person who is addicted to littering some

EMPLOYER'S CREED
A STUDENT...
is the most important person in any university.

A STUDENT...

is not an interruption in your work - be he the purpose of it.

A STUDENT...

is not a cold statistic - he is a flesh and blood human being with feelings and emotions like your own.

A STUDENT...

is not someone to argue or match wits with.

A STUDENT...

is a person who brings a lot more to it than you do to fill their needs.

A STUDENT...

is deserving of the most courteous and attentive treatment we can give him.

A STUDENT...

is the lifeblood of this and every other university.

A STUDENT...

is something you once were. REMEMBER?

This is our personal creed and must be remembered and practiced at all times. It should be repeated frequently with all your coworkers. We all need to be reminded from time to time. Thank you for your cooperation.

FAC/RAU to Host Pilot Seminar

The Federal Aviation Administration, in cooperation with Embry-Riddle Aeronautical University, will host an all-duey seminar on in-flight emergency handling. This seminar will be open to all pilots and flight instructors in the area. Your attendance and participation are requested and desired.

All flight instructors will conduct both formal presentations and open discussions as indicated below:

FAA/RAU to Host Pilot Seminar

The FAA/Verte, operated by a Physiologist, will be available in an adjoining area during the entire time of the seminar.

SCHEDULE
Saturday, Oct. 18, 1978
9:30 a.m. - Film - "Disorienta-

tion" - 16 minutes
10:00 a.m. - "Medical Facts for

Pilots" - presentation by Mr.

Chuck Valdes, Physiologist, FAA Civil Aeronautical Institute.

Mr. Valdes, well-versed in the latest information on human performance under stress and stress-related illness, will present a wealth of both formal presentations and open discussions as indicated below:

Study Rooms Announced

Due to the tremendous increase of students on this campus, the University has had to utilize its available classroom space. Our Common Purpose Rooms and Faculty Study Lounges are also being used for meetings of campus organizations and administrative purposes. This leaves the students with a problem of where to study on campus.

The Registration and Records Office, in cooperation with the faculty, has kindly donated their time to remedy this situation by providing a list of all rooms that are available to the student. These rooms may be occupied during regular office hours or during special occasions like unannounced programs or breaks. Please cooperate with the faculty and staff on these matters and all of the University will benefit. The available rooms are listed below along with the appropriate times.

<table>

Additional study rooms are available in the library and also on the third floor in the Reside-
Oxiron Delta Kappa, National Leadership Honor Society, was founded December 3, 1934, at Virginia and Lee University, Lexington, Virginia, by fifteen student and faculty leaders. Oxiron Delta Kappa, or ODK, is as it is popularly known, organized in a most admirable way from the very outset. At first there was no thought of immediate extension to other institutions, but it was apparent that Oxiron Delta Kappa, if properly conducted, would prove beneficial to any college campus where it might be established. Thus through this past year circles have been established on campuses all across the nation, including the Iona Circle at Embassy-Riddle in November, 1935.

The purpose of the Oxiron Delta Kappa Society is to promote. The first is to re-inspire those who have attained a high standard of efficiency to collegiate activities and to inspire others to strive for outstanding attainments along similar lines. The second purpose is to bring together the most representative students in all phases of collegiate life and thus to encourage such organizations as will help to mold the sentiment of interest and to questions of local and national importance. The third purpose is to bring together members of this faculty, and student body of the college for professional interest and understanding.

Oxiron Delta Kappa places emphasis upon the development of the whole person, such as present member of his college community and as a prospective contributor to a better society. The Society believes in white good scholastic and intellectual development are the chief objectives of college year, the life of the mind is not the only life students will have to cope with as the result of their college experience. It is not enough to be merely a "scholar," able in dispensable qualities have to be cultivated also. That is why Oxiron Delta Kappa recognizes as and encourages achievement in scholarship, athletics, social, service, and religious activities, and campus government, journal, and press, the arts and performing arts.

The Oxiron Delta Kappa idea at Embassy-Riddle can be best supported by the members of the Iona Circle. The Iona Circle will be holding a reception on October 16, at 8:00 p.m., in the Commonwealth Room. This reception is in part of some of expressing this idea. It is hoped that all members, whether in students, faculty, or alumni, will attend. It is the members of the Iona Circle and the Iona Circle idea.

Don't forget our meeting this Friday at the Chateau Victor on Nova Rd. at 7:00 p.m. Try to be on time because we have a busy meeting planned! Our speaker for the evening is Mr. Martin Herrington, the president of Florida Power and Light. At the meeting we'll be discussing the beach party, the Cheesetown, the Riddle Regatta, and we'll be holding elections for a new secretary.

This Saturday we're having a beach party at Posey Inlet. It'll start around 10:00 a.m. and we'll have a leg of beer and volleyball. Bring your own food, drink, etc. A couple of cool-ers will be provided but we certainly need more.

The weekend of Oct. 29-32 Riddle, together with TRBC, is sponsoring an Oktoberfest weekend. I'm sure you've all heard about it and we'll explain what's happening at the meeting on Friday. The Management Club is selling Oktoberfest T-shirts before and during the weekend and we also have the beer ingredients on Sunday during the bluesgun festival. Club members get a discount on the T-shirts (really selling at a low price) and are encouraged to purchase them as more people will be aware of the festival. If you'd like to help sell T-shirts or beer please tell one of the executive members at the meeting or contact Kim at Box No. 2188.

See you at the meeting!

H.R.

By Timothy M. Robinson

Although this past weekend was uneventful for Arnold Air Society members, many of us were planning for the upcoming weekend in Miami. That's right, Commanders Call has arrived! Sharing this Friday, many AAS members will travel to Miami for a weekend of events that should be fun for everyone.

Mike went out to the Dayton Beach Correctional Center this past Saturday. It looks as if AAS members will work with the youth at the center. Activities will include showing movies and playing softball or football.

The AAS Road Rally committee met again last week at Dale's house. It seems that everything is falling into place and this year's road rally will be as successful as last year. In case you missed last week's article, the date of the road rally is set for Nov. 11. There will be more information concerning the road rally in next week's article.

Pledge Class - The pledge class continues to impress regular members of AAS. They have decided, for a community project, to concentrate on children. This is what National Headquarters wanted all quadrennial members of AAS to do, and it appears that our pledge class is going to follow these same guidelines.

We hope all of our members that go to Miami have a great time. One thing is for sure, we'll be the life of the party!

MARINE AVIATION

The Marines PLC Club is in full swing again. We are planning a few field trips this trimester, one of which will involve some serious reep and altitude chamber training at NAS JAX. This training will enable us to get some back seat rides in the TA-4 and F-4C on subsequent visits to NAS JAX.

Don't forget the PLC meet-
ing on Tuesday Oct. 3rd, and bring your money for the banquet. In addition, all PLC’s are reminded that football practice is held every Mon-Fri at 5:30 p.m. - attendance is mandatory!

RIDDLE SKYDIVERS

By Gary McFemphal

We had another successful jumping weekend at Deland. Many of our first jump students of three weeks ago have returned to their football and are continuing rapidly. Keep up the good work and efforts.

With keeping busy at Deland on the weekends, Whitechapel has occurred. However, the Skydivers must tonight in the CJS at 8:00. All past, present and prospective jumpers are encouraged to attend. The reasons for this you will find out, you’ll hear about equipment and rigs for sale, and there will be jump stories for everybody to hear. Hope to see all of you there.

AROTC Field Training

Following their departure from Britain Hall (Sutton’s ROTC Headquarters) at 4:30 on Friday afternoon, the cadets were assembled approximately 15 miles northwest of Deland to their defensive positions. All through the night and into the early Sunday morning hours the cadets acted as leaders in various positions of authority. “The cadets are trying to meet the ability to apply classroom instruction in the field environment, and the only way to do it is the cadets have the technical knowledge, and personal familiarity that they take to lead us under pressure in the field,” said Sergeant-Major Morale, the other junior instructor. And put them under pressure he did. As they led platoon and squad size attacks, moving from defensive position to offensive position, the already tired cadets soon became exhausted and yet kept going.

Finally after 20 hours it was over. Twenty hours of continuous activity and stress ended the problem. How tough was it? Fifty percent of the cadets who participated did not even come to the road march. The heat, their 40 lbs. ruck-sacks, and the speed of the road march (31 miles in 2 hours) destroyed them. Exhausted and soaked with perspiration the cadet surveyors finally returned Sunday morning at Britain Hall. They were filled with a sense of accomplishment and simply enough of enthusiasm.

“ar the exercise is instructive, realistic, and demanding, the personal rewards when, and if, you complete it are bound to generate enthusiasm,” said Jorge Viscial, a senior cadet. And while there were plenty of sore shoulders, aching legs, and blistered feet, there was also plenty of enthusiasm.
