SGA OKTOBERFEST WEEKEND
PROMISES SOMETHING FOR EVERYONE

FRIDAY, OCTOBER 20 - PUB 7:00 p.m. - 11:00 p.m. - Concert with the "Hungry Six" a real German Oom, Pam-Dee Band, German Beer Specials and Sing-Alongs. A great way to kick off the weekend!

SATURDAY, OCTOBER 21 - Riddle Regatta - 11:00 a.m. - 4:00 p.m. - Come to the Annual Tube Race sponsored by the R-RAU Club. Whether a participant or spectator, don't miss this exciting race down the Halifax River. Registration begins at 8:00 a.m. across from Mainey Chiropractor - Plymouth, on North Beach St. in downtown Daytona Beach. First, Second, and Third place trophies will be awarded. Categories will be: Individual, Teams, and Notify. The Most Unique Raft Design will also receive an award. For Information: call the Varsity Club at 353-5561, ext. 212 or 553-1863. Minimum age to enter is 18 yrs.

SATURDAY, OCTOBER 21 - SGA Movie - "The Wild Bunch" - 8:00 p.m. - University Center.

R-RAU AND DBCC SPONSOR OUTDOOR BLUEGRASS CONCERT

On Sunday, October 22, the SGA of Embry-Riddle and Daytona Beach Community College will cooperate for the first time to bring you an Outdoor Bluegrass Concert on the lawn next to the University Center. Combining the "Concert Programming" between the two colleges, the afternoon promises great bluegrass sounds from these five groups, some cold beer, sunshine, and special refreshments.

Produced in cooperation with WELO radio, the afternoon will feature Connie Rose as M.C., Red and Murphy, and Co., Bluegrass Partners, and the Sunshine Bluegrass Boys. The Sunshine Bluegrass Boys have been together for over 5 years and have won many awards and including the Grand Ole Opry Banjo Player of the Year.

Among the finest-est young Bluegrass groups in the area, the country are Red and Murphy and Company. Their emphasis on close vocal harmony and instrumental proficiency, their enthusiasm when they hit the stage, and their concentration on entertainment have made them highly regarded by audiences throughout the southeast. Led by Red Henry, guitar, mandolin, and fiddle, and his wife Murphy, Henry, who plays fiddle, banjo, guitar, and mandolin, in a backwoods-bluegrass style, the group often highly amusing musings on subjects such as hunting, radio prayer shows, and methamphetamines. These extended comments and stories help Red and Murphy and Company achieve their reputation to entertain. Let's listen.

The festivities get under way at 1:00 p.m., so to make a Sunday afternoon for some foot-stompin' good times. The concert is free to everyone... bring a friend!

GIVE BLOOD AND FLY

By John Wolfinbarger

A recent change in blood giving policy has given a new boost to the expectations of the Red Cross for their October 26/27th Blood Drive. Note you can fly the same airplane the day after donating, and can fly solo 24 hours afterwards. Restrictions for both were 72 hours, severely limiting the number of potential donors. With a goal of 400 pints, the Sigma Chi Fraternity which sponsors the event, is looking optimistic for even more.

All organizations on campus are urged to stand together in support of this worthwhile cause. In particular, Lambda Chi Alphas and Sigma Chi have given tremendous support in the past.

The Blood Drive, originally conceived in 1972 at Riddle by the Sigma Chi Fraternity, has proved as one of the most successful and longest-standing programs in support of the Red Cross in Volusia County. Of course, the support of the entire Embry-Riddle student body is what makes the drive so successful.
WHAT'S HAPPENING?

By Rose "Indor"

WEDNESDAY, 19th
Photography Club: 7:00 p.m. - FSL

Hortons: Exterior Exercise Workshop for women, CPR - 8:30 - 9:00 p.m. with Staph
Morton
Hortons: Interior Counseling, CFP - 7:30 - 9:30 p.m. with Pat Daniel
Scuba Club: 6:15 - FSL
Pulm Club with "Praxmpan" - 6:30 - 10 p.m.
Lunch Chi Alpha: 7 - 8 p.m. - FSL

THURSDAY, 20th
Marketing and Development Question/Answer: 11:35 a.m. - FSL
Photography Club: 12 noon - FSL
Kaz: 5 - 7 p.m. - CFP
Chow Chop: 7 - 11 p.m.
Alpha Eta Rho: 8:10 - p.m. - CFP

FRIDAY, 21st
Photography Club: 5:45 p.m. - FSL

SATURDAY, 22nd
The Richie Regatta - Halifax River - 11 a.m. to 2 p.m.
"The Wild Beach" - 8:00 - U.C.

SUNDAY, 23rd
OUTDOOR FESTIVAL - ORLANDO, CONCERT - Out
to: 7:00 - 10:00 p.m. - with Lars Ellingson

THE AVIATION REGATTA

Tell to anyone who has been involved in this insanity in the past and they'll tell you just how much this event really is.

The Vet's Club has been organizing this event for six years now, and this Bapian promises to be the biggest yet. Proceeds this year will all go to the Daytona Beach Volunteer Fire Department.

If you don't want to eat the race yourself, but want to eat for your fellow students, then come down to North Beach St. across from Mason Chrysler-Plymouth. Watch the representations of the AVI0N staff paddle their way to victory under the guidance of CPTP Kyle Martis. Remember, if you don't want to eat and watch, there are a few other things going on this weekend in conjunction with the "OUTDOORFEST" celebrations.

The $25 gets you into the food and your money to provide us all with a way of forgetting that mid-term grades are going to appear in our houses at any time now. Get out and ENJOY!!

NASA Celebrates 20th Anniversary

NASA's Space Program has reached a milestone: the 20th anniversary of its establishment. In the past 20 years, NASA has been at the forefront of space exploration, making significant contributions to our understanding of the universe and its inhabitants.

### Exploration of the Planets

The past two decades have seen NASA's missions explore the planets in the solar system. Missions to Mars, Jupiter, Saturn, Uranus, and Neptune have provided scientists with valuable insights into the composition and history of these planets. For example, the Mars Reconnaissance Orbiter has been in orbit since 2006, capturing high-resolution images of the Martian surface and studying its geology, climate, and potential for past or present life.

### Space Station Development

The International Space Station (ISS) is a significant achievement of NASA's space program. The ISS is a permanent orbiting research facility that serves as a platform for scientific research and technological development. It is a multinational project involving 15 countries, including the United States, Russia, Japan, and several European countries.

### Commercial Spaceflight

NASA's Commercial Crew Program aims to return American astronauts to space from American soil by the end of 2020. This program is designed to promote competition, reduce costs, and increase access to space for a wider range of users, including commercial entities.

### Moon and Beyond

NASA's Artemis program seeks to send the first woman and the next man to the Moon by 2024. This is a significant step towards the ultimate goal of landing on Mars. The Artemis program will not only advance our understanding of the Moon but also prepare for future missions to Mars and beyond.

### Conclusion

NASA's 20th anniversary is a testament to its enduring commitment to exploration and discovery. As we look towards the future, NASA continues to push the boundaries of what is possible, inspiring a new generation of scientists and engineers to pursue their dreams of exploring the cosmos.

WHAT'S NEW AT THE STUDENT HOUSING COMPLEX

The next time you hear someone talking about the Racquet Club, you might want to ask about the availability of courts. When they tell you that there are no courts - but in fact, they should say the real name of this "club" is the new "E-RAU Student Housing Complex." The complex retained the name Racquet Club unofficially from the day it was a luxury resort hotel. Strongly enough the complex, located approximately three miles west of Clyde Morris on Route 92, was never opened to the public.

Resort that has a large family owned the resort and used it as a place where family members would come to get out of the spotlight. That seems rather strange, seeing how the family wasn't in show business.

Well, those days have come and gone while Riddle has spent a lot of time and money to make the 20 suite complex available to house 114 students. Each suite comes furnished and looks like a home. The suites have two bedrooms, two bathrooms, a living area and a small refrigerator, stove and sink unit. The price for each student is $59.00 per term.

The rectangular complex encompasses a grassy courtyard, with one of DeLand's largest swimming pools as the center of attention. There are also three gas grills scattered about the courtyard that are available to the residents of the complex.

Aside of the main buildings you will find a TV room; a hobby area and a game room with pool table, a four ball pool table, pinball machines and a juice box in the rest of the building. Updates is a cornerstone; meeting room that is available to any student groups or clubs through the office administrator.

The new Student Housing Complex was planned to be an independent complex for upper classes, but due to the fact that the present population is not large enough, the University decided to staff the complex to handle any problem that might arise. The University has done an excellent job in preparing the housing complex for the fall term. They deserve a lot of credit for their efforts. These are still a few things to be finished up, but most good things do take time.

Dear Bud,

I hope you will be able to come in Western Clothes (Come in Western Clothes) at PONCE DELEON SPRINGS

3RD ANNUAL E-RAU EMPLOYEES RECOGNITION DAY PICNIC

E-RAU EXPERIMENTS WITH SOLAR ENERGY

By John McCarthy

Staff Reporter

Last February a solar reheat unit on top of the Dorm was installed and began heating water for the Dorm. Construction of the project, which took six months, was funded by the Department of Housing and Urban Development. The project will be monitored to determine the usefulness of solar collectors and the results will be sent to the Florida solar center.

The unit collects the sun's energy from 100 flat plate solar collector panels. Each panel (30 square feet) has a copper plate made of glass that has a solar transmission level of 97% - meaning that 95% of the best absorbed by the glass is transferred to the liquid passing through the collector. Each panel weighs 150 pounds and holds 74 gallons of water. They are mounted on stationary brackets designed to withstand up to 120 mph.

Although a consumer can heat liquids up to 300 degrees F., the other units of the system are only designed to keep water at 140 degrees F. Two storage tanks of 2,000 and 2,000 gallons store, circulate the water to the city. A gas fired boiler automatically maintains the water temperature at 140 degrees F. Fred Williams, the Physical Ed. Director at Riddle, hopes to decrease the amount since he has found that the system has not been able to review its results for an entire year.

Because this system has been in operation for a year, it is impossible to determine how efficient it is, and how much money it is saving. When this has been determined the results will be published throughout Florida.

INTERESTED IN PHOTOGRAPHY?

so there is a meeting in the c.p.r. on oct. 18, 19, 20, students, faculty, and staff are all invited! no experience needed!! oct. 18 & 19 from 12 to 1 oct 20 from 5 to 6

LOCAL ART TO BE EXHIBITED AT E-RAU

Mrs. Atkinson is a graduate of Duke University with a minor in Art History. The exhibits will be on display in the lobby of the E-RAU University Center, on Manor lane Monday through Friday and will be exhibited in the Orange County Library in Orlando in March of 1979. The exhibit will include a collection of "Pastel Art" by local artist Mrs. Atkinson. The exhibit will also include a collection of "Oil Paintings" of the "Southwest" area to be exhibited in the Daytona Beach area exclusively. In addition, a collection of photographs from all the Florida shore will be exhibited, especially of Dr. and Mrs. George McMillen, Daytona Beach. Our dinner! Being one with a passion for pasta, I have to recommend Mama's on U.S. 1 as the best Italian restaurant nearby. You can find almost every Italian specialty on the menu, (lasagna, ravioli, spaghetti, pizza, etc.) and at reasonable prices. With dinner you get a loaf of hot fresh bread included in the price. Dinner is approximately $5 per person and the atmosphere is of the family type. Just remember to watch that wallet!

Find of all the brothers of Lamont Chi Alpha would like to congratulate you on your upcoming graduation.

Now that the formalities are over I'll fill you in on this last weekend. Saturday was our practice with a well designed set and a firing practice. After the fun begins at 720. A top ten Unused Line brothers decided to go to the rain. We are looking forward to the future.

By Chris

Twin Prints was an important meeting today at the S.E. College Fund. It was held from 1:00-3:00 p.m. We will all be doing ditch duty and washing Buddy Breathing, free snacks and life saving procedures. All students should come and see what all divers have to know about buddy breathing and their feelings.
The Twin Prints Club is also trying to get the Red Cross to finance us so we can go to a monthly class on how to do mouth to mouth, chest compressions and artificial respiration. This will be beneficial to all us so we hope the Red Cross will finance our training could save the life of the brother's so poor keep the student body informed when the meetings occur.
The last message of the day was a dice

“aloha and well.” Allan celebrated his twenty-fifth birthday while he was there, two days later.

While most of our members were enjoying luaus and luaus in Miami, some of us were left to bail and Labor in the hot sun. John, Johnny, Bob and Tom provide for me to the statehouse in the Hotel Miller. It was held on the street corner of Danes.

This coming weekend we should really need to try our chances for the next one. We put the finishing touches on the Commodore and the weather is out Tuesday. The Commodore has the committee and decided to lock the Commodore and read the rules. Committee members, the Commodore, and the student members, are really losing interest to the rally.

The Aggie Class - The pledge class is finishing plans for their full week end. The pledges haven't a clue on what they need to do, putting finishing touches on their plans is all it will take. Just a little reminder to the pledges - interviews are rapidly approaching

By Timothy M. Robinson

It's unbelievable that we already halfway through the semester. One of our members, Bob Terezakis, is only two months away from his commission coming into the United States Air Force.

This past weekend, Bob and many other members of the Naval Air Society went to Miami and had a great time. According to Allen, not much was accomplished, but when you're in Miami, you've really expect anything to be accomplished.

It was the annual Commodore Call, this year located in Miami. There were briefings for the Commodores, a banquet and dancing in the Commodore Club in Miami. There were interviews with Air Force Times, Atlantic, luncheon and dinner meetings, and special office procedures.

After all the meetings, our members hit the city of Miami. They found out that the Miami Police Club is to let everyone know that the Scuba Club will be participating in their annual regatta.

We are putting our best divers on the raft so we plan on coming in at least, in first place. It should be a good weekend for all we will see you there.

The Marine Corps P.L.C. is to have an important meeting today at the L.S. Hotel. It's being held from 1:00-3:00 p.m. We will all be doing ditch duty and washing Buddy Breathing, free snacks and life saving procedures. All students should come and see what all divers have to know about buddy breathing and their feelings.

The Marine P.L.C. CIT-103 had a formal dinner dress uniform and it was there to hold the club's officers up to an example to the Marine Dress Uniform. It was held at the Marine Air Training Fund, in Jacksonville, Florida. Also Major "Bert" Waden and a special edition of the Marine Dress Uniform. 143 attack squadron from Marine Air Training Fund, Jacksonville, Fla., was the guest speaker.

One last item, the PLC has more events and games this year, all important ones too. All are welcome to the PLC and if you have any questions for the PLC, just call the O.C.P. S.I.U. Times, 8a.m. to 3:00 p.m., or ask any PLC member. Our football team will be able to help other teams which are not doing as well as we, Keep hunting fan.
By Gary MacFarquhar

Last Wednesday’s meeting proved to be a special evening for all new officers of the FA-79 school president.

Doug Benson will be heading the club as our new president, wanted by Kevin Kozman in the vacant position Banks will be held by Doug Tofferi and Gary MacFarquhar will fill the general paper work in order to Secretary. Best wishes and congratulations to all the new officers – this year’s club’s success will depend on your hard work and perseverance.

Other topics discussed include fund raising to pay for club projects and parties and tentative scheduling of a party on November 11. Keep your eyes peeled for bulletin concerning upcoming parachute club events.

The weekend before last included a number of fans for various club members. Hank McConnell stated the show with a malfunction on the Para Commander he was jumping from. Norvik’s DC-3 was away and got the good reserve. Brenda and Rich son’s Chris Meyer went out of the DC-3 with an assortment of people and got his Backseat (DC-9) for being in an eight person formation. I went out of the DC-3 for my first jump under a square canopy. We also had several more students progress to free fall status. We were taught in liberal quantities and we started a party at Duluth Airport. It progressed to the apartment of Doug Benson and Jay Cunningham. The saga of dowsing and after partying that followed will long be remembered and the annals of Riddle Skydivers.

Another weekend well spent, thanks to everyone involved in advancing themselves to longer jumps.

**CO-OP NEWS**

By Paul Woodman

The primary emphasis for which I was employed six months at Westair was to serve as an Airframe mechanic for the facility. Westair’s eight repairmen and one FPLH were hired me, as I was interested in the various aspects of general aircraft. Mr. Fieseler not only gave me many and varied Airframe 100 hour inspections to perform, but also gave me supervision during some basic power plant work on saild single engine aircraft.

Another valuable service I received was a small amount of experience in the E-200 maintenance office paper work. If business ever was slow, I would give Mr. Fieseler a hand in organizing and revising the micro-film plates. Other office work included applying service bulletins and Johnathan in our aircraft and a few other maintenance related tasks.

This summer’s practical experience has begun to fulfill preparations for my career in the service. Through the application of the Maintenance program there are the FAA’s requirements, I have built a strong foundation of knowledge for my future career.

How would Freud relate to O’Keefe?

Cold war logicians: Henry H. Tinkham Jr., for sure, although he not. And O’Keefe jokes a throwing down.

Ward in a cutaneous contact has discovered a unique principle, the O’Keefe principle.

Unfortunately, this principle is not yet universally accepted.

O’Keefe’s Golden Rule

It’s too good to be true.

Low the service manual wiring diagram because of my experience in Electrical class.

Many times this summer’s diagrams similar to these grow and with each one I learned a good deal about applying the principles of electronics to the situation. I also learned the importance of working with others, such as mechanics and pilots, in an effective and safe manner. This experience in mechanics have been the first step in getting into the world of electronics.

I must stress the fact that this course in electronics program is making my college experience meaningful, complete, and satisfying. Now I feel satisfied that my future employment will be successful.

**RIDDLE SKYDIVERS**
The National Transportation Safety Board (NTSB) reported, Sept. 5, that the all-American combination of extreme overweight and extreme aft center of gravity caused the crash of a Cessna 402-B at Knoxville, Tennessee, on March 11, 1975.

The plane pitched uncontrolled shortly after takeoff and then crashed on the runway at McGhee-Tyson Airport. The plane was substantially damaged, but the pilot, the only person aboard the aircraft, was unharmed.

In determining the probable cause of the accident, the Board cited "a loss of pitch and altitude control during the takeoff climb because of the extreme overweight and extreme aft center of gravity conditions of the aircraft.

But the Board also said the pilot "manifested poor judgment in initiating the flight with a known overweight condition, and was consequently inadequate with regard to preflight planning."

The Board's investigation shows the pilot was told he was exceeding 5000 pounds of loss of pitch and altitude control during the takeoff climb because of the extreme overweight and extreme aft center of gravity condition of the aircraft.

The Board also noted the pilot was not aware of the effects of gross weight and the center of gravity on the performance of the aircraft.

In concluding its report for the Board, the Board said 'that the pilot should have been able to assure the safe operation of the aircraft based on available data."

THE CHALLENGER CL-600 TO GET GOODYEAR CARBON BRAKES

AKRON, Ohio -- The first major jet equipped with carbon brakes -- the Canadair Challenger CL-600 -- will get twice as many landings with a new generation of carbon disks developed by Goodyear Aerospace Corporation.

The carbon composite disks will provide a minimum of 1,600 landings, "an significant improvement over previous generation carbon brakes," said Robert W. Clark, Goodyear Aerospace vice president.

Goodyear, which possesses one of nation's complete brake lines, previously has supplied them for military aircraft including the Air Force's F-15.

The Challenger also will be equipped with a fully computerized Goodyear anti-skid system which adapts to all runway conditions for maximum tire protection and minimum stopping distance.

THE SAME PHYSICAL FITNESS PROGRAM USED BY HUNDREDS OF PROFESSIONAL ATHLETES IS NOW AVAILABLE IN DAYTONA...

- 20 Years of Research and Development
- Requires less time than jogging or weightlifting
- Excellent Cardio-Respiratory Conditioning
- Whirlpool

The Nautilus Program is designed for both men and women... it's not a spa or health resort, but a sure fire way to top physical condition.

Nautilus Fitness Center of Daytona Beach, Inc.
541 Beville Road • Daytona Beach
MASTER CHARGE • VISA • SPECIAL TERMS

FREE TRIAL OFFER!

Come in and let us demonstrate how nautilus can work for you! Your first visit is free... trained technicians will demonstrate equipment and explain the medically proven theory that has made NAUTILUS the last word in physical fitness.

Open 9 to 9 Monday thru Friday 9 to 4 on Saturday
