TV COMEDIAN COMES TO RIDDLE

Letter From Prescott:

On November 13 (THIS COMING MONDAY NIGHT) Comedian Kelly Monteith will perform in the University Center. Kelly has appeared on the Mike Douglas, Merv Griffin, and Tonight show frequently. Johnny Carson thinks Kelly is the best young comic in the business. That's why he's on the Carson show more than any other comedian in recent memory. He also starred in his own CBS summer TV show a couple of seasons back.

The evening will begin in Cabaret fashion with a performance by a local jazz band at 7:30 p.m. Complete with candles, tablecloths, and hopefully a little "class" added to the U.C. this evening promises to be a major event for Embry-Riddle.

My name is Jonathan Bailey. I was formerly the Editor of the AVION and am now Editor of the Prescott campus rag, the Pioneer.

It has been brought to my attention that there is a great deal of interest in the events taking place here, so I shall be writing a column for your paper. I can't promise any regularity, but if I feel you would be interested in any particular event I'll be letting you hear about it.

I have heard that the administrators at the Daytona Beach Campus are thinking of switching to our six day schedule and that this has been the cause of some consternation.

On the six-day schedule a student has three days for academics and three days for flight; the idea of this being to make scheduling classes easier.

Having now tried both systems I can say that I much prefer the six day system and most people here are in agreement with me.

My greatest problem at Daytona was trying to schedule my classes around a two-hour flight period and not only was that virtually impossible but the heavy weekday demand for aircraft made it necessary to do much of my flying on weekends.

Here at Prescott I am on a M,W,F Class schedule and

T,Th, S flight schedule. I find it very pleasant because I am never hurried to get from classes to flight and back again.

Being available all day on my flight days it is possible to accomplish several solos in one day and I usually find my weekends free.

For flight students this system is definitely much better but for non-flight people it could prove an inconvenience if they have Saturday classes. It shouldn't make much difference to a flight student's weekend though because usually a flight student at Daytona must make up for lost time on weekends anyway.

Jonathan Bailey

WHAT'S HAPPENIN'

By Ross Windom

WEDNESDAY, 8th
Diet & Exercise Workshop, 5:30-7:30 p.m., CPR.
Horizon Series: Making Ends Meet - 7:30 p.m., CPR.
AVION Meeting in the Office - 6 p.m.
Scuba Club - 6-7 p.m., FSL.
Riddle Packers 6-7 p.m., Conference Rm.
Parachute Club - 8-10 p.m., FSL.
Horizon Series: How To Make Ends Meet; a seminar on how to manage your resources effectively will be facilitated by Mr. Larry Prosser at 7:30 p.m. in the Common Purpose Room, U.C.

THURSDAY, 9th
Student Feedback - Session - 11:45-1:15 p.m., FSL.
Karate - 5-7 p.m., CPR.
Senate Mtg., 5:30-7:00 p.m., FSL.
Chess Club - 7-10 p.m., FSL.
Lambda Chi Alpha - 7 p.m., Snapfinger Woods Clubhouse.
AHP - 8-10 p.m., CPR.

FRIDAY, 10th
Horizon Series: Human Potential Seminar - 3 p.m., CPR.
Senior Class Mtg. - 5-7 p.m., CPR.
Riddle Packers Ocala Hiking trip - 7 p.m.
MGVIE: Freebie and the Bean - 8 p.m., U.C.

SATURDAY, 11th
3rd Annual Arnold Air Society Road Rally & Scograms Poker Party - 7 p.m., U.C.

SGA CABARET NIGHT

NOTE CHANGE OF DATE
MONDAY, Nov. 13, U.C.

SUNDAY, 12th
Catholic Mass - 10:30 a.m., CPR.
Protestant Services - 11:15 CPR.
F/S Recognition Day Picnic - 1 p.m., Ponce de Leon Springs.
Sigma Chi, 6-8 p.m., FSL.
ODK Initiation Banquet - 7 p.m., President's Residence.

MONDAY, 13th
Horizon Series: Assertiveness Training - 2-3:30 p.m., FSL.
Horizon Series: Growth Group - 4-6 p.m., FSL.
Diet & Exercise Workshop - 5:30-7:30 p.m., CPR.

TUESDAY, 14th
Karate, 5-7 p.m., CPR.
PLC Mtg., 7-8 p.m., CPR.
ODK, 7:30-9 p.m., FSL.
Screaming Eagles Mtg - 8-9 p.m., CPR.

REMINDER

There are two things necessary before advance registration:

- 1.) See the Insurance Clerk, in the University Center, to obtain the Identification document, and
 - 1.) Get a Bursar Clearance Form from the Bursar's Office.
- The above two requirements are needed for your entrance into the advance registration line.

PG PARENTAL GUIDANCE SUGGESTED
SOME MATERIAL MAY NOT BE SUITABLE FOR PRETEENAGERS

Oct. 13, 1978

Dear Mr Wencel, I enjoyed your visit. I liked the movie. I learned a great deal when you answered our question. My science teacher Mrs. Lindsey didn't know which was worse a hurricane or tornado. But you did now I know so don't Mrs Lindsey. You told us alot of things we didn't know. Because you have to know the pilotes depend on you too give them a report.

thank you
for coming
from
Byron McCaleb

More on page 5

THREE-CREDITS-NO TESTS

For all continuing students who would be interested in earning three elective credits with no tests, have I got the course for you.

SS-398 - APPLIED SOCIAL PSYCHOLOGY. I am now involved with this program and find it very self-satisfying. It entails working as a juvenile parole officer, helping delinquent children from ages 11-19 applying the theory of reality therapy. There is no pay except for three credits and a chance to get involved with a group of really good people.

If you are interested, contact Mr. Deissler and I'm sure he would be more than pleased to inform you on any questions you may have.

Sincerely,
Ron Birtz

NOTICES

ATTENTION: FACULTY AND STAFF:

1978 PHOENIX YEARBOOKS FOR ALL FACULTY AND STAFF ARE NOW ON SALE FOR \$8.00 in the Phoenix Office from 2-4 each Tuesday through Thursday. Come on by and pick one up. Help the 1979 student yearbook and enjoy a great book!!

EDITORIAL

LETTERS TO THE

EDITOR

O.K. folks, let's get it together. The AVION needs help getting the news and the Administration needs help keeping the students informed. Although the writers currently working for the AVION are a dedicated and hard working group of people, we simply do not have enough bodies to keep up with all that goes on here at E-RAU.

With this in mind, I am taking this opportunity to extend an invitation to all of the faculty members to become contributors to the AVION.

Here's your chance to explain to the students your side of the story. Tell us some of the problems that you face

in your decision making. You may be surprised how understanding a student can be when he is made aware of the facts behind a new policy. Saturday classes? Tell us about it! Explain the reasons and advantages of such a program. Don't just let the rumors build to the point of creating such a negative impression that the idea is defeated before it ever given a chance to succeed. Use the AVION.

Hopefully, as Embry-Riddle continues to grow, the AVION will continue to attract more and more writers, and therefore be able to cover more of the detailed happenings on campus.

EDITOR:

I've seen some of the most wasteful and inefficient spending of student tuition by this school and it seems that they don't really care how much or how little it is. Look around students (suckers) and get as disgusted as I am.

I've noticed several secretaries that reside (I won't say work) in the University Center that seem to have nothing better to do but drink coffee and shoot the breeze. Every day I see the same ones take the usual two hour lunch, (I've timed it) several coffee breaks, and a couple laps around the U.C. to show off their latest fashion or hair design to everybody. It would be nice to keep them busy with some work that just might accomplish something to benefit the students instead of their income. If they can't eliminate them then find somebody else. Next time you see that good looking blonde or brunette from "upstairs" taking a not-so-needed break on your tuition money, ask her if she has anything to do. Or how much she wants her job. Complain enough and either she'll find some work to do, or 2) find another job elsewhere.

Pat Hassett

EDITOR:

I feel I must rebut the reply to my letter concerning the grounds by the former maintenance worker. He apparently misinterpreted the thrust of my letter. From the nature of his reply, he reinforced my thinking. I was not criticizing their management. As the writer says, the work they did was out of their job classification. Why? That points to poor management. If E-RAU needed more workers to make the conversions, why didn't they hire them? They could have gotten temporaries. By the way, most of the work didn't benefit me, the computer student. Everyone can see beautification efforts.

I realize that it takes money to beautify the campus. I also realize that since I entered this campus in September '76, there has not been a commensurate increase in new facilities to go along with the increase in new students. E-RAU always seems to be trying to catch up. That points to poor planning. I'm sure a graduate student would realize that. Besides, what good are plans if the students are never informed of them?

I disagree with the writer's opinion that the school should disregard beautification and upkeep and concentrate solely on education. While education is its main purpose, it is not its only purpose. I don't go to school just to learn about aviation. When I leave class I open my eyes to the world, not just to a runway.

Thanks, Steve Muschler

LETTER TO THE EDITOR:

Dear Mr. Kollarik,
I read the article in the Daytona Beach Evening News on October 31 about Mr. John Apuzzo's complaint about Embry-Riddle Aeronautical University's 'dismissal' policy.

The policy is that flight training may not be taken outside the university without permission from faculty members. Several examples were cited that this permission is very difficult to get.

The chief instructor at Volusia Aviation Service complained this was restraint of trade. He defended many students situations.

There are many people on waiting lists for flight courses at E-RAU. Why can't these students take flight training from one of the other fine flight schools in the Daytona Beach area? If they could they would not fall behind in their flight courses. Besides, it's frustrating being here and not being able to fly.

I am in a degree program that does not require flight training. I don't see why there is any reason that I should not be able to take flying lessons from a private firm, perhaps at home over summer vacation. I feel that this is a restriction on my freedom. I of course would not apply for any transfer credit for this training and I believe that what I do in my own time with my own money is my own business.

Thank you to Mr. John Apuzzo who brought it to the attention of the entire city, the disagreement between students and staff at Embry-Riddle. Hopefully, some action will be taken.

Sincerely, James Mikos

As most of you already know, I was at the Prescott Campus for the Board of Trustees meeting on October 28th and 29th. The weekend afforded me the opportunity to talk and spend time with our fellow students out there.

What amazed me was the kinship they feel for the Daytona campus. I believe they really feel part of E-RAU and there definitely exists a bond between the two campuses.

There are approximately 265 students there now, with plans for an enrollment of about four hundred in the Spring.

Two items dominated the complaints department there: (1) food in the cafeteria is bad (a universal problem in colleges, it seems); and (2) not much to do. It is quite desolate there, but other escapes are available: like camping, hiking, mountain climbing, snow skiing in the winter months, etc.

By Michael Jaworski SGA President

One of the hottest issues on our Daytona campus is the possibility of a 6-day school week. While this is a rumor here, it is fact at Prescott. Refer to the "Flying Reporter" section of this edition to see the reaction of students to Saturday classes and/or flying at Prescott.

The general attitude of the student body at Prescott is one of enthusiasm and high spirits. The guys naturally would like more girls on campus (17 females out of 265 students, a better ratio than Daytona Beach), but nearby Yavapai Community College seems to provide some relief with their coeds.

One thing great about being at Riddle now, during this growth period, and with the opening of a new campus is that we, the students, have the opportunity to establish the type of relationship the two campuses will enjoy in the future. This relationship will not be one of competition (no matter what some of the administrators propose). We feel that we are all part of the same University and that is the relationship that we have already established.

There's much more I could talk about, but space would be a problem. If you are interested in knowing more about our Prescott campus, call the SGA office (extension 400) and get together with me - I'll be glad to answer your questions.

EDITORIAL

It has come to my attention that the flight line will start a policy of broadcasting the flight student's grade for the particular flight over the "Riddle frequency" when ramping in the airplane. This measure does not seem quite fair to the student or the instructor. First of all, the process of giving a grade for a particular lesson is arrived at by a post-flight discussion between the instructor and the student. At least, that's the way I have been doing it with my instructor. Each individual item to be graded is talked about separately. Then a grade for the lesson is based on the items on the list in the phase book.

What seems to be happening (to me) is that the grade, given over the radio, will cut down on the time required to process the card through the computer. But at the same time, the grade may be hastily

arrived at with no prior consideration to the student's opinion and may be unfair as a result.

Also the time spent in the airplane on the ramp is wasteful. It may take about 5 extra minutes to ramp in because of a more crowded frequency. That extra five minutes (.1 hours) may not seem like much, but if it happens every time on dual flights, that amounts to a lot of wasted time and money when taken collectively. Therefore, the student does not get a fair shake because his/her grade is already decided upon, and the school makes money on wasted time. Maybe I am misinformed, but I am getting sick of having administrative decisions handed down to the students without any prior consideration. Please send more information or rebuttal.

Sincerely, Jeff Barrow AVION News Editor

ROVING REPORTER

BY Michael Jaworski, SGA President

QUESTION
What do you think of a 6-day school week? (The school week consists of 3 days Academics and 3 days flying. Either classes M-W-F, flying T-Th-Sat., or flying M-W-F, class T-Th-Sat.)

ANSWERS
1. (Fritz Resmiller)
"I fly on Saturdays and I think flying on Saturdays is fantastic out here in Arizona."

2. (Ken Palmes)
"Well, I have classes on Saturdays and I'm not really too crazy about them and maybe some kind of deal where you could go to class every other Saturday would be better."

3. (Norm Tessier)
"I like flying on Saturdays - it doesn't take too much of the time off from Saturdays"

4. (Pete Goulder)
"It's a good idea because they're getting the most out of everything. It's the best way to make it work... They're putting a lot of hours on the planes and stuff and, if everything goes right, there won't be any screw-ups like in Daytona."

5. (Dave Liljegen)
"I don't have classes on Saturday, I fly. I like the idea where you have the whole dry to fly instead of just a couple of hours reserved each day. Then it's easier to fit in your schedule, but I'm glad I don't have classes on Saturday. It would be awful tempting not to go."

6. (John Barry)
"I'd rather be flying 3 days a week and taking classes 3 days a week."

7. (John Sims)
"You don't get Friday night to go out - but when you have 3 days, you get extra days to do homework and stuff like that - it's better."

8. (Richard Love)
"I like it 6 days a week - except you can't go out and party too much Friday night if you fly Saturday. That's why next time I'll switch my school to Saturdays, so I can go out and party Friday night. I'd rather go with a little hangover to class rather than flying."

9. (Kim Stone)
"I go to classes on Saturday - that's when they give you most of the tests to make sure you come. It's no problem."

I want you to go to your windows, throw them open and yell "I'm mad as hell and I'm not gonna take this anymore"... "The AVION Hasn't enough writers and needs all they can get." We've got photographers up the butt! What we need are writers!

FEEDBACK

QUESTION:
Why is it that Embry-Riddle does not have any black academic instructors or black admissions counselors?

RESPONSE:
From Julia G. Futch, Personnel Services
E-RAU makes every effort to recruit minority candidates in all areas of employment at the University. Only advertising sources are used which will reach all potential candidates, and include local news media, the Florida State Employment Service, specialized publications (i.e. the Chronicle of Higher Education for academic faculty members), as well as listings with college placement offices when positions are open calling for specific academic disciplines. Consideration is extended to all candidates who make application with the University.

QUESTION:
The University has placed new posts along the driveway between the Academic Building and the Engineering Laboratory. These posts have wires strung between them which are presenting a potential hazard. Shouldn't these wires be marked so as not to pose a danger to pedestrians?

RESPONSE:
From Fred Willems, Physical Plant Director
The areas where the post and wires were placed are not walk areas. However, we will be happy to mark the wires for those who insist on using alternate routes.

QUESTION:
Many of the newly hired teachers and instructors appear never to have taught before and are uneasy in the classroom and have not yet perfected their teaching techniques. Even though students have the opportunity for evaluating instructors at the end of the Trimester, is it possible for these newly hired instructors to be evaluated by members of the teaching staff within the same department at the beginning of each Trimester?

RESPONSE:
From L.W. Moltzel, Dean, Academic Affairs
We appreciate the "positive attitude" reflected in the questions. "Official" faculty reviews are conducted once a year, usually in December or January. However, evaluation and improvement should be an on-going and continuing process. My first suggestion would be for students who really want to help is for them to ask a lot of questions, and to show genuine interest in the class. This will bring out "the best."

If "the best" isn't good enough the students should discuss the situation with the appropriate Division Chairman. The Division Chairman can then take action on an individual basis - which may include having other members of the teaching staff within the same department provide assistance.

1964
Thomas A. Cook, a December, 1964 graduate with an Associate in Science and a Bachelor of Science degree in Aeronautical Engineering, is working toward his Masters degree at Valdosta State College, Valdosta, Georgia. Tom is employed by Piper Aircraft Corporation as Program Manager, Advanced Engineering Corporation Division, in Lakeland, Florida, and currently resides in Lakeland.

1969
An August, 1969 graduate, David B. Getman will soon move to Houston, Texas, where he will be employed by the Bechtel Power Corporation. Dave, who has a Bachelor of Science degree in Aeronautical Engineering, is currently employed by Westinghouse Electric Corporation, Plant Apparatus Division, in Pittsburgh, Pennsylvania, as a Senior Engineer.

Since graduating from Embry-Riddle, he has attended the University of Alabama and Carnegie Mellon University, Pittsburgh, where he is living until his move to Houston in late November.

1970
Thomas F. Isenburg was recently promoted to Director of Contracts Administration at Applied Technology, a division of Itak Corporation in Sunnyvale, California. Tom has been Manager of Contracts Administration since joining Applied Technology in 1974 following his employment with Hughes Aircraft Company, Los Angeles, California.

Tom is a 1970 graduate with a Bachelor of Science Degree in Aviation Management and has an M.S. in Systems Management from the University of Southern California.

THIRD ARMY DIVISION COMMANDING GENERAL, Major General Wallace H. Hutting presents 2nd Lt. Frederick Uphoff, 2-33 Armor Battalion, with U.S. Armor Association engraved sabre. Lt. Uphoff was named top ROTC Armor graduate of 1977. (photo by Tony Geishaus)

Applied Technology develops and manufactures radar warning systems, military mini-computers, power management systems, laser intercept systems, optical signal processors, optical

spectrum analyzers, hybrid microelectronics, liquid crystal displays, radar signal simulators, reconnaissance systems, and ground support equipment.

1971
Bussey C. Allsup currently resides in Ypsilanti, Michigan, where he is employed as a Captain with Zantop International Airlines. Bussey is a December, 1971 graduate with a Bachelor of Science degree in Aeronautical Science.

1974
Air Force Captain John M. Hiemstra recently arrived for duty at Andrews Air Force Base, Maryland. John, a 1973 graduate, is currently a pilot with a unit of the Military Airlift Command, previously served at Dyess Air Force Base, Texas.

He is a 1974 Embry-Riddle graduate and was commissioned later that year upon completion of Officer Training School at Lackland Air Force Base, Texas.

Steve B. Nagy graduated from Embry-Riddle's Ft. Rucker Residence Center in August, 1974 with a Bachelor of Science degree in Aeronautical Studies. As a Chief Warrant Officer, he was a VIP fixed wing aviator in the U.S. Army for eight years. He was also a Distinguished Graduate in the Army Fixed Wing Initial Entry Course.

Steve earned various FAA ratings from 1972 to 1976 and recently became a Second Officer in 727 and 737 jets for Western Airlines.

1976
Second Lieutenant Frederick H. Uphoff, a December, 1976 graduate, was selected by Headquarters, Department of the Army as one of two top armor graduates from the entire

ROTC program to be recognized by the United States Armor Association this year. Maj. Gen. Wallace H. Nutting presented him with the United States Armor Association's engraved presentation sabre in ceremonies at Kirch Goens, Germany, in September, 1978.

Fred went into the Army in 1968 to attend Warrant Officer Flight School. After graduation he won the Distinguished Flying Cross, 24 Air Medal and the Army Commendation Medal as a "gun-ship" commander in Vietnam in 1970.

After pursuing other interests from 1971 to 1974, Fred completed his college education at Embry-Riddle and returned to the Army gaining his commission as the Distinguished Military Graduate in 1976.

THOMAS F. ISENBURG - Applied Technology, Division of Itak.

1977
Mark Z. Connell returned to Embry-Riddle for a visit recently and stopped by the Alumni Affairs Office. Mark is a December, 1977 graduate with a Bachelors degree in Professional Aeronautics. He told the Alumni Office that he was hired by American Airlines in February, 1978 as a pilot flying out of National Airport in Washington, D.C. He resides in Falls Church, Virginia.

1978
James M. Hassell is residing in Hampton, Virginia, where he is employed by NASA, Langley Research Center as an Engineering Technician. Jim is an April, 1978 graduate with an Associate degree in Aviation Maintenance Technology and an A&P certificate. He hopes to return to Embry-Riddle in December in order to work toward a Bachelor's degree.

Gee, Thanks, Mr. Wencel

Dear Mr. Wencel, Oct 13, 1978
I thank you for coming to our school. I really liked the film. You told us lots of things we didn't know. What you told us helped out in class. Thank you very much.

interested
sincerely Shannon Boer

Mr. Frank Wencel, E-RAU's own meteorology instructor has been applauded by a group of fourth and fifth graders from Ormond Elementary School. Mr. Wencel offered his time and services as a volunteer to the Aviation Education Resource Collection (AERC). AERC is a program maintained by the E-RAU Media Center which offers aviation materials to the school systems. Part of this program is a "Speaker's File" which offers interesting speakers to the schools to speak to kids on a variety of topics. Mr. Wencel spoke to this group of enthusiastic students on hurricanes and tornadoes. They thought he was great!

If you are interested in volunteering your services by being available for an occasional visit to a local school, contact Kathy Paro or Judy Luther in the Media Center.

Mr. Wencel received letters of thanks from all the kids who enjoyed his talk. Here is one which makes it all worth it!

Is honesty a thing of the past?

We will have it wherever you want it ★ REMEMBER ★

It's just 25¢ from any member of W.E.R.U.

So send out your invitations

FRATERNITY CORNER

AHP

Last Saturday night held perfect cool, clear weather for our annual fall hayride. A great time was had by all who attended. A special thanks to Linda Tanner and Miller Beer for getting us the free keg that kept us warm and to Randy for his great job in keeping everyone's cups filled. Thanks also to courageous Don Bozzo and his

trusty horse "Silver" for leading us through the dark forest with its rain-filled fuches. After the ride everyone munched out on hot dogs and marshmallows cooked over the fire! Yum!

Next weekend remember to set aside time for the DYS tour and please pitch in on the NIFA project and the pretings for our guest speaker, Richard Collins, editor of Flying Magazine. Keep up the good work. Ritual dinner is less than a month away!

LAMBDA CHI ALPHA

By "Glide"
Well Lambda Chi Alpha has been fairly quiet in the last two weeks. Last week was our one week of rest. As for this week we were back to normal.

As usual the weekend started on Friday night and it didn't seem to end until Sunday night. After the usual long drawn out Friday night everybody was ready for our first workday on the house. In one day we were able to get the back two apartments ready for moving in. This involved a lot of clean up work and of course the great sport of painting. As the paint went on the house so did the beer flow. By the end of the day not only was the house painted inside but so was everybody who painted it. Saturday night was spent at Disney World and tough the money went faster than anything else, everybody had a good time. Sunday was finally a quiet Sunday. Our football team got a chance to rest after a tough season. Our record was 6 wins and 5 losses. As usual a perfect record. Sunday night was the final going away party for our Crescent Sunday. Sandy, we wish you the best of luck and don't think of us too often.

For all the Brothers and Associates Al will get those hats and shirts whenever he gets that list. We've got to have organization in this.

Well time to close and keep thinking Lambda Chi Alpha.

EX

By Berrae Meixell Jr.

Last week was a fairly busy week for the brothers of Sigma Chi. Even though we didn't have any spectacular projects on our agenda we were kept busy with quite a few things.

First of all we had our first of two little sister installations on last Friday evening. We are going to install the second group of young ladies into our little sisters program tonight. All totalled we have twelve new little sisters. It looks like brother Don Miller is doing a fine job and it also seems like he'll have his hands full. Good luck Don and good luck girls.

Last Saturday we had a super successful clam bake at the home. Brothers Brad Nunn and Tom Moore deserve a great deal of credit from all of us. Without all of their hard work the outcome of this party would have been slightly less than dramatic.

We did have one P.R. project which took place over the weekend and all of the credit goes to brother Larry Ammirata for babysitting last Saturday evening. Keep up the good work, Larry.

In closing I would like to remind all of the brothers that this Saturday night is C.A. Get psyched! And a note to all the pledges; we know your secret!

If there is anyone desiring any information concerning our projects or our fraternity let us know. We can be reached by calling 252-2277 or you can find out by stopping over. We're located at 520 S. Ridge-wood. Our door is always open.

CAMPUS CLUBS

Brothers of the Wind

E. R. A. U.

MGT CLUB

By Mark Phillips

Well the Brothers have been very busy for the past few weeks. We had a roller skating disco which turned out to be a great success. We are hoping to have more throughout the rest of the tri. This past Saturday night we had a super disco in conjunction with Delta Sigma Theta Sorority Inc. and Tri-City Disco. Also our new members are sponsoring a raffle, first place prize is a round-trip for two to Miami, Florida via Air Florida, 2nd Prize is a dinner for two at Red Lobster, and 3rd prize is a case of beer.

As for flag football the Brothers had a very busy weekend. We earned a three-way tie with the Vikings and AF-ROTC in our Division. We played the Vikings Saturday and won by a score of 6-0, then we played AF-ROTC after that and won by a score of 3-6. This left us with our playoff game Sunday afternoon against the Big 8 in which we won by a score of 19-0 with a touchdown pass from Chuck Henry to Mark Phillips and two touchdowns runs by Jerome. We play the Gentle Giants next week for the Championship game, see you there.

New Organization

ACC

By Craig Stechman

Hi, in case you haven't heard we're the newest organization on campus! Our name is the A.C.C. (Apartment Complex Committee). We are an organization designed to act as a liaison between the student housing offices and the Embry-Riddle Apartment complex. As a liaison we make recommendations to the housing office on any problems that arise regarding the complex and make suggestions on how to improve existing conditions. We also arrange social events for our residents and have a lot of ideas for upcoming events. I would just like to point out here that some of our events will be opened to all students and that you will be informed of such events. We are planning a big

By Patricia Neuzil
Last Friday we had our third dinner meeting of the trimester. Mr. Jim Dunkel, Director of Operations for Federal Express, was our guest speaker. He showed an entertaining film concerning Federal Express and gave some very helpful and informative suggestions on getting a job and keeping it. Mr. Dunkel's speech was excellent and many of us stayed afterwards to ask questions.

During the meeting Linda LaSpina, coordinator for the Career Center, presented Mr. Dunkel on behalf of Federal Express a certificate for their continued interest and support of the students at Embry-Riddle.

The club will have a special business meeting in a couple of weeks to discuss future business and activities. The exact day and time will be in my next article.

If anyone is a member and didn't receive a notice in their box concerning our last meeting, please leave a note in Craig Stechman's Box No. 4225, or contact any of the officers.

event opened to everyone this spring trimester, so keep your ears open and eyes reading the AVION for future details. The elected officials of our organization are: Dave Wierpert (President); Richard Friedrich (Vice-President); Peter LaPlante (secretary); Chris Dimitryyada (Treasurer); and myself Craig Stechman (Social Functions Coordinator).

If you attended the Oktoberfest Sunday, October 22, you may have noticed the A.C.C. selling pretzels. This was our first fund-raising event and was fairly productive. I would like to thank Richard Friedrich, Dave Wierpert, Danny Vella, and especially our two pretzel cooks - John Payne, and Steve Wiedler, along with others who made this event profitable and fun. With the money we made we plan on having a party for all residents (the date to be specified later). I hope to see even more participation in the future, because it is us who can make the apartment complex a great place to live.

WERU

By Glenn Bergman

If you've been interested, even excited, by the new albums coming out of Record Industry these past couple of months, you've had good reason. If not, you probably just haven't been paying attention. Ted Nugent has come out with a new studio album entitled Weekend Warriors. Aerosmith and Kansas have come out with live albums each.

Kansas' Live will be featured on Sunday, 8:00 - 10:00 p.m. Enjoy 140 minutes of one of the most enjoyable bands around. On the subject of money, WERU is sponsoring a Raffle that for only a quarter will yield a turkey, a keg of beer and music. The music supplied will range from Aerosmith to Zeppelin all the way to Neil Young. We have a vast collection but if it's not enough you probably have your own. We will play them, too. This will be your party anywhere, (within lim's). Think about it. Let's pass the idea around!

SKYDIVERS

By Gary MacFarquhar

A bunch of us skydivers retired to zephyr Hills last weekend for a big helping of fun times and partying. With a number of visiting jumpers, we managed to get in several

fun jumps and a lot of good stories! Those who didn't jump kept their ears open and picked up the latest tips from some of this country's hottest skydiving personalities.

In other news, there isn't much (news). Since we all vacated to Z-Hills, no one was able to get up a lead at our home drop zone, Deland. We'll all be back there this weekend, though, so stop on out and see what's goin' on with your Riddle skydiving team.

Also, look elsewhere in this week's AVION for some fresh looks at parachuting by members of the Embry-Riddle sport parachute club.

Opinion on Parachuting

By Gary MacFarquhar

Have you ever thought about making a parachute jump? That's right, climbing out of the jump plane and letting go of that strut out of your own free will! Do you think you'd be alone out there in the wind? If you think you would be, you're only right in the literal sense of the word "alone." Because, my friend, preceding you into that wind were the technical knowledge and expertise of the world's finest physicists, the calculations and data from countless wind tunnel and test drops, and last, literally MILLIONS of people preceding you under exactly the same conditions with identical equipment. Going with you into that wind are the training and knowledge that you have acquired in your pre-jump training from qualified, licensed and experienced drop-zone operators. Strapped to you is a proven reliable main parachute, and a second reserve chute with an automatic opener. And following you and your progress into the slipstream is a highly trained and qualified jumpmaster, backed up by still more skilled ground support personnel, who help steer you to a safe landing. So even though there is nobody next to you, standing there waiting for the call "GO!" you do have the support of a bunch of dudes who know what is going on.

However - don't get the impression that you cannot be hurt, possibly seriously, engaging in such pursuits. The ground is very hard, and is perpetually

unforgiving to those ignorant of the laws of gravity and aerodynamics. A student is thoroughly trained to deal with any situation that could possibly arise during the course of his jump. To make use of this knowledge, the student must be able to keep his head during that jump. Anyone who has successfully completed a jump course can be very proud of that fact. And, more importantly can generally consider that they have proved that their "Act was in order."

So, briefly you have heard what I consider a student can expect from jumping. PLEASE - if you disagree with my views in the slightest, don't sit around and moan about "sport death" with your friends, get yourself out to Deland, or Eustis, or all about - FIRST HAND. Then form your own ideas.

Read on for another look at jumping, by E-RAU parachute club member Randle Swinburn.

"I have recently become a member of E-RAU's Skydiving Club. I only have seven jumps, but I think I have been around the drop zone long enough to know how things are done."

"I'm very impressed with the emphasis that is placed on safety and preparedness before a student jumps. Since I have

been jumping there have been only a couple of malfunctions, and these were handled very quickly and professionally. I think this can be attributed to the excellent training given by Jay Cunningham and the other senior membership of the club."

"So, if you have thoughts about trying skydiving, but have not because of bad publicity, or just a little personal fear, come out to Deland and watch us any weekend."

"I know if you do you'll want to give it a try. And I can guarantee that you'll love it! DO!!"

ARNOLD AIR SOCIETY BILL ROBE WILSON, SS.

By Timothy M. Robinson

This past weekend started out with a bang, and ended at that same fashion. It consisted of the finale at the Haunted House, and the air show at McDill AFB.

On Thursday night, the Jaycees of Daytona Beach invited Arnold Air Society members to their business and awards banquet. Each of our members that participated at the haunted house during the last three weeks received a "Certificate of Merit."

Then, on Saturday, we saw the last of the haunted house. That's right. The finishing touches of clean-up were put on the haunted house, ending this year's chapter of ghosts and goblins.

That same night, Paul, the chairman of the haunted house committee for the Jaycees, threw a free dinner, again for the Jaycees and members of AAS that helped out at the haunted house.

Although at times it was a trying experience, working at the haunted house was very rewarding. Working with the Jaycees was great, and AAS members hope to continue working with that worthwhile organization for years to come.

The weekend ended with as much excitement as it had started with. We went to the air show at McDill with the corps and saw many static displays, along with the Thunderbirds. On the way back to Daytona Beach, in regular "ex-F.C." fashion, Janet and Ernie supplied some short but sweet entertainment. 35 seconds to be exact. Along those same lines, I would just like to soothe a non-AAS member's nerves by telling her that Nelson did not get too upset.

From all indications, the pledge class had a very good time at the Cedar House when they went out there a week ago this past Sunday. Dan Woodward, alias "Sluggo", was struck out three times by one of the kids.

Have a good weekend when it gets here. I know I will, I'm going to John's, Jim's, and Lou's house for some "steak!"

AFROTC

By Cadet 1/L1 Daniel Woodward

The football team completed its season last Saturday. The game marked the end of what in truth was a very successful season as evidenced by the team's final 4 and 2 record. One of the primary reasons for the team's success was Cadet Capt. David Freilinger. He devoted more time scouting other teams and organizing practices than most people realize. He was the motivation behind much of the team's success, and in fact played a key role in several of the plays that throughout the season, brought the team to victory. If revenge is sweet, no doubt Cadet Freilinger will see to it that next year's team has a huge sweet tooth.

Next Saturday is the Aero-bics Run. It appears as though most of the Corps has decided to approach the run in the same way as one would go about preparing for any of Captain Merlin's tests. That is, slack off until the night before, and then cram, cram, cram! It doesn't seem likely that running 50 miles on Friday night will work too well, but a cram course is probably better than none at all.

On 21 Nov. from 12 to 1800 an AC 130 will be displayed on the DBA ramp. The gunship has over 20 million dollars worth of fire and gun control systems on board, and an Air Force representative will be on hand to answer questions. Keep working, finals are finally in sight!

LOST & FOUND

LOST - somewhere in vicinity of W. building (probably W-204) an orange and black women's umbrella. Please return to Lisa if anyone has seen this umbrella and when please leave a note in my mailbox. I'll really appreciate it. Box No. 7963.

's whoever "borrowed" the Arroyo name book from my desk in the Embry-Riddle Bldg. The book was School property. No instructions and a student's. It also can be identified. The Arroyo name teachers can also assure that this book is missing. This is your chance to please return it now, before it is found in my possession. Thank you, Mary Winslow.

I found a jacket in W-304 on Tuesday, October 17. If the owner can describe it, he gets it. Contact through Box 3426.

I lost a ring this Tuesday and I would like to thank the person who found it. Thank you.

Championship Game!

Gentle Giants VS Brothers Of The Wind

The Brothers won a three way playoff Saturday and then beat Big Eight on Sunday. The Gentle Giants handed the Vets their first loss in four years to advance to the championship game against the Brothers of the Wind this Sunday at 3:00 p.m.

SATURDAY RESULTS

Brothers of the Wind 8
 AFROTC 6
 Vikings 0

On the second play of the game the Brothers connected on a pass from Chuck Henry to Dennis Henderson, for a 35 yard touchdown. The Vikings were unable to score against the Brothers.

Brothers of the Wind 8
 AFROTC 6

The Brothers received the points when AFROTC fumbled a hike in their end zone for a safety. A few minutes later the Brothers scored on a 40-yard A Bomb from Chuck Henry to Jerome Yates. Air Force managed to score a touchdown on a drive led by quarterback Freilinger.

SUNDAY

Brothers of the Wind 21
 Big 8 0

The Brothers' first touchdown came on a 25-yard pass from Chuck Henry to Mark Phillips. P.C. Noble caught an interception to set up the next touchdown on a pitch around the left end from Chuck Henry to Jerome Yates. The Brothers again recovered the ball on an interception. This time by Dennis Henderson! Chuck Henry then threw a 35-yard touchdown pass to Jerome Yates. Dennis Henderson ran back an interception 35 yards but the

game ended before they could score again. The Brothers made an extra point and forced a Big 8 safety.

Gentle Giants 20
 Vets 19

In the best match-up of the season, the Gentle Giants won by an extra point. They quickly scored two touchdowns on runs by George Kothe of 10 and 20 yards. They scored the first extra point on a pass from Paul Csibrik to Jeff Harks, and the second on a pass to Mangum.

The Vets scored on a 40-yard pass from Stu Pollak to John Richards. Dave Mahon intercepted a Gentle Giants pass and Bob Allen ran in a touchdown from 15 yards out. Stu Pollak hit Bob in the end zone for the extra point to get the Vets just one point behind the Gentle Giants.

Paul Csibrik threw a 45-yard pass to Jeff Marks for a Gentle Giants touchdown. Csibrik had intercepted a Vets' Club pass to set up the last touchdown and George Zimmerman also had an interception on his 5-yard line to stop a Vets drive, although they were behind the whole game, the Vets showed poise and discipline, and calmly worked their way back into it. With the running out, on 4th and ten, Stu Pollak hit Mike Stouffer for a 30 yard touchdown - they missed the extra point though, and the Gentle Giants kept the ball until time ran out. The Gentle Giants defense stopped the Vets with five yards of a touchdown twice in the second half.

BOWLING

This week we had much better results than last week. Franz Vogel bowled a 224 and a 223 with a 634 series, Terry Shalan and Rick Free-

born had 212's; and Bob Allen bowled a 203. Gail Sanders bowled a 178 to lead the women. Jeff Sheppard was thrown out of the bowling alley after bowling a pitiful 92 and Rick Larsen man-

aged to come back after bowling an 88 last week.

How would Shakespeare have played O'Keefe?

With gusto. And in all seasons. It is a brew for listening to a winter's tale. It's a liberation in praise of a midsummer night's dream. It is hearty, full-bodied, it is smooth and easy going down. And the head of O'Keefe is like the crown of a king. And all the players act upon the theme. It's too good to gulp.
