Riddle to Discourage Smoking for Your Health and Safety

By Mike Simmons

Embry-Riddle has issued itself a new program in which we see the students of Embry-Riddle, are the most important part. This movement concerns the safety and well-being of each student, faculty and staff member. It is the effort to give the non-smoker his right back.

This movement is oriented around the health and safety of everyone is a mission that must be supported by all. Specifically, what this action involves, is a campaign, movement by the students to set up rules and regulations to enable the community to be free of cigarette smoke. Based on the fact that smokers have their rights and non-smokers have their rights, the movement is working from a health standpoint as well as being fair to everyone.

So far, this action has been met with approval by the F.B.G.A., Dean Hedrick, Student Affairs, and the Nursing staff; in the near future, it will become a widespread action involving every student.

Aviation safety will be the main topic of Collins' speech along with some wise upper-division student's words. That's Monday, November 20th at 8:30 p.m. in the U.C. in honor of Renard Collins, Lewis alum. -Aviator.

The Dixie Dregs style is good--shockin', restless, even Euro-American "classical". Just always good. According to the students, their album, "The Dixie Dregs" which is the latest addition to the South's emerging "new wave" of smart, energetic fusion of bluegrass, jazz, classical, and rock music. Four of the five musicians who make up the Dregs are not just students at the University of Miami, where their sound is called "pirates," Pat Mehany and Brian Jones (who round out the group). Several of them boast extensive classical backgrounds as well. But they are not trying to rip off a country background from their "real" Caperton Album is "What If", basically country rock with embellishments. So, get some tape and make a tape on Wednesday, November 20th to be thoroughly entertained by top name artists in a well-blended concept.

End fall, both Boston and Cypress were instructed at the Ridgeline Breezes, Barnum & Bailey Clown College, teaching judging, uncorking, and sobriety. Later in the year, they gave master classes at colleges and throughout the South and Northeast.

Friday evening performances will be followed by on all day workshop on Monday, December 4th in the University Center and outside grounds. Louie on judging, sobriety, uncorking and nutrition and nutrition will be provided to all students who are interested.

Also on Friday's bill will be a show by the fabulous Mr. SchoolJam. "If there's a show going on, you attempt to follow the fast-paced instructions to get in the" show. Mr. SchoolJam has appeared on both sides of the ridgeline and college throughout the U.S. and Canada. It's called "Uncorking and Uncorking".

A week of weeks for programming. Be there Wednesday for the Dregs and Friday for unique novelty entertainers. This is the last chance for students and others.

Felicity and your friends to this one!

LETTER TO THE EDITOR

By Keith Kollarik

"Don't want to get involved!"

I have been a member of E-R-AU, I have heard that statement too many times. Believe that whenever the security people active at the presence of disturbances. This is to a student around who "saw the whole thing," and when asked if he would be willing to positively identify the people responsible, it's "Darn, I don't want to get involved!"

Well...what will you do? You are isolated whether you like it or not. Where do you think the money comes from to repair these things? It's damaged by some jerk. "Just for the Fun of It!" That's all it is worth.

So, the next time you see someone spending your money without your permission, get the security police and point the child out. If you won't, then don't complain to me about any future restitution increases. "I don't want to get involved."

To the STUDENTS, FACULTY AND ADMINISTRATION

I am trying to speak on behalf of the AVON about a very destructive element on our campus. It is one problem which plagues all people at Embry-Riddle, whether they be students or faculty, or administrating personnel. This may be easy for you to fix "everyday", but the blame or the problem is not everyone's. The problem was quite interesting since it was pre-registration. This plagues all students "Early of Class Information." You're probably thinking, "That's the easiest thing to fix" those boring editors, "Oh, it's not as easy with this school, you are probably saying. The article doesn't apply to me, I think I'll read the com-

But it does apply to you! The rest of this problem is ugly. Few people feel like expressing their views in print. Some, no one can learn from making complaints, because school (and all the talk) don't get the point of making complaints. The campus should be seen as a business or E-R-AU—can be very frustrating. But complaints do not provide a way to express opinions or procedures. This year, we have gotten a large amount of term mail from students, but I wonder how many times everyone should be listened to. The administration should try to apply this to the students through the newspaper. Nothing or much is created such as registration, graduation dates, anything, even where the student has to get prior information should be in the student's pocket.

Unfortunately; this is not the case. There is no one-way communication between the administration and the student. I feel that the Avion is the perfect place for such communication, and can be an effective tool for both the groups of people that are interested or not. They get up and write down your views—it only takes about 10 or 15 words! Communication, or lack of it, is a very serious problem on campus, but can be overcome by using the Avion to the fullest extent possible.

Senator Randolph to Recieve Wright Trophy

By Mike Santamaria

Auburn University, This past weekend was a very exciting and worthwhile time for us all here in Auburn. We gathered in the Florida Institute of Technology (FIT) in Melbourne, for the Regional IX, National Intercollegiate Flying Association (NIFA). This year FIT was the host of the event with the following teams competing: Florida Institute of Technology, Embry Riddle Aeronautical University, University of Central Florida, Embry Riddle Aeronautical University, University of South Florida, and Florida Atlantic University. This year’s events included: Computer Awareness, Aircraft Recognition, Aircraft Pretend Flight Simulator, Power on and off, Aeronautical Navigation, Message Drop, and a CPR Landing Test (which did not count in the total score).

The Embry-Riddle Flight Team entered in the predefined events only this year, because of the lack of necessity. So we competed in the air events at the present time. Those who competed in the events and also a very professional job were: Kevin Williams, Greg Bogren, Dan Fink.

Also in the computer event were: Ana Vegue, Alan Biomaster, Greg Bogren, 1982-83 Air National Guard, and Mike Tovar and Alan Blumerzheim in the aircraft recognition event. Also at the all were Jack Chernow and Mike Tovar as my opponent and myself as a team captain.

Some people did a very fine job and should be commended for their desire to compete in some aspect. They didn’t win.

FIT took top score in this year with Alexander, who was second. Second place, Ferris in last place since we did not enter in all the events. The events had only 10 days to prepare for the categories, but still managed to bring home at least one first place. Dan and the rest of the team can thank Mr. Tom Connolly for his time and effort in getting them ready through his “ASB2” class this year.

Each team members eager to prove E-RAU can again display the Red knight in a new region next year. So the games have started to turn for fund raising events and secretary and local support to the flight team can make All-USA events at the next regional airport. The team will see this meet as the springboard for our upcoming flight to the top!!
First Students Complete 727 Flight Engineer Course

By Daniel Karger
AVIATION REPORTER

E-RAU is offering a Boeing 727 flight engineer type rating. The program begins at the start of the summer and enrolls two E-RAU graduates completed the required courses.

Larry Stillion (of St. Petersburg, Fla.) and Jep Spalthoff (of Mountainaire, New Jersey) both graduated from E-RAU in August of 1973. They both recently acquired the rating of Boeing 727 Flight Engineers by completing the required courses with E-RAU.

The Flight Engineer program begins with PT-518/AS-518 (All the required core course; PT, the same course without credit). An FAA approved ground school is taught by LT. Thomas F. Willey, a pilot with Eastern Airlines and a straight-A graduate from the National Safety School as a Certified Safety Specialist in February, 1972. Then he started work with us at Boeing, on October 16, barely three weeks ago.

I asked Larry about how the department is going. He said that, as safety and security go hand in hand, the job involves both a safe and secure environment for students, faculty, and administration personnel and their work. He agrees with me that the goal is a place where both men and women can be safe, and it should suit all that attend.

He requests that the image of the security force at Embry-Riddle has not been the best in the past, but feels that, in fact, rectifying this image, the force has to continue the mission that they are working for. The flight student says that Larry is making it himself to make himself available 24 hours a day the line is down at Dayton Beach.

Presently the Embry-Riddle Security Department has 16 people (12 men and four women) and expects to have two of the women on patrol sometime this week, something to look forward to.

Larry Stillion presents a favorable image for the security force in his coming months. He is a very interesting person, and willing to talk with anyone who wants to keen on him by getting acquainted with the men and women of the security force. He will be able to better understand their task at Riddle and how they perform it.

When was the last time you thought about what you're eating, or what you're going to eat? When you're hungry, you're hungry. If you don't like what you're eating, you might get the ate.

For more information, Mr. Morton, can be contacted at the Engineering Building, telephone ext. 441.

by Jeff Barrow

There is a new face on campus this fall. Just recently, Embry-Riddle hired a new Chief of the Security Department. Mr. Bruce Morton is the new head of the department. I found Mr. Morton to be a very interesting person with many experiences and a lot of due in a security and safety officer.

Mr. Morton was born on May 30, 1924, in Philadelphia, Pennsylvania. In 1942 he graduated from high school in Michigan, Michigan in 1947, he started an acting career in the Armed Forces when he entered the Navy. At the outbreak of World War II, he was at Pearl Harbor working for CECRPCA Flight. During the war he traveled on many famous ships under the command of Admiral Halsey. He never graduated Chief Engineer and eventually was aboard the battleship, Enterprise, and later the fleet. During his career, he headed the Safety Engineering, and was appointed to the same course at one time or another.

The Flight Engineer type rating for the FAA is completed at one time or another. Mr. Morton has been working at the FAA since March 1952.

Mr. Morton states that he has an interesting position, and one that he enjoys very much. He feels that the FAA is a very interesting place, and that the image of the FAA is not the best in the past. He feels that, in fact, rectifying this image, the force has to continue the mission that they are working for. The flight student says that Mr. Morton is making it himself to make himself available 24 hours a day the line is down at Dayton Beach.

Presently the Embry-Riddle Security Department has 16 people (12 men and four women) and expects to have two of the women on patrol sometime this week, something to look forward to.

FEEDBACK

FEEDBACK QUESTION.
I'd like to look at the next need. Avionics issue isn't an area we've surfaced from the University as to just wide and fleet. Maybe a closer look at the entire administrative situation would eliminate some of the issues being problems. At this time, all areas. Engle-Riddle should be the point of allowing certain students to the course, just because they are teaching and happen to have the tuition.

What is all built down to is PARTICIPATION. If the students and faculty didn't allow Embry-Riddle to take advantages of them, many policies would never have come into effect. This is an issue asking for the students and faculty. Don't worry about your spelling or grammar. Just write, because if you don't, then you really can't, complete about the way things are going. Start your letter today. Cross the administration and expect it with gusto. Remember, as an entire body, policies can be changed. This issue also asks that everyone take the time and write to Political Science. Poly box 5095. Would like some students to the upcoming unpleasant. What changes do you think we need to improve the problems stated in this article, and improve the level of achievement at Embry-Riddle? All areas will be killed, and the results expected in percentages in one of the coming issues of the AVVD.

Some reflections upon request.

E-RAU Employees Spend a Day in the West

Embry-Riddle's employees and their families converged on the campus at Head Springs Park on Friday, 17 November 1978 from 10:00 a.m. to 6:00 p.m. to celebrate.

You could really tell where the main "Western Style Olympics" were being held by the great number of attendees. The city of Riddle and its downtown E-RAU folk who walked in the park's grand meadow area. Fred Williams, Director of Physical Plant stood at Riddle and his staff had painstakingly designed and constructed a variety of unique games and contests with a Western theme in mind to suit the laughter and lack of skill and completion of the Western Olympics.

The events of the day included the Olympics which were entered by representatives from each one of the university's departments. The winners of the events received gold medals specially designed for the day.

Before, during and after the Olympics throughout the day, beer flowed, ice cream was given out and fun continued. A tasty meal was provided by PNSY catering services. Brisket chicken, salad, coffee, beverages and rolls to make over 1000 employees and family members happy with what they ate.

To say the least, with the continued presence of Winfield, the provided music everyone was in a raised good mood.

Physical Plant's employees coiled themselves up in a sprawl of beer and eats took off for the very very cold waters of the Springs. As dusk finally rolled in, Andy Smithshild and his team of the Falcon Center provided those who stayed with a humorous and surprising show. Among his slides were pictures taken on this special day, rushed back to Smithshild, developed and returned to off the dryer to show. Way to go Andy.

Congratulations are also in place for Julia Fitch, Falcon Net Director and her committee for this year's event. With the positive comments from all who attended, next year's plans will really be very well published and perhaps fewer locations will be needed to fit all the people.

Thanks, Julia.

To all of those employees who received recognition awards for their services to Embry-Riddle - thanks for helping E-RAU in Family and staff members. Your loyalty and effective work is appreciated.

Until next year, good bye.

With brother and sister fighting off yard acts in California and the Chamber of Commerce in Sigma Chi counselor another chapter at "At the Bar of Fortune," how affairs abroad and at home would be answered.omen to be answered. Some was sure, royal way being to catch on the fishing trip? Does Dave Buchanan keep more than action between her teeth? Miss next week.

On the sporting side, much of the chapter was on the Saturday fishing excursion on the Happy Dolly out of Powder Beale. While pledge brother Ken Rupert caught all the fish, Cheryl Galloway, our Little Sister Stevenson caught a mud bottom. Steve caught a neck, symbol of what he usually catches... just kidding.

On the school front, our pledge class Phi did the planning, supply, and backing for last weekend's dinner. The decision for the next Saturday's event will be kept a secret. Some thought the Phi would be found out. But we know the Phi has the ability to pull it off.

* Sigphi Phi Delta

The brothers of Sigma Phi Delta had a very interesting weekend. It started with a call from the president of FI and Y and two hours later, 6:00 p.m. Friday heLog had dinner at the Connors in Powel Beale. We won't need time in planning up from here because the chapter is on the way to the T.W. at the Charter dinner. It was a very intelligent wine. We were very fortunate to have our friends with brother and sister broken to a higher degree of learning and a better understanding of the war. We also decided to give a try at playing. At first, we had a little trouble getting from Georgia to English but soon it was not a problem, for mathematics is a general language, and no language bar any man.

Span the Brothers, as well as be known to all, the B.S. was given up with the same consciousness as a problem. The Phi was unable to pick up when the FI permanent member Seabury was activated. A pickup wrecker was redirected to these conditions, and within the ten seconds of the complained time, the Phi was successfully snatched and the Phi wrecker was for another ability.

The Phi will work under this situation through a throw, and with properCongratulations and much all around, it was once again to the Phi. But we now find them Phi and with one trip in London for dinner, we spent one way next.

By Wade

This week I have to start out by giving myself the "Chi" Award. I admit I deserve it because of the missing articles lately.

So to back up a couple weeks, I first want to congratulate the Phi who pilots the Phi. Three weeks ago, these girls worked hard and the boys are proud to recognize their part of our organization. Finally, while we recognize recognition for winning the ASD 228 and Beta, we were not only for keeping the team together and in good spirits, but for the three weeks in attendance. I have no reason for alarm! Thanks again, Stan? Thanking everyone meeting and phrasing member? Don't miss it! It will be worth your while. The next Phi meeting will be Monday, November 21st at 7:00 p.m. Our Phi members will be there to discuss the Phi of the Phi.

The next Phi meeting will be Monday, November 21st at 7:00 p.m. Our Phi members will be there to discuss the Phi of the Phi. This will be an important discussion with our guest speaker, Mr. Richard Callahan, editor of our Phi magazine. We have decided our Phi brothers from our Phi chapter to Monday will be a perfect Phi evening! Happy Turkey Day!

U. S. is no invite to the fraternity the fraternity pool tournament, organized by Dave Gordon, run by Dave Gordon, and won by Dave Gordon was Read.

On Sunday, November 13, 1978, Omicron Delta Kappa held its initiation ceremony into Omicron's chapter for the new members. There were about 30 people in attendance and Dr. Kitchell was the guest speaker. She gave a very interesting speech on success and practiced the new members with their pins.

Omicron Delta Kappa is a national leadership honorary society, founded from the idea of college life, the influence of quality and versatility in college, and the development of student representations in all phases of college life, including the social and intellectual, and the public.

On Wednesday, November 22, 1978, Omicron Delta Kappa was elected to the Lambda chapter, Omicron Delta Kappa, Lambda chapter, for the 1978, Omicron Delta Kappa. Further, we will be meeting with our guest speaker, Mr. Richard Callahan, editor of our Phi magazine. We have decided our Phi brothers from our Phi chapter to Monday will be a perfect Phi evening! Happy Turkey Day!

The note that guides the society is a desire to bring together in one body for the general good of the institution, all leaders in the various phases of college activities. The five major areas of college life that are represented in the Omicron Delta Kappa are as follows:

1. Scholarship
2. Social Service, and Religious Activities
3. Student Government
4. Publications and Journalism
5. Speech and the Mass Media

V. Creative and Performing Arts

Saturday's Pig Roast, with music supplied by WERU, turned out to be one of the best events in recent memory. The pig was obtained by a group of students and together this year. A few moments from last year were noticed and improved to make every last moment of the wild. In last year they felt for a weeknight at a private fraternity party which we were fortunate in attending.

WERU has the pleasure to announce that they will be at your next event on Nov. 21 at 6:00 p.m. In the pub will be conducted by the Miller girls. Even if you don't use the grand prize, be prepared to have a wild and great time. Thank you to everyone who has taken enough time and patience to come forward with your new ideas. Pictures are being taken; these will be done in the air of photo and on a sheet of paper, and all of these are being taken at a steady pace and on a steady pace. All of these are being taken at a steady pace and on a steady pace. All of these are being taken at a steady pace and on a steady pace. All of these are being taken at a steady pace and on a steady pace. All of these are being taken at a steady pace and on a steady pace. All of these are being taken at a steady pace and on a steady pace.

Airline Accident Update

The National Transportation Safety Board learned the entire flight crew for the cause of the accident. The pilot, co-pilot, and flight engineers were immediately dead. The alitator was winds from live actual 500 feet in the flight crew's viewing of 1,500 feet. The captain, George V. Knox believes the plane might have held down because they were

by the checklists. Leon
gulld, J.R., the first officer, also iron characterized from cutting the panel in the vicinity. The knee board believed that it was only sig
ing an excessive rate of descent. Crew crew may be not the worst crash in U.S. history, if we ever learn the true story.

What is known about the crash is that flight 182 while approaching Laredo Field, San Diego collided with a mountain also located at the main airport. Both aircraft were newer than the 290 crashes in the vicinity, however some were not involved in the crash and some were involved in a suicide mission. It will be quite some time before the reasons for this accident are determined.

P.S.A. Flight 182 tape is being withheld. A court or
determined that tapes of Flight 182 and the crash on September 25 be
des not shown. San Diego was the
crash on the tapes which
could explain the extent of the damage.
We would

beside

rather it would all come out during the public hearing on

Further information of the evacuation within the cockpit has already been princi
ged to theその事例の分析。They do not necessarily contain any information damaging to P.S.A. or information that isn't already known to the

In keeping with the radios from the flight

Eagles Over F.I.T 2-1

(Strike 1)

The Eagles soccer team closed their 1978 soccer campaign with a very impressive 2-1 win over FIT Melbourne.

The Eagles came out for revenge for last season's 4-0 defeat at Melbourne. The first 15 minutes saw FIT wildly offensive as they put some fine passes on goal and equally fine soccer from the Eagles defense. After a brilliant save by the Eagles keeper Brian Meyer the ball out to the left side of the field finding 50-man shoeless who took the ball deep into FIT territory and converted a brilliant ball into the packed FIT defense, the goalkeeper came out to punch clear only to find the ball in the back of the net put in by his own defensive back making the score 1-0 Eagles.

After the break the game was neck and neck. Some fine soccer by both teams, a great pass from the right side Finster Burne open who took the ball up field, laid off a pass to Ron Akin who turned it out to his right stop Peter Kowalko took the ball on the run returned it to Ron Akin who hit a great goal from close out by the helpless FIT keeper. FIT picked them up started to chase the Eagles defense. Brilliant defensive work by Austin of the Eagles back and Jeff Mathew all kept the FIT offense line-out.

One minute before the end FIT made one last attempt to break the Eagles defense and pushed the Eagles defense at four-foot, with Eagles keeper out of position a backhand penalty in the 18-yard box gave FIT a penalty to make the score 2-1. The Eagles held out for the remainder of the game to come out victors.

Coach Butler's comments after the game were: "This was a very classic game, there were two good soccer teams out there, apart from one or two faried transp on both sides both teams played some excellent soccer closing the Eagles campaign with a 1-1 result." The coach went on to thank Mr. Bill Stafford, Director of Admissions and Mr. Fred Willam, Director of Physical Fitness for their continued support in supplying transportation to the opponents the season.

The coach wishes the seniors who will be returning next season the very best of luck in their chosen careers but promised that some hard work next season.

There were finally some good games last Thursday. Dave Michael's game of 235 and Bob's game gives him one of the highest games of the season, but the question is, can he keep it up? Other high games were in back Frame's 204, Scott Hunter's 202, and Jamie More's 201.
