First Black Four-Star General Remembered

By Debbie Eber
The Daily Staff Reporter

The 10th anniversary of the death of the first African American four-star general was observed at a ceremony at the University of Chicago.

Ritchie, a black man who served in the Army, was a prominent officer during World War II and is remembered for his leadership in the development of African American officers.

The event was held in memory of the general, who was posthumously awarded the Medal of Honor for his service in the war.

E-RAU Research Collection

The E-RAU Research Collection has a new home in the Library of Congress. The collection, which has been used by researchers for many years, is located on the second floor of the Library. The collection includes a wide range of materials, including photographs, books, and manuscripts.

SGA Elections Coming Up Soon

Only two weeks remain until the final deadline for SGA candidates. At least two candidates are necessary for each election.

Cutbacks Holdback WERU

By Bob Jones

The ACR cutbacks have resulted in a 5,000 reduction in the station's budget. The station is now operating on a minimum budget of $5,000.

SGA Research

The SGA has received a grant to conduct research on student life on campus. The grant will be used to study the impact of SGA activities on student life.

To the Editor:

I am writing to express my concern regarding the recent increase in the use of social media platforms by our university community. While social media can be a valuable tool for communication and information sharing, the rapid spread of misinformation and polarizing content has become a significant issue. I urge all students, faculty, and staff to critically evaluate the information they encounter online and to engage in respectful and constructive conversations. Together, we can promote a more informed and inclusive digital environment.

Sincerely,
[Your Name]
The Problems With 'Plastic Money'

By Bob Window

If you are a student who wants to obtain a credit card, you may find yourself subject to competitive salesmanship. This has occurred in recent years in several disdainful locations, such as on your campus. Credit card companies are involved in a competition for sales that often means pressure is exerted on students to obtain credit cards. This pressure is often difficult to resist, and if you do not have a credit card, you may be subject to discrimination.

Chevron, Sears, and MasterCard also advertise their credit cards among students. These companies place advertisements in dormitories and other student venues, attempting to persuade students to obtain cards. This pressure is often difficult to resist, and if you do not have a credit card, you may be subject to discrimination.

The American Express Card offers a special application for students called "StudentEdge." This application is available at 912-5000 for more information. However, if you are planning to apply for a credit card, you should be aware that it is important to carefully consider the terms and conditions of the card before applying.

Many students may feel pressure to obtain a credit card, but it is important to carefully consider the terms and conditions of the card before applying. You should be aware of the interest rates, fees, and other charges that may apply to the card.

Close the cards! Not only will you save money, but you will also reduce the temptation to overspend.

Joe and John's Corner

The staff will be going to Disney World tomorrow, and the E-MR is also planning an outing for the Beech and Piper planes. This means that there will be no classes tomorrow, and the staff will be taking a break to enjoy the scenery and the atmosphere.

We wish all our friends a happy New Year, and we look forward to seeing you in the new year.

After the figure of the E-BAU's commercial pilot certification program, why not enjoy getting a flying lesson, although not too soon, it is a great deal of fun. The lesson I'm talking about is the Airbus Single-Engine Jet (ASE). The only prerequisite is a genuine pilot certificate and an enthusiastic attitude towards flying. If you're unsure your enthusiasm is up to par, once around the lake will boost it a peak you have never experienced in flying before.

Waterbeds are strong.
Of course we don't recommend parking your car on a waterbed. Waterbeds were developed for only one reason. Giving you the ultimate in sleeping comfort. A warm, comfortable night's sleep is what a waterbed is all about. They come in a variety of styles to complement your bedroom decor. Sure, waterbeds are strong. But more important, when equipped with a SafeWay waterbed heater, waterbeds give you a great night's sleep. To see a waterbed . . . see us.

SUSAN MOYETH - will soon be teaching Yoga Dance Workshop

Thursday evenings at the first floor studio, students will learn tap dance from various mountains of Hungary in the studio workshop.

Sessions will be held in the studio from 9:30 to 11:00 a.m. and 1:00 to 3:30 p.m. A dance party is scheduled Thursday evening from 9:00 to 11:00 p.m. featuring other ethnic dancing plus a review of the Hungarian dances taught.

Casual of Hungarian women usually wears a blouse, skirt and scarf with traditional dance of the old countries preserved at social gatherings, and family affairs. She has also to follow widely around the globe in some famous ethnic dance of Hungary, and has a master's degree in education.

Enjoy a day of education, culture, and artistry with people of various ethnic backgrounds. Singles and couples are welcome. The price is limited. Pre-registration fee is $2.00, $3.00 on the door. Call 215-5761 (after 4:00 p.m.) for further information.

PHASE CHECK NOTES

When is a Control Zone Effective? What does the application "the Control Zone is FBI" mean? If you did not answer "always" and "always" respectively to these questions, then you probably belong to a large group of folks who have been asking AMRAD questions on phase checks of late. For it is a fact that a control zone is always in effect, regardless of weather conditions, unless it is specifically designated as only effective during certain hours. When a control zone is so designated, the hours will be included in the note on the sectional chart, or reference to NOTAMS will be made such as the note at the southeast edge of Stuart's control zone which reads, "On Oct. 25, 5809-2108 Incl." An example of the hazards of thinking that a control zone is only in effect when the weather is 1000 feet broken or less is visibility can be seen by examination of the control zone around Cristobal Bank airport. Collier field the VFR pilot operating in the area 67 miles west of the airport with 5200 feet B/R and 6000 feet BFF. The approach is (ergonomically). Thus, the pilot feels more in the knowledge that he is a "controlled area" than 6000 feet and the pilot may be flying in the same area (6 miles west of the airport). The pilot feels more concerned about flying into the Collier area than 6000 feet, and he will expect that the VFR aircraft operating in the area will be at least 500 feet below the clouds outside the control zone when he plans through that 1200 feet ceiling (with a predicted elevation of 1700 feet for the Collier airport). The approach, "the control zone is FBI" is a mouth 6000 feet BFF when the instrument om age is an airport in the control zone shows a ceiling of less than 3000 feet and/or a visibility of less than three miles. The significance of a weather report is only that the operations is now and must be conducted in accordance with VFR or special VFR procedures. It cannot be inferred in any way from an airport water observation that the "control zone is FBI." Since control zones, by definition, extend upward from the surface to the base of the flight operation (maximum 14,500 feet) or to infinity if there is no CCA, the weather may vary well be above the 1200 feet VFR in a control zone MENTION FROM PROFESSOR DAVI.

By saying, "If you think we're going to get anything out of it, the deal breaks," Mr. Nelson has shot himself in the foot. That's the right line, but some people can say it a little more softly. It's a good line, but it's a little too blunt. Yr. Nelson also said, "If you're going to do this, you must be able to come up with some kind of plan to make it work." He went on to say that he had discussed the idea of a freeport with the Freeport officials, but that he had not yet received any responses. He said that the Freeport officials had expressed interest in the idea, but that they were still evaluating it. Yr. Nelson also said that he had discussed the idea with the local Chamber of Commerce, but that they had not yet taken any action.

The Freeport officials, in turn, said that they were still considering the idea. They said that they were interested in the idea, but that they were still evaluating it. They said that they would like to see more information about the project before they would be willing to take any action.

The Freeport Chamber of Commerce, in turn, said that they were interested in the idea, but that they were still evaluating it. They said that they would like to see more information about the project before they would be willing to take any action.

AFROTC

By Otis Usner

In the past meeting the steering committee was concerned about the meeting's lack of attendance, which began to erode the group's cohesiveness. It was decided to start small and focus on recruiting new members. The group will begin with student recruiters, flight training, and flight simulator training.

EAGLES: 2nd At Peach Creek

By Dave Dedifich

Embry-Riddle bowling rolled into its fifth-week last week and there were the usual sharp shooters out there. Bruce Mosier, however, bowled high game of 210 and right handed his work back with a 212. Bruce and Mark were among a group of five bowlers shooting at least a game of 200.

High batting went to Tim Perry, with a 341 and rolled over Roger Pinter with a 318 and 301. Larry Thibodeau was runner up with a 371 series.

Bonnie Daves had a high game of 151. That was some consolation for Bonnie who had low game (two weeks ago with 60).

It was asked numerous times this week how long our regular reporter will be away on his pleasure trip. I don't know but believe him if he bought a one-way ticket.

This week's scholastic bowling standings:

Two Men 5A Hor. 9-16
West Virginia 9-14
Three Men 9-13

Surprise 8-12
Gutter Dantes 8-13

Surprise 11-13

Surprise 12-13

Surprise 15-13

11-a Pin

Claymore 15-11
Stan Pate, Hony 14-10

Rick French scored 30 during his past weekend's game at Peach Creek. E.R.A.R. Golf team placed 2nd in the meet.

Photo by Chuck Henry

E.R.A.R. recently traveled to Tampa to match golfing skills with three other schools on the prestigious Pebble Creek Golf Course. It was the third round of the season against Sitton, St. Leo, and St. Pete.

E.R.A.R. finished second with a team score of 218. Other scores were Sitton-206, St. Leo-217, and St. Pete-332.

Bryan Wilson once again lead the team with a fine round of 218. Bobby Rayman was second with 78. Dick French and Dan Redfeller finished with 80 and 81 respectively to hold the team in the tough competition with only three games left.

E.R.A.R. was leading the field at 12 over par, unfortunately the agony of the long trip and tough course finally took their toll.

The Eagles as a team were 16 over on the last three holes.

E.R.A.R.'s season record is now 3-9-2. The team travels to St. Augustine Friday for a showdown match with the white team. Unfortunately, the long trip will be without the services of 'Dingaram' Dan Redfeller who fractured his wrist last weekend. The Eagles' golf tournament will be a battle match on March 6 at Daytona Beach Gold and Country Club. Everyone is encouraged to come out and watch the Eagles wind up their best season in many years.
