Spirits Soar At E-RAU

The E-RAU Spring Trimester ended with a bang - candy run with a whisper. The Spring Fling, Greek Week games, softball, baseball, soccer, and swimming pool activities caused everyone who wanted entertainment, plenty to do.

Greek Cutty were provided for all fraternity/colleges on campus in a reviving period of fun and friendly competition with Delta Chi winning the overall title. Spring Fling brought Syrup Cypri, Delbert McClintock and Bobby Kinton with rhythm and Uganda. Sports filled many days with excitement and no one could complain about "nothing to do!"
Hello and Welcome to Embry-Riddle. If you're a continuing student, welcome back. My name is Ed Miller, recently elected editor of the AVION—Newspaper. Throughout the summer, the newspaper will be published every two weeks. I would like to take this opportunity to encourage your participation in the AVION staff. We desperately need writers, photographers, ad sellers, layout artists, and more. We have already extended our invitation to students in order to develop this new publication. As part of this effort, the AVION will be showing a film, "Get Riched," for all interested students.

E-RAU HOUSING...

By Debbie Ritter
Arlion Reporter

In order to better serve the housing needs of students both on campus and off campus, the housing department has had to implement new policies for the Fall Semester.

- Some new policies include a standardized year for both dormitories and the dining halls.
- The elimination of the student hall resident with the option for any student to choose the number of new housing director (one for each campus housing facility).
- An expanded campus housing program, a reserved dormitory, and contact system a computerized system for the inside workings of the department.
- Finally, the move of the housing administrative structure to a new location.

To provide better service for the housing student, the Housing Office will be relocated in Dorm L. This will aid those students who do not have transportation.

Finally, those people who work for the Housing Department indicate that the E-RAU Resident Assistant, having an active role in the Student Government Association, will be a vital role in the day-to-day operations of the SGA and E-RAU. The SGA member will act as a liaison between the Gold Rush and the student body.

With these new policies and programs in place, the fall semester should run smoothly for the Housing Department and all students involved.

E-RAU Board of Visitors sponsor's... a 'Hanger Sale'

A 'hanger sale' is bigger than a garage sale, according to Mr. Roberts Whiteside, chair of the Board of Visitors for E-RAU. "Therefore, we need interested students, faculty, and students, and we are hoping this will be a successful event in the fall semester. 

The sale will be held on campus in the Student Union Building, and it will be open from 10 a.m. to 4 p.m. on Saturday, May 19. The sale will feature a wide variety of items, including clothing, shoes, books, and household goods. 

Let's work together to make this a great event for everyone involved! Please contact the Board of Visitors for more information or to volunteer your time. We look forward to seeing you there!'
E-RAU Graduation

By Kevin Keenan

On Saturday, April 21, the hopes and dreams of 206 graduating students were realized in the form of their E-RAU graduation ceremony. Many of these students had spent the past couple of years on this path to earning their degrees. The ceremony was held at the E-RAU University in their new and improved University Auditorium.

The university is expanding its facilities and moving to a new campus on the outskirts of the city. The auditorium was renovated and the new campus is expected to open next year.

The new campus will feature state-of-the-art facilities, including classrooms, laboratories, and a new research center. The university is expected to attract more students and increase its enrollment in the coming years.

The ceremony was attended by family and friends of the graduates, as well as faculty members and staff from the university. The graduates were presented with their diplomas and certificates, and many were emotional as they crossed the stage to receive their degrees.

The keynote speaker for the ceremony was Dr. John P. Wheeler, an internationally recognized expert in the field of theoretical physics. Dr. Wheeler spoke about the importance of education and the role it plays in shaping the future of the world.

The ceremony was a success, and the graduates are now ready to begin their careers in the field of their choice. The university is proud of its graduates and wishes them all the best in their future endeavors.
Continuing Education...

...in growth in many departments and programs, continues

INDEPENDENT STUDY PROGRAMS
By Tom Wilson

A distinguished forum for the presentation of ideas and concepts in the independent study methodology is now one of our most popular courses. This may have been the cause of a recent series of new ideas being presented. The course is available for those who have completed the prerequisites. It is a valuable addition to our curriculum.

The spring semester begins with the introduction of new courses and new faculty. These courses provide an opportunity for students to interact with others who share their interests and passions. The courses are designed to encourage creative thinking and to provide a platform for students to explore new ideas and concepts.

The fall semester is focused on the development of new courses and new faculty. These courses are structured to encourage students to develop their own ideas and to explore new areas of interest. The courses are designed to provide students with the tools and resources they need to pursue their goals.

Graduate Studies
by Bruce Moser

The coursework graduate program continues to grow with approximately 50 new students added to the faculty this semester. The program is designed to provide students with the knowledge and skills they need to succeed in their chosen field.

Advanced flight programs leading to the Boeing 727 Flight Engineer's Certificate and Cessna Citation Type are now being offered. The courses are designed to provide students with the skills they need to operate and maintain these aircraft in a safe and efficient manner.

The course in flight simulation is now being offered for the first time. The course is designed to provide students with the skills they need to operate flight simulators in a safe and efficient manner.

An evaluation of the flight simulator. They were very pleased with their first program and are anxious to get the project started.

FAA/REJC - The formal facts proposed were submitted with significant changes and improvements. I am optimistic about our chances of getting this contract.

On Friday, May 4th, approximately 100 students and staff from the Upward Bound Program were flown in by Eastern Airlines to Tallahassee for a tour of the capital, legislature, court, governor's mansion and the campus of Florida A&M and FSU.

The plans were to tour Tallahassee Airport at approximately 9:30 a.m. and then tour several schools in the area. The students were provided with transportation for the flight to Tallahassee.

Upward Bound is a federal program designed to motivate high school students to continue on to post secondary education. This year, the fifth year, under the leadership of Director Carmen Velloso, the Upward Bound Program has assisted 137 students to enter college who would never have been able to do so without the aid of the program.

Students are recruited for the Upward Bound Program from junior and senior high schools in the Daytona Beach area. To be admitted to the program, students must qualify under the guidelines established by the Department of HEW in Washington, D.C.

The course is designed to provide students with the knowledge and skills they need to succeed in their chosen field. The program is structured to encourage students to develop their own ideas and to explore new areas of interest. The courses are designed to provide students with the tools and resources they need to pursue their goals.
