Spirits Soar At E-RAU

As Activities Abound
Hello and Welcome to Enrico Fiddler, if you're a</p>to the Avion office (207 of Fiddler U) Wednes<i><u>by</u></i> uesday, May 9 at 7:30 p.m. Refreshments and beans will be served, and interested students are welcome to attend. There are many things to be thai in order to participate on the Avion staff. You will be given a copy of the contract and a certificate of recognition for your services. In the Spring Trimester, the Avion staff enjoys many delicious dinners at some of Dayton's finest restaurants. We also take an all-expense paid trip to Disney World and had a wonderful time. Our layout staff enjoyed several nights of Pizza and Beer after completing the paper for publication. If you have any questions, or would like to help in any way, come by the AVION Office and meet our friendly staff, and get in on the fun. Looking forward to meeting you.

E-RAU Housing...

Students can expect changes

By Debbie O'Brien

In order to better serve the housing needs of students both on campus and off campus, the housing department is implementing new policies for the Fall '79 trimester.

These new policies include a standardized rate for both Dorms 6 and 7 (510), the elimination of class list resi</p>den<i><u>ts</u></i> with the hiring of three new housing directors, an expanded Off-campus Housing program, additional deposits and contracts system, a computerized system for the inside workings of the housing department, and finally, the move ment of the Housing administrator to Dormitory II. 

A full Description of the new housing policies will be provided to all new occupants of the housing departmen<i><u>t</u>.

Finally, those people who are within the Housing Department include Bob Kasper, assistant Dean of Students; Linda Tomczak, Housing Administrator; Eric Steiner, Off-Campus Housing Coordinator; Steve Rice, Resident Director; Apartment Complex; and the other director is to be announced.

With these new policies and procedures in place for the Fall '79 trimester, the Housing Department and all students involved.

President's Corner

Dr. John A. McMurray, President

There's nothing better than being on the Avion staff. You'll be able to take advantage of your participation in the Avion staff. You'll also have access to the Avion staff and a certificate of recognition for your services. In the Spring Trimester, the Avion staff enjoys many delicious dinners at some of Dayton's finest restaurants. We also take an all-expense paid trip to Disney World and had a wonderful time. Our layout staff enjoyed several nights of Pizza and Beer after completing the paper for publication. E-RAU Board of Visitors

sponsoring a 'Hanger Sale'

A hanger sale is bigger than a garage sale, according to Mr. Robert Whitehead, Chair of the Board of Visitors for E-RAU. There are about 1000 hangers, hundreds of hours, and one event. Hangers on the line are in "as is" condition. We can use all kinds of things on your hanger sale, that's clean and in good shape. We expect to get that
down all next week. An all-expense paid trip to Disney World and had a wonderful time. Our layout staff enjoyed several nights of Pizza and Beer after completing the paper for publication. E-RAU Graduation

206 Dreams come true

By Kevin Keenan

On Saturday, April 31, the hoped and dreamed of 206 graduates were finally realized in the form of the E-RAU Graduation ceremony. Many of these students had been in college for five years and were eager to see what would happen next in their lives.

The ceremony was held outside the Tidewater Community College gymnasium with Dr. John P. Wheeler, President of the College of Aviation Studies, and Mr. W. Edward C. Kirkland, President of E-RAU, presiding.

The graduates were presented with their diplomas and certificates, and the ceremony ended with a group photo.

SPACE SHUTTLE

Enterprise rolled onto launch pad

KENNEDY SPACE CENTER, Fla. - The Space Shuttle Enterprise, delivered on April 10 from its home at the NASA's Dryden Flight Research Center in Edwards, Calif., was moved to Kennedy Space Center on Tuesday. It will be used to train space shuttle operators and crew members.

The shuttle, the first in a series of spacecraft to be launched into space, was moved to the launch pad by a barge and then lifted onto the platform by a crane.

The Enterprise is one of two shuttles built by NASA to test the design and performance of the space shuttle before it is ready to be flown into space.

Continuing Education... Growth... in many departments and programs, continues...

INDEPENDENT STUDY PROGRAM
By Dr. Tom Wilson

A standardized format has been adopted for use in preparation of an Independent Study Guide to be developed for students interested in participating in the Independent Study Program. The Course Outline and Study Guide format, together with the manner in which it is an integral part of the program. Each course will consist of 15 lessons - an introductory lesson, 13 subject lessons, and a summary lesson. Briefings and discussions have been conducted with four Aviation Management and five Aeronautical Science faculty who have expressed interest in preparing courses for use in the program.

GRADUATE STUDIES
By Bruce McGraw

The new graduate-programs continue to grow with approximately 25 new courses added to register for classes during the summer term. Enrollments for the summer term should equal or exceed those of the preceding term.

Advanced flight programs leading to the Boeing 727 Flight Engineer License and Canadian Type Rating are now available for enrollment. A significant increase in inquiries about these programs has also been noted. In the fall term of 1977 it will be possible to enroll for an Ouyard in order to earn a Master's degree at the Aeronautical graduate school.

Off-campus locations showed a marked increase in graduate enrollments for terms starting in March or April, with a total of more than 35% for the spring semester.

Work continues on upgrading the undergraduate curricula for the summer term. Faculty support is also being requested for developing a graduate curriculum, developing new courses in various areas, and development of a new master's level aerodynamics engineering degree and obtaining library support materials for all departments.

In the near future, off-campus locations and academic centers will be added to the Aviation Program Support Office.

SEMINARS & WORKSHOPS
By Dr. McCollum

Programs for the next two seminars have been practically completed. Board for the October 15-16, 20 seminar in Aviation Management will be held at the Aeronautics Research Institute on post secondary education. This week is our fifth year, under the leadership of Dr. William L. Davis who has directed the program for the past five years. The Aeronautics Department will make every effort to ensure a successful program. Students are reminded that all programs are subject to change without notice.

ALL HELP GREATLY NEEDED FOR THE AVION

Wednesday, May 29, 1979

Upward Bound to State Capital

On Friday, May 4th, approximately 100 students and staff from the Upward Bound Program were flown to 26-27 Chateau D'Alblaine, residence of Tel Aviv for a tour of the capital, hotels, market, airport, museum, government, and the campus of FAB and FSIU.

The planes arrived at Tel Aviv airport approximately at 9:30 a.m. After touring the airport buildings and walking the campuses the students had lunch at FSIU before returning to the airport for the flight back to Daytona Beach, Leon County school board provided transportation for the students while they were in Tel Aviv.

Upward Bound is a federal program designed to motivate high school students interested in pursuing science, technology, math, and computer science to continue on to post secondary education. This week is our fifth year, under the leadership of Dr. William L. Davis who has directed the program for the past five years. The Aeronautics Department will make every effort to ensure a successful program. Students are reminded that all programs are subject to change without notice.
