Air Florida Buys Piedmont Stock

WINSTON-SALEM, N.C. Piedmont Aviation, Inc., President David D. Smith, has announced that Piedmont has purchased all the stock in Air Florida, Inc., a major commuter air carrier. The sale was negotiated with Air Florida, Inc., and was approved by the stockholders of both companies.

Air Florida, Inc., operates a fleet of 150 aircraft, including Boeing 737s and Douglas DC-9s. The company serves more than 50 cities in the United States and has a strong presence in the Southeast region.

The acquisition of Air Florida will enable Piedmont to expand its service network and increase its passenger capacity. The combined company will operate a fleet of over 200 aircraft and serve more than 100 cities.

Piedmont and Air Florida have a long history of cooperation and have worked closely together in the past. The acquisition is expected to be completed within the next few months.
LETTER TO THE EDITOR

To the Editor:

I would like to address a problem that has been growing at EAU since I was last in residence. The problem is in the lines.

Due to the incarcuration of the EAU campus in the U.S., I was required to leave EAU 28 minutes late for one of my classes. As a result, I was unable to make up my class within the allotted 60 minutes. The instructor of my class made a point of the inexcusability of this action and the importance of not being tardy. I understand this, and I am sorry for the inconvenience this may have caused.

SU: 2008

It is not uncommon for students to be late to class, and it is important to be punctual. However, in this case, I had no choice but to be late due to the incarcuration of EAU. I hope that this situation can be resolved in a way that is fair to both me and the instructor.

Sincerely,
[Signature]

Editor's Note:

The problem lies in the fact that there is no way of knowing how much time has been lost due to the incarcuration of EAU. The instructor's lack of understanding of the situation is not acceptable, and the student should be given a more reasonable time to make up the class.

The situation at EAU is a common one, and it is important for students to be punctual. However, in this case, the student had no choice but to be late due to the incarcuration of EAU. I hope that this situation can be resolved in a way that is fair to both me and the instructor.
The cash-out of a small station by the National Television, according to some, is a "good" example of the cash-out of a small station. This doesn't make the most frequent. It isn't that we're failing to fulfill our obligations to the public.

In September 1971, wirel "The Bar Tender" by My Fair Halet. This week's tale is a series of stories, all based on the same name, "ABC Liqueurs & Loun- A bar that's been a feature of the area for several years and has gained a reputation, particularly through its takeout service.

First, the lounge located in the corner of the building. The lounge is known for its fine selection of liquids, which gives you a little of the fun of the ladies without having your head around anywhere. Bar is in out of the way, but it's good.

Second, the lounge located in the corner of the building. The lounge is known for its fine selection of liquids, which gives you a little of the fun of the ladies without having your head around anywhere. Bar is in out of the way, but it's good.

The selling of happiness to those who can afford it. A bar that's been a feature of the area for several years and has gained a reputation, particularly through its takeout service.

in the front of the Sig house decided to take a tumble. Luckily a few Delta Chis were around to catch the falling fella. Good work guys.

Saturday's picnic was rained out. Every rain it rains on our picture, but those who did show up had a good time, nonetheless.

This week's crate is "Curts"--the award goes to Scott Granger. The other night, while at the 24 Hour Pepsi Challenge, Scott did all the work with little to no work at the stations. Check with Karl for the details.

For all those out there who are still interested in our fraternity, Delta Chi, it's not too late to get involved. Contact a brother if you call 233-9420. We provide THE alternative to corporate social life.

That's about it for this week, gang. Until next week keep the books added up.

WERU

In the last edition of the paper, you might have read about WERU's operating and revenue funds being frozen. In an attempt to stave off de-urbanization, our funds were frozen, but that was only to be until this past Thursday, pending a decision by the SAC (Student Administration Council) of what to do with the station. The SAC in their last meeting has decided to lift the freeze on the WERU accounts in hopes of giving us the chance to get our organization back on our feet and show the world.

At a budget meeting, the Wednesday before the SAC meeting, when all the SGA supported budget requests for operating this fall, WERU once again came in the unlikelihood requesting $2,994 and leaving with $874. This cut seems to have been caused by the realization that at present WERU has an excess saving account put virtually to which deposits have been made every yr for the purchase of FM equipment in the future. When our glam for this finally becomes a reality, as promised, I am unable to look forward to seeing this guest meeting as we will be forced to withdraw money from our savings in order to remain viable and provide the students with the Radio Station they deserve. This must be with SGA approved.

In our last new membership meeting we had 33 new members sign up with us and a man training program has gone into effect to get the Burton back on the air this week. This will give WERU the opportunity to show what can happen when a few dedicated students rally together for an almost dying cause. So be sure and listen in for us on 680 kHZ and if you are interested in joining us, drop by the station and sign up. Your time and support will be greatly appreciated.

By Ron Weingert

For those of you planning on an enjoyable weekend at College House, unfortunately you can not pull a severe damage to your place. We are sorry the deck had to be scrapped, but we tried to reschedule those classes on a later date.

At last fall meeting, we discussed several things including the major topic of discussion. This has involved several meetings of his Cornell with the club, the meeting with the Radio Station. This week we will be having the meeting with the club, the Radio Station. We hope to complete the film by the end of the yr. with clips from all of the club dinners. If you have any new ideas or input concerning the film, please feel free to express your views at this week's meeting. Tim also showed several short movies of his recent trips to Key Largo and everyone enjoyed the evening.

Scuba Club

By Tony Quick

Are you looking for a chance to go scuba diving, lake fishing, or hang gliding? Then you should come out to the E-RAU Cues Club meetings this week.

The E-RAU Cues Club is having a scuba diving meet on Friday evening. The meeting will be held at the house at 8:30 p.m. The following Saturday, the club will have a Lake fishing meet at the house at 9 p.m. The following Sunday, the club will have a hang gliding meet at the house at 9 p.m.

The meetings will be held on Thursday, Jan. 31 at 7 p.m., in the Faculty Staff Lounge in the U.S. Free refreshments will be served at the meeting.

All those who are interested in joining the club should come out to the meetings and凡是 those who do not have time to join are urged to come on out.

The meetings will be held on Thursday, Jan. 31 at 7 p.m., in the Faculty Staff Lounge in the U.S. Free refreshments will be served at the meeting.

All those who are interested in joining the club should come out to the meetings and凡是 those who do not have time to join are urged to come on out.

MG T. CLUB

by Elizabeth Beards

The Sunday night social activities to which I am but a relative newcomer are always of great interest to me. My introduction to the club was at its annual pool party on July 4, and I was immediately impressed by the variety of activities available to members. The party was held at the home of an officer and provided a relaxed atmosphere for members to enjoy the outdoors and each other's company.

The pool party was followed by a barbeque and fireworks display, which added to the festive atmosphere. I was particularly impressed by the pool, which was beautifully landscaped and provided a perfect setting for refreshments and conversation.

The activities available to members include pool parties, barbeques, and other social events, all of which are designed to encourage members to get to know each other and to have fun. The club also has a number of active committees, which members can join to participate in the planning and execution of events.

I am looking forward to attending more events and getting to know more members of the club. I believe that being part of a community of like-minded individuals can be very rewarding, and I am excited to be a part of this community.
L5 Society Works To
Promote Chapter Here

By Rich Adams

The leading edge of science has proven that man
now has the capability to colonize space. Since
the technology exists, why don't we do it?

There is a national organiza-
tion called the L5 Society, head-
quartered in Tucson, Arizona. The
National Board of Directors in-
cludes such celebrities as: Hon.
Barry Goldwater; U.S. Senator, Paul 
Aschmann, Science Fiction
Writer; Prof. Changemaker, former
astronaut, Goodloe Woodcock;
Boeing Study Manager; and
Ron. Edward R. Finch; Chair-
man, American Bar Association
-Aerospace Law Committee, and
other well-placed individuals
from various professions; all with one thing in common:
the L5.DREAM.

In September of 1974, Dr.
Norman O'Neil of Princeton
University, published an article in
PHYSICS TODAY on space
colonization. As a result of that
article came the Space Manufac-
turing Facilities Conference at
Princeton N.J., in May of
1975. These days of papers,
would generate enough electric-
ity to supply a city the size of
New York. Around night, mil-
donion dollars per year is being
spent on Research and Develop-
ment for L5 already.

In 1976 Dr. O'Neill's con-
cerns and the conclusions of the
2nd Princeton Conference: NASA's
got an extensive 10-year
program in engineering design
at Stanford University and the
Arts Research Center of NASA.
The conclusions of these studies are
that: "Space colonization is desir-
able because of the hope it offers
humanity. The people of Earth
could build a new society and
resources to colonize space."

Another aspect of the L5
ceretion is Solar Power Stations
(SPS). This is a large Satel-
tle (6-10 km) which converts
solar energy into a low-intensity
microwave beam for transmis-
sion to a receiving antenna on
Earth where it would be con-
verted to electricity. One SPS
business for about thirty years.
I have been a part of this
project for ten years and have
generated a lot of heat and
got some good ideas and
started some ventures. This
Society is now trying to get big
enough to do some serious
work."

The main deterrent of the
L5 dream is money problems,
so we need your support. Get
involved. Get aboard. There's
a job for you. L5 Aerospace
Society meets every two
weeks. The next meeting is
Monday, February 4th in the Fac-
ulty Staff Lounge, at 6.p.m., or
contact Box 5642. Also you
could become a national mem-
ber of the L5 Society.

Energy From Space

The creation of the orbital system "Sletyn-Satas"
served by automated space freighters, opens the way
to construction in the cosmos of world objects,
among them orbital power plants.

By Paul Zander

The power of the Sun
exceeds by 3,000 times the
total power of all other sources
of energy on Earth. And that
source is inexhaustible. How-
ner, on Earth the Sun's rays
arrive as light and heat only in
regions, while in others they
don't penetrate in for months.
Even in the Sahara and the
frozen deserts, the Sun does
appear nightly for half of the
day. Small satellites, then, up
until today scientists have tried
to realize solar technol-
gy without much enthusiasm.

But there is a place where
the Sun shines constantly.
That's in the open cosmos.
The French-speaking crowd were distinguished by their...
RAQUETBALL CLINIC

Need help in raquetball? A clinic will be run on 2 Feb., 1985, at 2:00 p.m. in the Rec. Office. The Redheads, 2:00 p.m., is expected to last an hour and a half, and the fee will be $2.00.

A raquetball clinic has been set up on Tuesday evenings, from 7:00 to 9:00, and on Saturday afternoon from 2:00 to 3:30, at the Daytona YMCA, at 825 Draper Avenue. There is no charge for the opening week. The cost you pay is $1.00 per session. The first class is next Saturday, 2 February.

There Ought to be a Law Against Rim Hanging

Reports have been circulating that certain players have been 'hanging' on this school's basketball rims. PLEASE... don't do it anymore. It's for everyone's sake.

Eagles Begin New Decade of Baseball

The district's 10,000-meter (6-mile) run will kick off the annual Daytona Speed Week this year on 2 February 1980. If you are interested in setting records in this event, it's still not too late. Just bring in your $5.00 entry fee to the Recreation Office (Room 2, Room 241) in the Daytona YMCA by this Friday.

There will also be limited registration on the morning of the run until 9:00 am. The race itself will start at 10:00 am.

Amelia's Space

Amelia's Space is the AED's newest feature. This column will be a forum for students and faculty, through which we can share our problems, helpful hints on coping with the daily reality of life at ERAU, and even a few stories. So two Amelia's Space will also serve as an "action center". You may call if YOU have a general or specific problem about how things operate around here, so do not hesitate to contact the author. A call. The author has many contacts around campus and won't mind picking around a little to find the answer to a problem.

Do you know of a particular reading matter that you think could stir the campus? If it takes a quarter to a half-hour to read, if you think it is important, then we'll be sure to read it by the end of the day. It has amazed us quite a few times, as a matter of everyone's memory.

Amelia's Space.

On the 20th of October to and from school, you may notice any special spots that police cars usually seem to be. One morning it was just beyond the first traffic light, north of 6-BARS. Now, beyond the school. The same limit changes from 45 mph to 35 mph at that point and most of us innocent students really get one. You see we are exercising more care these days.

It's a tough one. How can 400 lbs of steel be seen from your favorite parking spot? Spray paint is the answer. You get a few cents, and you're done.

If you have a question, problem, or contribution for Amelia's Space, write to AED, C/O THE AVON and put it in the space (no stamp needed.)

DON'T WEIGHT ANY LONGER!!!!

Two groups are ready to begin-against how to control the weight problems. The weight groups will be going down in the MT on Tuesdays from 5:00 p.m. to 7:00 p.m. The exercise by the staff/ students group will meet on Thursdays from 5:00 p.m. to 7:00 p.m. beginning next Thursday. Fall semester is over and we all want to get back to the gym and get back to it. If you're not satisfied with your weight, we'd like to see you there.

Keep some simple records to help you show your progress and be more motivated. If you need to lose weight, we can help you. We're all here to help you lose weight.

You're all here to lose weight! So come and join us.

Amelia's Space.
