### Academic Affairs reviews registration policies

By Dean from Trustees
Dean of Registrations and Records

Registrar's problems have been the subject of current meetings by the Academic Committee. The registrar, faculty members, administrators, and an Ad Hoc Committee have submitted a number of problems that are "unbearably" considered.

Problems of increasing importance concern both the schedule of classes and the grading of final exams. It has been suggested that the advancement periods for Fall and Spring exam registration be shortened. In the past, a separate week was designated for final exam registration and another week for Fall advising. The new system would allow a student to take care of both the Spring and Fall advising registration in one appointment with the Academic Advisor. A new Spring registration form has been designed which would allow the Academic Advisor to record the advising periods for Spring and Fall exams simultaneously.

The faculty have been asked to institute an "enrollment freeze" in the first week of classes. The freeze would prevent the addition or deletion of courses during the first week of classes. This would allow the Academic Advisor to advise the student as to what courses the student should take in the second week of classes.

### Multi-engine simulator arrives

By R.K. Schmeltz
Army Staff Reporter

February 12, the first of three multi-engine simulators was installed in the "GAT Room" to facilitate the training of multi-engine pilots.

The need for this program was generated when the decision was made to downsize the M-58C aircraft in May of the previous year. The need for multi-engine training became evident when it was determined that the remaining M-58C aircraft would have been based on an aircraft whose design was determined by the Air Force's multi-engine aircraft (MAA) study.

The new simulators will allow the pilots to practice in a more realistic environment. The simulators will be used for multi-engine training and will be available to the student for self-training.

Richard Bryant, Assistant Director of Flight Simulation, explained that the simulators will be used on a daily basis to determine which students are ready for sim training. He explained that the purpose of sim training is to prepare students for the actual aircraft that they will fly in the future.

### Ex-B-26 pilot now teaching at E-RAU

By Barry Trenary
Army Staff Reporter

A B-26 pilot, now teaching at E-RAU, is helping to develop a new course on the history of the B-26.

The B-26, a single-engine aircraft, was used by the Army during World War II. It was used to drop bombs on targets in Europe and Japan.

B-26 pilot Bob Martin, now teaching at E-RAU, is working with the History Department to develop a new course on the history of the B-26.

### E-RAU holds corporate security seminar

By Dan Koger
Army Staff Reporter

E-RAU Corporate Security Management and the National Security Agency have held a seminar on corporate security for managers.

The seminar was held at the E-RAU campus and was attended by managers from various companies, including those in the military.

The seminar covered topics such as security policies, security procedures, and security training.

No more smoking areas?

The Student Union in the U.C. are for those students who want to enjoy a smoke without the thumbs down of smoking. The campus as a whole is also an area for those who want a smoke without the thumbs down of smoking. The campus as a whole is also an area for those who want a smoke without the thumbs down of smoking.

The Thursday post, I had to stop smoking on the outside of the building with a large crowd of people trying to smoke. This is not a fair system and I believe it should be changed so that everyone can smoke where they want. We should not be told where we can and cannot smoke. We should have the right to smoke wherever we want.

The smoking ban in the Student Union is not fair and I believe it should be changed. I believe that smoking should be allowed in all areas of the campus where people want to smoke. The smoking ban is not fair and it should be changed.

The smoking ban in the Student Union is not fair and I believe it should be changed. I believe that smoking should be allowed in all areas of the campus where people want to smoke. The smoking ban is not fair and it should be changed.

**SGA Candidates voice campaign views**

**Pasternack/Junge:** "We've come up through the ranks to take on the leadership of the student body and to take this organization to the next level and to the next generation."

**Tarbert/Reeder promise accountable administration for constituents**

By Kerrie Pasternack - Candidate for Vice-President of the SGA and Bob Junge - Candidate for Vice-President of the SGA. After many months of deliberation, the two candidates believe they now have the experience to pursue the office of Vice-President of the University of Nebraska and Junge of the SGA. The two candidates are confident in their abilities to lead the student body and to take the organization to the next level.

**SGA Representative voice campaign views**

**Supports consistory and clarity of student policies**

By Michael Droegemeier - Candidate for Secretary of the SGA.

We the people, in order to form a government, present a Constitution of the SGA, and to protect ourselves against tyranny from all foreign and domestic sources, do ordain and establish this Constitution.

**By Arthur Benson - Candidate for SGA Representative**

I am a candidate for SGA Representative because I believe in the importance of student representation. I have grown up in Nebraska and have been a part of the SGA for several years. I believe in the importance of student representation and I am committed to serving the student body.

**Seminar**

Continuing from page 3...

The seminar was well attended and several questions were asked. The speaker, Dr. Delaney, explained the various aspects of the seminar to the students present.

**Metal fatigue causes DC-9 tailcone to separate**

A metal fatigue fracture caused the tailcone of a DC-9 jet to separate in mid-air, killing four people on board. The investigation revealed that the tailcone was made of suspect material.

**Army shows off C-12 transport plane**

By Bill Carroll - Associated Press

On Friday, Feb. 27, the United States Air Force showcased a C-12 in a demonstration at the Fort Worth, Texas airport. The C-12 is the military version of the Beechcraft King Air B200, which is used for personnel transport.

**Simulator**

Continuing from page 4...

The C-12 is equipped with special features that allow for a more realistic flight experience.

SPYRO GYRA entertains at Stetson

By Tony Pacio
AVSOM Laiday Editor

Even with the numerous other events taking place around Daytona, Jonathan Edwards captured a full crowd in the U.C. Friday night. The show lasted 45 minutes, but keyboardist Kenny White took out and began playing, the footage was slightly

White's guitar was always good as his performance, and he had everyone checking out his instrument. For example, he often requests for more. When asked the audience to continue, "I want to hear it," he added. The audience cheered. It seemed he was losing sight, and the keyboardist White continued for another 45 minutes. After a long intermission, Jonathan Edwards was finally introduced. He came out doing the customary harmonica and guitar. The audience was enthralled by the music. Edwards said afterwards that this was the number "...I would've loved to just keep going and play without any interruption." After the first number on the set, White played a song before continuing with the band. Despite his performance, the crowd grew...

SPYRO GYRA

contd.
A letter of student concern...

Mr. Frank Henry, President
Harding & Middle Tennessee State University
Regional Campus
Delphi, Indiana

Dear Mr. Henry,

I have been both pleased and concerned about the delivery of mail to students who live off campus. While I have heard of the problems that you and your staff have had in the past, I would like to bring to your attention some of the issues that have been occurring recently. I understand that, due to a lack of personnel, delivery times have been erratic, and that the mailroom is often understaffed, causing delays in the delivery of both mail and student orders.

However, I recently received a proposal to modify the delivery schedule, which I believe could improve the situation. The proposal involves increasing the number of delivery personnel, improving the scheduling of shifts, and implementing a more efficient system for handling mail.

I would appreciate it if you could consider this proposal and take steps to address the issues I have raised. I believe that a more reliable and timely delivery system would greatly benefit students and the overall campus community.

Sincerely,
Bruce Meredith

Christian Fellowship Club to hold next meeting in President Hunt’s mansion

By Brent Kramer

The Christian Fellowship Club will be serving hot sandwiches and hot dogs at our meeting on March 15th. Our guest speaker that evening will be Dr. Marion from the Bishop’s Church. Marion will be putting a note in your book with more information about the meeting.

Starke Airfield welcomes AFROTC March 7

By Michael R. Legge, CMC

The regular elections are coming up, the Senate election in just a few weeks. Senator and Junior elections will retire Field Day, and the Cadet Wing is expanding. Vote! Last election, despite our normally small turnout, AFROTC managed to attract...quarter of the cadet body. This has become the University of Miami, ROTC’s best attendance. Join our ROTC family and walk a mile in the shoes of a cadet — in the military.

MONDAY BEACH AVIATION

There is to have a field day on April 8th. All cadets are invited to participate. The event will be held in the University Center, in the MFP building, and on the flightline. The special Field Day on Starke Airfield is now collaboratively organized and fun. Anyone interested please show up to attend. There will be no ROTC badges allowed in the Department.

Our own Field Day is coming up, and everyone is expected to participate. Junior and Senior levels will be featured. The event is open to all students and will be held on April 8th.

Remember that the ROTC is here to serve the University of Miami, ROTC, as well as the Miami community. We are open to everyone who wants to join us.

On March 17th and 18th, the St. Louis Rams held a tournament at Rollins College. We would like to invite the stud-
ents to attend and support the team. It is a sure bet for a good time, the next day and partying with 14 other Florida colleges. Donations will be available in the student center office after the event.

At the end of last fall’s season, Riddle Air Force was 7th in the state. In a recent interview with Dr. Johnson, he said, “We have a strong team this year.”

We are currently doing emergency work in the area and we hope we will be able to continue this work.

The team will definitely be in a very difficult place coming back from the losses of last year. We are going to need a lot of help and support.

Again, we would like to extend our deepest gratitude to our friends and family members.

Depleted Flight Team receives eight awards at NIFA competition

The weekend of February 20-21 was an essential one for the Flight Team in which we competed in the National Intercollegiate Flying Association Regional meet hosted by Florida Institute of Technology in Melbourne, Florida. The regional meet was the final competition on the national level against other schools from the many other regions across the nation.

The Mounted Flight Team competition was divided into several events, including a competition of skill, expertise, ability, a high degree of precision, and a high degree of accuracy. These events were started with flight, power-off Accuracy Landings, power-on Accuracy Landings, precision navigation, and message drop. As the flight events were being run, there were people who were able to compete in the ground events being flown with a plane. Aircraft Maintenance, ground accuracy, and safety.

The team's overall safety practices and behavior around the aircraft, repair, and all competitions resulted in the team being judged and awarded on safety. The team was able to take home the highest award for safety.

Despite the fact that no team is currently in the nation, every person on the team at the Awards Banquet was recognized in the best tradition of friends for each of their events at least once. The people who thoroughly enjoyed the event and were aware of the team.

**AIRCRAFT RECOGNITION**
- Michael Hamby placed first in the competition.
- Landon Laffoon placed third in the competition.
- Professor Mark Moore placed first in the competition.

**FLIGHT SAFETY**
- Michael Hamby placed first in the competition.

**FLIGHT TEAM**
- Michael Hamby placed first in the competition.
- David Demos placed eighth in the competition.

Intramural sports 'successful' under Leslie Swettgarter

In the last two years here at Bradley, the intramural program has given almost as large a student audience. It has come from a program which everybody thought it to be a joke, a fun program in which hundreds of students are willing to participate and enjoy. At the start of the enrollment of the intramural program goes to Dean Rockett, but the real "soul" behind the program comes from underneath. The "underground" sense is for Leslie Swettgarter, The Director of Recreation.

Leslie has done a fantastic job developing the intramural program and shown a great interest in continuing to let it grow here at Bradley. She's concerned for the students and willing to help them in any way she can. Even though she hasn't brought up many controversial issues (such as the N.C.A.A.,) she's really come for the students.

For those of you who are not interested in the sports program here, I feel sorry for you because we're now making lots of fun.

The sports programs are not only set up for the student who can run, hit, or throw, but also for those who can't run the block or the person who strikes out every time. These sports are not only fun but a great relief from school pressures. You get to meet some of your friends and occasionally a girl or two. Now, if you're one of you who are thinking that I'm filling up "full of bull" you're wrong, because if I didn't believe and enjoy the programs, how could I write this article after being a softball game Saturday? 7-2.

Keep up the good work, Leslie.

Questions answered about student loans

What is a Federal Grant?
A Federal Grant is a loan given to students to help them pay for their college
education. Unlike loans, you do not have to
repay a Federal Grant. Federal Grants are
determined by the Federal Government
and are considered the most
beneficial form of financial aid.

How can I apply for a Federal Grant?

You can apply for Federal Grants online at
https://www.fafsa.gov/. The application
process is free and it is the first step in
applying for financial aid.

E-RAU's 'Battleship' promotes community relations

By Rick Arndt
Area News Reporter

The "Battleship," President Jack Alford's namesake on the north campus beach, is one of the most recognizable landmarks on the campus.

The Wooden Ship is built by the students and is located on the beach near the International Center.

E-RAU's 'Battleship' is available for use by student organizations. It is located near one of the best public beaches in the nation and is a great site for club meetings, fraternity functions, sorority picnics, and other student activities.

The Wooden Ship is a replica of a traditional wooden ship and is made of pine and other woods. It is 40 feet long and 12 feet wide.

The ship is equipped with a 20-foot-long mast, a 15-foot-long rudder, and a 10-foot-long keel. The ship also features a 10-foot-long gangway and a 10-foot-long pontoon.

The ship is open to student organizations for use and is located near one of the best public beaches in the nation. It is a great site for club meetings, fraternity functions, sorority picnics, and other student activities.
