Flying related to cancer

OKLAHOMA CITY — The Surgeon General's Advi{sion division stated today that the prolonged effects of flight on laborers can lead to several cancer-related deaths. Dr. Richard Pritchard, in a statement released earlier that all a ssigned flight personnel are at risk of cancer and its effects on lab animals, had suggested that flying did indeed cause cancer in lab animals.

In a report released on Tuesday, the lab animals that were used for testing and had been exposed to flight were found to have cancer.

Dr. Pritchard also noted that the lab animals were kept in conditions that resembled those of the lab animals used in previous studies. It was found that the lab animals had developed cancer in their eyes.

Space shuttle recovered off Africa

The crew of the Space Shuttle Columbia has been recovered by U.S. Navy divers and reconnaissance teams, who found the spacecraft in the waters off Africa.

The Columbia was discovered by a satellite after a crash in the Indian Ocean on Feb. 1, 1986.

E-RAU male survey uncovers startling facts on E-RAU females

According to a recent survey, fewer than 50% of E-RAU males report that they have sex at least once a month, compared to 75% of E-RAU females.

Many more students shared this feeling of anonymity. "I wonder. Women don't belong here. Women should be in the majority, not in the minority. We should be able to go to school and not have to worry about being watched," one student said.

Birds, newest addition to E-RAU wind tunnel

"E-RAU has been very successful in the past, but we need more wind tunnels," said Mr. J. Pritchard, the head of the E-RAU administration. "We need to expand our facilities and attract more students."
ITK emerges victorious in Geek Week

The fierce battle of ERAS Geek Week proved thrilling to many of the participating campus fraternities. All of them threw extra effort into trying to outdo each other, but none could match the fervor of the ITK brothers who won the inaugural contest.

Without much effort at all, we had the pans off the other so-called fraternity. It's funny how ITK, though inferior in East, Week to serving the community and promoting good sportsmanship, Tappe Kep is not going to match other. We entered these contests every year for selfish reasons and to pull off. Me and the boys answered two defective, golden hair rolls of5000 as a reward for our victory.

For the post-game celebration the gang all headed down to Peace. Let's enjoy our incentive. The next day we won the annual intercollegiate pledges copy and try several members of the freshman persuasion.

After managing to initiate the few girls who actually came, several of the Brothers demonstrated some technique or source of the pledges. Meanwhile the rest of us practiced our log-tapping until we passed out. It was great waking up the next morning with half a barrel left inside a garage. Besides, it's half. We quickly finished the rest off and went in.

McDonalts for breakfast. Afterward, we proceeded to the liquid store to edit the barrels (1 Tappe Kep brothers never forget to buy the tape and empliment them again that night. We always make sure our juniors get a good night's sleep on a school night.

Tap Kea's next party will be this Friday at the clubhouse. Again all fraternities are welcome. We would like to see more girls show up to our parties. We're trying to forget that we're in ERAS fraternities.

Flight manual revised

Three of us who have not picked up the new revisions to the Flight Operation Manual had best do so at once. Several major changes have been made to the policies of the flight department.

Perhaps the most significant change is one which affects the operation of the Piper Saratoga. The new regulation has been described as a "low pitch" solution after numerous meetings between Flight Standards personnel and Piper's engineers failed to find any "alternate" to the multitude of problems with the limiting gear system's indicator lights.

The change involves the aircraft's operating speed, the airplane's "never exceed" speed has been changed from 205 knots to 140 knots which is the maximum landing gear extended speed. The reason for the change is that both have been placed in the landing gear retraction time.

Several other changes have been published in the new revisions. Each of them has been made so that the pilot can understand that the safest conditions can be maintained while standards are revised in a "real world" environment.

Bad news from financial aid

Due to a massive computer breakdown, the Financial Aid office announced recently that all students will receive Guaranteed Student Loans, grants, and University Financial Aid on time and in the correct amount with no hitches.

The Director of Financial Aid, Mr. J. Davis said that the error should be corrected by the middle of the summer term and that it should never happen again, so this was "...a freak, little is a distant thing."

Financial Aid office hours are 10:00 a.m. to 6:00 p.m., except Thursdays and some waiting may be necessary, so we only have 14 student assistants and 14 staff members to handle the 6 people who sweep us at one time.

No consideration

Dear Mr. Editor: I would like to express my disappointment over the way that student had to be drawn at the Riddle pool while I was an Eligible donor. I must say that, as little as I thought I had bought a new Speedo suit with the stars and stripes on and I was too young to get it at the price. If anyone has some extra cash I would really appreciate if someone would get that any’s interested and possibly buy one of the pool. Thank you for your comments but I can’t spell it.

Emotionalism...

Dear Editor: I have had it! The outbreak of uneasy students at VRAU has taken me to the limit. I like all super heroes. I am anxious from this one day and it is the biggest looking mirror hanging from his neck. He warned me not to do it. Old show! I think the NSA should really look into this matter and revise the constitution with some new and harsher penalties. From ground out in Dorm I

Valuable asset?

Dear Mr. Editor: The Avloff has been without a doubt one of the best publications available for the price. It is really handy when a classmate forgets to buy toilet paper. Do you think you guys could post the paper on soft paper? I also would appreciate less many ink or give coupons for laundry detergent. Your truly pal, Black Harry

I like Jack

December 25, 1999
Crippled Seminole lands flawlessly

By Max Cornue
Airline Business Reporter

On Wednesday afternoon, the engine of a Georgia 1 located at the Daytona area was approaching visual flight rules for the landing at New Smyrna Beach airport. Upon nearing the airport, the pilot of the airplane dived rapidly, thus forcing a crash landing. The Emsley & Nix airplane engine had been lost in its main landing gear. None of the three persons on board survived during the emergency landing which occurred at Daytona Beach Regional Airport.

Dr. Tony DiGirolamo spoke at length concerning the incident. When asked about the emergency landing as New Smyrna, the instructor pilot Berrigan stated that the main landing gear had broken and was stuck in the wheel well of the airplane. Second, the crew was told that the airplane was to go into a glide and to use as little power as possible for the approach.

During this particular incident

Jay Craddock, director of operations and safety, and Michael McLaughlin pilot the aircraft. The incident occurred after the aircraft had been on the ground for several hours. The flight crew had been informed of the incident and were told to proceed with caution.

The incident occurred on the east of the airport, where the runway was covered with ice and snow. The flight crew had been instructed to proceed with caution and to use as little power as possible for the approach.

This pretty face was quite busy and pleased to hand out T-shirts at a local event yesterday. The day's activity by the Daytona and provided advertisers with a fine opportunity to reach potential customers through their products. (Photo by G. Tarizzo)

Future managers need ability to change with time

By Bert Kaufman
Director of Operations

Pilot-in-Command Civilian Flight School

A new key word is being used by managers throughout the world, and it is "flexibility." The ability to change with time and circumstances is becoming increasingly important. Managers who are able to adapt to new situations and challenges will be the ones who succeed.

This is in the field of economics, the field of management, and the field of aviation. A manager who is able to change with time is able to adapt to new situations and challenges.

Another challenge that is facing managers today is the changing job market. As the economy continues to grow, the need for flexible managers is increasing. Managers are being asked to adapt to new situations and challenges.

The key word here is "flexibility." Managers who are able to change with time are able to adapt to new situations and challenges.

Construction halted on Raquetteball courts

By John Schrader
Avion Staff Writer

The construction of the raquetteball courts at Daytona Beach was halted yesterday. The purpose of the proposed courts is to provide a recreational facility for the students and faculty of the college.

The site, located near the main campus, is being re-evaluated to determine whether it is the best location for such a facility. The courts have been postponed.

Bruce Craft, Director of Physical Development, said that the decision to halt construction was made after a detailed evaluation of the project.

We are not perfect

Editorial

The entire Avison staff has taken critical notice of the March 11th front of The Avison, an issue marked by forced attack. The staff at the time would like to address these problems and some new policies concerning has roles.

The major issue of criticism was directed at a letter to the editor entitled "(Unpleasant)". The letter's author expressed displeasure that Julian P. Glenn and the editor, Miss Julia P. Glenn, had their bylines changed to Susan M. P. Glenn and Susan M. P. Glenn. The editor, Miss Glenn, must be pointed out that the bylines are not for the editor, but that of the individual named Susan M. P. Glenn. The editor preferred to have his name printed, thereby allowing no correct remedy for the situation.

To correct this, an editorials section must be made concerning Julian P. Glenn's editorial. As part of the editorial staff of The Avison, Mr. Glenn has the right to write preen and edit his. This is no has to return to the editor, but the Avison has and will stand behind its staff members.

The Avison does make mistakes, but we strive to avoid errors. Our track record speaks for our resolve.

Here to serve

Guest Editorial

On March 23, President Jack Hart held a briefing with staff members of the university. I had the pleasure to attend this meeting as the new SGA President elect. As your resource to the administration, I rely on the information to follow:

1. We must study ourselves and decide who our major marketing core is, the people who work on our campus. We need to look at these people and see what's working and what isn't. We need to let the system make it function more efficiently and make it more comfortable to the student.

2. We need to remember that we are here to serve the students; that is our role. We need to recognize our need and forget this.

3. If we continue to work together during this economic period, ERAU will become the greatest of the nation.

I was impressed with the honesty in which this briefing was carried. Good and amnesties were mentioned with the students in mind. In using the seminar and President Hart to secure the function of ERAU, it makes one believe his love for the school and the students it involves is authentic.

In his week's issue of The Avison, the front page of the "Avison Copy Editor" of my "numerous public announcements concerning footnotes" leads one to understand that these announcements were cut from the blue card system. I find it amazing as how people are quick to criticize but slow to recommend solutions of their own. Mr. Glenn also claimed falsely that students were denied the right to vote in this, it fact, the students were denied the right to vote. These students who did not have blue cards were sent to correct the U.C. where their names could be checked off on a student record.

As far as "an SGA elected by a minority of 34 people", it's obvious. You stop a small group like the Avison newspaper itself. The Avison has a bad mind for preening news and article problems to the largest audience of "the student body".

"In regard to the letter written by the "Avison Copy Editor", it's obvious that this writer is a member of the student body, but it's obvious that this writer is a member of the student body."

Klyde Morris

No guts

To the Editor:

I found it ironic last week to read the front page of the Avison (Sat., "the award-winning newspaper of the nation"), when on the next page, the extremely biased letter by Julian Glenn along with the letter to the editor entitled "Disappointed". As an SGA representative I find it critical and extremely disturbing that Mr. Glenn would publish such a letter.

On the issue of the vote registration cards, I feel that it was a real failure. I was up with the idea last November as a way of avoiding the need to punch students into voting more than once. Last year, there was a problem with students who couldn't vote because they didn't like the idea of having a hole punched in their cards. There was also the problem of the students who had been here for several years and their cards were full of holes.

Yes, there is a problem of getting students present in the SGA election, but, if I don't think

Klyde Morris

Disagree

To the Editor:

Being an international student, I would like to encounter what I don't see. I think the Avison has a problem with the editor. I have had the opportunity to work with Mr. Glenn and have to figure out what to be in this election and would vote for him again. I think the person uses what the editor is a "Disappointed" letter to the Avison but enough guts to sign his name and enough intelligence to think twice before writing. He doesn't know anything about what he is writing about.

Avison Editor

Don't pay

To the Editor:

With the results of the SGA elections now history, it is time the results were announced. Approximately thirty students voted, a few were unable because they lost their voting card, and 4000 people do not care or vote at all. Obviously, a lot of people do not care about the SGA.

Let's take a closer look at what the SGA elections were. In addition to the usual candidates, they offered a minority ticket which consisted of one minority member.

The conclast of the voting period was that the minority ticket was elected to office by a minority of students. Only 33 of the 4600 people that voted for the minority ticket, or 0.7%, were minority. The SGA elections were an example of how the majority silences the minority.

"In the SGA elections, 32 votes were cast for the minority ticket. The minority ticket, in turn, cast 32 votes for the majority ticket."

Spring or Summer grades
Summer Graduation applications are being accepted in the Registration and Records Office for those students completing Summer Session (June - August) degree completion. Students completing the application will be given a Preliminary Graduation Authorization to be brought at the time of application for a smooth completion. Please be advised that no diploma will be ordered if this application form is not processed by the Registration and Records Office. Check with the Registration and Records Office if you have any questions.

Missing!
Would the person who borrowed the Career Center notebook containing the Aviation Maintenance Technology course and Aviation Employment Requests please return it in the Career Center so your fellow students also can benefit from it? Thank you.

Delta Chi relaxes
By Geoff Murray
With finals just around the corner, Delta Chi’s social life has been held during the week’s events and is now mellow during the weekend. A few brothers were out this past weekend, but most stayed home in their dorm rooms. However, the pledges have been busy and are planning a fund raising event this weekend.

This will be close to a boost of the upcoming Spring Ball in which Delta Chi will be involved. The brothers feel that this event will last well to 3 a.m. on this coming Wednesday morning.

AnF has party spirit

The members of Alpha Eta Rho utilized another disappointment on the Frisbee in the tug of war event when they lost to Lambda Chi because of a technical call in Lambda Chi's favor. Never have or ever Alpha Eta Rho known they had it in a man's meet up in the tug of war. They performed beautifully by coming in third in these last rounds and third in the tug of war, first in the first game stance, third in the second.

Weirdesensidents here at Embryan-Riddle also have to share our frustration. According to McCollum, "Embryan-Riddle has all days to investigate and send a report to the FAA and NTSB concerning the incident." Or, perhaps another explanation is needed. We have an internal investigation group that will look in the incident to see if there are any faults.

**Photo contest begins**

By Julian Fliesinger

Anthropology Lab Assistant

Remember all those great pictures you took of award-winning cases and double chin champs? Remember how much you wanted to show them off as soon as they were developed? Well, dig back into your order sheet, dust off the projector and stare into that with the whole school.

The FAA/RAU Weather Room staff is sponsoring our first weather photo contest. The weather is of tremendous importance in all we do and this event is aimed at encouraging students to become aware of our environmental mankind. Photos, prints, and printouts by Embry-Riddle, will be used to be entered into the top three print photos. Each contest will be judged by Frank Want and Mr. Morris, staff meteorologists, and weather Cortex lab assistants. Entries may be submitted in the weather room between 6 a.m. and 6 p.m.

The rules are simple; any FAA-RAU student may enter. No entries will be allowed to be entered without the permission of the FAA/RAU Weather Room. Entries will be judged on the basis of their content, including composition, color, and clarity.
