E-RAU imposes wage freeze

By Mai Corriveau

Reducing the spring, university administration announced a plan to impose a 20 percent wage freeze on all non-tenured faculty members. This decision was made in an attempt to balance the university's budget, which is expected to be reduced by 30 percent this year.

Using this approach, the university's planning committee considered a range of options, including a 15 percent freeze or a 25 percent freeze. After careful deliberation, the committee decided that a 20 percent freeze was the most feasible and fair solution.

While this decision may be met with resistance from some faculty members, the university administration believes it is necessary to ensure the financial stability of the institution. They hope that this action will help to alleviate some of the financial pressures currently facing the university.

Races attract myriad of aircraft

By R.L. Smith

This year's Dayton Air Show attracted hundreds of aircraft to the fairgrounds, with some planes drawing the largest crowds.

Aerobatic performers like the Vietnamese Air Force and the Bulgarian Air Force were among the highlights of the show, performing daring maneuvers that left the audience in awe. The Swiss Air Force and the Canadian Forces also brought their aircraft to the show, showcasing their impressive capabilities.

The show also featured a range of static displays, including fighter jets, helicopters, and military aircraft. Visitors were able to see up close the latest technology in aviation and learn more about the advancements being made in the field.

The fairgrounds were packed with people of all ages, eager to see the impressive aircraft and to learn more about the exciting world of aviation. The show concluded with a spectacular fireworks display, leaving a lasting impression on all who were present.

Air to ground communication available to travelers soon

By Jeff Richardson

Starting this spring, passengers traveling aboard all American Airlines flights will be able to make telephone calls while in flight. This new, service, marketed jointly by American, Boeing and Lucent Technologies, will allow passengers to dial into a voice mail system to leave messages for friends or family while they are flying. The service is expected to roll out on American's entire fleet of Boeing 757s and 767s by mid-year.

The new telephone system allows passengers to call anywhere in the continental United States or Canada, without incurring any additional charges. The system is expected to be available on all American Airlines flights by late 2013.
Editorial

Voice for animal rights

A chapter of the Humane Society is located in almost every county in the United States. The Humane Society is in pursuit of better animal care, and is always fighting to add to the care and rights for animals. The society is always striving to help animals in emergency situations, and to improve the lives of those animals who are on the brink of being destroyed. The main point of the Humane Society is to protect the animals.

Most animal rights are based on a basic principle: animals should be treated with the same respect and care that we would extend to any other human being. This means that animals should not be tortured, abused, or used for any purpose without their consent.

In recent years, there has been a growing movement for animal rights. This movement is gaining momentum as more and more people begin to realize the importance of protecting animals.

In conclusion, the Humane Society is working hard to make the world a better place for animals. They are dedicated to the protection of animals and to ensuring that they are treated with the same respect and care that we extend to all living beings.

Letters

More on survey

To the Editor:

I would like to add my response to the survey on February 14, 1983. The survey was circulated and developed by the students from the OMWUHE. The survey was sent to every student in the school and it is not intended to be a scientific survey. It is just a forum for students to express their opinions.

Warren N. Student

Column criticized

To the Editor:

This editorial is in reference to E. Elliott's article in The Avion on February 14, 1983. The article criticizes a book by Elliott. Although the article is critical, it is not intended to be a scientific analysis. It is just a forum for students to express their opinions.

Warren N. Student

Microprojection

To the Editor:

This is an article to publish in the Avion newspaper. It is a commentary on the current state of the world and the issues that are facing us. The article is intended to be a forum for students to express their opinions.

Automatic weathered engulfment undergoes year-long test

By Victor Schellberg
Washington, D.C. — The FAA will begin a year-long demonstration of automated weather reporting equipment on all airports from Florida to Alaska.

Known as the Automated Weather Observing System (AWS), the equipment will automatically gather weather data from various locations on an airport and transmit this information directly to the planes by means of a computer-generated voice message. The messages will include wind, visibility, and snow conditions, as well as temperature, dew point, and runway conditions.

Gerald E. Larson, a spokesman for the FAA, said the planes would be able to get into an airport with better weather conditions than those in the present time. The FAA will test 2,400 AWS systems around the nation's airports and see how the new data can benefit the planes.

Once the test is over, the FAA will begin planning for the formal implementation of the AWS system. The FAA hopes to have the AWS system in place by 1980.

Tommy one, Hand. Check in, stand out. Long lines move over the area. Nud and Neville in red. Long tresses.

Check up, check up, check up. Inflated. Let the lines, the lines! Pull the lines. Secondary, Primary. Twice. Let the lines! It's a malfunction. Drop. Zoom. Drop. The ground.

Cave No. Two. Twined lines are NOT a malfunction. But the lines are twisted, twisted. Lift. General, 2000 feet. I am away.

I'm out of here. Falling. Deep, deep, deep, deep.

I'm out of it. Check up, check up. It's my parachute. Check up, check up. It's my fault. It's my parachute. I'm Dead.

Skydiving, Deep. Worcestershire, Primary. Touch the ground. It's the ground. Falling. Falling.

The fullness of my dream. I couldn't stop laughing. We discussed the skydive. Skydive, skydive, skydive. I had to do it. But I'm still standing, good job! I should have done it. They had a called a buddy system in me.

Their professional attitude and professional operation for the most embarrassing thrill of my life.

Wide Trackers take first

"Real" reads the big movie's
inscribed on the screen. Lush, 
and colorful, it is a scene that
keeps the viewers on the edge of
their seats. The story revolves
around a group of surfers who,
while surfing in the area, come
across a mysterious object. The
object is revealed to be a long
pipe, and the surfers realize
that it is the key to a hidden
secret. They decide to explore
further, and the story takes a
thrilling turn as they face
adversity and danger in their
quest to uncover the truth.

Miami Trackers draw record crowds

The Miami International Surf Show opened in grand
fashion last weekend with record crowds.

The event, which is the 15th year of the show, has been
a popular destination for surf enthusiasts for over a decade.

The show featured a variety of exhibits, including surfboards,
shorts, wetsuits, and other surf-related merchandise. In addition,
there were several competitions, such as the surfboard
riding and the surfboard design contests. The competition
attracts surfers from all over the world, making it a
gathering of the best surfers from around the globe.

The event also included a surf film screening, which
featured films from some of the top directors in the
surfing world. The films displayed a range of themes,
from the history of surfing to the latest surf culture.

Surfing is a popular sport in Florida, and the Miami
International Surf Show is one of the largest and most
widely attended events in the state. The show is a
great opportunity for surfers to connect with fellow
enthusiasts, learn about new products, and experience
the latest trends in the surfing world.

**E-RAU graduate files for Blue Angels**

By Max Compton

On February 12, the Blue Angels opened their doors to Emerald Riddle Aeronautical University students. The event, which included an opening ceremony and a field trip to the E-RAU campus, aimed to foster a greater understanding and appreciation of the university's offerings.

**Aero-Hispanic society newly formed**

The Aero-Hispanic Society, a new student organization, held its organizational meeting on February 3 to discuss the group's mission and objectives. The meeting was attended by several faculty members and discussed plans for upcoming events and activities.

**Loans available to women**

A loan fund of $10,000 is available to women students at E-RAU to support their education. The loan terms are favorable, with interest rates starting at 5.5% for students who meet certain eligibility criteria. For more information, contact the Financial Aid Office.

**Dispatcher program succeeds**

Five recent E-RAU graduates successfully completed the FAA Dispatcher Practical Examination on February 15. The graduates included Joseph Jenkins, Jennifer Williams, and Mark Ramon. Their achievements are a testament to the quality of education provided at E-RAU.

**Displaced**

By George Murphy

This past weekend the South Eastern Inter-Fraternity Council (SEIFC) held its annual "Leadership Academy." The convention was held during the spring term of every year and included most Management Club

Pratt & Whitney manager speaks

By Bill Finnegan

The Pratt & Whitney Aircraft Club with host, Mr. Ronald D. Hackney for the second year in a row, was held April 21st at Pratt & Whitney Aircraft Corporation's West Point Research and Development Center in Bridgeport, Conn. The event was sponsored by the Inter-Engine Rare Parts Sales in the Tennessee FREE press reports.

Mr. Hackney's experience began when he was the initial engineer for high pressure pumps and test analysis. Then in 1954 he became Senior Engineer at Pratt & Whitney.

The Brothers of the West prepare for black history celebration

Alpha Eta Rho keeps busy

By Tammy Wagon

These last few weeks have been really busy for AEP. In addition to having Pledge Class Sigma typically coming in, pledge leaders, several activities have kept brothers occupied.

Two weeks ago, AEP was on hand at the NFA event to sell convocation and give support to the Flight Team. It was a chance to meet and talk to other chapters of Alpha Eta Rho that were here to compete in the flight test. The reception was unoffical and brought the other chapters at the Trip for a sense of club co-operation.

Some of the club's activities included:

- AAE's building got a new look, with the Brothers coming in and making it look its best.
- The chapter had a successful meet and greet with the newer members.
- The AAE's are planning for their annual Spring Ball.
- The Brothers are looking forward to their next event, which will be held this Saturday.

Navy Club seeks members

By Gregory Rame

The Naval America Club is looking for anyone interested in joining our organization or helping to become Naval Officers or other officers. Please join us on February 25th at 12:00 noon at the U.S. Naval Academy. The event will be held in the Main Barracks. All members are welcome.
Goodyear blimp covers 500s

By Jay Coz
Asst. Student Reporter
The Goodyear airship Enterprise
docked at New Smyrna Beach
airport Monday to cover the Daytona
500. The Enterprise and sister
ship, the America, are used to
cover major sporting events.
The Enterprise is 395 feet long,
by far its longest, and 35 feet high.
It can be seen at many citrus
festival parades.

The blimp is fully equipped
including weather vane, a
kitchen for the crew members
living on the blimp. The
entertainment area is
designed for the comfort of
the passengers.

The Enterprise is operated by
the flight crew, which consists
of the pilot, co-pilot, navigator,
and engineer. The crew
operates the blimp in
cooperation with the
Goodyear team.

The Enterprise is used for
covering major sporting
events, including the Daytona
500, the Indy 500, and the
Formula One World Championship.

The Enterprise is equipped
with a weather vane, a weather
station, and a radar system that
tracks the movement of aircraft.

The Enterprise is flown by
a pilot and co-pilot, who
are responsible for the
operation of the blimp.

The Enterprise is
powered by a four-stage
turbine engine, which
provides the necessary
power for the blimp to
remain in the air.

The Enterprise is
used to cover the Daytona
500, the Indy 500, and
other major sporting events.

The Enterprise is
operated by the
Goodyear team, who
work closely with the
flight crew to ensure
the smooth operation of
the blimp.

The Enterprise is
