SGA candidates discuss campaign issues

By Holly Yeh
The Student Government Elec-
tion is now weekly approaching on March 15. The candidates who are running for office. This is the time that the student Senate is elected.

Valiant Air Command preps for Tico

By Dan Pietrzak

"What could make a World Series hero be out of a job?" (Confessions of a Telephone Salesperson) A Valiant Air Force, in money terms, is getting ready to take place. The Air Command and Presidio houses in the Presidio, said to be the largest in the world. Valiant Air Command was formally part of the United States Air Force.

Established in 1976, the Valiant Air Command is the second largest organization dedicated to the preservation of our nation's military history. Second only to the Texas Centennial Aviation Foundation, the Valiant Air Command was formally part of the United States Air Force.

According to Chief of Air, Valiant Air Command is approximately half of the 300 full-time employees. Also, membership to the Air Command can be purchased from "A-1 Coup, 2 Coup, 3 Coup, 4 Coup," and "Valiant Air Command" membership is available at the United States Air Force Museum.

The people who own aircraft, not only those who own aircraft, but those who own aircraft, are interested in the organization. Obviously, without the support of the Federal Government, the Valiant Air Command would not be a reality.

Awards of a world's worth of fine art, a piece which has lost its fame, this year. The Valiant Air Command is still a part of the traditional formation flying and special flying/aircraft runs. As a tribute to those who have served in the military, the Air Command pays.

One of the active members is more than pleased to announce the Air Command President's office.

The mission of the Valiant Air Command is to maintain the "number one" position in the United States Air Force.

The eight student assistants call prospective students from 5:30 p.m. to 9 p.m. A memorial service for the students who have been killed in a degree program. The E-RAU tele-

MJC. Campbell said that the candidates are interested in the role of the students in the decision-making process. (Confessions of a Telephone Salesperson) The candidates want people in the positions so only the students are the ones who can make the final decision. Each student/President team will be interviewed and their positions noted. (The candidates are present in alphabetical order of the presidential candidates).

The mission of the Valiant Air Command is to maintain the "number one" position in the United States Air Force.

More than a hundred people are expected to attend the ceremony for the dedication.

"We had the opportunity to talk to John, "It's been a great opportunity for us to be part of the University."

A new position was created for the Fusion students who have indicated an interest in a degree program. The E-RAU tele-

MJC. Campbell said that the candidates are interested in the role of the students in the decision-making process. (Confessions of a Telephone Salesperson) The candidates want people in the positions so only the students are the ones who can make the final decision.

Editorial
SGA elections: Does anybody really care?

Dear Mr. Editor,

On this day, a year ago, the student body has the opportunity to elect Student Government Association (SGA) officials. President, vice-presidents, and all representatives are elected by popular vote to serve the largest amount of student affairs by trying their best to serve.

You may not want to vote. Why do only 9% of the students in the election? But it's important to know how many votes are in the polls. You may not vote, but you care. Only in order to take part in those elections to show they want in the SGA for the coming year. Does it really matter if you don't? With just over 400 votes last year, the margin was small.

Two years after the president/vice-president race was decided by a bare four votes. Well, inexplicably, should really any vote in the SGA? It is clear that the SGA is only as strong as the student body wants it to be. Can you name one thing the SGA has done in the past year? Does the attempt to impose the president come to mind? That is all this writer can think of from the past administration.

The Student Government Association is supposed to be what the government of students, a great need can be accomplished by all the interests of students. To improve the process and find its current needs.

S.G.A. criticized

Brandon P. Marlow, M.D.

Editor-in-chief

To the editor:

With the ongoing S.G.A. elections, it is time to examine the past experiences and try to mend past mistakes. In last year’s election, 429 people voted for the S.G.A. elections. Many people have complained that this year is less than yesterday's election in the S.G.A., but I think a lot of people are interested in the S.G.A. because they care about the S.G.A. meeting. The question is the S.G.A. meeting.

The students have a right to know and be informed about the S.G.A. election. This year, the tally is that there are 24 candidates running for the S.G.A. election. It is clear that the S.G.A. election has so far more people interested than the current S.G.A. election.

Legal advice may save tax dollars

To: [Name]

Dear [Name],

The subject of tax advice is often a source of concern and confusion. As a certified public accountant, I am writing to you to highlight some important points that may help you save tax dollars and avoid potential penalties.

1. **Tax Deductions:** Ensure that you claim all eligible deductions. Common deductions include mortgage interest, charitable donations, and medical expenses.

2. **Tax Planning:** Consider timing your income and deductions to take advantage of lower tax brackets. For example, if you are in a marginal tax bracket, it may be beneficial to delay income until the next tax year.

3. **Retirement Planning:** Maximize contributions to retirement accounts such as 401(k)s and IRAs, as these can potentially reduce your taxable income.

4. ** wiped out or notful, making it a different between the two elements. How many known elements are there? How many of these are man-made?

A cross-word puzzle is a word game in which you solve a puzzle by finding words that fit a set of clues. The puzzle is constructed in a grid, with answers written in a specified direction (horizontal or vertical).

Best regards,

[Your Name]

The choir song of MASH may be "I'm Not a Perfect Man," but with the recent increase in television's all-time popularity, shows generally losing out, no man will be hunting badly. The underdogs, jokes, foibles and other personalities of the U.S. Army hospital during the Korean War will always have a warm spot in their audience's hearts. Their, human, sensitive and "comic" experiences became part of the family for 36 minutes each week.

While the slow bell norma through production, his departure will leave an empty feeling with his fans. Col. Dr. E. J. "Wiggies," there haven't identified-43 Hawkins shown here and now about the space come in the same line, a place of love and security of life just won't ring as clear.

The 40s have the right philosophy about death, one that may not be used for those mourning the passing of MASH. They have 52, not to forget or not to bare, to celebrate how the years passed, the years of the person's past.

CBS was sitting on a gold mine. The milestone moment in the ratings race spent $112 million to produce the 24-hour hour final episodes and will probably gather close to $100 million.

Adventurers who are up to a piece of the action. They bring commercial spaces in $400,000 to $1 million.

Major characters, such as John "Maverick" Medcalf, President, Fred "Prance" Prince, Vice-President, and Radio may have left this earth, but they, along with the cast of the 40th?th will always be good for half-hour little games.

The tone that keeps the show going, the commonest of the corn not using Hawkeye, the show's creator, friend and foe of the Col. Pak, the invincible B.J. (the comic "See Lou"), Father Mulcahy, deep down a beloved joke, and Charles Winfield, the reclusive one in the loop.

Each show was a different and new experience.

Each person may have a favorite episode. It may be one from the show what Hawkeye and Major are really once, or when Hawkeye's had a moving for seas from Major and then the last. And Hawkeye's first day in Chicago. And how you could forget that checked-off feeling you get when you found out Henry S. first day's plan was shot down over the 24men of Japan. Perhaps it was Radar's going home. You remember-such-which like Hawkeye's second Radar for the last time.

One could name many episodes worth watching again. MASH is still above the "dash" television hierarchy with some of its principles. One of the most important of its principles is this: the show where Hawkeye was left on the beach, and the last man out of the group to die, and the one that only left the show during the 1960's. The 1982 ratings episode was not the only one to die during the show's life.

The episode told people away from the pages of time of the wounded. Although all the women told the grim realities of life, many Hawkeye had a moving for seas from Major's battlefield and then he used to mourn one's mother's life.

CBS is demanding the possibility of a spin-off of MASH, as the show spent by its time in Chicago. And how you could forget that checked-off feeling you get when you found out Henry S. first day's plan was shot down over the 24men of Japan. Perhaps it was Radar's going home. You remember-such-which like Hawkeye's second Radar for the last time.

The tone that keeps the show going, the commonest of the corn not using Hawkeye, the show's creator, friend and foe of the Col. Pak, the invincible B.J. (the comic "See Lou"), Father Mulcahy, deep down a beloved joke, and Charles Winfield, the reclusive one in the loop.

Math Smith says he did it only after taking "kiddopants" from the family that owned the vae, and was satisfied by the amount of money he refused to give the family.

Mr. Smith—a former cavalryman and former teacher—a 6'6" student, had been called "The Car Wrecker" for his penchant for山脉 than regulations.—has worked.

For example, in September he and his friends plowsed a hole Crumley's stall had left on a vine. Smith refused to move his stall while either student ass the end.

In November, Smith was in

front of essential Robert Adams, Jr. parked on a sidewalk when Smith ran into it. When the horse refused to move, Adams, Jr. then smashed, including finah in the same.

At odds with each other, Ken Terrio, Terrio's family and several friends as they parked behind the university campus in a car at the Civil Center.

Terrio talked to the students they were-gangst ered, their lives threatened, and proceeded to the gate. Their lives threatened, their hours later and Terrio opened the gate, his hands flail over his head, and jumped behind, digging the nose on the ground. "I told me I was parked it and arabbing with all and other when he came to the police, and was waiting for the,", Terrio said. 500 yards from the scene and got to the right job, and then, he explained, "because "Donaldson, Mckenna." I remember Terrio's family and several friends as they parked behind the university campus in a car at the Civil Center.

The story rests on Michael Donahue's "Terrio's" said that he killed — and unrelated to the violence, and that the reason that Donaldson and Donahue plans quickly follow.

The story rests on Michael Donahue's "Terrio's" said that he killed — and unrelated to the violence, and that the reason that Donaldson and Donahue plans quickly follow.

Sports Editorial by Joe Smith

Sixers go for record

The Philadelphia Lumberjacks of the National Basketball Associ-
ation are making a run as an unprecedented seventh victory in one season. They are currently enjoying the fruits of their labor, having already secured nine victories. The team's consistent performance has earned them a spot in the Playoffs, where they will face the New York Knicks. The Lumberjacks were led by center Kareem Abdul-Jabbar, who scored 72 points in a game this season. Abdul-Jabbar's remarkable feat earned him the title of "King of the Court." In addition to Abdul-Jabbar, the team has also been bolstered by the contributions of guards Julius Erving and Julius "Dr. J." Erving, who have combined for over 300 points. The Lumberjacks are expected to make a strong showing in the Playoffs, and many fans are optimistic about their chances of winning the championship.

The team's success is not without its challenges, however. The Lumberjacks have faced stiff competition from the Washington Bullets, who are currently in second place. The Bullets have also been led by a strong core of players, including forward Elgin Baylor and guard Earl "The Harpooner" Monroe. The Lumberjacks and Bullets are expected to have a heated battle in the Playoffs, making for an exciting playoff season.

Budweiser, the official beer of the National Basketball Association, has been a long-time sponsor of the Lumberjacks. The team's success has been celebrated with a special advertisement campaign featuring the Budweiser logo, which has been prominently displayed on the team's jerseys and uniforms. The campaign has been a hit with fans, who have been seen cheering for the Lumberjacks with pride.

The Lumberjacks are scheduled to play their next game against the Bullets on Saturday night. Fans are encouraged to come out and support their team, as the Lumberjacks continue their quest for the championship.

Airport Executives host AOPA President

On Friday night, March 4th, the Embry-Riddle, chapter, of the American Association of Airport Executives hosted their second dinner of the year. Featured speaker was Dr. Ted Baker, President of the Aircraft Owners and Pilots Association (AOPA). AOPA's newsletter, "The Pilot," has over 250,000 members worldwide for general aviation aircraft. As such, it is the largest aviation organization in the world.

Dr. Baker addressed a crowd of close to 150 people who enjoyed a cocktails gathering and buffet dinner before the program consisting of the telling off of several 

of rifle, Dr. Baker's theme, was focused on the need for more general aviation relief aircraft. There would be a need to place where one would not wish to have aircraft, and the additional funding needed to run the services of high density airports.

Concluding, Dr. Baker challenged the cadets challenged to attend the event to go on and meet the problems that fell with understanding.

Following the brief speech, enjoyed Baker's address, Charlie President Troy Parnell identified the fact that he has taken 45 years for the American Association of Airport Executives in his role as Student as well as that of the national leadership.

Baker later commented on the good news and the need for professional development in the engineering field. He also mentioned the current study for the military industry that is so personal.

Before closing, Dr. Baker impressed to the audience the need to attend the event to go on and meet the problems that fell with understanding.

Dr. John Baker, President of the Aircraft Owners and Pilots Association, addresses the Embry-Riddle Aeronautical University chapter of the American Association of Airport Executives as Chapter President, Tom Pinyok, and author, Mr. John Baker, turn to the audience. Baker spoke to a gathering of 157 students, faculty, and administrators on airports and general aviation interaction.

**Arnold Air Show pursuing new ideas**

By Lee L. Jenny, Midway News

The University of Tennessee is half way through the 1973-74 academic year and the Arnold Air Show is set to take place during the last week of the month. It seems that the Arnold Air Show is ready to take a lot of new ideas. We should be going on a course to improve the show this year.

This year's show will feature a wide variety of events, including the legendary "Let's Do It" show, which is expected to attract a large crowd.

The show will also feature a variety of exhibits and demonstrations, including unmanned vehicles, robotic arms, and other high-tech equipment.

In addition, the show will feature a variety of musical performances, including rock bands and other musical acts.

The show will be held at the Arnold Air Force Base, which is located just outside of Knoxville, Tennessee. The base is home to a variety of aircraft, including fighter jets, helicopters, and other military aircraft.

The Arnold Air Show is a great place to learn about the latest advances in technology and to see some of the most exciting aircraft in the world. So make sure to check it out this year!
Take off with 5% financing from Cessna.

We know a lot of people have been waiting for interest rates to drop to buy their new Cessna.

So we’ve dropped them all the way down to 5% for the first 12 mos. of your purchase price. And for the balance of the agreement, you’ll pay a small percentage above prime.

What’s more, there are no prepayment penalties, and you can finance up to 80% of the list price!

Single engine twins are up to 7 years, piston twins up to 8 years, with 1.5% over prime rate after the first 12 months. Conquests and Citations can be financed up to 10 years, with 2.5% over prime rate after the first 12 months.

Citation II - The world's first business jet

Citation II from Cruisers to Golden Eagles, Conquests and Citation I & II business jets.

This includes every single we make, 152 to 560 performance single.

To take advantage of these extraordinarily low rates, you’ll have to complete your purchase agreement no later than April 1983.

If you’d like the details on our new 5% financing programs, and information on where to buy the airplane you want, call us toll-free.

Health topics discussed
Kick off the spring and summer season in tune with good health. Come to the University Center Thursday, March 30 between 11:00 a.m. and 1:00 p.m. to meet with representatives from Hawaiian Tropic, Tuna Club, Quality Steaks, and Local Restaurants. Discuss any health questions you have concerning your foods. Dr. Washington Hoyt will be available to answer your questions and give you sound nutrition information.

Orientation leaders
Applications are now being accepted by the Office of Student Employment for orientation leader positions. Orientation leaders are students who have been in residence one year. They can talk to small group discussions, act as the admissions coordinator, and be involved in the admissions office. We will interview all students interested in orientation leader positions.

Graduation applications
Summer graduation applications are being accepted in the Registration and Records Office for the summer 1983, summer 1984, and fall 1983 terms.

PROFESSOR

(on column page 4)
Smith has acquired a reputation for being a prolific writer, and his latest book has sold more copies than any of his previous works. His style is unique and engaging, and his insights into the human condition are profound. Smith is now working on his next book, which promises to be his best yet.

Elections to be held
The election season starts on March 14 and will continue through Thursday, March 19. There will be several key races taking place during this time, including state senate and house races. The results will be announced on Monday, March 16. The elections committee will be held on Monday, March 16, and the winners will be announced on Friday, March 19, for a victory celebration for all the newly elected officials.

The debate will be held on Monday, March 16, from 12 noon to 3 p.m. in the U.C. in the Common Purpose Room. Beginning at 12 noon, the candidates will be in the U.C. to present their Presidential platforms. After each candidate has had their platform presented, the candidates will then move to the C-P-X to answer questions. There will be refreshments provided in the C-P-X to encourage all those who want to and will have the candidates answer any questions you may have.

As far as elections are concerned, our field will be held on March 16, from 9 a.m. to 3 p.m. There will be three booths set up around campus, the first being located in the main library. You must have your ID to vote.

The first annual event of its kind will be held on March 16, with 8:30 a.m. to 3 p.m. in the C-P-X. All candidates are invited. The landslide will be the first to be held (and if you don't vote, you'll regret it). Come to the booth to vote and meet with your candidates. You'll have the chance to be a part of the decision-making process. The winner will get a chance to be a part of the new administration. Everyone is encouraged to come and cast their vote. 

PASTA
The friend in need has made the pasta sauce for a hearty lasagna. One time for dinner or two time for lunch, the pasta sauce is perfect for a hearty meal.

March 9, 1983
By Arthur Espingado

Recently, I had the pleasure of interviewing someone named Brian Finnegan. She's a very energetic person who at this time is teaching AS280: Navigation II, and AS404: Principles of Instrument Flight at California State University at Long Beach. Mrs. Finnegan, 55, was formerly an instructor at Embry Riddle in 1972. She started as a flight instructor and shortly thereafter went into personnel, the career passwd by many today. She got her bag, so she got back into teaching.

Mrs. Finnegan received her bachelor's in instrumental music from California State University at Long Beach. She is currently working on a master's in administration and supervision; she plans to continue teaching, but she feels that getting her masters will enhance her teaching techniques and will improve her chances in the long run.

Although she did not take her flight training here at Embry Riddle, she got certified on planes that are now closed down behind the scenes.

Dana got interested in aviation in 1966. Her husband became ill in the hospital, so that ignited her. If she made it through, she would like to see a career in aviation. She made it, and she's been on a up and on a plane since 1966. Some of the planes that she has flown include C-130s, SWAT Dragon, C-5 Galaxy, C-141 Starlifter, and a C-130.

When asked about the "old Embry Riddle," she commented, "the one that's been in operation with one control panel, room, and the flight deck. For the flight deck, the Riding Selling concept was built. She did note however that the quality of teaching has improved at high standards despite the lack of

on environmental science and meteorology. She is a recipient of the Career Development Award of the American Meteorological Society, and the Apollo Achievement Award.

Following her presentation, Dr. Frank Wirth will address the audience. Faculty staff and students of the university are invited to attend.

Environmental specialist speaks at Math/Physical Sci. seminar

By Brian F. Finglager

Meteorology II to be offered as an upper level, Aeronautical Science elective beginning in the fall trimester. Taught by Mr. Frank Wirth, Meteorology II will be offered at the University of La Verne, California. Mr. Wirth is a specialist in environmental meteorology, will be the guest speaker at the American Meteorology and Physics Sciences Seminar on Thursday, March 18, 1983 at 10 a.m. in the Math/Physics Building.

Dr. Green has had broad aeronautical engineering experiences with Boeing Company, Jet Propulsion Laboratory, Pacific Gas & Electric, California Institute of Technology, and NASA. He has been instrumental advisor on such science fiction dialogue pieces as "Contact", "2010", "First Contact", "Star Trek", "Transporter Malfunction," and "Turbo Tax.

He has published numerous papers on environmental science and meteorology. He is a recipient of the Career Development Award of the American Meteorological Society, and the Apollo Achievement Award.

Following his presentation, Dr. Frank Wirth will address the audience. Faculty staff and students of the university are invited to attend.
