SGA candidates discuss campaign issues

By Jeff Stone

The Student Government Elec-
tion is now officially under way and April 18 is in the view-
to. This week they are being

four SGA candidates running for positions in the Student Government, including President, Vice-President, and Senator.

The election begins with the release of the candidates’ platforms, which will be discussed in more detail below.

A major automobile accident claimed the lives of four Embry-Riddle Aeronautical University Students and left a fifth in critical condition at the hospital.

According to the Daytona Beach Police, the students were playing cards at an off-campus residence when a car driven by a friend ran into the group.

The accident occurred on March 22, 1983, at 2:30 a.m. The victims were identified as John J. Jones, age 18, a student from Fort Lauderdale; Robert G. Williams, age 18, a Tiny student; and James R. Bowers, age 18, a University student.

An investigation is ongoing and no charges have been filed.

Editorial

SGA elections: Does anybody really care?

Once and only once a year the students have the opportunity to elect Student Government Association (SGA) officials. President, vice-president, and ten representatives are to be selected in a process supposed to be open enough to become active in student government. The key word is "supposed." Does anybody really care?

Last year's election proved that only about 9% of roughly 4,900 eligible voters bothered to cast a ballot. And the turnout rate was not the largest among the number of students asked by Kennedy-Baldrige and the 1982 SGA election is a prime example.

You may ask yourself: Why does only 9% of the SGA vote care enough to vote? Isn't there hope for the written word, the written ballot? Despite this low number of voters in the past, 1983 SGA officials are predicting that you will vote this year. Some of the reasons given:

1. It's time for change: The average freshman is only two years away from voting in the SGA for the first time. Does anybody care about voting this year? I'm looking at you, junior.
2. It's easy: Just show up during voting hours, which will be for seven days, and you'll be done.
3. It's important: The SGA is an important body, with power, authority, and responsibilities.

The SGA should be used as a stepping stone for leadership and service. It is a place where students can gain experience, improve communication skills, and develop a sense of responsibility.

Letters

S.G.A. criticized

When discussing S.G.A. elections, it is time to examine the past experiences and try to rectify past mistakes. Last year's election, 429 people voted in the S.G.A. elections. Many people have complained that this was not enough or by voting there was a lack of interest in the S.G.A., but I think a lot of people are interested in the S.G.A., mostly because of the hard work and dedication of the S.G.A. members that made the difference.

The S.G.A. is an unrepresented body that we can get involved and use. You are not alone, there are many of us interested in working for the S.G.A. The S.G.A. is like a family and we all need to work hard to make it successful.

Memorial services for the four students killed in an accident this weekend will be held on Sunday, March 13 at 10:00 a.m. in the University Center.

The Sun's actual weight is about 2.5 billion billion tons, as much as 323,370 Earths.

This week's question: A chemical is a substance that cannot be broken down into simpler substances. How many known elements are there? How many of them are man-made?

Answer: 112 elements are known, 58 of which are man-made.

If you could drive to the Sun at 56 miles an hour, it would take 138 years to get there.

The force of pressure in the Sun's center is 100,000 times the pressure at the Earth's center.

The Philadelphia 76ers won the NBA's National Basketball Association, marking the start of a new era in the franchise's history. In the first half of the season, the team showed great promise and potential for success in the upcoming years. However, the 76ers struggled in the second half, and the season ended with a disappointing record.

The Philadelphia 76ers are one of the oldest and most successful franchises in the NBA, with a rich history dating back to 1949. The team has had its share of ups and downs, but with a strong coaching staff and talented players, they are poised for a comeback in the years to come.

If you passed up Army ROTC during your first two years of college, you can enroll in our 3-year program before you start your junior year. Your training will start the summer after your sophomore year at the six-week Army ROTC Basic Camp. It'll pay off, I tell you. You'll save nearly $2000 for tuition at the Basic Camp and up to $10,000 a year for your last two years of ROTC training.

But, more importantly, you'll learn the basic skills you need to start a successful career in business. Rotc training gives you the necessary education, experience, and the basic skills you need to start a successful career in business.

TENTH

WILLIAMSBURG, Va.

(703) Last fall private colleges advertised that if they did not fill enrollment goals in 1983-84, private colleges would cancel the 1983-84 program. Although initially these advertisements were not well received by students, interest has since increased, with some institutions finding that they are now getting higher enrollment numbers than they were expecting.

delivered last fall.

to a significant migration from the more expensive private college campuses to public campuses.
On Friday night, March 8th, the Emory-Riddle Aeronautical University won the second annual "Trophy Tournament," which featured the university's aviation programs. The event was sponsored by AOPA (Aircraft Owners and Pilots Association) and was held at the University's facilities.

The "Trophy Tournament" is a competitive event that showcases the skills of the university's aviation students. The winning team was awarded a trophy, which will be displayed at the university's main campus. The event was attended by numerous aviation enthusiasts and industry professionals.

Dr. John Baker, President of the Aeronautical University, congratulated the winning team and expressed his gratitude to AOPA for supporting the event. He also announced that the university will hold similar events in the future to foster a culture of excellence and innovation in aviation education.

The university is committed to providing its students with the best possible education and training in aviation. It has several programs and facilities dedicated to aviation, including state-of-the-art flight simulators, hangars, and aircraft maintenance facilities. The university also partners with local and national aviation organizations to provide students with valuable networking opportunities and job placements.

The university's success in the "Trophy Tournament" is a testament to the quality of education and training it provides to its students. It also highlights the importance of partnerships and collaborations in aviation education.

For more information about the university's aviation programs and events, visit their website at emoryriddle.edu. You can also follow them on social media for updates and news.

We know a lot of people have been waiting for interest rates to drop to buy their new Cessna. 

So we've dropped them all the way down to 5% for the next 12 mos. of your purchase price. And for the balance of the agreement, you'll pay a small percentage above prime. 

That's right, there are no prepayment penalties, and you can finance up to 80% of the list price! 

Single engine twins are up to 7 years, piston twins up to 8 years, with 3.5% over prime rate after the first 12 months. 

Citation I:
- World's fastest business jet. 
- From Crusaders to Golden Eagles, Conquests and Ill propjets and Citation I and II business jets. 
- Yes we lease, too, it's backed by the most comprehensive service and support organization in the world. 

To take advantage of these extraordinarily low rates, you'll have to complete your purchase agreement no later than April 1983. 

If you'd like the details on our new 5% financing programs, and information on where to buy your dream airplane, just call toll-free.

Recently, I had the pleasure of interviewing Thomas B. Paterson, a very energetic person who at this time is teaching AS/93 Environmental Science. He is very much aware of what is going on in the field of environmental science.

Dr. Paterson was willing to talk about his experiences in this field. He holds a Ph.D. in Environmental Science from the University of California, Berkeley, and is currently teaching at the University of Florida.

Dr. Paterson is a member of the American Association for the Advancement of Science and has published several articles on environmental science.

Meteorology II to be offered

By Brian J. Finigan

Meteorology II will be offered as an undergraduate-level course at the University of Florida this fall. Taught by Dr. Frank Fewell, Metorology, it will cover advanced topics in meteorology, including air masses, fronts, and weather forecasting.

Attached below is a graphic of the course syllabus.
