Leading environmentalists speak at E-RAU

Dear Lippold:

The SCJ board is planning a conference this summer to deal with problems facing the country and the world. At the request of the editors of the SCJ newsletter, I am writing to you to ask your suggestions for topics to be covered at the conference.

Best regards,

[Signatures]

Experimental aircraft stops over on way to Lakeland airshow

According to Hardy, you are not required by law to be a certified mechanic or caretaker of any of these aircraft from the kit. Upon completion, the Federal Aviation Administration inspect the aircraft to ensure it is airworthy.

Like all aircraft, experimental aircraft require an annual inspection in order to maintain its airworthiness. Hardy points out that even small aircraft have a lot of parts and equipment that must be replaced or maintained periodically.

Don Hardy, who is involved in general management at the firm, says he's proud of the aircraft being built by his company. "We are building a new generation of aircraft that are designed for people who want to fly without the added costs of traditional aviation," he says.

Editorial
A sobering realization
By R.K. Smith
The early morning hour of Saturday, March 5, the lines of 218 spectators across the sidewalk in front of Virgil's was entirely justified in a violent automobile crash. Like a clock, hard-stop at the top, then fast, usually without a chance for brownie points, they were suddenly halted by the gash of our midnight parade.

It is to be hoped that the drivers who educate their students during the schools' assembly hour will agree that it is a wiser and far safer way to do it. They might also find a little more time of their own to get out on the schools' premises.

May God have mercy on those who were killed and their families. May God have mercy on those who were injured and their families. May God have mercy on those who still have hope for a better world. May God have mercy on those who have lost hope in a better world.

Dean addresses S.G.A.
At the February 16 meeting of the Student Administrative Council, Dean Bennett was present as an observer. SGA members at this meeting were presented with a list of proposed changes in the student government. Among the changes proposed are the elimination of the student government, the abolition of the student newspaper, and the elimination of the student body. These proposals were met with intense opposition from the student body, who strongly opposed any changes in the current student government structure.

Letters
Pro women
By John Smith
In the recent debate about Angel Flight, I was surprised by the number of women who support the program. Women, I believe, should be allowed to fly and participate in the aviation community. It is a progressive step towards equality for women in aviation. These women are making a significant contribution to the aviation community and should be recognized for their efforts.

More women
By Jane Doe
In the context of promoting women in aviation, we should support organizations that are dedicated to this purpose. We should encourage more women to take up aviation as a career and support them in their efforts. It is important to recognize the achievements of women in aviation and to promote gender equality in the aviation industry.

Letters to the Reader
More to the Editor
In response to the recent article regarding Angel Flight, I believe that this program is a positive step towards increasing female representation in aviation. It is important to support initiatives that promote gender equality and provide opportunities for women to participate in the aviation community.

Klyde Morris
The Aviation has many different roles, from a place where people learn to fly to a place where people work. The Aviation provides a platform for people to express their passion for flight. It is an important part of our society and should be protected and supported.

The Aviation is an excellent resource for those who are interested in aviation. It provides a space for people to come together and share their interests and knowledge. It is an important part of our cultural heritage and should be preserved for future generations.

Wes Oleszewski
The Aviation has a rich history and is an important part of our culture. It continues to evolve and change, and it is important to keep it relevant and engaging for our youth.

SAC candidates outline campaign ideas

By Holly Vogt

The Student Assembly Council candidates have outlined their campaign ideas. The candidates say they are doing this so voters can choose the type of personality that would represent them on the SAC.

One of the candidates is from the Student Association of Florida candidates. He says he is running because he believes in giving students a voice in decision-making processes. He also says he wants to improve the student government's relationship with other student organizations and the university administration.

Another candidate is from the Student Association of California candidates. She says she is running because she believes in providing students with opportunities to grow personally and professionally. She also says she wants to improve the student government's relationship with the university administration.

Both candidates say they are running because they believe in giving students a voice in decision-making processes and in providing opportunities for students to grow personally and professionally.
**Golden Earrings is back**

By Michael Anderson

Remember Golden Earrings? They were the band that came out with the popular hit "Jaded Love." In the eleven years that have passed since that hit single came out, the all-black, very seclusive Earrings have released a series of albums that, although very popular in Toronto, have never seemed to gain acceptance in America.

Although the Long Island Audience and the now classic Mohawk helped each of their hard-drinking front man of rock. With the release of Cat, not only do they have their first major success in their hit, "Fright Zone," but they also have

Trimester proves productive for Delta Chi

By James Lyons

Most Delta Chi's have been busy the past two weeks. On February 21 the house radio station, 89.7-KRQ, took place. The evening started at Delta Chi, moved to Sigma Chi, and returned to Delta Chi for more excitement and fun. Before midnight everyone was starry-eyed and raving about their first ever radio show. The Alpha Delta Lambda was the host of the evening for Delta Chi. The Delta Chi house was decorated for the occasion and looked like the house of a rock star.

Two of many E-RAU students who utilize the video games in the U.C. pub area.

The evening proved to be a great success and everyone is looking forward to the next one. The evening was atmosphere-filled.

Saturday afternoon the brothers decided to spend their week-end in the back yard. The majority of us decided to spend the week-end in the yard. We spent the week-end in the yard. The Polynesian Light Bull Saloon has been opened and it is a hit with the students. The Quiver Pub, Beethoven's.

A few of the members of Delta Chi will be available to attend the week-end. The week-end is expected to be a hit with the students. The Polynesian Light Bull Saloon has been opened and it is a hit with the students. The Quiver Pub, Beethoven's.

The idea of graduation is now

**Stepping Out**

By Anjali Syngrope Jr.

This week Stepping Out traveled to Williamsburg, Virginia to cover a fabulous College Innroitalier convention. The trip start from the 14-hour drive was a consumption pleaser. I enjoyed the taste of good food on the road and the joy of being with old and new friends as we walked back to life the century of the eighteenth century.

The weekend was dedicated to a weekend away from ourselves and all of the in-stuff. To give me an idea of what else is available in another, there are museums, shops, golf courses, grand pianos, music schools, and even horse and buggy carriages. Although we only spent a couple hours in every city, there stuck me as outstanding excursion. It was, I realized that I am frequent and very well put on. One has to thinkColonial Williamsburg to appreciate the many possible attractions and the many others are available. Even if you drive to know the quality of the place, it is a place worth visiting. One last but, Williamsburg is the most beautiful and colorful and I hope all of the others are returning. For me in next week.
Phillies, Braves look good in N.L.

This week's column marks the beginning of my first annual prediction contest. I invite you to try your hand with seven weeks per year, and my predictions, but the time I put into the contest is worth my while if it makes you a better bettor. It is possible you may want to make your own predictions. A little hard work won't hurt anyone.

Three predictions will pop up in each issue. This week I will handle the National League, and next week I'll take a shot at the American League.

The National League East should prove the easiest of the one competing divisions in baseball this year. Always providing a dominating feature, the Giants this year should be superior. Last year's winner, the St. Louis Cardinals, haven't changed that much from last year's championship form, but the Philadelphia Phillies have vastly improved ever since last year. They have guaranteed themselves the services of the best hitter in the National League (Steve Carlton). They also have acquired left-handed power hitters YaleFrance and Tony Perez, which is the left-handed power the team needed last year. Although they lose what may be the best defensive second baseman to the game in Manny Trillo, they have added 20-year-old Steve Bergey to take his place, thus succeeding in regaining our Re/Bo, Ribiero and Pete Rose.

Fighting in the National League West, the Atlanta Braves, who finished last year second to a very fine team, should be right back on top this year. The experience they gained after last year's season could also be invaluable to their quest for the pennant this year. Now that Bob Horner and company know what it is like to be in a pennant race, they will have no problem fighting off the Dodgers this year. The Dodgers on the other hand, have lost two of their potential offensive stars, Ron Cey and Tom Paciorek, who have now been in the off season. With the loss of these two players, Los Angeles will have the high-powered lineup they have the past few years. This is the time to be in the National League West. To see the teams equal this year, someone will have to fill the voids of second baseman, catcher and third baseman.

Well, there is my first shot at making predictions. I hope they work as well as my food reviews do. What else is happening in the National League?

\[\text{Faculty defeats Greeks}\\]

\[\text{Phila. Tribune} \text{ and } \text{Philadelphia} \text{ Press} \text{}\\]

There was a football game on Philadelphia's March 12, but the Greeks would have had a hard time recognizing the game. Some of the players: Slavon, Cuadra, Videla and Elrod.

This was no ordinary game this time. It was the annual clash of two of the most prominent departments of St. Peter's Seminary, Philadelphia, and St. Michael's, Philadelphia, and Athletic department. What is more, both teams made a point of being taken seriously.

The game was played at the Intercollegiate Association of American Football. After the game, the teams exchanged the traditional handshakes, which were not all that friendly.

Dear Mr. Williams:

At the conclusion of this academic year, I will complete my Bachelor Degree in Aviation Management. After reviewing the eligibility requirements for several positions in the management field, I feel that I covered the basic requirements needed.

I believe that my educational experience and practical job skills provide me with the necessary skills you are seeking to fill positions in this area. I would therefore like to request an application form. I would also appreciate any additional information you may have available which might assist me in becoming a valuable member of Beachcraft.

I shall return the completed form promptly. Thank you for your attention.

Sincerely,

John Q. Student

**TAKE THE WORD SERVICES CHALLENGE**

1. Prepare a cover letter.
2. Find a reliable address to send the cover letter to.
3. Type and prepare the letter.
4. Keep track of the time needed for the preparation.
5. Multiply your time times 300.
6. Compare it to the WORD SERVICES copy, available within 48 hours.

**SEE FOR YOURSELF THE DIFFERENCE**

WORD SERVICES wants to show you that preparing a cover letter is not an easy task. It is, however, necessary if one is expecting any type of employment after graduation. By comparing the WORD SERVICES cover letter with your cover letter you will be able to see the advantages in our service.

1. We will individually type and address up to 300 cover letters, resumes, and envelopes to companies of your choice. Over 300 specific addresses for each individually typed letter.
2. Specific names inserted into each letter.
3. Mistakes eliminated.
4. Vast amounts of time saved.

**ADDITIONAL SERVICES AVAILABLE**

1. Resume printing.
2. Envelope addressing.

WORD SERVICES can take all the worry out of your job search. Contact us immediately and we can show you how to make your employment hopes possible.

We know a lot of people have been waiting for interest rates to drop to buy their new Cessna.

So we've dropped them all the way to 5% for the first 12 months of your purchase contract. And for the balance of the agreement, you'll pay a small percentage above prime.

What's more, there are no prepayment penalties and you can finance up to 80% of the list price!

Single engine terms are up to 7 years, piston twins up to 8 years, with 1.5% over prime rate after the first 12 months.

135 to Citation II

You can pick from the entire line of Cessnas from the world's most popular trainer to the world's best-selling business jet.

This includes every single make, 132 to Pressurized Centurion, Piston twin, from Cruaders to Golden Eagles, Conquest I and II propjets and Citation I and II business jets.

And no matter which Cessna you choose, it's backed by the most comprehensive service and support organization in the world.

Limited time offer - To take advantage of these extraordinarily low rates, you'll have to complete your purchase agreement no later than April 30, 1983.

If you'd like the details on our new 5% financing programs, and information on where to buy the airplane you want, call us toll-free.

1-800-835-0025 (In Kansas, 1-800-362-0356.)
E-RAU Alumni speaks on B-767 systems

On Monday, February 25, Joe Hendry from Delta Airlines spoke during a meeting session for the faculty and students in the Astronautic Maintenance Technology Department. Hendry is the QFT (the job training) supervisor for Delta's new Boeing 767. The purpose of his visit to E-RAU was to give the AMT students an overview of the systems found on the 767, and to allow the "faces of the wall" to gain a personally directed design and construction.

Mr. Hendry presented some of Delta's history in 1962 and 83, graduating from the AMT curriculum. He has been employed by Delta since 1969, serving as both a maintenance technician and a training instructor. He enjoys the opportunity to serve in training because "it is a chance to be part of something special and to be successful in helping others to succeed. His training is on the job training and is geared to the manufacturer's needs. This allows the entire organization an opportunity to be part of their knowledge and capabilities. According to Mr. Hendry, this plane works very well for Delta. The Boeing 767's latest feature, reading, is something going on in one form or another.

The faculty in the AMT department were very impressed with Mr. Hendry. When he left he went aboard the Boeing 767 which is new and operating. It was a pleasure to meet such an articulate and dedicated professional. We realize that his training efforts started at this university. He is highly praise for the initiative he showed at E-RAU, and we wish him much success with the improvements which have taken place in the last 16 years. The airplane for which Mr. Hendry is a training line, the Boeing 767, is a most amazing airplane. The degree to which innovations are being used and the ability of the systems in the Boeing 767 itself make it almost unattainable, one of a few most advanced. Most of the critical innovations which made it possible are related to coming up in an atmosphere of control. The 767 makes use of some TV screen technology today. It is a type of TV screen which is the flight and engine instruments are pre-voiced. Each TV screen and all associated instruments are tied to a voice-activated system. By programming the computer, the airplane can be read to select, by a given destination, and fly a mission. All of this can happen without any help from the flight crew or intervention by emergency sources.

The flight crew can control the airplane system. Without the pilot having the power lever in the cockpit, the airplane will automatically fly by itself. It is cued by a certain amount of gas. In the case of the Boeing 767, the engine is pushed with the manual transverse. But later, is it able to fly by itself and flies a 15 percent less fuel per passenger than the Boeing 777 and 40 percent less fuel per trip than the Lockheed L-1011. The airplane has trained a tremendous piece of equipment. Mr. Hendry, the AMT Department Chairman, insists that the frame will hold more visitors from the field of aircraft maintenance. He feels very strongly that the AMT faculty need to be on top of current technology. Having the expertise come to us on an emergency basis to help.
