Daytona's first Airshow premieres March 31

By Geoff Murray
The Daytona Beach "Skyfest '84" airshow is just around the corner and promises to be filled with shows and static displays. The airshow is scheduled for March 31 and April 1, Saturday and Sunday. The event will occur on the field of the Regional Airport.

Top international acrobatic pilots and stunt aerialists on the program include the world-famous Blue Angels Naval Aerobatic Team based in Pensacola, Florida. The Blue Angels have entertained thousands throughout both the United States and Europe and also at the Kissimmee Airshow. The Blue Angels perform utilizing A-4Fs.

In addition to the Blue Angels, the renowned Eagles Aerobatic Team, led by former World Aerobatic Champion Charlie Hillard of Fort Worth, Texas, and the amazing Robert A. "Bob" Hoover of Rockwell International out of Los Angeles will be performing.

Hoover, a World War Two fighter pilot and former chief pilot for North American Aviation, will fly both his P-51 Mustang and the twin-engine Shrike Commander transport aircraft through a series of low-level acrobatic maneuvers that has thrilled millions of air show spectators around the world.

Hillard, along with team members Gene Soucy and Tom Poberozny, will fly the Eagle I

bi-plane in dual formation and head-on, aerobatics. The three Eagles fly wingtip to wingtip in the "V" formation while demonstrating precision maneuvers such as the "Hammerhead" and "Torque Roll", alternating with a split area sequence that features the individual pilots in snap rolls and hesitation rolls, all being accomplished at altitudes under 1,000 feet down to literally ground level. Hillard was the 1972 World Champion, while Soucy and Poberozny each have been members of the U.S.A. Aerobatic Team and are past National Champions.

The U.S. Army will send their "Golden Knights" parachute team to the Daytona Skyfest for a presentation of precision sport and tactical parachuting maneuvers, including the Diamond Track and "cut-away".

In addition, a select display area will feature ground displays of many military and civilian aircraft, including Warbirds from WW-II and antique or custom built aircraft. A comprehensive listing of these displays has yet to be announced.

Jim Franklin and John Kazian will perform a wing-walking act during the show. Franklin will be flying the aircraft while Kazian defies the laws of Physics on the wing of the aircraft.

The concept of the Skyfest was developed through the

Daytona Beach Chamber of Commerce and initially researched through Mayor Larry Kelley's office due to recognition of the vast popularity of air shows demonstrated by the annual Florida State Air Fair held in Kissimmee, an event attended by some 40,000 people.

The actual producers of the show are Richard Grisson and M.A. "Sonny" Everett in conjunction with the Chamber. Grisson has been the director of the Kissimmee event for several years and has produced other shows in Palm Beach, as well as being a consultant to the Canadian National Exhibition in Toronto, Canada.

Everett has been involved with air shows since 1963 and operated the "Air Show America" touring show during the 1976-77 Bicentennial celebration. He is Chief Narrator and Co-Chairman of the world's largest aviation event, the EAA Convention and Fly-in held in Oshkosh, Wisconsin, which last year has served as a technical coordinator for motion pictures and television, including the movie "Cloud Dancer" starring David Caradine and Jennifer O'Neill which ran on Cinema and HBO in the Fall of 1983.

General Chairman of the air show is Fred Leonhardt, Daytona attorney, and the Co-Chairman of Logistics is Bob

The United States Navy Airshow team, the Blue Angels, will perform at the Daytona Skyfest Airshow on March 31 and April 1. Several other acts will round out the day as well as numerous static displays.

Cessna opens Orlando heavy maintenance center

By William Fouk Avlon Staff Reporter
When the Cessna Citation business jet was first introduced in the late 1960's it was thought of as a step backwards. With its six-cylinder wing and small engines, the six passenger jet could boast no speed or endurance records. Yet this combination offered fuel efficiency, short field performance, and quietness that no other business jet could match.

The Citation hit the market with near perfect timing because the fuel crunch of 1973 was just around the corner. Now, almost 15 years later, there are over 1300 Citations throughout the world, making it the most popular small business jet on the market.

Keeping the Citation fleet flying is a unique network of six factory owned service centers located throughout the United States. The Southeast Service Center maintains Citations in the southeastern United States as well as Central and South America.

Formerly located at the Palm Beach International Airport in West Palm Beach, Florida, the Southeast Center recently moved to the McCoy Airport in Orlando. "The new hangar and work shops are twice the size of the Palm Beach facility and has already reached near capacity," said Larry Coleman, General Manager of the Southeast Center.

The Orlando center can handle eight Citations in the hangar for heavy maintenance. Citations usually stay for about five days, depending on the work being performed. The center

can do all types of maintenance including: inspections, hot sections, airframe repair, left and right, avionics repair, and virtually anything else. The Southeast Center usually serves 30 Citations per month or about 700 per year.

Twenty-five full time Airframe and Powerplant (A & P) mechanics are employed at the center as well as five avionics technicians, two parts personnel, and two inspectors. Work is performed using the crew principal.

Depending on the workload, a crew will usually consist of five men working on two Citations under the guidance of a lead man. There is no specialization, with the exception of avionics, and crews will do different jobs each day. For example a crew may do a hot section one day and airframe work the next day.

Training is an important part of any maintenance shop and Citation is no exception. Ongoing training is usually conducted on the premises by factory instructors. Because the center is a factory authorized service

See SKYFEST, page 12

At the Southeastern Citation Service Center, A&P mechanics work on aircraft using the crew method. Depending on the workload, five men usually work on two Citations.

E-RAU honors Titus

By Holly Vgth
The first annual Embry-Riddle Employee Banquet was held on Thursday, February 16 at Indigo Lakes Conference Center. The banquet was held to honor those employees with 5, 10, 15, and 30 years of service to Embry-Riddle.

Mr. Chandler Titus received the only 30 year award. Titus was born in 1924 on a farm in Vermont. In 1943 he joined the United States Air Force. During his ten years in the military he worked mainly as an aircraft maintenance technician, a flight

engineer, and an instructor of flight engineers.

While in the military Titus traveled around the world. At that time a flight engineer was in charge of all maintenance for the aircraft; it was also the highest rank an enlisted man could earn.

Titus worked on many of the aircraft, such as the DC-3 and Globemaster, used in developing the jets in use today. His position allowed him the opportunity to go through most of the

Seven invited to Twins' camp

By Kelly A. Shortt
Third baseman Dave Baker is one of seven minor league players invited to attend spring training with the Minnesota

Twins in Orlando this season. The six-foot, 190 pound right-hander is hoping to make the major league team's roster this year.

Third baseman Dave Baker makes the tag as the Twins edge the Mets 9-7 last week. Baker is one of the seven called up from the minors to try out for the pros.

The 27 year old Iowa native studied history at UCLA. "I tried several subjects but found history to be the easiest for me," said the third baseman.

A standout on the Granada Hills High School baseball team, he was the St. Louis Cardinal's 23rd pick in the 1974 draft. After a successful career at UCLA, Baker was selected by the Toronto Blue Jays as their 11th pick in the 1978 draft. He was then traded to the Twins for pitcher Don Cooper in 1982.

To date, Baker has played in nine major league games. As a Blue Jay, he made twenty appearances at the plate where he acquired a .250 batting average. When asked why he was traded by Toronto, Baker replied, "I felt that I was not being useful to the Blue Jays." Subsequently, a trade was made.

"When you're traded, you have no choice. You're like a head of cattle...you're owned by the team." With all the ins and outs involved with playing major league baseball, Dave Baker justifies his involvement

By Louis M. Kady
Despite student protest to Embry-Riddle's Tuition Equalization Program (TEP) at last Wednesday's Student body meeting, it is apparent that the University will continue its plan to implement it.

Approximately 200 to 250 students attended the Student Government Association sponsored event which was also attended by certain top-level administrators. Among those present were Dr. Jeffrey Ledewitz, Interim President, and Campus Provost, Carl Lippold.

The meeting began with opening statements by Ledewitz

Student protest of TEP fails

concerning the TEP; afterwards, he made himself available to answer questions offered by students. Following the meeting's adjournment, many students remained with the administrators to discuss the issue further.

According to Ledewitz in his opening speech "I want it known that I, too, am opposed to any tuition increase, and in favor of the petition which expresses your concern and provides the Administration with feedback."

The interim president went on to explain the justification for the TEP, which was approved by the E-RAU Board of Trustees last Fall.

"Ask yourself why you came to this University. Feedback I've received is because of E-RAU's quality and its reputation in the aviation industry. Without continuing to at least maintain that quality, we might, as well close," charged Ledewitz. "The tuition increase prevents a decrease in quality."

Further comments by Ledewitz indicated that the

University would have to freeze faculty and staff salaries if a tuition increase is not instituted. He demanded that salary increases are necessary in order to retain the high quality faculty that E-RAU possesses.

"Even though I am still opposed to a tuition increase just like you are, I'm even more opposed to a Quality Decrease

See TEP, Page 2

Dr. Jeffrey Ledewitz

Editorial

Student Government Involved?

The Tuition Equalization Program has been receiving much attention lately, not only from the student body but also by the university administration.

At last week's TEP rally, which was sponsored by the Student Government Association, more students collectively participated in voicing an opinion than ever before. While attendance figures were well below a representative ten percent of the entire student body—approximately 250 people participated in the rally—the same issues surfaced over and over again.

Most students realize that a tuition increase is needed to keep quality in the educational system at Embry-Riddle. What many question though, is faculty salaries and the recent hiring of E-RAU graduates into faculty positions. Good people are always in demand, as are the offers from private industry that draw experienced teachers out of the educational marketplace.

The issue brought up by the students centered around the communication process between university administrators and the student body. Wherever the breakdown occurred, students were not informed in a timely fashion of the intended implementation of the TEP program. This virtually eliminated the possibility of student input as the program will be initiated this coming Fall regardless of student participation in the decision making process.

Taking the economic situation into consideration, many students feel that there is an alternative to the per credit hour approach. The real issue is not whether we should raise the tuition or not; rather it is if we should use the per credit hour system to facilitate that increase. Unfortunately, there is little we can do about it now.

Possible Student Assistance...

Where do we stand? What can we expect? What are the possibilities for meeting the increasing tuition costs?

Filing for financial assistance through the financial aid office is your first step. If you receive aid now, chances are that you will receive it again. If you have not filed as of yet, fill out a financial aid data sheet and talk to one of the advisors. You may qualify for one, if not several forms of financial aid.

If your academic studies are superior to most, consider filling out a scholarship application forms. There are numerous scholarships available and not all are based on Grade Point Average. You may not be considered for a scholarship unless you apply. Check the deadlines and apply.

A Student Generated Program...

Two years ago, the Student Court implemented a scholarship program that is sustained by the fines collected from offenses committed on the Daytona Beach campus. With the endorsement from university administrators, we now have the Student Government Court Scholarship program that financially assists ten students per calendar year. This program could be expanded to help many more students should some innovative applications be made to existing disbursement techniques.

The Student Government Association collects approximately \$200,000.00 per year through student government fees. If ten percent of these collected monies were invested in an interest bearing account, many students could be financially assisted. It might look something like this: \$20,000.00 is put into a twelve month certificate of deposit which average ten percent in interest per year. This \$2,000.00 in interest could be utilized for financial aid.

The Student Government Association is our representative body and must do as we request. It is their job to carry out our wishes and do it effectively, diligently and in a timely manner. If we want to enact a program such as outlined above or implement some form of action, the student body must first muster support.

When we as students overlook alternative ways of subsidizing the cost of education, we do nothing more than a grave disservice to our fellow students. The resources are there as are the enterprising abilities. What is lacking is implementation.

If you feel this concept is viable or something else would assist needy students, go to the Student Government Association and tell someone. If you have any complaints, stop by the Avion office and speak to us. We will make sure your voice is heard.

letters 'NO, BILLY, THERE WONT BE ANY PRESSURE TO VOLUNTEER'...

TEP

To the Editor:

On Wednesday night approximately 250 students attended the Student Government Association (SGA) meeting on the Tuition Equalization Plan (TEP). I appreciated the opportunity to present the history of TEP and to explain why tuition will increase next Fall. The students' questions were excellent and thought-provoking. This dialogue assists in creating more effective communication throughout the University.

I'd like to thank the SGA for sponsoring the meeting; the Avion for its news coverage of this topic during the past few weeks; the Vets Club for their leadership and suggestions; and the Wednesday night participants for their interest and concern.

Jeffrey H. Ledewitz
Interim President

SGA

To the Editor:

At the March 12, 1984 Student Government Association (SGA) meeting an amendment

to the Student Government Association Bylaws was passed. This amendment read: "It shall be mandatory that all Division chairpersons report in person to the Student Administrative Council (SAC), at the Council's regular weekly meeting, concerning the overall activities of the respective Division."

This amendment took less than 15 minutes to discuss, write, and be voted upon. After hearing a Student Administrative Council Representative state, "We got him now," I received the impression that personal feelings were involved concerning the present E-RAU Entertainment Chairman, and the establishment of this amendment.

The issue concerning the mandatory representation of each Student Government Association Division was solved in September of 1983. The Student Administrative Council stated to each Division that there will be a representative from that Division at the SGA weekly meetings. This obligation was fulfilled by all Divisions. If the SAC had intentions to amend the SGA Bylaws, why was it not done?

months ago in September of 1983?

For an issue as important as the Bylaws to the Student Government Association Constitution should not amend—must take more thought than 15 minutes? Is this an effective approach to law making?

Ann C. Heinz
Box 2532

Nicaragua

To the Editor:

The situation in Nicaragua is extremely critical at this time. The Nicaraguan economy which depends heavily on only a few agricultural exports has been under increasing attack from CIA backed counter-revolutionaries. Several million dollars worth of damage has already resulted from attacks such as the one against the vital oil storage facilities at the port of Corinto last October.

Nicaragua needs a successful coffee harvest to be able to purchase basic food stuffs, medicines, spare parts for industry and transportation, and oil. Because of the urgent political and military situation, many Nicaraguans have been

mobilized in the defense of their country and cannot participate in the December-February coffee harvest this year.

In the United States, the National Network in Solidarity with the Nicaraguan People (NNSNP) is working to coordinate volunteer participation. U.S. citizens have a particular role to play in this harvest, because if it were not for our own government's attempts to overthrow the government of Nicaragua, the Nicaraguan people would be free to develop their own political life and their own economy in peace.

By participating in the volunteer coffee harvest, I hope to show that as an American citizen, I stand with the people of Nicaragua in their moment of need and that I oppose the policies of the Reagan Administration. I urge others who hold similar beliefs to write to NNSNP for further information on how to help the people of Nicaragua and to "make donations. Their address is: NNSNP, 2025 "I" Street NW, Suite 402, Washington, D.C. 20006.

San Francisco, California

CESSNA

(continued from page 1)

center for just about every component of the Citation, factory instructors from manufacturers such as Pratt & Whitney, Garrett, Collins, Sperry, and others frequently give maintenance seminars on new products and methods. This helps the staff to keep up with the new technology, yet takes less time from their busy schedules.

When the Palm Beach facility closed its doors and moved to Orlando it took with it all of its employees. "We've got quite a dedicated group," stated Coleman. The pay scale is close to that of the airlines, and the Orlando group is the second highest paid group in the company.

Since its opening last September, Coleman has hired five A & P's and one avionics technician. Because of the job

stability, Coleman looks for a corporate aviation background with three to five years of experience. He also noted that he has several Embry-Riddle graduates on his staff. Although several years of experience is usually required, Coleman has hired A & P's right out of school. When hiring recent graduates he looks at the students academic record and any mechanical experience such as automobile maintenance or apprenticeships.

Avionics technicians are not only hard to find, but their experience is more demanding. All of Citation's avionics people come from either the military or avionics manufacturers. "Although the industry needs avionics technicians, there are no avionics jobs in the service industry," explained Coleman,

"so your job opportunities are higher at the A & P level for jobs in the service industry." Once personnel are hired they are sent to Wichita for factory training or, if there is a group, the center will conduct a field training seminar.

Because the Orlando center is already operating near capacity, Larry Coleman plans to add a second shift. However, he pointed out that the overall objective for all Citation Service Centers is "To provide a high level of controllable expertise." The Citation is not only the most cost effective business jet, but it has the best warranty and service support in the industry.

Crime, Price Alerts, and Face Reading

Coming by 1994: Safe cigarettes and recreational drugs... a male contraceptive...

choice of sex of babies...cures for cancer and herpes...pills for sobriety and memory enhancement...sensibility prevention.

Price Alerts! **Auto Die Payers** Holding off a while could save a bundle. Prices, which started off a year or so ago at near \$1,000/unit, are already down to as low as \$499 - and could well be going for as low as \$399 by early next year.

Being a Spouse: A wife was allowed to sue her husband for injuries suffered in a boating accident. The Supreme Court of Tennessee, rule reversing its

previous rule banning such interpersonal lawsuits, said the rule was based on obsolete concepts of marriage and the legal status of women.

News: The Tennessee decision is in line with recent trends... but most states will bar lawsuits for negligence against a spouse.

Crime: A couple was assaulted, and the wife raped, by neighbors who attacked them in the garage of their apartment complex. They sued the landlord, showing he had not provided the normal security measures that were usual for apartment complexes. Further,

he had done nothing even after several crimes had taken place and the tenants' committee had requested greater security. The couple was awarded \$3 million in damages, plus \$2.2 million in punitive damages, because the landlord has shown a reckless indifference to the safety of his tenants.

Fun: Social fantasists don't have to be of the whip and chains variety. By liberating the imagination, even simple fantasies such as pretending to be in an exotic place or role-playing a character you would like to be can add playfulness to a relationship. Fantasies can allow partners to communicate real needs in a nonthreatening way. A good start for the shy: Write down a fantasy in detail and read it aloud to your partner.

Face-reading: Large round eyes indicate bravery, and joined eyebrows reveal a mean and unforgiving nature, according to the ancient Chinese art of *siang mién*. Thin lips: Brutal, selfish (unless tempered by a rounded nose tip). Smooth, wide forehead: Clever, decisive. Cleft Chin: A yen for the limelight. Large, long ears: Compassionate, understanding. Thin eyelashes: Sharp temper, wide space between eyes: Inner reserves of energy.

Money: Credit-card protection services are rarely worth their registration fees (\$12-\$25 per year). Most card companies have a toll-free 800 number. If you lose your cards, it's a simple matter to notify the companies yourself - the chief function of protection services.

Pimple Prevention: Acne-prone pretens (generally those whose parents have it) can be tested and treated before their skin erupts. An oil sensitive tape monitors sebum level and bacterial count. If readings are high, antibiotic ointments are applied. If they don't work, internal antibiotics are used. For stubborn pores: Vitamin A (retinoic acid).

Inferile Women: have long depended on unreliable blood tests to monitor ovulation. Better: Ultrasound - high-frequency sound waves that produce a TV picture. Using ultrasound, doctors can determine the precise time to administer fertility drugs or artificial insemination. Result: In one study, five of 15 women with chronic infertility became pregnant.

Steppen Out...

Spring Fling
Has seen better days

By Tony Pinto
Entertainment Editor

This week Steppen Out had the opportunity to take a long overdue rest and take it easy, catching Spring Fling and a bit of the spring break crowd.

There are times when I want it my way when it comes to spending money for entertainment. If it's a crowd I want, there's the Beachcomber for some elbow rubbing and tight maneuvering. If I want to get away with someone special, there are a number of places that allow for some leisure conversation and relaxed moments.

But when Embry-Riddle Entertainment takes my money for a show, makes me buy their beer and then sells me short on quality entertainment, I've got to gripe. I don't know exactly what went wrong with this show but someone didn't do their homework.

A couple of friends thought the posters weren't all that good; I don't know, they all look the same to me. Someone thought it was too hot; I thought about going to the beach also.

My roommate thought the cost of beer would exclude many; I didn't think \$ 1.00 was all that bad-my nose is growing longer. St. Patrick's Day was a common salute among friends; I heard it many times as they left for better festivities.

I really didn't mind, I had my beach chair, blanket and frisbee. Before I had the opportunity to get bored, several of us wore a path to my roommate's car. Thank God for the efforts of alcohol.

I gave in I must admit. I got on a bit of a gulf trip as I bought a beer. Was it Entertainment's fault? I thought not as I looked at all those staffers trying to make the best of a lousy situation. But I had to think again as I looked at the crowd-or lack of.

We had plenty of advertisement for this one; a full-page spread in the Avlon is pretty expensive these days and all that copy-I'll think twice before I do it again. We talked about it all week and anticipated the day; too much anticipation and a lot of disappointment. I doubt if the bands fulfilled their obligations on stage; who could get enthused about 200 people.

Speaking of crowds, with Spring Fling costing approximately \$ 10,000.00, that means we paid \$ 50.00 per person to attend. I have never been paid so much to just sit in the middle of a field and listen to music. After all, I never paid so much to have everyone else not attend.

All things are a bit easier in retrospect. But spending big bucks on a couple of groups or acts that collectively can't draw its paying crowd is a real shame. Embry-Riddle Entertainment should be in the business of competition, whether with the beach or another festivity.

Auditions - March 28th

Here's your chance to show your stuff. If you are a comedian, musician, singer, dancer or whatever, be sure to sign up in student activities by Friday, March 23rd. All acts will audition on Wednesday, March 28th at 5:30 P.M.

SEE YOU THERE

Entertainment should be in the business of providing services that appeal to many students on well planned dates and with some foresight. Planning an event is tough and E-RAU Entertainment is not new to the practice. So what went wrong?

Could be we ask the same questions as I. Why do we endorse such activities? Why do we spend so much for entertainment? What do we do in the future now that our largest musical event of the trimester turned out to be a flop? Can we endorse another Spring Fling? I hope not!

Whatever the reasons are, I don't care. I just want the Entertainment Committee to learn from this Spring Fling. True, not all productions are a success. But when it is one of only a few, things have to be better than they were.

I wish to thank all those on the Entertainment Committee who sweated in the heat and spent long hours setting up for the show; without them, you can't even hold a flop. I wish to thank Riddle Security; do they get any incentive pay for a thing like this? And lastly, Kathy Novak; I don't know why but I think it's because she had to stay throughout.

To those who were really responsible for Spring Fling. Thank! I now have the opportunity to visit my old college friends and say something negative about the trimester. No doubt, the more I drink, the more I won't mind. That's what I did Saturday until I left. Oh yes! Thanks for the double standard in advertising alcohol.

Beach
Regulations

During your springtime activities, following a few simple rule could mean the difference between a pleasant day on the beach and a rotten encounter with the police. While enjoying the beach, remember the following:

- The legal drinking age is 19.
- No open bottles of alcohol (including beer) on the beach or streets.
- Speed limit on all beaches: 10 MPH.
- Don't park on the beach between the hours of 3-5:30 A.M.
- Pedestrians have the right of way on the beach - don't sunbathe in traffic lanes.
- Hitch-hiking is against the law.
- No camping or sleeping overnight on the beach, streets or parks.
- Parking at a yellow curb is illegal. Out-of-town cars will be towed.
- Parking on hotel or motel property is against the law unless you are a guest - cars will be towed.

Spring Fling: let the pictures do the talking

E-RAU Running Club raises money for Easter Seals

Mike Wadner of the E-RAU Running Club runs on the World's Most Famous Beach to raise money for Easter Seals. The 24 hour beach run was sponsored by the club and Burger King.

Neither warm temperatures or rain could stop the Embry-Riddle Running Club from running for 24 hours this past Saturday and Sunday in order to raise money for Easter Seals. The 24

hour run began at 9:00am on Saturday with 16 club members running the first mile. During

the following 24 hours, the club battled fatigue and soreness to keep at least one club member running.

By Sunday morning, time had taken its toll on the club; however, at ten minutes prior to 9:00am, the remaining club members forgot about their

pain and ran the last mile together, followed by a victory swim in the Atlantic.

The Running Club members amassed a total of 448 miles over the 24 hours. This distance is equivalent to the distance required to travel from Daytona Beach to Atlanta, Georgia. The top three total mile winners

were Nick Sirianni, Robert Glasscock and Faculty Advisor Dr. Frank P. Jozak; each ran 63, 56 and 55 miles respectively.

The total amount of money raised for Easter Seals has yet to be determined, but the total will be printed in the next issue of The Avion.

Twins defeat Mets in pre-season action

By Holly Vath
Avion Staff Reporter

The Minnesota Twins are just one of the many major league baseball teams involved in Spr-

ing Training here in Central Florida.

The Houston Astros play out of Cocoa Beach, the Minnesota

Twins out of Orlando, and the St. Louis Cardinals out of St. Petersburg. The Minnesota Twins played the New York Mets on Thursday, March 15.

In one of the first plays of the game, Kent Hrbek, first baseman for the Twins, dropped the ball at first and allowed the runner to reach first. It was a poor start for the Twins but they managed to get their act together during their turn at bat. They finished the first inning three runs ahead, 3-0.

The Mets, though, looked worse than the Twins. After three innings they still had not gotten a hit. After the third inning the Twins were leading by a score of 7-0. In the top of the seventh the Mets started to come back. They loaded the bases and managed to score 3 runs to make the Twins 7-3.

In the eighth inning the Twins really felt pressured after scoring no runs in the seventh. The Mets again loaded the bases. Rick Lyssander then walked two Mets in and by the end of the ninth inning the score was tied 7-7.

In the tenth inning the Mets came through with two runs and defeated the Twins 9-7.

One of the starting players for the Mets is one of their most promising players, Darryl Strawberry. Strawberry was the 1980 number one draft choice for the Mets. Even though he went hitless in the game, he may be one of the saviors of the consistently losing Mets.

The stands were filled with both Twins and Mets fans. As the Mets rallied for a victory in the seventh inning the fans started cheering for the Mets in unison. The most amazing thing about Spring Training is the relaxed atmosphere of the game and players.

Before the game many of the players from both teams were signing autographs and chit chatting with the fans. It is nothing compared to a major league game during the regular season. The opportunity was there to get close to the baseball hero's of the 1984 baseball season. Spring Training games are played until the end of March. Tickets are available the day of the game for most games.

Sports Editorial

Dodgers to repeat in NL West

By Joe Elm
Sports Editor

The start of the 1984 Major League Baseball Season is only two weeks away and that means it's time to take a look at the coming season and make my second annual fearless predictions.

This week I'll preview the National League and next week I'll take a look at the American League. The National League will be especially tough to call this year because there are four teams in each division with a legitimate shot at the title if they get a few breaks and stay healthy.

National League East

I'm going to go with the Pittsburgh Pirates in the East because they were the hottest team in baseball in the latter part of last season, and if they can start this season like they finished the last one, they will be the favorite to win the division.

Although they lost Dave Parker, Richie Hebner, and Mike Easler, they have added ex-Red Sox outfielder John Tudor, Mervyn Wynan is coming off a very successful rookie season, and they have also signed 37 year old free agent outfielder Amos Otis.

The defending National League champion Philadelphia Phillies have made wholesale roster changes and are switching to a younger line-up. Trying to shed the "wheezy kids" nickname they had last year, they released Pete Rose (43), Tony Perez (41), Ron Reed (41), and Joe Morgan (40). The Phils are going with youth this year and Paul Owens hopes that there is enough leadership on this team to carry them through the season. If not, the Phillies could find themselves lower than second come season's end.

The Montreal Expos are trying to do what the Phillies did in 1979 by signing Pete Rose to some how provide the intangible winner's attitude that has been lacking over the past few seasons. The Expos have been one of the best teams on paper over the past few seasons but they have failed to do it on the field.

National League West

If the Dodgers can rid themselves of most of the errors they committed last season (168), then they will be considered the favorites to repeat as NL West champs in 1984. A lot of the errors can be attributed to the young infield and the transition of Pedro Guerrero from right field to third base.

The Dodgers also possess the best pitching staff in the league, last year leading all of baseball with a team ERA of 3.10. They will miss the services of Steve Howe who has been suspended for the season for drug use, but Tom Niedenfurter (8-3, 11 saves, 1.90) maybe able to pick up the slack.

If San Diego can stay fairly injury free this year they could make the Dodgers sweat a little come September. The Padres were beset by injuries throughout the season; most notably was Steve Garvey, who missed 62 games with a dislocated left thumb.

The acquisition of Goose Gosage from the NY Yankees in the off season should shore up any relief problems the Padres might have even thought about having.

The magical folding act called the Atlanta Braves may be the major disappointment of the year, and may not even get a chance to lose the lead down the home stretch. Although they desperately need pitching help, Ted Turner released home town favorite Phil Niekro. Also, Pascual Perez (15-8, 3.43) was charged with cocaine possession in the off season in the Dominican Republic and probably won't be back with the Braves this season. Yes, the Braves can hit, but when their hitters go into their inevitable slump, they won't have the pitching to carry them through.

Predictions

N.L. EAST

1. Pittsburgh
2. Philadelphia
3. Montreal
4. St. Louis
5. NY Mets
6. Chicago

N.L. WEST

1. Los Angeles
2. San Diego
3. Atlanta
4. Houston
5. San Francisco
6. Cincinnati

Golf Club to help in Tourney

Members of the Golf Club will serve in several capacities at the Professional Golf Association (PGA) Seniors Tournament including caddies, standard bearers, and range marshalls.

While club members will fill many of these positions additional volunteers are needed. If you would like to assist, a member of the Golf Club will be available in H-125 between noon and 4 p.m. on Wednesday, March 21, and Thursday March 22 to provide information on jobs available. All volunteer workers will be given a free pass to the week long tournament.

Most of the famous names of the seniors tour are expected to be at Pelican Bay including Sam Snead, Julius Boros, Miller Barber, Gay Brewer, and defending champion Gene Littler. Arnold Palmer, while not yet confirmed, is expected to play again this year.

In other Golf Club news, the golf team played in the Hatter Classic sponsored by Seton University in late February. Led by Brian Thomas with a 76 on the last day team members Josh

The E-RAU Eagles baseball team split a double header this past weekend. They defeated Macomb Community College 9-5 in the opener, but dropped the second game 9-3. Kelvin Hamilton (above) was the winning pitcher in the first game. Star of the two game

set was Glenn Frazier of the Eagles who hit three home runs on the day. The Eagles' next game is Thursday, March 22 at 15:00. The game is against Ohio State-Newark and will be played at Derbyshire.

TWINS

(continued from page 1) in pro ball with just these words, "I like baseball."

Last season, while playing third base for the Twins-Class AAA farm team in Toledo, Baker was selected as the International League's Best Defensive Third Baseman with 140 games played. He had 82 put-outs, 305 assists, and 27 double plays. His .946 fielding percentage was good for third in the International League.

While at Toledo, Baker built up a .278 batting average with 88 RBI's and 144 hits in 518 at-bats.

During the off season, Baker played with the Clearwater Twins of the Florida Instructional League. "I played in the Instructional League during the off season," Baker said, "to improve my playing abilities. Normally I play third, but I've been working at two new positions." The third baseman added, "Learning to play catcher and first base will, I hope, make me a more versatile player."

As of March 16, Dave Baker has played in five games with the Twins in the Grapefruit League.

Article IV
Membership, duties, qualifications of the Student Administrative Council & Student Union Board

Section 1
The Student Administrative Council

Section 2
The Student Union Board

We, the students of Embry-Riddle Aeronautical University, in order to promote the internal unity and welfare of the student community, to respond to the challenges of society, believing in the concepts of democratic government, human rights, and individual responsibilities while recognizing and acknowledging the professional principles upon which this University was founded, do ordain and establish this Constitution for the student body of Embry-Riddle Aeronautical University.

Section 1
The Student Administrative Council shall consist of:
1. a chairperson, the S.G.A. President (elected at large)
2. the Vice-President of the S.G.A. as an ex-officio non-voting member elected at large.
3. S.A.C. Advisor shall be mutually agreed upon by the University Administration and S.A.C. as an ex-officio non-voting member.
4. Student Representative:
a) one (1) Student Representative for each 500 undergraduate students who were enrolled in the trimester preceding the elections (excluding the summer trimester), with at least six (6) credit hours, to be elected at large. The minimum of elected representatives shall be five (5).
b) two (2) additional Student Representative to be appointed by S.A.C. to represent the students residing in University housing, who will each have (1) vote on the S.A.C.
B) Power, Duties, and Limitations: shall:
1. be the policy and decision making body within the S.G.A. to include the responsibility of division administration, S.G.A. fees, and representation of student views to the University Administration.
2. appoint an elections committee to run the S.G.A. elections. The elections are to be held in March.
3. have the final approval of all S.G.A. budgets.
4. have the authority to override a Presidential veto by a 75% majority vote.
5. provide for the compilation and publication of legislation.
6. advise and consent by a majority vote appointments made by the President of the S.G.A.
7. approve and allocate the Fiscal Budget and all student funds in accordance with the constitution.
8. establish its own meeting times and rules of procedure as detailed in the S.G.A. Bylaws.
9. assemble in open meetings at frequent intervals for the deliberation of legislation and the business of the student body.

Article I
Rights and Freedoms

Section 1. Each student shall be entitled to all rights guaranteed to persons under the constitution of the United States, the State of Florida, and Embry-Riddle Aeronautical University policy.

Section 2. The right to establish and maintain a democratic student government in which each student of the S.G.A. shall have an equal right to participate. Student shall have the right through their student government and its delegates to participate in the making of University policies via recommendations and the right to petition for changes in either academic or non-academic regulations.

Section 3. The right to the classroom to freedom of expression, discussion and inquiry related to the course. The right to evaluation during and after completion of the course based solely upon academic performance which is to be defined by the professor of that class on the first meeting of the trimester.

Section 4. In accordance with Embry-Riddle Aeronautical University policy and the Family Education Rights and Privacy Act (Section 517 of Public Law 93-380, Education Amendments of 1974) subsequent amendments, students have the right to access to their official records as described in the act. This includes the right of protest against any disclosure of information by the University concerning a student's views, beliefs, or political associations. The right to privacy with regard to a student's records shall be upheld except by the students own expressed permission or under valid court order. The academic records shall be kept separate and may be referred to by appropriate University personnel.

Section 1. The Student Union Board shall consist of:
1. a chairperson, to be the S.G.A. Vice-President.
2. S.U.B. Advisor shall be mutually agreed upon by the University Administration and S.U.B. as an ex-officio non-voting member.
3. Representatives:
a) A VICE EDITOR-IN-CHIEF, TO BE ELECTED FROM THE AVIONMART.
b) PHOENIX EDITOR-IN-CHIEF, TO BE SELECTED FROM THE PHOENIX STAFF.
c) ENTERTAINMENT COMMITTEE CHAIRPERSON, TO BE SELECTED FROM THE ENTERTAINMENT COMMITTEE STAFF.
4. Secretary-Treasurer as an ex-officio non-voting member.

B) The S.U.B. shall:
1. coordinate the budgetary and managerial duties of the S.G.A. financed divisions.
2. submit divisional budgets to the S.A.C. for approval.
3. have the authority to conduct performance reviews of S.G.A. financed division and in the event of an unfavorable outcome, make recommendations for action to the student court.
4. have the right to override a Vice-Prudential veto by a 75% majority vote.
5. assemble in open meetings.
Qualifications for the Student Union Board:
a) must not be on disciplinary probation.
b) must be at least a part-time student holding a minimum of six (6) credit hours and have been at least a part-time student holding a minimum of six (6) credit hours for at least one (1) full trimester prior to running for office.
c) must attest in writing to the intent of remaining an undergraduate student pursuing not less than six (6) trimester hours of credits on the Daytona Beach Campus for three (3) consecutive trimesters following the election.
d) must have at least a 2.5 cumulative grade point average as certified by the submission of documentation deemed acceptable by the S.G.A. election committee.
e) only one of the above criteria may be waived by the election committee.

Section 2. The Student Union Board shall consist of:
1. a chairperson, to be the S.G.A. Vice-President.
2. S.U.B. Advisor shall be mutually agreed upon by the University Administration and S.U.B. as an ex-officio non-voting member.
3. Representatives:
a) must not be on disciplinary probation.
b) must have been elected by majority affirmative vote under the rules of the S.G.A. election committee, or be selected by a majority vote of the current S.A.C. to fill a vacated position, or in the case of division be selected by the staff.
c) must be an undergraduate student pursuing not less than six (6) trimester hours of credits on the Daytona Beach Campus. Excluding the last trimester of office for an official who will graduate at the end of that trimester.
d) must maintain a minimum of a 2.00 cumulative grade point average.

Article II
The Student Government Association

Section 1. Name: The student governing body shall be known as the Embry-Riddle Aeronautical University (E-RAU) Student Government Association (S.G.A.).

Section 2. Purpose: The purpose of the E-RAU S.G.A. shall be:
a) the representation and presentation to the Administration of student views concerning University policies.
b) to strive to achieve the goals as outlined above in the preamble.

Section 3. Membership: All undergraduate students at E-RAU, as defined in the University catalog, shall have a full vote in the government through their elected representatives or right of petition. All undergraduate students taking at least six (6) credit hours are eligible to be members of the S.G.A.

Section 4. Organization: The S.G.A. organizational structure shall be composed of the Executive Branch, the Student Administrative Council (S.A.C.), the Student Union Board (S.U.B.), and the Judicial Branch.

Section 5. Divisions: The Divisions of the S.G.A. shall consist of the Student Administrative Council, the Judicial Branch, the Avion Newspaper, Entertainment Committee, and the Phoenix Yearbook.

Section 6. Officers: The President, the Vice-President, the S.A.C. representatives, the Editor of the Avion, the Chairperson of the Entertainment Committee, the Editor of the Phoenix, and the Chief Justice shall be considered as officials of the S.G.A., as each will be considered to hold elected positions. In addition, the S.A.C. Advisor, and the Secretary-Treasurer are also considered officials, though non-voting/ex-officio.

Article V
The Judicial Branch

Section 1. Name: The Judicial power of the S.G.A. shall be vested in the Student Court, herein referred to as the "Court."

Section 2. Purpose: It is ordained that the Student Court protect the rights of the student body by insuring the rights of the individual and through the interpretation of the Constitution.

Section 3. Membership: The Court shall consist of five (5) Justices selected from the student body by the S.A.C., plus the Chief Justice, elected from the student body during the general S.G.A. elections.

Section 4. Meetings: Meetings require a quorum of three (3) Justices, chaired by the Chief Justice.

Section 5. Authority and Powers: The Judicial Court shall extend to all cases arising under this Constitution, the Bylaws legislation enacted by the S.G.A., to all student cases arising from traffic violations; and to all cases which may be referred to the Court by the Dean of Students Office, including but not limited to matters involving the personal conflict of students, disputes between two or more students. The Court also has the power to fine and recommend probation, suspension or dismissal as well as swearing in of new officers, S.G.A. representatives, and Justices.

Section 6. Appeals: Decisions and recommendations of the Court shall be subject to review through established University channels as outlined in the student handbook.

Section 7. Replacement of Justices: Should a Justice or Chief Justice vacate his position, the S.G.A. President shall nominate a qualified student to serve. The nomination is subject to approval by a majority vote of the S.A.C.

Article III
The Executive Branch

Section 1. The President shall:
a) be chairperson of the S.A.C., and shall cast a vote only in the event of a tie.
b) delegate duties and responsibilities to members of the S.A.C. as necessary to conduct the business of the S.A.C.
c) have the authority to veto any resolutions made by the S.A.C. within ten (10) calendar days of the resolution.
d) publicly express the views and recommendations of the S.G.A.
e) serve a term of one year to expire upon the installation of the elected President.
f) nominate students to serve on University and Board of Trustees committees with the ratification of the S.A.C.
g) call and conduct any necessary joint sessions of any or all divisions of the S.G.A. to include the S.U.B.
h) serve as a member of the University Board of Trustees.

Section 2. The Vice-President shall:
a) be chairperson of the S.U.B. and shall cast a vote only in the event of a tie.
b) delegate duties and responsibilities to members of the S.U.B. as necessary to conduct business of the S.U.B.
c) have the authority to veto any resolutions made by the S.U.B. within ten (10) calendar days of the resolution.
d) publicly express the views and recommendations of the S.U.B.
e) serve a term of one year to expire upon the installation of the elected Vice-President.
f) attend all S.A.C. meetings and report on the activities of the S.U.B.

Section 3. The Secretary-Treasurer shall:
a) be selected jointly by the University and the President of the S.G.A. and shall hold this position until relieved by the S.G.A. President and the University.
b) perform the duties as directed by the current job description and title on file, which shall be subject to amendment and/or approval by the S.G.A. President and the University.
c) attend S.A.C. meetings as an ex-officio, non-voting member for the purpose of submitting periodic financial reports and to record the meetings minutes.
d) shall assist and coordinate an annual internal audit of the S.G.A. financial records.

Section 4. Succession:
a) should the President vacate his office for any reason, the Vice-President shall assume the duties of the President until the next general election.
b) should the Vice-President vacate his office for any reason, a new Vice-President shall be elected by the S.G.A. in a joint session of S.U.B. and S.A.C. The new Vice-President shall be elected from the current members of S.A.C. and S.U.B.
c) should no official of S.A.C. or S.U.B. desire the position of Vice-President, the President shall nominate a student at large for approval by a joint session of S.A.C. and S.U.B.

Article VI
Amendments to the Constitution

Section 1. Amendments to this Constitution may be initiated by any student.

Section 2. Amendments must include a proposed date of effectiveness.

Section 3. Amendments to this Constitution must receive a two-thirds (2/3) majority vote from the S.A.C. or a signed petition of 10% of undergraduate students carrying at least six (6) credits, to be submitted at the next referendum.

Section 4. A referendum shall be conducted when called for by a two-thirds (2/3) majority vote of S.A.C. Such action shall be a roll-call vote and shall be recorded in the permanent records of the S.G.A.

Section 5. An issue shall be considered passed by referendum if there is a majority affirmative vote of at least 10% of the student body.

Section 6. If approved under the referendum procedure, then the amendment shall be considered part of this Constitution.

Article VII
Impeachment

Any member of the S.U.B. or the S.A.C. may initiate impeachment proceedings by requesting a joint session of the S.U.B. and S.A.C. through the S.G.A. Advisor. The Advisor shall then call a joint session and supervise election of a chairperson for the impeachment proceedings. A 75% vote of the existing voting members of the S.U.B. and S.A.C. is necessary for a recommendation(s) to impeach. The person being impeached shall not vote. Such recommendation(s) are then referred in writing to the Student Court for final action. The reasons for impeachment must be submitted to the concerned person by the Student Court at least ten (10) days before proceedings commence. The Student Courts decision is final.

Article VIII
Ratification

Section 1. Ratification of this Constitution shall require a majority affirmative vote in a referendum open to all student body in accordance with Article VI.

Section 2. This Constitution becomes effective when voted upon and passed.

Av. Awareness Day a success

On March 7, the Reserve Officer Association (ROA) held an Aviation Awareness Day which gave some Junior Air Force ROTC cadets from Mainland Senior High School a look into the possible careers in aviation. With the aid of various faculty members and supervisors, ROA was able to establish an event which will hopefully become a longstanding yearly event for the Daytona Beach Community.

The tour of E-RAU began at 10:00 a.m. and introduced the cadets to the AMT and Engineering facilities which proved to be extremely enlightening to all who attended. At 11:15 a.m. they were taken to our flight line where they were able to see the hard work and determination which is a must to teach and every aviation student. After a brief lunch with the Air Force ROTC Detachment 157 Cadet, the Mainland cadets were transported to the Daytona Beach Regional Airport where they received a V.I.P. tour of

the tower and radar facilities. Afterwards they were escorted aboard the Nautilus 707 parked on the D.B.A. ramp, and they returned to E-RAU to conclude the day's events.

The ROA would like to thank the following for making this day a total success: David Brécia, David Boudreaux, Wesley Brown, Andrew Pountakis, Ernest Desimone, Lester J. Koch, Robert Lesky, Cheryl Metzger, Victoria Thomas, Paul Valentine, and Det. 157.

Management Club hosts IATA dinner speaker tonight

The Management Club has reached a climax for this spring with their next dinner speaker. Mr. Knut Hammarstjöld, Director General of the International Air Transport Association (IATA), will address the club on the topic of "Aviation in the year 2000."

The kinds of IATA resolutions range from the administrative aspects of the IATA Traffic Conferences, seating pitch, schedules, timetables, reservations, ticket procedures and credit plans.

There will be a sign up sheet on the Management Club board for anyone who would like to help sell programs at the airshow. It's a great way to get into the show. The sale of the programs will provide a large source of revenue for the club, so sign-up and show your support.

Mr. Hammarstjöld will be in the United States to accept an award here in Florida. The dinner will be on Wednesday, March 28, due to Mr. Hammarstjöld's busy schedule. Once again the event will take place at Treasure Island Inn and will be an "all you can eat" buffet style.

Reservations for the dinner can be made by sending \$8.00 (member) or \$9.50 (non-member) to Debbie Kane at box 7570.

Reservations for the dinner can be made by sending \$8.00 (member) or \$9.50 (non-member) to Debbie Kane at box 7570.

The IATA is the trade association of the world's scheduled international airlines. The aim of this private organization is world airline cooperation. IATA has proven to be a useful and necessary mechanism in the formation of a considerable number of unilateral agreements throughout the world. These agreements delegate IATA to provide rate recommendations on tariffs, agency commissions, rebates, and currency conversion rates.

The E-RAU Amateur Radio Club will have a meeting on Thursday, March 22 at 7:00 p.m. in the Faculty/Staff Lounge in the University Center.

Members also have access to an amateur radio belonging to Red Cross located near Halifax Hospital, in exchange for their generosity the ham will provide volunteer radio communications in a local, state, or national emergency. We are still trying to set up a station on campus but limited space has been a hindrance in our efforts.

Sigma Phi Delta wins tug-of-war

Once again the Brothers of Sigma Phi Delta (SPD) proved that mass is not everything, and the will to win prevails over all in the end. With a squad of

determined brothers, the heaviest weighing in at only 457 pounds, SPD managed to win the most important event during Greek Week competition, the Tug-of-War.

However, despite this incredible feat, we were unable to win overall competition. We would like to congratulate the brothers of Delta Chi in their overall first place finish in the Greek Week competition. Also congratulations to Sigma Chi for coming in second and winning the Spirit Award. We would like to thank all the fraternities on campus for their brotherly competition.

Office has kindly offered to supply a French newspaper if there are enough French speaking students enrolled. The club is currently looking into this and will decide on which paper we would prefer at the next meeting.

In an entirely logical engineering decision, the brothers decided to put more feet on the rope instead of pounds. The engineers were able to win their last five of six tugs. The most exciting moment came against Delta Chi. The Delta Chi squad was just inches away from a victory, when the tide shifted the other way. With an unexcelled effort put forth by John Frawley, who was the anchor man, we were able to overpower and drag the Delta Chi team to defeat.

VOTE

1984 ELECTIONS

Plans for a trip and some fund raising activities will be discussed before the Morocco presentation at Thursday's meeting. We need as many people to attend as possible so that all our decisions reflect the feelings of our numbers. Hope to see you there. Au revoir!

Yet another fight remained in the way of first place, a tug with Lambda Chi Alpha. The winner would be able to claim first place. Again, an exhausted but super psyched platoon of engineers pulled on every ounce

AFROTC Vice Commandant to visit campus today

By C/Capt. Rob Tatum
Col. Hansen, Vice-Commandant ROTC, will be visiting Det. 157 on Wednesday, March 28. This will be the uniform day for all labs. Combination two (long sleeve shirt with tie) will be worn. Col. Hansen is the new Vice-Commandant - let's look extra sharp while he's here!

those who helped plan this event, and congratulations to Major Cramley on his promotion.

There will be a Junior ROTC drill competition on March 24. It is to be held at Memorial Stadium and begins at 7:30 a.m. Everyone is invited.

Congratulations to Group Two, Squadron One, the overall winners at field day. The final Non-Commissioned Officers Academy graduates

have been selected. Everyone put in a lot of work and did a fantastic job.

The second drill competition and promotion cycle has past. The competition looked really tough this time.

Upcoming events include: Pass-in-Review practice at 9:00 a.m. on March 24, Commanders Call on March 30, Line Up on March 31, and the Daytona Beach airshow starts on Saturday, March 31.

Alpha Eta Rho plans sock hop

By Kim Robinson
Last Thursday evening, March 13, Alpha Eta Rho sponsored a distinguished NASA speaker, Norman Poff. The fraternity was more than honored to host Mr. Poff. He gave a very interesting and informative presentation on some of NASA's programs.

and Dr. Connolly for helping to organize Mr. Poff's visit. This Saturday evening AHP brothers decided to plan something a little out of the ordinary by having a 50's sock hop. At this time brothers and pledges will grease their hair, break out the poodle skirts and saddle shoes to dance the night away to the sound of Elvis, the Platters, Coasters, and other music of this magical era. All brothers are asked to practice the jitter bug, twist and other 50's moves because disco dancing will not be tolerated.

With only a month of the trimester left, softball season is getting down to the wire with AHP fighting hard. The team

deserves a great note of commendation as their season record is 5-1 with their only loss to the toughest team in the league, Southern Ice. But among the fabulous victories was a game with Delta Chi in which AHP toppled over by a score of 24-1 and a game with Sigma Chi in which they won 15-1. Each of the two games were shut out till the last inning when their opponent scored a single run. Charlie Nicholson, captain of the team, is looking at promoting play-off games in hope of capturing the championship. All brothers are urged to come out on Sunday and watch the team battle it way to first place.

The experiment takes different aircraft and crashed items at different angles and on different surfaces to see what the impact on the dummy passengers really were. Among one of the aircraft NASA crashed was a Cessna 172, the audience could really appreciate this part as the film was slowed down to show what exactly happens in a crash situation. Alpha Eta Rho would like to thank Kim Mahoney, Mike Wiggins

By Suzanne Shillingford
"Bonjour! The French Club is pleased to announce that french classes have begun. The class meets every Wednesday in A210 at 7:00 p.m. and everyone is welcome. The class will be conducted by members of the club and faculty advisor, Bob King. At our next meeting on March 22 at 6:30 p.m. in A-211.

we will be having a slide presentation on Morocco. We hope to have a presentation on a different country every meeting. If you have any slides, books, or photographs of your country which you would like to share, please let us know at the meeting on Thursday. The International Student

Orientation Leaders Needed

We are looking for individuals with leadership and communication skills to join the ORIENTATION TEAM.

The E-RAU Orientation Program...

...assists incoming students in completing smooth transitions from high schools or other colleges and universities to Embry-Riddle and the Daytona Beach community.

...provides Orientation Leaders with opportunities to gain practical experience in leadership, effective communication and teamwork.

...provides an opportunity to meet new people and have a good time!

Applications and job descriptions may be obtained from the Student Employment Office. The deadline for submitting your application is March 30, 1984

With its distinctive "Eagle" emblem as part of each airplane's dramatic paint design, the Eagles Airshow Team and their Eagle 1's thrill audience airshows with one of the most popular formation aerobatic performances.

SKYFEST

(continued from page 1)

B-Maria with Al Godwin of Sun Bank serving as Co-Chairman of Operations. Under their leadership several committees follow who will be in charge of sponsorship sales, advertising, ground support, personnel and concessions.

A handfull of Embry-Riddle's clubs and organizations are also involved with the airshow. The Interfraternity Council, led by Geoff Murray will be managing concessions during the weekend event.

E-RAU's Management Club, with President Bill Flinderson, is offering advertising space in the special Skyfest souvenir program to area business and a variety of sponsor programs are available for companies or individuals. The Society for Collegiate Journalists will be doing the layout and final preparation of the program that will be sold during the airshow. Arthur Eyzaguirre, Vice-President of the journalism honoree, is diligently working to assure that

the program is published on time and is appealing.

The E-RAU AFROTC Detachment is highly involved in the area of static displays. Lieutenant Colonel Ralph Collins has secured numerous static displays that will be present at the show.

Tickets are on sale now for \$3.00, the day of the show for \$7.00. However, all students and senior citizens will can purchase the tickets for \$4.00. Embry-Riddle students with

valid IDs can purchase tickets in the Student Activities Office for \$4.00. The special E-RAU ticket is good for both days of the show.

Off campus tickets can be purchased at all 7-11 stores, Sun Banks, Select-A-Seat, Chamber of Commerce Office, Volusia Mall, Palm Coast, and Holiday Inn.

The gates for the show will open promptly at 9:00am and the show will commence at 1:15pm.

Naval Aviation Club to tour carrier

The Naval Aviation Club will hold its next meeting tonight at 7:00 p.m. in E-109 to discuss three upcoming tours. Retired Captain Macleiden will be the guest speaker.

On Wednesday, March 21 a second tour of the USS Saratoga, an aircraft carrier based in Jacksonville, will be given. The tour is not limited to just the hangar deck or flight

deck, but will include the whole ship. Lunch will be provided in the officers wardroom for a mere \$1.50. The first trip to the Saratoga proved to be one of the club's most interesting events. Many areas not open to the public were visited.

On Thursday, April 5 NAS Cecil Field is the home of the A-7 and S-3 squadrons of the

Atlantic fleet. Both communities will be toured.

Our annual trip to NAS Pensacola will occur on April 19 and 20. The tour will include a graduation ceremony of the AOCSS class, sea-land survival schools, Naval Aviation museum, etc. Three E-RAU graduates who are now in primary flight training will be there to answer questions and

possibly show the group around Whiting Field. Accommodations Thursday night will be in the officers quarters at a minimal cost.

Remember, if you are not a paid member but wish to go, club dues are \$5. Anyone wishing to participate should attend the meeting tonight in order to get further details and make sure they are counted in.

The High Frontier offers solution to nuclear arms race

By Tim Van Milligan
Avion Staff Reporter

The challenge of peace through the use of space is what the High Frontier is all about, and it was the subject of Dr. M. Droge's speech given to the L-5 Aerospace Society on Wednesday, March 7 in the University Center.

Mr. Droge is currently on loan to President Reagan's Office of Public Liaison White House Staff. Before this he worked for the United States Information Agency from 1956-1966, and then he joined the Agency for International Development. He was also on a

one year loan to Lyndon Johnson's National Security Council. Besides all this he served for 4 years as assistant to the Director of the Action Agency (The federal agency for domestic and international volunteer activities).

Mr. Droge's speech touched on many aspects of exploration and settlement of man's past history. Such as Columbus' trips to the America's and the movement of American west across the country. But most of his speech was devoted to man's involvement in space, the nuclear arms race, and how the former could probably solve the

latter.

This project called the High Frontier involves using off-the-shelf defensive weapons and putting them in orbit around the earth to destroy any offensive missile launched.

It can also protect against terrorist groups whom may get a hold of a nuclear weapon and threaten cities around the world. Another result of this project would be the destruction of all nuclear weapons by launching them into the sun. This would be done because the system would render them useless.

The project is open to the Russians to join, because it

would be to their benefit also. If the project were to be passed by Congress, the first steps could be in effect by 1987 and when the system is complete there would be 437 satellites protecting all countries below.
