## Riddle Security spoils burglary over break

Calhoun, Woods and others foil auto stereo bandit's sinister plans

By Bill Fisher  
Avon Staff Reporter

Over the Christmas break two student vehicles, parked at the south end of the dorm 1 parking lot, were burglarized. On December 17, 1986, at approximately 7:41pm, ERAU security officer John Calhoun found that a 1977 Dodge had been stolen from the van in the passenger side window. Standing about 50 feet from the van were two males, holding a shopping bag, who started to run when confronted by the security officer. The suspects then fled across Clyde Morris Boulevard.

As the suspects were fleeing a small white car stopped on Clyde Morris across from the parking lot and dropped off one of the males

parking lot, and was apparently involved with the robbery suspects. After the suspects fled, the security officer notified Daytona Beach Police and the owner of the vehicle of the incident.

Mr. Calhoun then returned to the scene of the robbery to search for any items the robbers may have taken. Among the trees between the parking lot and Clyde Morris he found a shopping bag containing an Alpine car stereo that had been stolen from the van, and some tools.

While looking through the bag, a small white car stopped on Clyde Morris across from the parking lot and dropped off one of the males

sooner by the security officer. The car then proceeded down Clyde Morris, entered the ERAU campus through the main entrance, and stopped behind the University Center by the rear entrance, in Epicure Food Service.

When the security officer addressed the car, he again fled the scene. Mr. Calhoun then contacted ERAU Security Officer Norma Woods and directed her to block the car behind the U.C. with an ERAU security vehicle. This was accomplished and Daytona Beach Police were notified of the apprehension.

The Police arrived and placed the suspect under arrest on felony charges. At this point the suspect

admitted to robbing another vehicle in the Beach area, and then fled in the University Center. The security officer, which is sponsored by the Student Activities Office, will be present from 9 a.m. to 4 p.m. It will include static displays, and demonstrations by the different organizations on campus.

ERAU Chief of Security Bob Walker stated that for the last seven years there has not been a break-in at the dormitory.

"The reason for this is to introduce all clubs and organizations to the students, to the faculty, and to the staff here at ERAU," said Laurie Ranfus, C&O day coordinator.

The purpose of this day is to consider a chartered requirement for most clubs and organizations. However, some clubs have asked not to participate, and they are taken on an individual basis.

According to Miss Ranfus, some clubs have a membership

capacity, such as the Bowling League. Others have certain criteria that the students must meet before they can consider applying for membership, such as honor societies. This gives the students an opportunity to know what they want to do, and work towards reaching this goal. And many other organizations are open to most students.

The set-up will be similar to last year, with the sports clubs on the first floor, Drama, Families and Seniors in the west hallway, and all the other organizations in the activities area, under the movie screen of the University Center area. Set up for C&O day will be the night before the event.

The Drama Club will be performing their play, "Cats," and the band will be performing.

# Calhoun, Woods and others foil auto stereo bandit's sinister plans

By Bill Fisher  
Avion Staff Reporter

Over the Christmas break two student vehicles, parked at the south end of the dorm I parking lot, were burglarized. On December 17, 1986, at approximately 7:41pm, ERAU security officer John Calhoun found that a 1977 Dodge van had been broken into through the passenger side window. Standing about 50 feet from the van were two males, holding a shopping bag, who started to run when confronted by the security officer. The suspects then fled across Clyde Morris Boulevard.

As the suspects were fleeing a small white car started up, left the

parking lot, and was apparently involved with the robbery suspects. After the suspects fled, the security officer notified Daytona Beach Police and the owner of the vehicle of the incident.

Mr. Calhoun then returned to the scene of the robbery to search for any items the robbers may have dropped while they fled the scene. Among the trees between the parking lot and Clyde Morris he found a shopping bag containing an Alpine car stereo that had been stolen from the van, and some tools.

While looking through the bag, a small white car stopped on Clyde Morris across from the parking lot and dropped off one of the males

seen earlier by the security officer. The car then proceeded down Clyde Morris, entered the ERAU campus through the main entrance, and parked behind the University Center by the rear entrance to Epicure Food Service.

When the security officer addressed the man dropped off by the car, he again fled the scene. Mr. Calhoun then contacted ERAU Security Officer Norma Woods and directed her to block the car behind the U.C. with an ERAU security vehicle. This was accomplished and Daytona Beach Police were notified of the apprehension.

The Police arrived and placed the suspects under arrest on felony

charges. At this point the suspects admitted to robbing another vehicle in the parking lot.

Brock Adkins and John Perry, ERAU employees, assisted security in the apprehension and detention of the suspects.

ERAU Chief of Security Bob Waltens stated that for the last seven years the security department has requested that all vehicles being left over the break be parked at the south end of the Dorm I parking lot. "During that time this was the first robbery experienced." Students leaving cars over the break should stop by the security office and fill out an information form that gives the address and phone number where the student will be staying.

# Clubs plan big day for membership recruitment

By J. Miguel Vidal  
Avion Staff Reporter

The Clubs and Organizations (C&O) day this trimester, will be held on Wednesday, Jan. 21, in the University Center. The activity, which is sponsored by the Student Activities Office, will happen from 9 a.m. to 4 p.m. It will include static displays, and demonstrations by the different organizations on campus.

"The purpose of this day is to introduce all clubs and organizations to the students to the facility, and to the staff here at ERAU," said Laurie Ranfors, C&O day coordinator.

Participating on this activity is considered a chartering requirement for most clubs and organizations. However, some clubs have asked not to participate, and they are taken on an individual basis.

According to Miss Ranfors, some clubs have a membership

capacity such as the Bowling League. Others have certain criteria that the students must meet before they can consider applying for membership, such as honor societies. This gives the students an opportunity to learn what they are, so they can work towards reaching this goal. And many other organizations are open to most students.

The set-up will be similar to last trimester, with the sports clubs on the Flight Deck, the Fraternities and Sorority in the west hallway, and all the other organizations in the activities area, under the movie screen, of the University Center area. Set up for C&O day will be the night before the event. The University Center will be closed and locked, therefore everything should remain secure.

Other than displays by almost sixty campus clubs and organizations, there will be music, give

## Orientation Team help new students adjust

Avion photo by Dave Novak

Members of the Orientation team live it up in the University Center at "A night in

Margaraville," which was held last Thursday night for all new incoming students

By J. Miguel Vidal  
Avion Staff Reporter

The week preceding the beginning of each trimester is the time when all new freshmen, and transfer students go through the orientation process.

Due to the small number of new incoming students, orientation this trimester was not as busy as it was last fall. Transfers and freshmen in a combined group, arrived at ERAU on Monday, Jan. 5, and completed orientation two days later. A total of nearly 300 students and 80 parents received orientation.

Orientation is conducted by a group of student workers, better known as the Orientation team (or O-team). The O-team is selected, trained, and supervised by Linda Bloom, Director of Counseling, and Lynn Evans, a member of the Counseling Department.

According to Linda Bloom, a member of the O-team is considered a very important part of the Orientation process, because he or she will be the first person that a new incoming student will be in touch with, on his arrival here at ERAU.

Some of the requirements needed to be an O-team leader are that he or she should be able to give at least one year commitment to the job, have positive thinking about the university, be open and friendly, and

## New Editor leads Avion this Spring

By Paul Novack

On December 2, a transfer of editorship took place on the *Avion* newspaper staff. The position of Editor-in-Chief was transferred from Mark Stern-Montagny to Timothy Van Milligan. This change took place following an annual election for this position which occurs regularly at the end of every Fall trimester.

Tim, a senior Engineering student, has been a member of the *Avion* since the Fall of 1983. He has served several staff positions: Managing Editor (Spring 1986), Advertising Manager (Fall 1984, Spring 1985, Fall 1985, Summer 1986), Diversion Editor (Fall 1986), and has been an *Avion* Staff Reporter since he joined the staff in 1983.

Tim says that his goals as Editor are to "bring professionalism into the newspaper staff, and hopefully to channel that professionalism into

Tim Van Milligan

the newspaper. The results to the student body would be a larger newspaper with more of the information that they need."

He went on to say that he "would like to give back to the staff what he was given when he started out on the newspaper staff, that is a sense of pride in Embry-Riddle and in the quality of the *Avion*."

## Editorial

# Journalism can lead to better newspaper

If the *Avion* is to remain an "award winning newspaper," the paper will continue to require an informed, enthusiastic staff of reporters and editors who know something about journalism. This same group of people should know how to write as well.

Since the *Avion* is a student publication, produced by volunteers, we cannot expect to have a perfect paper; but we can hope to hold down the typos, spelling, and grammatical errors. The *Avion* staff is the first to recognize the importance of honed writing skills. We are also the first to admit that we do not have the most perfect skills in writing.

Knowing how to communicate through the written word is a fundamental skill required in all aspects of the business world. Perfected writing skills are necessary whether you're writing a balance sheet, a technical brief, or a news release. Time and time again we have heard from visiting engineers, astronauts, businessmen, and recruiters of the importance in possessing the ability to write — and how so many people in their respective industries do not have those skills. "The employee who can write well will be more successful than an employee who can't."

In the heat of deadlines, the *Avion* will often have more mistakes and errors than we care to admit. Only sufficient training in journalistic concepts, along with opportunities to practice writing in the classroom, can hope to minimize the shabby results our paper sometimes produces. The spelling and grammatical errors are apparent to all, but the transgressions in journalistic style and newspaper layout is not so evident. Those errors do exist.

The University could help to minimize these journalistic errors by doing more to encourage students to sign up for the Journalism course. This solution would work except that no one takes the course. If a few people do register for it, the course will either be cancelled, or just have a handful of students — very few of which wind up working on the *Avion*.

The course is now only good for two credits, and this simply does not fit into the schedules of most students. If this course can be "beefed up" in content to allow a three-credit course (something that professor and *Avion* advisor Dr. Osterholm says he can do), then we think more students would register. There would immediately more *Avion* staffers signing up. In fact, the *Avion* would encourage the use of its office as a "lab" to supplement the classroom instruction.

More students registered in a better journalism class can only have a positive effect on the University. The paper will look better, and that will make the University look better. Of-

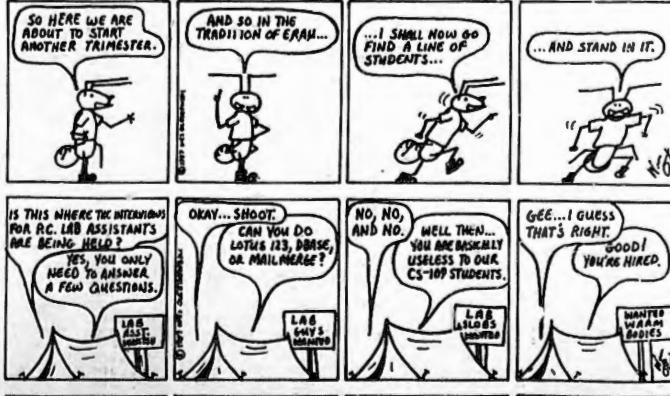

course, training in journalistic concepts, along with opportunities to practice writing in the classroom, can hope to minimize the shabby results our paper sometimes produces. The spelling and grammatical errors are apparent to all, but the transgressions in journalistic style and newspaper layout is not so evident. Those errors do exist.

The University could help to minimize these journalistic errors by doing more to encourage students to sign up for the Journalism course. This solution would work except that no one takes the course. If a few people do register for it, the course will either be cancelled, or just have a handful of students — very few of which wind up working on the *Avion*.

The course is now only good for two credits, and this simply does not fit into the schedules of most students. If this course can be "beefed up" in content to allow a three-credit course (something that professor and *Avion* advisor Dr. Osterholm says he can do), then we think more students would register. There would immediately more *Avion* staffers signing up. In fact, the *Avion* would encourage the use of its office as a "lab" to supplement the classroom instruction.

More students registered in a better journalism class can only have a positive effect on the University. The paper will look better, and that will make the University look better. Offering courses in tech report and creative writing, as well as requiring reports in just about every course on campus, is not enough. Journalism is an important style of writing that more people should know — even if they are not going to work for a newspaper one day. University administration should work immediately to make Journalism a "real" course and give it the importance it deserves.

## Letters to the Editor

### PRIVACY?

To the Editor:

This letter is addressed to building maintenance at ERAU. Would someone please tell me why the Flight Line men's room doors have to be propped open all year round? I don't particularly like someone watching me while I'm washing my hands at the sink or for that matter, washing my pants. I'm supposed to fly or squatting in front of the mirror or whatever else I want to do in **IN PRIVACY**. What's the story anyway? Is adequate ventilation a problem? If so does anyone know about ventilation fans? Hey! Let's solve this problem before the cold weather gets here. We deserve better than a cold toilet seat!

Name withheld upon request

*(the story of John's Co-op was first published.)*

In the Avion dated Nov. 26, 1986, I read with interest about your work on developing a simulator for a bat-chip for your Computer Science Co-op Course.

I congratulate you on being selected for this fine opportunity and for the valuable experience you are gaining for your professional career. I invite you to come to one of our department faculty meetings and take a few minutes to tell us about what you did and comment on the relevance of your Co-op Program to the real world out there.

I also encourage you to share some of your positive experiences in the CS Co-op Program with your fellow students at ERAU the medium of the student newspaper -- the Avion.

## Three students die

By Steve Cagle  
Avion Staff Reporter

Edward Reynolds, sophomore, died Friday, January 9, in Ft. Lauderdale when he was struck by a car.

Reynolds an Aeronautical Science student from Charlotte N.C., was enroute to Boca Raton FL, with his sister, to visit his parents when he accidently got hit by a car.

A memorial service is tentatively scheduled for Sunday, January 18, in the Common Purpose Room.

John Childers, senior, died November 29, at his Park Ridge Illinois home of accidental asphyxiation. Childers had finished his final flight course during the fall semester and was to have graduated in December.

A memorial service is scheduled for Sunday, January 18, when University officials will posthumously present his degree to his family.

John Pruis, a former Embry Riddle student, died December 11, when his plane crashed into Lake Manistee, Michigan. Pruis attended ERAU Fall 1984 - Spring 1985.

Vice President Ledewitz sheds new light on upcoming tuition hike

## Financial burdens dictate Fall increase

By Larry Benninger  
Avion Staff Reporter

During his student forum presentation on December 2, 1986, Executive Vice President Ledewitz continually referenced the Association of Governing Boards Reports article: "Why Tuition Keeps Going Up," to explain the reasons for the constant escalation of college expenses. The following is a annotated excerpt of this article.

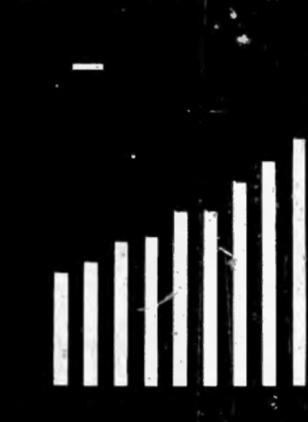

1. Colleges and Universities now are making up for losses in Real Income that faculty experienced in the 1970's. The projected cost increase for the ERAU budget for 1987 is \$2.5 million. The biggest portion of this is pay adjustments to the faculty, whose salaries had been held down during the 70's and early 80's. Also included are newest faculty costs and fringe benefits.

2. Costs of doing business at the University could not continue to remain the same. The cost of learning materials (library books, periodicals, visual aids, etc.) has continued to rise! Energy costs continue to escalate despite conservation methods.

3. The costs of replacing outdated equipment have doubled in the last decade. This is especially true in the technical fields. More high-tech equipment is continually needed to replace older equipment that does not meet industry standards.

4. Wage and salary rates of operation and maintenance persons not doubled during the last 10 years. Embry-Riddle has attempted to combat these costs by employing a large number of students in support staff positions. This, plus the low area pay scale has kept this increase below the national average.

5. Costs have increased because of employment taxes. Social Security tax tripled between 1974 and 1984. Health and medical costs have also increased considerably during

the past decade.

6. The cost of new buildings and facilities is a source of financial pressure on the university. Embry-Riddle has done more building in the past few years than most universities. ERAU will spend about \$1 million on capital Equipment in 1987. Another \$300 thousand will be spent on facilities, though not necessarily on the Daytona Beach Campus.

7. Federal Student Aid has not kept pace with the increase in the costs of colleges. The increase in

Guaranteed Student Loan amount to tuition is the first increase in student funds in years. There have only been cutbacks in Federal Grants and Government sponsored Scholarships.

8. Private gifts have not increased enough to relieve financial pressures. Because Embry-Riddle is a relatively young school, there is not much money available as private gifts. There is no strong alumni association. Therefore, the brunt of the universities expenses will continue to be met with tuition increases.

## Education secretary desires a revamp of federal aid programs

**WASHINGTON, D.C.** — Claiming that college tuition is skyrocketing in part because there's so much student aid around, Education Secretary William J. Bennett says he wants to revamp the entire federal aid program.

Bennett's proposal, outlined two weeks ago at a Washington, D.C., conference on higher education funding, would eliminate federal subsidies for certain loans and develop a repayment program based on post-graduation income levels.

His plan, however, drew fire from college officials and the American Council on Education (ACE) almost as soon as it was announced.

"There is no reputable evidence that student aid causes increased college costs," contends Charles Saunders, ACE's vice president for legal affairs. "On the other hand, cuts in federal student aid have contributed to institutional (decisions) to increase tuition."

"What Bennett is doing is rationalizing further attempts to reduce student aid," agrees ACB spokesman Bill Kriger.

Bennett claims some colleges and universities raise tuition far more than the level of inflation simply because administrators know students can turn around and get the extra money from aid programs.

At the late November funding conference at Catholic University, Bennett noted college costs have risen 150 percent since 1973, which is 36 percent more than inflation during the same period.

As a result, federal funding for higher education is running "out of control," Bennett argues.

"We believe that for colleges to increase costs beyond inflation, and for the government to subsidize those increases, contributes unnecessarily and irresponsibly to rising costs," he says.

Bennett told the conference the federal government could save a "significant amount of money" by revamping aid programs into an "Income Contingent Loan Program" (ICLP).

This program, to be tested under a \$10 million project offered at ten selected schools, will allow student to base federal loan repayments on what they expect to earn after they graduate.

In addition to its cost-cutting emphasis, says Bennett Press Secretary Loye Miller, the ICLP "obviously will have much more money available than the Guaranteed Student Loan Program" because private banks - not the government - will make the loans.

He adds it also would allow students to borrow more than they could under previous programs, and that such loans could be more easily repaid because the repayment schedule will be based on a borrower's income after graduation.

"At no time could the payments be more than 15 percent of your adjusted gross income," Miller notes. "You could pay it off virtually like a mortgage on a house."

"Bennett had a good idea," agrees Dr. Eileen Gardner of the Heritage Foundation, a conservative Wash-

ington, D.C., think tank.

Gardner acknowledges students who graduate into low-paying jobs will end up paying more interest than they would under existing loan programs, but she believes the proposal will force schools to examine their funding procedures.

"As long as the government funds what is demanded, colleges will demand more and more," she charges. "It's the analogy of the dog chasing its tail. The faster the dog goes, the faster the tail goes. The dog never catches up."

Other critics dismissed the idea as neither good nor new.

They argued against the plan's rigidity, the question of bringing private banks into the student aid picture, and the morality of letting students graduate so deeply in debt. Not fair, counters University of Iowa Prof. Jeffrey Cox.

"What Bennett is proposing to do is control costs in educational support by victimizing students again," University of Iowa Prof. Jeffrey Cox says. "Our position is to keep the public universities as accessible as possible."

Cox acknowledges schools do not always plan well for their financial future, but he feels that even tougher times are ahead if the new plans are adopted.

"This proposal damages accessibility. Low tuition is far, far more preferable than excessive student loans," he notes.

However, Bennett remains unconvinced.

Although some universities will prove they are worth today's skyrocketing tuition costs, "I suspect that some will not," he concludes.

# BLOCK

(continued from page 1)

of maximum block hours from 18 credit hours to 16 hours. This makes it difficult for students to average 16 credit hours per trimester, especially since most classes are three credits.

If a particular class is not offered when a student needs it, he or she may be forced to take an unwanted number of credit hours. The administration is aware of this problem. Addressing this situation, Chancellor Eric S. Dente stated "It is diffi-

cult to pull for everyone. We are trying to balance between higher tuition cost to teach all classes all the time, and higher costs of the student being enrolled too long." Students will have to plan well in advance to avoid scheduling problems.

The new tuition system will generate needed revenue to continue to improve facilities and educational programs at Embry-Riddle. The expenditure of money will include, but will note be limited to: faculty pay

## The many faces of the Avion...

By Timothy S. Van Milligen  
Editor-in-Chief

As the new editor of the Avion, I would like to welcome you back to Embry-Riddle and to the first issue of your newspaper Avion. As you can see by the different banners across reading heads on this page, the student newspaper of our school has not always been named the Avion.

Going back through the microfilm of the newspaper, I found original title of the student newspaper to be the *Jetstream*, with the first issue bring in June 1960. The first issue was six inches more than a few 8-1/2x11 sheets of paper stapled together. In fact, it wasn't until February 11, 1972 that the newspaper was printed on newspaper.

In February of 1967, the newspaper changed its name to the *Avion*. The *informer*, the banner from the first issues of the *informer* changed every

week, which did little for the continuity of the newspaper, but the newspaper had become a means of communication for reaching all the students as quickly and accurately as possible.

April 4, 1969, was the birth date of the first Avion. The name was chosen because the school had just changed from being the *Jetstream* to the *Avion*. The newspaper should have a name which symbolized the school in which they attended. The name Avion was chosen because it was made up from two words: Aviation, and Clarion (which means brilliantly clear). It is interesting to note that with a nearly close resemblance between the *Jetstream* and the *Avion* paper couldn't go wrong. If that was what they thought then they were right. At the end of this term, the Avion will be 18 years old, and is still going strong.

The first full size (broadsheet) Avion appeared on November 30, 1973. The reason for the switch to a

larger size paper was because of a newspaper change, which affected the entire newspaper industry. This was at the same time when our aircraft were almost grounded because of fuel shortages.

It was also during this time, that the Avion purchased a \$5,000 IBM Composer. This was the first type that was formerly used by all publications. Before the purchase of the IBM Composer, the newspaper was typed on an ordinary office typewriter. The use of the computer, lasted until the Spring of 1974 when the Avion upgraded its technology and acquired the Compugraph's 7200 Edwriter. With it, the Avion had full photo-typesetting capabilities. Spelling mistakes, which were once a problem with the IBM Composer, were now easily corrected on-screen of the Edwriter. The Editor also allowed

## AVION

(continued from page 4)  
a larger newspaper, covering a wider range of events and features.

The Edwriter was interfaced with the personal computer world in the Fall of 1984. In that year, with the funds to extend advertising revenue, the software and electronic interface were purchased to allow stories to be transmitted from the office computer to the Edwriter. This opened a vast store of information which wasn't previously available to the Avion. Because PCs can talk to each other through computer modems, the computer could be input faster from remote locations, not to mention being downloaded from news services such as from Associated Press or the Associated Press. Club articles, which often came into the office illegible, could be received in typable form. The computer revolution has saved the Avion large amounts of time in putting the newspaper together while opening up the Avion to a wider range of

content.  
The latest purchase of the Avion has been an AST Turbohome interface, and an Apple Laserwriter Plus. The laserwriter will allow copy to be typeset directly from the office computer network, with a speed at a fraction that it would take for the Edwriter to do the same. While the Avion will always remain the same, as a friend to all, in 1973, "the Avion" has been striving for a student publication that would reflect the opinions and questions of the student body as a whole. The staff of the Avion hopes that some interest has been generated, some questions answered, and the college news has been reported objectively and completely."

I am proud to serve as the new Editor-In-Chief of the Avion, following the footsteps of the all the previous staff members, who were builders of what the newspaper is today: "An Award-Winning College Newspaper."

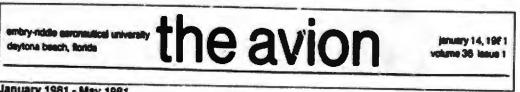

As far as we know, we are the only college in the nation to have such a capability at this time. We look forward to these advances to bring to you, our students, a greater volume of pertinent information. It has been said that the times we are living in is the information age. That is what the Avion is all about, the prime source of information that you need to make intelligent decisions.

With all the new equipment, and through all the many faces of the Avion, the Informer, and the Jetstream over the past 27 years, the commitment of all the former staff members to the Avion has always remained the same. As a friend to all, in 1973, "the Avion" has been striving for a student publication that would reflect the opinions and questions of the student body as a whole. The staff of the Avion hopes that some interest has been generated, some questions answered, and the college news has been reported objectively and completely."

I am proud to serve as the new Editor-In-Chief of the Avion, following the footsteps of the all the previous staff members, who were builders of what the newspaper is today: "An Award-Winning College Newspaper."

# NAVAL

Naval Aviation Club

By Kathy Ward  
Club Writer

Naval Aviation Club has a dynamic speaker for the first meeting on Jan. 14, 1987, Rear Admiral Butz Chase. He is the commander of the Submarine Division, Atlantic at NAS Cecil Field. This entails the F/A-18 Hornet, S-3 Viking and A-7 Intruder communities. Admiral Chase is a former A-7 attack pilot and brings a multitude of experience to his new command. The opportunity to meet and talk with Admiral Chase should be a learning and interesting experience to those that come. The meeting will be in G-109 at 1900 hours on Weds. Jan. 14.

The NAS Pensacola trip was a success. Those who went found it to be very informative. Activities included an ACOC graduation, squadrons visits, the Naval Aviation

Museum, interesting speakers and talks from former ERAU students. The next trip is NAS Pensacola is tentative for Dec. 1987.

Members of the club would like to extend a special congratulations to the Dec. graduates that will soon enter programs leading to their Navy wings. These were: Mark Kollonia, Kelly Childs, Steve Gray, Jan Ozark, Dan Merrill, Dave Wagner and Dean Williams. We wish them the best of luck.

Highlights on the agenda for the Spring semester is a trip to an aircraft show in Feb., weekly simulator trips to NAS Cecil Field, trips to Pine Castle Electronic Warfare Range, static displays, guest speakers, and a variety of other programs.

The Naval Aviation Club meets the 2nd and 4th Wednesday of every month in G-109 at 1900 hours. Everyone is welcome. Come and see what Naval Aviation Club is all about.

# AXA

Lambda Chi Alpha

By Scott L. Ulrich  
Vice President

It seems like only yesterday when all of us were huddled up back for finals and making plans to go home. Twenty three of our brothers just couldn't say goodbye last fall after finals. Instead, they all met together on Dec. 21 in Boston. With

everyone wearing the fraternity color, they "took the town."

It is the beginning of another semester and Lambda Chi Alpha is once again making big and bold approaches. Rush week is quickly approaching and the brothers are excited about meeting new prospective members. Rush officially begins on Monday, January 19.

# AFROTC

Air Force Reserve Officer Training Corps

By C/Mr. Buck Windham  
Public Affairs Officer

Seniors now have only 101 days until commissioning!

The first Commander's Call of the year will be held this Friday, Jan. 16 at 4:45 p.m. in the basketball courts in front of the basketball courts. All cadets should wear their blue Detachment T-shirt and should be prepared to have a great time.

The Special Projects Division is now planning trips to various military bases, aerospace related corporations facilities, and airshows in the area. As the trimester progresses, more details regarding these activities will be announced.

All cadets who need to take the

The Special Operations Division (SOX) will be conducting tryouts on Jan. 18. The tryouts are Color Guard, Band and Choir. Within the next two weeks, all cadets over 100 and 200 level cadets are strongly encouraged to participate in corps activities of this kind. More information will be distributed during Leadership Lab.

Any students who are not enrolled in AFROTC but have an interest in earning a commission as a second lieutenant in the Air Force through the ROTC program should stop by the Detachment here on campus, or call extension 1290.

All cadets who need to take the

name and box number in the ERAU Skydive club mailbox in the Student Activities Office.

The club will be purchasing more equipment this year, and start training a collegiate team for the college meet coming up next Dec. in our own "home DZ" of Deland.

We are looking for more first

Club Writers

local parade. In addition to the above activities the Riddle Riders will continue to explore new frontiers and beautiful and exotic places throughout the state of Florida every Sunday.

This term's coming activities appear to be as exciting as the last. Our agenda will include at least one visit to the Orlando Speed World to observe and participate in the Volusia County Motorcycle Safety Foundation's "advanced rider" motorcycle safety courses and has asked the Riddle Riders to be the first group to try them. We are also investigating the possibility of a trip to the Everglades. Another trip this term is to the Florida Keys where the water is crystal clear and bikinis are abundant! Also, Bike Week is coming up in March and as usual the Riddle Riders will be among "The Few, The Proud, The Big Riders," riding in the tradi-

tion of the Riddle Riders.

The first meeting will be held on Thursday January 15th at 7:00 p.m. at the VFW Post 601. Our decision on Sunday, January 18th will be determined at Thursday's meeting. If you would like to join, r. or female, please come to the meeting or leave a note with your name and box number in the Riddle Riders mail box in Student activities office. We will get back to you.

Aerospace Society

By Jim Banks  
L5 Space Writer

Are you on your way into space? If you are, then your first step might be to join the L5 Aerospace Society. L5 is a student organization dedicated to educating Embry-Riddle students about the past, present, and future activities of the world's space programs.

The Aerospace Society will hold

its first meeting tonight (Wednesday), at 7 p.m. in the Common Purpose Room (CPR). The CPR is located in the University Center, room 101, on the ground floor and the Student Activities office.

Events planned for this term have yet to be finalized. But you can be sure that each week members of L5 will be informed and amazed by the

# VETS CLUB

## Veterans Club

By Laurie Ranflos  
Vets Club Writer

The Vets Club is a social organization composed of Veterans of all branches, on active & inactive status, and their spouses.

In February, we have the opportunity to raise funds by working at the Daytona International Speedway during the two hour races and at the Busch Clash. When April rolls around, we will sponsor the 14th Riddle Regatta! This is the time when clubs, organizations, departments, individuals and local companies challenge each other in an inner tube race down the Halifax River. Awards & spirits are plentiful upon completion of this event. Proceeds go toward a local needy charity. Start getting plans ready for

those teams and rafts!

The Vets Club will hold its first meeting for the Spring 1987 semester on Friday, January 16, 1987 in the early evening. Please check the Vets Club bulletin board which is located across from the Student Government office, on the Flight Deck ramp, for exact meeting time and location. EVERYONE is welcome! We will also be set up in the U.C. est. Club Organization Day, Wednesday, January 21, 1987, from 9:00 a.m. - 4:00 p.m. to distribute more information about our club. Stop by and join in on the fun!

For more information, please contact Bill Heidenreich, Vets Club President, or Ron Costa, Executive Vice President, by leaving a message in the Student Activities office:

## NOTICES

### SENIOR CLASS ELECTIONS

If you are interested in running for Senior Class President or Vice President, or are interested in being on the Senior Class Council, please contact the student Activities Office in the U.C. est. 1049, to schedule a meeting with Laurie Ranflos, Senior Class Advisor. The goals and objectives of this group and the responsibilities of the officers will be reviewed in detail. This group will organize the class party, secure discount hotels for the guests of April Graduates, decide on a class project, and coordinate on activities.

If you have any questions concerning this matter, please stop by the Student Activities Office.

### MANDATORY CLUB MEETING

On Friday, January 16, 1987, a mandatory meeting for all club officers will be held. All NEW officers will meet in room A-109 from 1:30 p.m. - 2:30 p.m. The new regulations, benefits and C & O Day will be discussed at this time. ALL EXISTING officers will meet in room A-109 from 2:30 p.m. - 3:00 p.m. A brief review of updated information, as well as C & O Day, will be discussed.

Please plan on having at least one officer attend this meeting. This is a chartering requirement.

NOTE: If you are a continuing officer, and have your C&O Packet from the fall, please bring it with you. Thank you.

### C&O DAY

Clubs and Organizations Day will be held on Wednesday, Jan. 21, 1987. This event is sponsored by the Student Activities Office. Club representatives will be set up at tables around the perimeter of the U.C. from 9 a.m. through 4 p.m. to collect names of potential members, and to distribute information concerning their groups. Give-away prizes will be distributed to students during the course of the day, to those who are eligible. A list of events will be available at the booth. Students need to obtain at least five signatures from different clubs. These signatures must be signed and completed form to the state area. A coupon will be given to them at that time. Coupon numbers will be read from 11 a.m. until 2 p.m. You do not need to be present to win. Place your name and box number on the back of your coupon.

There's more to ERAU than just classrooms! Get involved!

## L5

(Continued from page 6)

latest news from NASA, and other space organizations from around the world. This is a crucial year for our national space program, and Aerospace Society members will always be up to date.

Several unannounced launches will take place from Cape Canaveral this Spring, and L5 members will have a

front row seat for all of them.

Ron Dantowitz is the new L5 president and promises a year full of fun and information. Dantowitz heads up a new slate of officers. Tony Derrick, Vice President, Tom Gandy, Secretary, and Kal Weller, secretary. Mr. William Brown returns as supreme advisor. Once again, the first meeting is tonight at 7 p.m., in the CPR.

up printing one-side commentaries that would barely be appropriate for the opinion page.

Additionally, many clubs spend too much time in their article delivering a play-by-play of the previous semester's activity. A brief report of the sometimes immature behavior of some clubs does not need to be included in a public record such as the Avion. Such interesting reading belongs in individual club newsletters.

Appropriate material for appearance in the Avion includes the names of those members who have earned praise (but not for drinking the most beer), brief descriptions of special events, information on what the club is all about, and important pleas for help. In other

words, the Avion is looking for newsworthy, objective information for the club's section.

Officers and writers should feel free to submit longer feature articles about their group's activities, especially if it is of interest to all students. These kind of stories will be published with no restrictions and will be featured on the front page. Special stories are encouraged and will be featured in the sports section.

The newspaper especially encourages that clubs and organizations submit photos of their activities whenever possible. Black and white are preferred, but color can be managed. Feature photos of students having fun tend to wind up on the front page.

# Ride Sharing, Votran stops, and new rules take effect

By Mark Stern-Montagny

The addition of curbs, parking and traffic lines (markers) around the campus over the winter break have increased the number of new parking and traffic regulations.

When a student or an employee of ERAU registers their vehicle at the Safety/Security office they first re-

ceive a parking fee receipt from the cashier's office, a parking permit sticker (for either the left rear bumper or window) and a "Parking and Traffic Regulations, 1987" pamphlet. According to the pamphlet 25 to 30% of the people who receive parking tickets claim that they did not get a pamphlet or were not aware of their specific violation. If

you do not have your current 1987 Parking and Traffic Regulations pamphlet, one may be obtained at the Safety/Security office in building M. Note, parking in thoroughfares will not be tolerated. A University vehicle registration sticker does not guarantee a place to park.

Monday, January 12, began the ticketing of vehicles that do not display a parking permit sticker on campus.

The Ride Sharing program was introduced by the Office of Transportation last fall and is being offered again this year. The benefits include preferred parking on campus which makes for a shorter walk to your

destination. Ride Sharing will save gas money and give the participants a chance to meet new people.

The following is an excerpt from the 1987 Parking and Traffic Regs:

"Two or more people may apply for a ride sharing permit but, two or more persons must be physically in the vehicle in order to enter the

designated parking area. The permit is transferable from one vehicle to another as long as all are registered ride sharing vehicles. For more information on the ride sharing program contact the Office of Transportation and Traffic Regulations or contact the Off-Campus housing office in Dorm 2, Rm. 176, or call extension 1039."

Votran will begin service to Embry-Riddle Monday, Jan. 19, with the pickup and drop-off point at the corner of Library Monday through Friday service times begin at 7:02 a.m. with service every half hour thereafter and ends at 6:57 p.m. On Saturday bus service begins at 7:57 a.m. and runs every hour thereafter with the last stop of the day at 5:57 p.m. There are currently no plans for services on Sunday.

Adult fare is 60 cents entitles an adult passenger to unlimited passage and free transfers for one complete month. When paying on the bus, exact fare is required. For more information call Votran at 761-7700 or Off-Campus Housing at extension 1039.

## AERONAUTICA

# Voyager aircraft successfully circles the globe

Dick Rutan and Jeana Yeager brave storms, mechanical difficulties while setting aviation record

By Peter W. Merlin

EDWARDS AFB, Calif.—Dick Rutan and Jeana Yeager successfully completed their record-breaking flight in the experimental Voyager aircraft on December 23, 1986. The two-million-dollar project was described by Rutan as "the last first in aviation."

As the spindly craft first appeared in the early morning skies above Edwards, it was followed by the press of spectators and news media personnel. "I can't tell you how good it is to be home," Rutan radioed shortly before landing. "I have to admit there were times during this flight when I didn't think it would be successful," he said.

With spectators a few flybys for the cameras, then Jeana Yeager began to crank the landing gear down. During this 15-minute process, aircraft designer Bert Rutan, in a chase plane, verified that the gear was down and locked.

After a brief conference, that afternoon Rutan said, "It's a grand adventure." Jeana Yeager added, "There's no telling what we'll do next."

During the flight, Voyager's crew endured violent weather, extreme

fatigue, and numerous mechanical breakdowns. Both pilots lost about ten pounds each during the flight. They consumed only about ten percent of their food supply.

When Voyager took off from Edwards, Dick Rutan had its fuel-laden wings dragged on the ground, damaging the wingtips. This resulted in the loss of both winglets, but did not seriously affect performance.

On the second day, Voyager encountered severe turbulence from upper winds in the western Pacific. The craft, which had never been tested in more than a 15-degree bank, was forced into a 90-de-

gree

bank

on

the

problem.

A noise suppression sys-

tem failed, causing concern that the crew would experience a 30 percent hearing loss, according to flight surgeon Dr. George Justice. The rear engine failed on the last day, causing a 3,000 foot altitude loss. The problem was corrected in about 90 seconds.

The project was a "grass roots"

effort which was conducted without government support. "I couldn't be more proud, because we did it on our own," said Dick Rutan. Late in the project, sponsors donated money and equipment. Voyager used a synthetic motor oil developed by Mobil Oil. This allowed the engine

to run for 300 continuous hours.

Mobil also donated \$65,000 cash

and an on-board video camera.

The National Aeronautics Association presented Voyager's crew with a plaque in recognition of their achievement.

Voyager was the proving ground

for the advances that all of aviation

will reap in the years to come.

Lycoming tested a new liquid

cooled O-205 engine, which will be

the flag-ship for a new line of liq-

uid-cooled piston engines.

The structure, a graphite honeycomb

sandwich, will give aircraft of the

future faster speeds and longer

ranges, as proved by the Voyager

team.

Flight surgeon Dr. George Justice, according to his report, "I couldn't be more proud, because we did it on our own," said Dick Rutan. Late in the project, sponsors donated money and equipment. Voyager used a synthetic motor oil developed by Mobil Oil. This allowed the engine

to run for 300 continuous hours.

Mobil also donated \$65,000 cash

and an on-board video camera.

**EDWARDS AFB, Calif.** This reporter was fortunate enough to be present for the *Voyager* take-off and landing. This achievement was what this country needed after last January's disaster. The great feat accomplished by the *Voyager*'s world flight was not that a plane and crew could circumnavigate the globe on one tank of fuel, but that it was financed by grass roots America. Funded by private and corporate donations, this proves again that we are proud and determined Americans.

## THE TAKE-OFF

On a cold December morning after waiting since 2 a.m., the sunrise brought with it the faint outline of a slender, fragile, airplane called the *Voyager*. Only a scant 100 people at best were there, people who donated their time and money. These VIPs were privileged to see the take-off. After delays for removal of ice accumulated overnight, the engines were started for a warm-up and final check.

Then the excitement began to mount. The roar of the little engines broke the morning silence, as the *Voyager* struggled for speed carrying with it almost 9,000 lbs of fuel --

wing tips are dragging. With the 7,000 foot marker streaking by, the decision point was passed, they were committed. Dick Rutan's decision was a bold one. With the added drag of the scrapping wings, the *Voyager* finally left the bounds of earth after using 14,000 feet of the 15,000 foot runway.

The onlookers were fearful of the damage but, with Burt Rutan in charge, giving it the O.K., the *Voyager* was off its way.

## AROUND THE WORLD

With the world watching, best wishes and good weather were on the minds of all that watched. Mojave was quiet during the flight, only the little communications trailer was busy with activity. The weather was the biggest obstacle that the crew faced. The *Voyager* did complete the flight with range to spare.

## THE LANDING

The temperature that greeted the *Voyager* crew was the same as when they left the California high desert - cold. This time with about 50,000 onlookers and well-wishers. The mood was bright and hopeful for the worst was over. With the networks covering the arrival live, the whole

lake bed, people were talking and watching, but most were just waiting for the first glimpse of the long-winged tribute to an ingenuous America. Some had portable televisions while others had cameras and hand held aircraft radios. Those with the radios were always the center of large groups, listening to the conversations between *Voyager* and the ground. Those of us on the ground were not the only ones listening for Air Cal, Pacific Southwest and United Airlines all gave their congratulations and wished Dick and Jeana a Merry Christmas.

Aviation buffs were not the only ones watching from the cold, barren landscape. Many just wanted to be there to see history in the making.

When the first glimpse of *Voyager* was yelled out, cheers went up. Only those with binoculars could see it at first, but then the wings could be seen. Stretched straight out, the wings showed the little weight they were carrying compared to the drastically high curve taken when full of fuel. Coming in over the crowds at 10,000 feet, *Voyager* buzzed the crowd four times to loose altitude. Dick Rutan was at the controls while Jeana Yeager lowered the landing gear by hand. The crowd was on their toes although *Voyager* flew over head with its five chase planes. Over the radio Dick joked about not having a shower for nine days and promised to have one before meeting the press.

## THE MAGIC MOMENT

Just visible off in the distance, *Voyager* touched down on the same dry lake that the Space Shuttle returns on. The crowd was ecstatic, jumping up and down, yelling and waving American Flags. Yes, America has done it again. Proving that American ingenuity and determination can accomplish anything.

The *Voyager* project started five years ago as an idea on a napkin in a small Mojave cafe. Designer Burt Rutan is famous for his Vari-Eze, Quikie and Starship designs that feature canards. Looking for corporate support and finding none, Rutan turned to the American people for help through donations. Adds in magazines and with his own finances Burt Rutan and the rest of the *Voyager* team raised enough money to complete the project. The *Voyager* accomplished what was not thought possible, because of you and me.

# Digital engine control will increase jet performance

## National Aeronautics and Space Administration

Need to get a jet fighter up to 40,000 feet thirty seconds faster? That could require developing a new engine with all its attendant costs. However, a new engine control system, developed by NASA, squeezes unused power out of present jet engines to offer major thrust and fuel economy advantages.

Using newly developed engine/flight control integration technology, researchers at NASA's Ames-Dryden Flight Research Facility, Edwards, Calif., have been demonstrating increased thrust of 10 percent or more with its F-15 research aircraft. Flight tests have shown fuel savings exceeding five and up to seven percent in some types of flight. The increased performance has been accomplished with only one of the two F-15 engines modified.

The engine and flight control integration technology necessary for such jumps in performance are a result of NASA's Highly Integrated

Digital Electronic Control program (HIDEC). HIDEC trades unneeded engine stall margin for increased performance (stall margin is the amount that the engine operating pressure must be reduced to avoid stall). HIDEC is being conducted in conjunction with the Air Force, McDonnell Aircraft Co., and Pratt and Whitney.

Several factors add to the typical 25 percent stall margin required by a jet engine, which often reduces an engine's usable power by almost 15 percent. This is necessary with conventional engines because designers have to allow for the worst combination of flight conditions in which aircraft fly.

The HIDEC drops the stall margin requirement down to about 12 percent, still allowing for variations in engines, control tolerances, air density variations, inlet flow disturbances and a four percent pad.

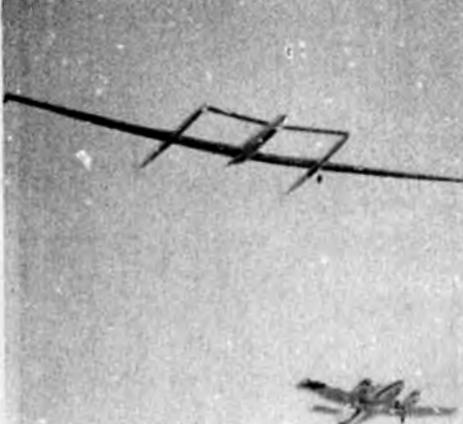

The key to such performance increases is an engine and flight control system that communicate with each other. The NASA/McDonnell

F-15 is equipped with one Pratt and Whitney 1128 research engine with digital Electronic engine control and a standard F-100 engine. In addition, the F-15 is modified with a digital electronic flight control system.

The HIDEC combines the engine control and flight control systems. Flight condition information such as attitudes, rates and pilot commands are provided to the HIDEC and analyzed. In addition, the HIDEC system anticipates flight conditions in advance to select the minimum margin required for that instant of flight. The appropriate commands are then made to the digital engine control system which adjusts the engine nozzle to provide the correct operating system pressure.

NASA Ames-Dryden project manager Dr. James P. Stewart characterizes HIDEC program accomplishments as major and expects HIDEC to be found on the fighter aircraft of the 1990's. "The single-engine program has been virtually problem free, very fruitful and the numbers are better than predicted."

Aircraft designer Burt Rutan (in chase plane) watches as *Voyager*'s landing gear come down, one at a time. It took 15 minutes for Jeana Yeager to crank the gear down by hand.

## Young Cosmonauts visit Space Center

By Brian Nickles

As part of an exchange with the Young Cosmonauts of the United States ten Young Cosmonauts paid a visit to NASA's Kennedy Space Center Friday, December 12.

After meeting with KSC Director Lt. Gen. Forrest S. McCartney upon their arrival, the youngsters were taken on a tour of facilities at the Space Center. After a quick press conference, the students were given the opportunity to see Pad 39 B, part of the Space Shuttle Launch Complex.

Touring various facilities in the US, the young cosmonauts were accompanied by several Young Astronauts, teachers from both the United States and the Soviet Union and Vladimir Shaplyko, Secretary of the Komsomol Central Committee and deputy to the Supreme Soviet of the Byelorussian SSR, and Valery Solov'ev, Pilot Cosmonaut who flew on the Soyuz T-10 mission during which he flew 237 days in space aboard the Salyut 7 spacecraft with cosmonaut Leonid Kizim and

Oleg Atkov.

During the question and answer session at the Cape, several questions were directed at Solov'ev concerning the Soviet Shuttle Program and the cosmonauts reaction to the loss of the Challenger and crew during the launch of STS-7 on January 28, 1986.

The Young Cosmonauts who visited the United States were Alexei Atkov, Mikhail Basnov, Yelena Grishina, Oleg Korolev, Alexander Konkov, Oleg Korolev, Pavel Kudryavtsev, Tatjana Nikitina, Igor Novikov and Anton Petukhov. They ranged in age from 12 to 18, and were selected by their peers from Young Cosmonaut groups all across the Soviet Union. The only problem was that most of them had already come from Moscow, as the capital city and from Ulyanovsk, as the birth place of rocketry pioneer Konstantin Tsiolkovsky.

At the KSC meeting, it was hard to distinguish the Young Cosmo-

nauts from the Young Astronauts, as they were wearing the same style clothing. Solov'ev looked on as if many of the kids had exchanged T-shirts and hats as well. While Cosmonaut Solov'ev answered questions, the students from both countries acted as all kids do on a field trip, minding their own business but somehow maintaining an air of reverence for the goings on when they were not directly involved.

As the questions were directed towards the students, they listened carefully to their translator and then

## Orbital Inclinations

## NASA gears up, winds down

By Peter W. Merlin  
Space Technology Editor

For what it's worth, the year that was 1986 is history. Touted by NASA as a major year in space, 1986 became a year of tragedy and controversy for America's manned space program. The Space Shuttle Challenger accident put a halt to all manned space missions and cast a shadow of doubt on the entire Shuttle program.

As a result of these difficulties, unmanned expendable launch vehicles gained new prominence. The Department of Defense, who had relied on the Shuttle, decided not to "put all (their) eggs in one basket" anymore. The U.S. Air Force called for a Medium Launch Vehicle (MLV) to orbit their payloads, and NASA established a new policy to eliminate commercial payloads from Space Shuttle missions.

1987 promises to be a more optimistic year for the nation's space program. NASA is gearing up for its next Shuttle flight, currently scheduled for early 1986. Some experts believe it will be delayed further.

NASA officials claim that the booster seal problem, which caused *Challenger* to break up during launch last January, has been fixed. They have also offered us an escape system for the launch phase of a flight. It is, however, a frighteningly limited system which can only be used after booster separation, during a controlled glide. A quick-and-dirty system to meet schedule requirements.

NASA is currently winding down its expendable booster program. Two Atlas-Centaur and five Delta remain in the NASA inventory. Three expendable contractors are competing for the MLV contract: McDonnell Douglas (Delta), General Dynamics (Atlas-Centaur), and Martin Marietta (Titan 34D/Titan 4). Whichever firm receives the contract will have an option to use the boosters for commercial launches. This will add a new dimension to the commercial space industry. American non-NASA commercial space industry can compete with the European Ariane and Soviet Proton launcher (recently offered for commercial service) for satellite payloads.

## Storm Riders select competition teams

### Storm Riders Press Release

During the past fall the Storm Riders held a series of contests to select their competition team for the upcoming NSSA College team surfing season. We held our final contest near the end of the fall term in quality 4 - 5-foot surf courtesy of distant hurricane Frances. In a very tight final, Eric Engasser, a hot freshman from Pensacola Beach, stood out over Eric Holzinger for first place. In a strong third place finish Andy Shorter impressed the judges with his fluid style. Fourth place went to New Jersey surfer Brian Carter; Morgan from St. Augustine took fifth place followed by Andre from Brazil. Our new competition teams show a strong promise for the Spring Season.

For readers not familiar with competition surfing, most contests are organized into 15 minute heats. A 3 to 5 member panel judges each surfer's performance. The criteria include wave selection, fundamental surfing, level of ride, and style. Usually 50 percent of each heat advances to the next round, culminating in a six-surfer final. In most NSSA contests 72 or more surfers battle to reach the coveted final round. In 1985-1986 the Storm Riders found themselves in 18 contests in the Southeast U.S. NSSA Conference. We earned an alternate slot for the NSSA Nationals at Huntington Beach, California.

The National Scholastic Surfing Association is a non-profit organization dedicated to the goals of scholarship and sportsmanship. Team members must be full-time college or secondary school students in good standing. All NSSA surfers are eligible to compete for college scholarships based on academic ability, proven surfing talent, and financial need. The current world surfing champion, Brian Carter, is a graduate from the NSSA ranks.

The Storm R's has continue practice sessions for its coming Florida NSSA competition season. The events include contests at Spanish House--near Sebastian Inlet (January); Canaveral Pier at Cocoa (February); Daytona Beach (March); St. Augustine (April).

### Competition Teams

- "A"
- 1. Eric Engasser
- 2. Brian Carter
- 3. Fred Basold
- 4. Andy Shorter
- 5. Morgan
- 6. Andre Almeida
- 7. Heather Holzinger

"B"

- 1. Brian Carter
- 2. Eric Holzinger
- 3. Eric Corlander
- 4. Keegan Paans
- 5. Brian Basold
- 6. Brian Guzman
- 7. Deric

In addition to competition the Storm Riders sponsor surf movies, trips and parties. During Christmas break the Storm Riders' advisor Vic Morris spent 10 days in Puerto Rico. They were treated to outstanding 5'-15' waves at Wilderness in the northwest corner of the Island. New members interested in surfing are always welcome. Check the Storm Rider's page below to find the Flight Deck for upcoming meetings and events. Look for our table in the U.C. on Clubs and Organizations Day.

## Shakespeare invades university! National tour to perform on campus January 22

By Hendry Betts  
Avior Staff Reporter

"But soft, what light through yonder window breaks...." It is the premier cultural event at Embry-Riddle this year.

The Humanities Department and Student Activities are co-sponsoring The National Shakespeare Company's production of Romeo and Juliet.

"It is the premier cultural event at Embry-Riddle this year."

pany's production of Romeo and Juliet.

At 9:00 on Thursday, January 22 the University Center will become Renaissance Italy and the audience will witness the triumphs and tragedies of the clandestine love affair between Romeo Montague and Juliet Capulet.

The National Shakespeare Touring Company travels all over the country and has been nominated for Entertainers Of The Year in the Cultural Division at the National Association for Campus Activities

the resources or the commitment to make it happen mainly because of lack of facilities."

The Flight Deck will be the stage and the only concern about the show is seating. Since the show is taking place in the U.C., seating is very limited and the public cannot be invited. There are going to be a few special guests of the University, and Student Activities as well as the Humanities Department is hoping for some outside media coverage of the event.

The National Shakespeare Touring Company will bring some culture to Embry-Riddle on Thursday, January 22 at 9:00.

Opening on January 22nd at Ocean Center, Daytona Beach, for six lavish performances through January 25th, this all-new edition of The Greatest Show On Earth promises audiences thrills and chills never before experienced in any live performance:

\*World-class athletes from the People's Republic of China demonstrate & resume feats of acrobatics as they perform for the first time ever with The Greatest Show On Earth.

\*The Hassani Acrobatic Troupe from Morocco displays sheer human strength and agility in their North American debut.

\*French animal trainer Daniel Suskow and his family present camels, horses, zebras and an American buffalo in an unusual mixed animal review.

\*Spain's Polo Aerial Quartet and Quincs Highwire Act make the debuts aloft for American audiences.

\*Mexico offers the astounding talents of The Flying Vazquez, featuring Miguel Vazquez, the first and only person ever to complete the

The traveling menagerie of Ringling Bros. and Barnum & Bailey Circus, including a herd of ponderous pachyderms, makes its way through the streets of 85 cities a year enroute to entertaining Children of All Ages.

quadruple somersault on the flying trapeze, as well as the rodolos Teeterboard Troupe and the Flying Ramos.

\*Sweden is represented in this sizzling show by the elephant expertise of Axel Gautier and his family who present 21 ponderous pachyderms; and Marco and Philip Peters of the Netherlands tempt fate

on the "Wheel of Death."

\*Bulgaria, Poland and Hungary offer the tremendous talents of Venko Lilev and his prancing Bulgarian bears; Polish acrobat Christoper Myaski and his lovely wife Jacqueline in their aerial debut and light-heeled Hungarian Lilliputians Sandor and Elizabeth Raski delight audiences of all ages.

Earth as they witness four sensational, never-before-seen production spectacles in the most awesome two-and-one-half-hour show ever presented. Tickets for Ringling Bros. and Barnum & Bailey Circus go on sale Monday, December 15, at the Ocean Center Box Office and all Select-a-Seat-Outlets.

Show Times are:  
Friday, January 23 - 7:30 p.m.  
WESH-TV2 Family Night. All seats \$2.50 off (\$7.00 & \$5.40)

Saturday, January 24 - Noon\*,  
4:00 p.m., 8:00 p.m.

\*Groups of 25 or more - \$2.00 off (\$7.50 & \$6.00)

\*Seniors (62 and over) and children under 12 -  
\$1.00 off (\$8.50 & \$7.00)  
Sunday, January 25 - 1:00 p.m.,  
5:00 p.m. - NO DISCOUNTS  
Regular prices - \$9.50 & \$8.00

Tickets for all Ocean Center events may be ordered by phone with VISA and MasterCard by calling (904) 254-4545 or (800) 544-6444. Mail orders are accepted, with check or money order, by sending to: Ocean Center, P.O. Box D, Daytona Beach, Florida, 32018

## O-TEAM

(continued from page 1)

ould have good verbal communication skills. This person should also meet the requirements set by the Student Employment office.

According to Linda Bloom, one of the best things about being an O-team leader is meeting people, and making many friends. "They always remark about how gratifying it is for them to be remembered by other

people. In some way, they keep on being leaders, even when they are out of orientation," she said.

People interested in becoming a member of the Orientation Team, should contact the Counseling Office. Fifteen positions will be available this trimester. Interviews will be held in February, with selection and training in early March.

## C & O

(continued from page 1)

prizes, and free pop-corn throughout the day. Clubs will also be encouraged to make announcements of events and activities that they will sponsor throughout the day.

The Screaming Eagles Model Airplane club will give an outdoor remote control model aircraft demonstration at some point during the middle of the day. The Lacrosse team has also expressed interest on doing a demonstration on their sport. The Skydiving club, which

usually makes a jump every trimester during C&O day, will not be able to give a demonstration due to the reduced amount of space west of the university center.

Finally Laurie Ranfors said "the C&O day is always very successful. I am yet to hear a negative comment on the clubs that have participated. Even if they are not looking for new members at that certain time, they enjoy the interaction that they get from the students."

## BLOOM COUNTY

In 1979, I wrote this parody of the "Airport" disaster movies. It was intended to be in book form...but since my books aren't selling for crud, I've decided to give the whole thing away for free.

Our story opens at Freeland International Airport, Freeland Michigan. It's late January an it's snowin' like a bitch...

*Freeland Tower Cruman 309-marker*

Three oh Nine continue approach, Number two, follow snow plow. Wind 360 at 40 altitude two niner two six, and snowin' like a bitch...

*309*

In 1979, I wrote this parody of the "Airport" disaster movies. It was intended to be in book form...but since my books aren't selling for crud, I've decided to give the whole thing away for free.

These strips are in a rotated series, so don't miss a single issue or you'll be lost forever.

Our story opens at Freeland International Airport, Freeland Michigan. It's late January an it's snowin' like a bitch...

*Freeland Tower Cruman 309-marker inbound*

Three oh Nine continue approach, Number two, follow snow plow. Wind 360 at 40 altitude two niner two six, and snowin' like a bitch...

*309*

Meanwhile at the Flight insurance booth in the airport terminal...

OK Mr. Smith, what's your occupation and just how much insurance do you want?

I'm a terrorist... I have a \$10 million dollar target.

Okay 10 million... who do you want the money to go to?

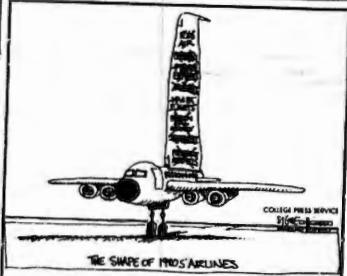

The huddled... starving... and desiccated...

Aren't you just a little suspicious?

No, not really... that'll be 50 cents please

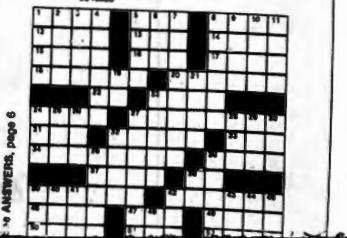

stuck!

*NUTS*

## Time looks at terrorism

### Discover Magazine Release

WASHINGTON, D.C. - Time Inc., under the auspices of DISCOVER Magazine, will sponsor a major world conference and exposition, "Terrorism in A Technological World," to be held January 20, 21, 22 in Washington, D.C. The theme of the conference involves a planned satellite linkup with leading colleges and universities whereby students and faculty will actually participate in the conference as it happens.

DISCOVER Publisher James B. Hayes stated that, "Over the past 20 years, terrorism has become a far more frightening and powerful weapon. But the role of technology in this deadly was has not yet received adequate attention - in spite of massive media coverage."

This gathering will provide a historic opportunity for leaders and decision makers to examine the causes of and policy options to this human tragedy which

out the polemics of ideological agenda. The nature of speakers and the vital nature of their subject ensure that the conference will be closely followed by a worldwide audience, Hayes added.

"After doing all we could to locate the most innovative and insightful speakers, we came to the conclusion that the conference would be further enhanced by an interaction with students and faculty on college and university campuses from all parts of the country."

We believe it would otherwise be very difficult for student body organizations to bring these speakers to their campuses on an individual basis, Hayes noted. The technological accomplishment of this linkup will present a large and distinguished group of international leaders before a vast audience of students and faculty.

If it is the addition of technology to terrorism that places societies at

risk, we must use technology as well or better in the pursuit of peace than those who would destroy it," Hayes said.

The three-day conference will consider 27 specific topic areas, among them: Assessing the Threat of Technology; Nuclear; Mexican; Computer Security-National Security; The Costs of Countering Terrorism; New Terrorist Weapons-The Chemical Threat; Terrorism, The Long War, State-Sponsored Terrorism and The Psychology of Terrorism.

University and student body officers wishing to receive more information about participating in the January satellite linkup should call 1-800-251-5541, in Pennsylvania 1-800-637-5509, in Florida 1-800-345-3496, in Alaska and Hawaii call collect 215-493-1211.
