Bellanca goes down near AC-1

By Martin F. Smith
Avion Staff Reporter

A Bellanca 17-30 crashed late Wednesday, Mar. 30, while landing after departing Ormond Municipal Airport. The four persons aboard received injuries ranging from minor to serious when the plane hit trees while attempting to make an emergency landing at Daytona Beach Regional Airport.

According to Daytona TOWER controller Hugh Gardner, the aircraft was en route to a ranch located off Ormond Beach. Daytona Approach Control had just established radar contact when the pilot stated that he ran out of fuel and requested vectors to Daytona. Gardner stated that the pilot was cleared for seven right, but requested seven left and was immediately cleared.

ERAU students Martin Cannavino and Todd Daniel saw the aircraft at a low altitude near the AC-1 residence complex about 10 miles west of Daytona Beach. They stated that the engine was turning, but was spattering intermittently. Cannavino stated that the aircraft slowed, appeared to stall momentarily, and then changed heading, missing the Apartment Complex by approximately 200 yards. The aircraft struck two trees and fell some 30 feet to the ground, demolishing the plane. The plane never landed but it came to rest in a field several hundred feet beyond where the aircraft came to rest about 300 yards north of US-92 on a ranch leased to Card Sot.

There was no post-crash fire. Although the wings and empennage were mangled, the cabin remained largely intact. Pilot Al Marshal was knocked unconscious from the impact. After he came to, he told witnesses that he couldn't see anything other than the airport prior to the crash.

Sunrise stated that she heard a loud noise, such as a building collapsing. She then realized it was a traffic accident, because such accidents frequently happen on US-92. She said she saw the horses on the ranch looking back towards the woods and then a person from ERAU approached and told her a plane had gone down.

Cannavino was reportedly the first person on the scene. He said that a few seconds after impact the plane became hydraulic and all four occupants were thrown away from the wreckage under their own power. According to witnesses at the scene, the pilot said that he had trouble transferring fuel from the two 17 gallon inboard tanks.

Crews from JT Evans Aircraft Recovery Service of Orlando told Avion reporters that they drained at least 15 gallons of fuel from those tanks before attempting to remove the wreckage. The recovery crew then transferred fuel in the two tanks which still amounted to several gallons.

According to Halifax Hospital public relations manager Grant Knowlton, the pilot was released after undergoing CAT scans to determine the seriousness of his head injuries, at about 11:55 Wed. evening. The other three occupants were released earlier and no one required admission to Halifax hospital.

A Bellanca 17-30 is a high performance, single-engine aircraft capable of 145 mph. In its nose-wheel configuration, the wings are constructed of wood laminate. This extremely rigid design has no known incidence of in-flight failure and may have contributed to the lack of serious injury in this accident.

Skyfest expects many features including the Thunderbirds

Skyfest expects many features including the Thunderbirds

By Ray Natac
Avion Staff Reporter

Preparations are well underway for next week's 19th annual Skyfest airshow sponsored by Embry-Riddle and The Chamber of Daytona Beach.

Some 50,000 spectators are expected to attend the two-day event on April 16 and 17. The highlight of the event will be the Air Force Thunderbirds demonstration team who will make their third appearance over the skies of Daytona Beach on Sunday, the second day of the airshow.

Featured on both of the show days will be R.A. "Bob" Hoover, considered by many as the "pilot's pilot." Hoover will make a return appearance to Skyfest in a T-39 Sabreliner.

Another return act will be the Eagles Aerobatic Flight Team featuring Charlie Hillard, Gene Soucy, and Tom Polson. They will perform in the Golden Knights, the U.S. National Aerobatic Title and, collectively, were part of a five man team who won a World Aerobatic Championship in Salou de Provence in France.

The United States Army Parachute Team, the Golden Knights, will thrill spectators as they jump from an aircraft at 12,500 and land at show center 17 1/2 minutes later.

The Ray-Ban Gold Aerobatic Team will soar across the skies in their Pitts Special aircraft. The four lead Canadian Air Force Pilots and are Canada's only civilian aerobatic team.

Rounding off the major acts are wing walker Johnny Kazian and aerobatic pilot Jimmy Franklin flying his black and silver WACO Mystery.

The Master of Ceremonies for the show this year will be screen actor and veteran air show narrator Sonny Everett.

In addition to the performers, Skyfest will feature the largest static display of aircraft in the Southeast, according to air show organizers. Over 70 different types of military aircraft are scheduled to appear including the Air Force's Republic F-104 Thunderbird II tank killers, the Boeing F/A-18 Hornets, General Dynamics F-16 super sonic fighters, the Lockheed C-141 Galaxy, CT-130 Hercules turboprop transports, the Navy's P-3 Orion anti-submarine warfare aircraft and Grumman F-14 Tomcat aircraft carrier jet fighter, the Marines' AV-8B Harriers, and a variety of Army Army helicopters.

The Grand Marshall for the event is the Honorable Bill Chappel (D-Orn) and the Chairman is Eric Dosen, ERAU Chancellor of the Daytona Beach Campus.

The airshow provides a significant service to our community by providing the Daytona Beach and Halifax Area with an event that is both entertaining and positive for our residents and our visitors," said Jon Kaney, Chamber of Commerce President.

The United States Army Parachute Team, the Golden Knights, will thrill spectators as they jump from an aircraft at 12,500 and land at show center 17 1/2 minutes later.

The Ray-Ban Gold Aerobatic Team will soar across the skies in their Pitts Special aircraft. The four lead Canadian Air Force Pilots and are Canada's only civilian aerobatic team.

Skyfest '88

The Thunderbirds will be arriving in Daytona Beach on the week of April 16 and 17. They plan to thrill and chill the hot Florida audience as they always do. Show up if you think you'll be a great experience.

Egyptian faculty participates in ERAU development program

ERAU Press Release

Three visiting faculty members from the Egyptian National Engineering and Technology Association (EN-CATO) are attending a six-month aviation oriented development program at Embry-Riddle Aeronautical University's Daytona Beach campus.

The visitors are the first to be involved in the new International Faculty Development Program which allows interested faculty from foreign countries to participate in the university's aviation education.

"Based on the success we have experienced so far," said Director John C. Williams, Ph.D., of the University's Center for Professional Programs, "I would

expect that we will expand the program to include additional participants from the new future."

Gannon stated that the visitors include Magid Soukry Guirgis, whose area of interest is avionics; Youssry Mahmoud Hafez, aircraft maintenance; Mohamed Abd Al Aziz, computer science. They are being assigned office space. They will be assigned to various departments to participate in committee work, course outline development, classroom and lab instruction.

The visitors are auditing a number of courses and are scheduled to attend national and regional conferences to further develop their aviation expertise.

Embry-Riddle is the closest American Aeronautical University to the sun at noon, because of the vernal equinox.

Ricardo Rodriguez (left) and Earl Stephens (right) have recently been voted as Vice President and President, respectively, of the SGA. The elections were held last week, and they will be sworn in today. They plan to heighten student awareness and involvement in the SGA and the university. Both are from New York and will be graduating next Spring. Ricardo is an Air Science major, and Earl is an Av Tech with a minor in Air Science.

Eight former professional aviators will be here at Embry-Riddle to talk to students. These pilots have been invited to speak at a seminar Sat., April 9. All the pilots are Embry-Riddle alumni.

The seminar is entitled "A Day in the Life of a Professional Pilot" and is sponsored by the Student Alumni Association. This free event will run from 10:30 a.m. until about 3 p.m. It will take place in A-Building, starting with an introductory session in A-109, the large lecture hall.

The introductory session will also be open for general questions from the audience. For the afternoon session, the pilot will split up into the classrooms for individual presentations. These presentations will range in topics from how to get to the computers to ALPA (the Airline Pilots Association) and airline work rules.

The afternoon session will also provide an opportunity for the students and alumni to interact on a more personal level. Students will be able to have more of their direct questions addressed.

The purpose of the seminar is two-fold. The primary reason is to enhance the link between students and alumni. The second reason is to provide an opportunity for students to find out how to get from Embry-Riddle to the airlines from the alumni who are there.

In the evening seminar is also planned to attend. "A Day in the Life of a Professional Pilot" is free and open to all students and faculty/staff members.

The speakers for this event are: Lou Nemeth, Captain, Piedmont John Mazur, Captain, USAir John Stanton, Flight Engineer, Eastern

John Barrett, First Officer, Eastern Metro Express

Tim K. by, First Officer, Piedmont Robert Healy, Captain, Piedmont

John Scritner, Pilot, Venture Airways

Nicholas Simatos, Pilot, Flight International

The Student Alumni Association will be sponsoring additional seminars in the fall to coincide with Homecoming and the Alumni Reunion. These seminars will cover more aspects of aviation such as management, maintenance and computer science. Alumni in each of these fields will be the guest speakers.

The Student Alumni Association is attempting to make these seminars a regular event of Homecoming. If you are interested in getting involved in these events or if you know of alumni who would like to be guest speakers, please contact Teresa Anderson a box 6804.

Embry-Riddle is the closest American Aeronautical University to the sun at high noon, because of the vernal equinox.

Editorial**The Avion gives credit where credit is due**

The Avion has grown over the years, providing as it progresses with many benefits.

Every week, the newspaper is on the stands: providing news, editorials, diversions, and cartoons. It features comments from and to the students and faculty about the present course of Embry-Riddle.

It features news on endless varieties of subjects, such as space, aeronautics, entertainment, sports, and local, national, and world events.

It provides local and national advertising, keeping you aware of the cheapest tires, planes, and pizzas within your financial reach.

It does this with the tireless dedication of its volunteer staff of editors, managers, reporters, photographers, production assistants, and general roustabouts. Nearly thirty students give up sleep, food, and (most important) time every week to insure the quality of our publication.

Why?

This is an often asked question, usually after working an 18 hour day. The answer lies in the fact that it needs to be done. Although, as Wes Oleszewski once commented, "It's the free white out," could be a part of it. But, in actuality it really isn't important if it goes on the record, or a job comes out of it. It simply needs to be done.

The students and staff that help every week, giving extra effort for the needs of the university, are the ones that make the Avion progress, as well as change the course of Embry-Riddle. These students are the ones who, although not on the same pay scale as the President or Chancellor, spend much time learning, teaching, and shaping the university as they do.

People like Klyde Morris, Tim VanHulligan, former Editor-in-Chief and Advertising Manager; Paul Novack, former Editor-in-Chief and Copy Editor; and Chris Leygovid, former Editor-in-Chief and Production Manager have brought massive changes to the paper. However, their graduations mark the end of different Avion styles and leadership.

Klyde in his time was, perhaps, the most stepped-on and looked-down-on campus. He let loose anything from the flood to the flight line, cutting red pine and brick walls to shreds. His absence in the Avion will be a bane for level-headed ants of the next generation.

Tim, Paul, and Chris all changed the direction of the paper, not only with different looks, but with content as well.

They advanced the Avion into the desktop publishing era, giving the paper heightened quality and growth potential. The addition of color and the introduction of new computerized software was a tremendous leap for the Avion; it opened the doors to a new world of possibilities. These gave greater reliance, speed, and capability — giving the staff a few extra hours of sleep on deadlines, not to mention better looking homework assignments.

They shaped the junior staff, insuring the even-keeled management of the Avion by its posterity. They attended conventions, awards ceremonies, and parties teaching what the Avion is all about. "It's more than writing about parties, it's living them!"

And, they committed their issues to vital, progressive, and wide-ranging news and articles, enlightened students and administrators to the world around them.

They shaped the junior staff, insuring the even-keeled management of the Avion by its posterity. They attended conventions, awards ceremonies, and parties teaching what the Avion is all about. "It's more than writing about parties, it's living them!"

And, they committed their issues to vital, progressive, and wide-ranging news and articles, enlightened students and administrators to the world around them.

Like all breeds of students have given their efforts to the Avion over the years, only to graduate and move on. Yet the Avion continues with the university. And, as always, it continues serving its students, staff, and faculty in the same position as always — as the protector of freedom by public knowledge.

SOMETIMES IT HELPS TO KNOW WHEN TO LET GO

Letters to the Editor**Sound problems**

To the Editor:

I recently showed up for ERAU's semi-annual speech night, hoping to be able to hear several speakers give their presentations. I was somewhat dismayed to find that the entertainment committee is still unable to provide a sound system that works for even the simplest occasions. The person running the sound seemed to have continuous trouble operating the equipment and several times the aural feedback drowned out the symbolic music (I mean word questionably) which was assaulting my eardrums. If it were me, I would demand immediate action on this problem. Who else would the administration have the attitude: "if the students don't care, it gets off the priority list"? This committee could and really care less about the "idiot parents" of this school. Why else would the administration have the attitude: "if the students don't care, it gets off the priority list"? The administration turned to see that this technical committee had to leave a second mike, located on the podium, turned up throughout each speaker's presentation. The result was that each time a speaker turned a page, it was heard throughout the UC. This certainly didn't help to bolster the speaker's confidence.

This is not the first time I have observed this individual having difficulty operating the sound equipment. On several other occasions, he has proved himself to be the man of imports and other adjustments essential to

quality sound reinforcement. I urge the entertainment committee to either re-train their sound board operators, or find people who can do the job right. I would be willing to lend my hand anytime needed.

Sincerely,
Martin F. Smith
5648**Bug problems**

To the Editor:

Administration: Take note.
In the year that I have been here, I have found the "real" reason why the transfer rate is so high, and why I am transferring. It is that the administration does not have an attitude of respect for the students.

Take for example the Epicycle affectionately known as Epikite, Epicord, Epigraph, and the list goes on. The food is, in many cases, mediocre. Yet, has anything been done to improve the food service? I don't think so. Furthermore, I have never seen any

sary or accidental, but three in two hours, sometimes at 12:30 to 2:30 in the morning, almost every week is ridiculous. It took maintenance all semester. I'm finally figure out the problem. I'm sure that we have a staff of "well-trained" technicians to handle the problem. And while I am on the subject of Maintenance, what about the important task of removing hooks from the ceilings at Dorn I to fill the holes? The question is, is there any money we have to take hooks out of the ceiling.

In January to fill holes that have gone unfilled? As with many things here at ERAU, this job has been gone with passed. This includes the air-conditioning in Dorn I. It's been four months now. A kid of 7000 dollars does not fix air-conditioning problems weekly?

We are paying for a service here, and we are definitely getting what we paid for.

Another example is Epicycle, affectionately known as Epikite, Epicord, Epigraph, and the list goes on. The food is, in many cases, mediocre. Yet, has anything been done to improve the food service? I don't think so. Furthermore, I have never seen any of the administration eat at Epicycle, let alone the Board of Trustees. Once again, it's "if the students don't like it, eat somewhere else." Well, if the students don't like the food in Epicycle, we can't go to another place, because freshmen are not allowed to have cars here, we can't get to anywhere else to eat except McDonalds and Burger

King. Speaking for myself, I could not eat fast food twice a day, seven days a week, for fifteen weeks. Not only that, but it is very expensive.

Finally, the housing department is a joke. The house price of getting a room in the dorm is stupid. It has been said that the "random" method is the only fair way to give students housing. Why? So people like Mr. Perry can go through Housing's version of the Riddel Room lottery and get a room. This is not only a waste of time and not housing, but it doesn't even confirm housing. I don't think housing could care less about Mr. Perry or anyone else as long as they get their money. That seems to be the other major theme here at ERAU.

Sap as much money out of the students as possible. Well, without the students there would be no school. Electricity is just a bunch of empty buildings, and empty buildings don't bring in much money.

In my opinion, this school is headed for disaster. We have administrators that do not care about the students, just about the money. That's a sorry attitude for anyone in the educational business. This may be the best school for aeronautics, but it won't be in the future if something doesn't change.

Brian Maddux
Box 2020

P.S. If this doesn't go in one ear and out the other, I would enjoy a personal reply.

students and their money, this university is just a bunch of empty buildings, and empty buildings don't bring in much money.

In my opinion, this school is headed for disaster. We have administrators that don't care about the students, just about the money. That's a sorry attitude for anyone in the educational business. ERAU in just ten years

How to make college the most desolate decade of your life

By Wes Glezerowd
Editorial Cartoonist

It was a fresh, bright Aug. 1 morning in 1977 when I left the state of Michigan for Embry-Riddle. A terrific day to be there, but not the kind of day to be home for the start of a 10 year odyssey far from home in Daytona. Start 1 did, and now a decade later the job is done. In looking back there is one thing I would like to set straight once and for all. I have not been attending classes here for 10 years straight. The fact is that I have only been associated closely with the Avion and the university population for

For the benefit of those readers who are lucky enough to not be attending school here on the extended plan and for the record, here's how my 10 program shakes down. Starting in the fall of 1977 and spring of 1978, I knocked off the first year. Then after spending the summer of '78 hiking and working, I returned in the fall of '78 for Action Services. I returned to good ol' ERAU to knock my way through a second year. After all a professional is someone who makes mistakes, what he is doing, and that is certainly not the case when it comes to working your way through ERAU.

I have also run into a number of people who did believe in what I was attempting to do. Foremost were Dean Rock and Cherie Armstrong, if not for their professionalism and guidance I would have been stuck here for the rest of my life. Next up was Alvin, I mean Al, I mean the university president, Jean Hunt. I told him that I had such a long way to go, and how I just couldn't see the end. He just looked at me with a smile over his ever present glass of iced tea, then he leaned back and said simply "you'll make it, I know you will." The guy believed in me, and there was just something about the way he said it that stuck with me. Finally, I got a job with the university to get the last year I'd think back to what he said and think to myself "can't quit, can't let it - president does."

I'd like to say a word of thanks here to all of those who didn't look down their noses at me. And to those who did say I'm I'd like to say "In yer face almedogs, I did it anyway." I sort of feel sorry for those scoffers and those fortunate sons that had it handed to them and smacked as they passed me by. Now they have to compete in the real world with a guy like me, and I am a shark in a goldfish bowl.

The one thing that I wish I could get across to the people of ERAU is that this is our university. This institution was not left to us by some scholarly dweeb 200 years ago. We made this place, it is ours. If there are no traditions we must start them. And it's up to us to weed out the bad stuff.

Last week I got a message from one of the school's part-time employees. She was telling me about the accident that he remembered the way the students used to hell out of the emergency exit of his bus. It's amazing how all of this seemed to have happened about a month ago. In leaving this place I am well aware that there are a lot of people out there along the same long hard road that I went. In one of the coming freshman classes will be some skinny airport rat who will be starting the odyssey. All that these people have going for them is what I had, good family support, a good education, and a desire to succeed. I hope they will work for what they want. To them this series of articles is dedicated, we won't have to give them our respect, they will earn it. All I have to say to them is, you'll make it, I know you will.

My business here at ERAU has always been just to finish. You see it's really easy to just quit. As easy as it is to stand with a pocket full of daddy's cash and look down

your nose on someone who has to work for his education. I am looking back the most important thing that I have learned from this odyssey is that you should never listen when someone is telling you that you can't do something. As long as you never ever quit, you never know what you can't do but you.

Along the way I have encountered a lot of slob who didn't believe in me, or what I was trying to do. I heard the term "professional student" so many times I wanted to vomit. After all a professional is someone who makes mistakes, what he is doing, and that is certainly not the case when it comes to working your way through ERAU.

I have also run into a number of people who did believe in what I was attempting to do. Foremost were Dean Rock and Cherie Armstrong, if not for their professionalism and guidance I would have been stuck here for the rest of my life. Next up was Alvin, I mean Al, I mean the university president, Jean Hunt. I told him that I had such a long way to go, and how I just couldn't see the end. He just looked at me with a smile over his ever present glass of iced tea, then he leaned back and said simply "you'll make it, I know you will."

The guy believed in me, and there was just something about the way he said it that stuck with me. Finally, I got a job with the university to get the last year I'd think back to what he said and think to myself "can't quit, can't let it - president does."

I'd like to say a word of thanks here to all of those who didn't look down their noses at me. And to those who did say I'm I'd like to say "In yer face almedogs, I did it anyway."

I sort of feel sorry for those scoffers and those fortunate sons that had it handed to them and smacked as they passed me by. Now they have to compete in the real world with a guy like me, and I am a shark in a goldfish bowl.

The one thing that I wish I could get across to the people of ERAU is that this is our university. This institution was not left to us by some scholarly dweeb 200 years ago. We made this place, it is ours. If there are no traditions we must start them. And it's up to us to weed out the bad stuff.

Last week I got a message from one of the school's part-time employees. She was telling me about the accident that he remembered the way the students used to hell out of the emergency exit of his bus. It's amazing how all of this seemed to have happened about a month ago. In leaving this place I am well aware that there are a lot of people out there along the same long hard road that I went. In one of the coming freshman classes will be some skinny airport rat who will be starting the odyssey. All that these people have going for them is what I had, good family support, a good education, and a desire to succeed. I hope they will work for what they want. To them this series of articles is dedicated, we won't have to give them our respect, they will earn it. All I have to say to them is, you'll make it, I know you will.

My business here at ERAU has always been just to finish. You see it's really easy to just quit. As easy as it is to stand with a pocket full of daddy's cash and look down

Students announce official formation of ERAU Graduate Student Council

By Bruce Perry and Carolyn Smith
Avion Staff Reporters

The Graduate Students are forming a Council that not only benefits the graduate students but will also help the University as a whole. The objective of the Graduate Student Council is to join the graduate students together in an effort to achieve a more unified graduate student organization for the University. In order to accomplish this goal, the graduate students are not only seeking student support, but the support of the administration and all interested faculty members.

At a recent meeting, held in the CPM on March 23, the graduate students presented six issues and formations of individual committees that will develop from their organization. The following six issues are of primary concern for the graduate students.

A designated room for the graduate student organization would serve as a communication tool for students to promote, announce, and organize spe-

cial events.

Career Center acceptance

The graduate students are currently seeking the same privileges as the undergraduate students are presently享受着. They are seeking to assist graduate students in search of cooperative education, internships or fellowship programs. Graduate students find it almost impossible enter one of the three previously mentioned programs. Many graduates feel they are not being offered an important job related experience for post-graduate employment.

Professional accreditation

Graduate students stressed the need for Professors oral accreditation with the M.B.A./A.M. graduate program. The Foreign students affairs office would handle the undergraduate students as well.

With the increased involvement and support of the students, faculty and administration, the efforts of the graduate student council will help to enrich the entire university. This series would be the undergraduate students as well.

Developing what some graduate students called an "Executive Speech Series," that would promote and extend invitations for prominent speakers throughout the country to lecture at the university. This series would be the undergraduate students as well.

In order to effectively communicate issues, problems and concerns between us students, faculty and administration, a designated graduate student needs to represent his/her colleagues. For example, John Kondilis, a graduate student in Graduate Studies and Research Programs, which is discussing with the administration how they can work together to make the

Sports opinionBy Mike Hotaling
Sports Editor

Please this. You're playing on an Embry-Riddle intercollegiate sports team, or given weekday or weekend. You are sacrificing precious study/break time to play a sport you enjoy and to promote your university.

I realize the feeling of investing all that time in practices and preparation to have maybe a handful of ERAU students show up to offer support. Okay, we are not a division I AA school with a highly successful football program. We've got a few professional schools with, but the members of these clubs are as dedicated and, in quite a few cases, play the same level as some monolithic university athletes.

Care in point: I attended a recent ERAU baseball game at City Island ball park. I recognized 4 Riddle students present to cheer on the team (although 3 of them were making more

noise than a small crowd). Most of the students who are considered off the street out of curiosity. Granted, we all sleep, girlfriends or boyfriends, and keeping the brewing industry in business. Also, promotion of sports events seems to be somewhat new to us. Do you ever see an event advertised on the radio in the U.C.? Neither have I.)

Okay, I've done it too, in my first trimester, I didn't attend a single event, even though Avion sports editor provides me with a slanted view of what's going on around campus. So, what is the reason no one shows up, lack of promotion, not enough time, lack of interest, or apathy? I don't think it's student apathy, too many people use that as an excuse for lack of student interest, when all it boils down to is the fact that no one wants to go to the games.

My point is not to say that everyone should be attending every sports event that this school is involved in, but to

point out that no one shows up at any event.

This fall, each and everyone of us will be paying a \$32 sports fee for our tuition. Maybe this will bring out a few people to get their moneymouth.

How many people know that our university has defeated such opponents as Florida State and The University of Florida lacrosse team? Not bad for a bunch of guys who rarely get to practice as a team because of academic and flight conflicts, and whose coach has to fight for a van to practice in.

Obviously, this editorial is not for me. In reality, the sports fees will not immediately provide us with a major sports program, but we will get a better chance to provide future students with more opportunities than we had to enjoy an exciting sports calendar.

ERAU baseball loses 6-5 to Ohio State

By Mike Hotaling

Sports Editor

The ERAU baseball team lost to Ohio State Newark Thursday March 24, dropping their record to 4 wins and 9 losses with 7 games left to play.

After falling behind 2 to 0, the Eagles rallied in the third inning to score 4 runs.

With one out, Jeff Hosler drew a walk, and advanced to second on a single by Brian Callahan, and Mark Porash loaded the bases on a walk.

Ed Soer then singled to right to drive in Hosler and Callahan, tying the score, and Parsons advanced to third.

John Morningstar followed with another single sending Porash home to make the score 3 to 2.

Vince Puglisi capped the scoring in the third inning by singling and driving in Soer, to raise the Eagles' lead to 4 to 2.

Ohio State battled back and were ahead 6 to 4 when the

Eagles came to bat in the bottom of the seventh inning. Al Jackson led the inning off with a single up the middle, and moved to second on a single by Brian Callahan to left field.

Ed Soer came through again by doubling down the right field line to score Jackson and move Callahan to third. This brought the score to 6 to 5, and this is where the game ended as the next batter struck out.

Team leader in the hitting department was Ed Soer, with a double and a single. Others with singles were Al Jackson, Jeff Hosler, Brian Callahan, John Morningstar, Vince Puglisi, and Chuck Smith.

Jackson, Hosler, Callahan, Porash, and Soer scored runs, while Soer, Morningstar, and Puglisi were credited with RBIs.

Pitching a solid game for ERAU was Chuck Smith.

Windsurfing team led by Cunningham

By Mike Hotaling

Sports Editor

The Embry-Riddle Windsurf team competed in the 27th annual Thunder Mug race Sunday.

The team fared very well in the event sponsored by the Halifax Sailing Association.

The event is a long distance race originating at Bethune Point and racing to the Dunlawton causeway and back. It takes approximately an hour to an hour and a half to cover the Halifax river course.

Humanities professor and windsurfer

club advisor Jim Cunningham placed first in the Hobie 16's class, and 4th in the overall sailboat class.

The team sailed the sailboats of the Hobie Cat type, with the Hobie 16 being a 16 foot version of this type.

Randy Welbelm finished second in the sailboat class, and Graham Drinkwater placed third.

Several different types of sailing craft

were represented in this race.

The multihull division, which consist of catamarans with more than one hull (for example a typical sailboat is monohull and a Hobie Cat is a multihull), had 16, 18, and 21 foot Hobies and Pininfarina competing.

In the monohull class, sailboats and open sailboats were dueling.

The ERAU club raised funds at the event by selling hot dogs and refreshments. The proceeds will pay for a club trip to the Miami area in April to compete and to enjoy some much-needed rest and relaxation.

**Records were made to be broken...**

**Before. After.**

Before flying Virgin, these typical collegiate-types thought travelling to London was about as exciting as taking an 8 a.m. trig exam with a hangover. After flying with us, they were as happy as three rock stars on a world tour. You'll feel the same way. Once you're flown on our roomy 747s. And experienced our great movies, music videos, BBC comedy shows, 8 different music programs, and all our other award-winning in-flight entertainment. All coming at you through a pair of serious electronic headsets.

Still not satisfied? How about a nice hot meal. In fact, a choice of 3 nice hot meals.

That's right, it's airplane food. With one major difference. It's actually edible. It's also followed by tea and pastries later on.

So you can munch out while you do a little extra studying. (Yeah, right!)

Want even more? Then let us remind you of our fares. As low as \$219* from Newark. \$249* from Miami.

Now what do you think?

Great. Then see your travel agent. Or call us at 1-800-862-8621.

Hey if we could please these sourpusses, please you will be a breeze.

Virgin Atlantic Airways. 747's To London.

Take us for all we've got.

*One way Late Saver Fare. Fees and taxes not included. Bookable within 7 days of departure - all must be ticketed upon booking.

Non-refundable. Valid in New York April 1-June 30; in Miami April 1-May 31.

SUMMER GRADUATION!

The final summer graduation will be held on August 20, 1988. If you anticipate completing your degree requirements some time during the summer semester, we are accepting applications in the Registration and Records Office and you will receive a Preliminary Graduation Evaluation from us before the next Advancement Registration to be held during the latter part of the spring semester.

FREE HOUSING FOR OVERFLIGHT STUDENTS

As most of you are aware, the Flight Technology Department has faced a number of difficulties which for the most part are beyond the control of both students and department administration. As a result, a significant number of students have been inconvenienced by excessive delays in beginning and/or completion of Spring semester registered flight courses. We realize that because of the circumstances, many students will be unable to begin their flight course during the early weeks of the summer semester to complete their course. It appears the Flight Technology Department will have additional capacity this summer primarily due to the elimination of the Air Force Flight Screening Program contract. As a result, the university encourages all students to consider remaining on campus this summer to catch up on your flight training. As an added incentive, the university is willing to provide free on-campus housing on a space-available basis for those students who are unable to secure permanent flight courses. Only students who are currently enrolled in a flight course during the current spring semester and who will not complete this course prior to the end of the spring semester will be eligible for this program. The university will cover housing expenses during the period in which they are active in the flight course, or until the end of Summer A term whichever is greater. The university will not cover housing expenses for those students living off campus. This applies to on-campus training only.

Inquiries regarding this should contact the Transportation Manager as soon as possible.

We apologize for the delays which have been encountered by many of you over the past several months, and we hope that our situation will improve during the summer semester. We are hopeful that you will consider this opportunity and help us improve this situation.

BEACH PASSES

Due to the efforts of SGA Vice-President Mike Miller, all students in Volusia County can now purchase a beach pass for \$10 instead of \$25.

AIR CONDITIONING REPAIRS

The air conditioning equipment is down for major repairs. The tentative completion date is the week of April 4th.

MAPS SEMINAR SCHEDULE

Mar. 28 (Fr) Dr. Alexander Karev - Super Symmetry, 1330, Riddle Theatre

Apr. 8 (F) Dr. Christopher Phelps - Frames of Reference, 1330, W310

All seminars are scheduled at 1330 on Friday's. Everyone is cordially invited. Students Welcome.

AMT LISTENING SESSIONS

The College of Aviation Technology will hold the first of several planned listening sessions on TUESDAY APRIL 5, 1988 AT 1030 IN A-109. The purpose of these planned listening sessions is to allow students enrolled in a particular program to meet with the College of Aviation Technology to discuss any problem(s) they may have in relation to their studies. These sessions are not planned to solve an individual student's personal problem(s). They are planned so that students who are presently enrolled in a particular program can have an input into the further development of that curriculum or program.

The monitors of each session will be there to LISTEN to the students' suggestions and comments, they will not be there to defend the present curriculum or program.

The purpose of the first session will be:

How well the Aerodynamics I, II, III, and AS 404 and AS 406 academic courses are meeting the needs of the student for the attendant flight courses.

The monitors for this inaugural session will be Bill Martin, Dean of the College of Aviation Technology; Dr. Tom Connolly, Chairman of the Aeronautical Science Department, and Paul McDuffee, Chief Flight Instructor and Chairman of the Flight Technology Department. Several program chairmen, faculty members, and staff members will also be in attendance.

Please plan to attend and have an effect on the future aeronautical science curriculum and program, as well as the future graduate who just might be your co-pilot!

MAYOR'S SCHOLARSHIP

Applications for the 1988-89 Mayor's Scholarship Program have been received by the Financial Aid Office.

The Mayor's Scholarship Program is for residents of New York City who reside in an eligible Neighborhood Strategy Area or designated census tract. In addition, the student must have an "O" Pell Index for 1988-89. Further information may be obtained in the Financial Aid Office, 118 Spruce Hall.

LIBRARY HOURS FOR FINALS

The library will be open during the following hours for exams:

FRI 4/15 7:30 - 10:00PM

SAT 4/16 10:00 - 11:00

SUN 4/17 10:00 - 11:00

MON 4/18 7:30 - 11:00

TUES 4/19 7:30 - 11:00

WED 4/20 7:30 - 11:00

THURS 4/21 7:30 - 8:00

COORS MEMORIAL SCHOLARSHIP

Applications for the 1988 Coors Veteran's Memorial Scholarship have been received in the Financial Aid Office, 118 Spruce Hall.

To be eligible as a scholar, applicants must be 22 years old or younger as of July 1, 1988; have a cumulative grade point average of at least 3.00; completed a full freshman year but not yet attained senior credit hours, be enrolled as a full-time student, and be a dependent of an Honorably Discharged American service personnel, or a dependent of an Active Duty, Guard or Reserve military personnel, or a dependent of American service personnel killed in Action, Missing in Action or who have died in the Line of Duty. Additional information is available in the Financial Aid Office.

PENNSYLVANIA AVIATION COUNCIL

SCHOLARSHIPS

The Aviation Council of Pennsylvania has announced the establishment of three \$1,000 scholarships available to residents of Pennsylvania who are enrolled in the following programs:

- aircraft and avionics management
- aviation management
- professional pilot

Application can be obtained by writing:

Aviation Council of Pennsylvania Scholarship Program
406 N. 28th Street
Allentown, PA 18104

GRADUATING SENIORS

All library items must be returned by 5:00pm on April 21st.

All fines & charges must be paid by 5:00pm on April 21st.

Failure to do so will result in your diploma being withheld.

STUDENT BODY

All library items are due by 5:00pm on April 21st.

MAIL BOXES - FALL TRIMESTER

Going home for the summer, either in A or B? If so, would you like to retain your mail box for the fall term? No deposit, no hassles, just a short change of address form required. Stop by the University Mail Room (Rear door, east side of UC building) between 10:00 am and 2:00 pm April 5-6-7 to fill out this form. If we do not receive your change of address form, we will assume you are not returning this fall and will re-issue your mail box to another student.

NDSL/PERKINS STUDENT LOANS

If you are an April graduate who was awarded a National Direct or Perkins Student Loan as part of your financial aid package while a student at ERAU, you should be reminded that this is a Federal Loan repayable to Embry-Riddle.

Information regarding the repayment of this loan will be available to you the week of March 21, 1988. The voluntary Exit Interview Sessions will be held by appointment only at the Riddle Center located in A bldg., Room 101.

Specific dates and times are listed below:

Wed. March 23, 1988 10:00 am to 10:30 am or 10:30 am to 11:00 am or 3:00 pm to 3:30 pm or 4:00 to 4:30 pm.

Thurs. March 24, 1988 4:00 to 4:30 pm or 4:30 to 5:00 pm.

It is very important that you attend one of these meetings to obtain valuable information concerning repayment of your NDSL/Perkins Student loans.

Please check your ERAU box for further information and pertinent documentation. Additionally, contact Barbara Stiles, University Documentation, 6230 to either schedule an appointment for one of the above sessions, or if you have any questions regarding the Exit Interview process.

Army

By Bill Fisher

Club Correspondent

ERAU's Eagle Battalion was at Camp Blanding, FL during the weekend of 11-13 March to participate in a joint field exercise (FTX). They were joined by Army ROTC units from J.B. Stetson and University of Central Florida (UCF).

Third Army ROTC Region Commander B.G. Keller, who was visiting during the training, travelled to many of their sites, spoke with cadets, and answered many of their questions.

The FTX was organized by UCF and provided excellent training for cadets in the MS-1, II and III levels. Training was provided by the combined Cadre and MS-IV Cadets from the three schools.

Training for the MS-1's and II's included a run through the Camp Blanding Confidence Course, zeroing and record firing of the M-16 rifle, and instruction on map reading and use of the compass compass combined with a practical exercise involving navigation and terrain analysis. The Cadres also made several trips down the rappelling tower off both the wall and the side slides, and constructed and crossed a one rope bridge, as well as experienced Army Aviation first hand through an exciting "rap of the earth" ride in the Army's newest utility helicopter, the UH-

60 Blackhawk.

Training for the MS-III's centered around preparations for their trip to Advanced Camp this summer. Beginning Friday evening squads consisting of cadets from each of the three schools participated in a ropes course designed to teach them the basic paracord skills they will need to successfully complete that portion of Advanced Camp.

Fighting off constant harassment from opposing forces and navigating through rugged Florida terrain, these squads set up patrol bases, initial rally points, objective rally points, participated in an air assault from UH-60 Blackhawks, and conducted an early morning vehicular assault.

The FTX ended with an awards ceremony which presented trophies to cadets from each school who fired the best score on the M-16 range, completed the Confidence Course in the shortest time, and showed the best techniques while rappelling. Cadets from Eagle Battalion who received the awards were Stacy Cummings for best rappel, John Clark for the fastest time on the confidence course, and Joia Fisher for the best score on the M-16 range.

Photo shows B.G. Keller speaking with a group of Embry-Riddle Aeronautical University Army ROTC Cadets.

Fellowship

By Berrie White

Club Correspondent

Hello everyone. With only one more week of classes left before finals, everyone is anxiously awaiting the end of another term. We have also just finished celebrating Easter which is the most important event of the Christian calendar. Few people realize the significance of Christ's death and resurrection, but it really does Christ lives in man and can only die before God and not be condemned but receive eternal life.

God created the world perfect, but because of the sin of one man, Adam, a II mankind was born into sin. The

bible states in Roman's 6:23 "the wages of sin is death..." The only payment that can cover our sin is death, or better known as Resurrection. Paul says "While we yet sinned, Christ died for us...we have now been justified by his blood."

When Jesus Christ died, he gave us the opportunity to have our sins forgiven, and when he rose from the dead he gave us the opportunity to receive salvation. He died for us more than anyone else. Jesus says in Revelation 1:18 "I am the Living One; I was dead, and behold I am alive forever and ever! And I hold the keys of death and Hades (hell)." Jesus holds the keys to life; he

also says in John 14:6 "I am the way and the truth and the life. No one comes to the Father except through me." Paul also says in 1 Cor. 15:17 "If Christ has not risen, then we are still condemned, but because of Christ's death and resurrection man is given the choice of life.

This Saturday evening at 6:30 in the U.C. common purpose Room we will be holding our final meeting of the year.

Dr. John Wheeler will be leading us in a time of remembrance of what Jesus did for us as we have a special communion service. This will be a very significant time and I would encourage everyone to be there.

This past weekend, not very much happened at Sigma Chi. Everyone ready to finish the last few weeks of both time off from school and tried to relax over the Easter weekend. Spring is around the corner. Don't slack off yet, brothers went home for the holiday. Summer is soon here!

As for the now who decided to stay in Daytona, they tried to make the best of things. The break from school did

not stop everyone some good, and everyone is ready to finish the last few weeks of both time off from school and tried to relax over the Easter weekend. Spring is around the corner. Don't slack off yet, brothers went home for the holiday. Summer is soon here!

For Leisure And Student Health

reading to establish what's normal for you. A safe range for healthy adults is generally 100/60 to 140/90. Yes, young people can have high blood pressure although it is more common as we age.

Did you know?

If you eat an orange you may get as much as 60 percent more Vitamin C than you would if you squeezed it and drank the juice.

When you run, the impact on your human shock-absorption system is 3 to 4 times your body weight. When you walk, the impact of each step is only 1 to 1.5 times your weight.

Another great reason for giving up cigarettes: a couple of nicotine-free years can put you back in the non-smokers' category far as most health risks are concerned.

Blood pressure is called "the silent killer" because you can feel fine and have dangerously high blood pressure enough to cause a stroke or a heart attack.

A plugged-in hair dryer or other appliance that falls into a sink or bathtub can cause a fatal shock even if it is grounded.

It is illegal to smoke in public places after October 1, 1987 that carry the UL (Underwriters Lab) mark must have a safety system to reduce electrical flow if they touch water.

QUESTION: What drug does the most damage in America?

ANSWER: It's the one most Americans go on pretending isn't even a drug!

The answer to this question, and any others you may have, please stop by the Health Services, located in the University Center.

By Health Services

Would you fly a plane without the proper fuel? Then treat your body to its proper fuel!

Cut down on salts, fats and sugar. Eat more fruits and poultry, fresh fruits and vegetables. To learn more about this and the four food groups—stop in at Health Services.

What is blood pressure?

It's the force of your blood against the walls of your arteries. It's normal for blood pressure to fluctuate: high when you first wake up or if you're nervous or excited; low during rest or sleep.

REMEMBER: It takes more than one

Safety first...

AS 408 Flight Safety students display their safety posters in center hallway of G building and on the second floor of the flight building. Although the posters are part of the course requirement, the objective is to

remind and reinforce the safety implications of flying. Safety posters are posted for seven days and then replaced. The posters are said by the students to be an asset, and are liked by many on campus.

HELP PUT
THE USA
ON TOP!

IN WORLD AEROBATICS

Without your generous financial help, we never could have flown in England in 1985. We're preparing to go again in 1988, and we need your support and our national heroes really paid off. We brought home many medals.

Among the 70 pilots at England, the nine members of the selected USA team stood out.

As you can see, U.S. Aerobatic Champion pilot is my friend by my side. Please help us to help us again, so we can take on the world in Canada in August 1988. Please remember, we're not asking for money, just by who's in the World Competition. Fill out the form below and send it today. Tax-deductible contribution today. Thank you.

Chris McHenry
1985 U.S. Aerobatic Champion

Who's
driving?

You miss her sparkling sense of humor. She misses you and your jokes. Even the bad ones. That's one good reason to call long distance. AT&T Long Distance Service is another good reason. Because it costs less than you think to hear your grandmother start to giggle before you even get to the punch line.

So whenever you miss her laughter, bring a smile to her face with AT&T. Reach out and touch someone.

If you'd like to know more about AT&T products and services, like the AT&T Card, call us at 1 800 222 0300.

The right choice.
