## THE COMIC BOOK

Thinking financially results in the best possible outcome and establishes a secure foundation for the future as an independent man. In contrast, thinking emotionally leads to short-sighted financial decisions and usually, deep regrets. However, thinking financially is not pleasant for the people around us. This comic book presents a guy, whose dream is to become an accountant. When he finally succeeds into this, he realizes that thinking financially may be effective for his boss but it is irritating for everyone else, even for his family.
