Outline

- Patient Case
- Definition & Explanation of Trust
- Application of Trust to Cancer Case
- Implications for Clinical Care
- Implications for Research
- Questions for Audience

Patient Case – Care Team

- Mr. James – patient with Gardner’s Syndrome
- Dr. Larson – Gastroenterologist
- Dr. Geist – PCP
- Dr. Franklin – Surgeon
- Dr. Auden – Resident
- Dr. Gustafson – Resident
- ICU Team

Definition & Explanation of Trust

“a psychological state comprising the intention to accept vulnerability based on positive expectations of the intentions or behavior of another”

Applications

- Traditional Trust Development – Dr. Larson
- Swift Trust – Drs. Franklin, Gustafson, and Auden
- Organizational Context – CCU & Medical Telemetry
- Trust Violations – Dr. Franklin/Mr. James & ICU team/family

Implications for Clinical Care

- Trust Development
 - Swift Trust
 - Traditional Trust
- Organizational Context
- Trust Repair
 - Interpersonal
 - Organizational

Implications for Research

- How does trust evolve at the interpersonal, team, and multiteam system level?
- How does technology (EHR) impact trust?
- How does context influence trust development?
- How do we best repair with patients and colleagues?

QUESTIONS for audience

- What trust violations have you experienced?
Committed?
- How have you repaired trust?
How have others repaired your trust?
- How can trust repair be trained?
