Outline

• Patient Case
• Definition & Explanation of Trust
• Application of Trust to Cancer Case
• Implications for Clinical Care
• Implications for Research
• Questions for Audience
Patient Case – Care Team

• Mr. James – patient with Gardner’s Syndrome
• Dr. Larson – Gastroenterologist
• Dr. Geist – PCP
• Dr. Franklin – Surgeon
• Dr. Auden – Resident
• Dr. Gustafson – Resident
• ICU Team
Definition & Explanation of Trust

“a psychological state comprising the intention to accept vulnerability based on positive expectations of the intentions or behavior of another”
Applications

- Traditional Trust Development – Dr. Larson
- Swift Trust – Drs. Franklin, Gustafson, and Auden
- Organizational Context – CCU & Medical Telemetry
- Trust Violations – Dr. Franklin/Mr. James & ICU team/family
Implications for Clinical Care

• Trust Development
  – Swift Trust
  – Traditional Trust

• Organizational Context

• Trust Repair
  – Interpersonal
  – Organizational
Implications for Research

- How does trust evolve at the interpersonal, team, and multiteam system level?
- How does technology (EHR) impact trust?
- How does context influence trust development?
- How do we best repair with patients and colleagues?
QUESTIONS for audience

• What trust violations have you experienced? Committed?
• How have you repaired trust? How have others repaired your trust?
• How can trust repair be trained?
