## ADVICE TO PRINCETON ALUMNI FROM AL CAPP

BY AL CAPP *taken from National Review*  
*September 22, 1970*

I've made a careful study of the situation here and I have good news for you. Princeton has only one problem: The lunatics are running the asylum.

Princeton was once a place we sent our loved ones who were going through one of life's most ludicrous and irrational states—puberty...in the hope they'd pick up some

useful knowledge, and, more importantly, some useful connections. And to get them out of our sight while their minds and their complexions

## FORMER FED FOUND ON FACULTY

JOHN EBERLE, PROFESSOR OF  
MANAGEMENT

Among those faculty members who are new to Riddle this year is Dr. John Eberle. He is on part time status, teaching two Principles of Management classes. In addition to his classes at ERAU, Dr. Eberle teaches Accounting and Supervision of Personnel at Daytona Beach Junior College.

Dr. Eberle "retired" to Daytona Beach, after 30 years of working in various supervisory and administrative positions for the federal government. Most of his time was spent working in the Commerce Department.

He earned his Doctorate in Public Administration from American University in Washington, D.C., by attending night school for thirteen years.

## STUDENT URGES POLLUTION FIGHT AT RIDDLE

BY JERRY POLVERINO

Pollution is something everyone knows about, talk about, but it is something none of us think we can do anything about. If you think this, you are wrong! Both faculty and students of ER have the opportunity to do something if we really care, essentially in three ways which are listed below. The first way is as individuals, the last two apply specifically to ERAU.

ONE: All of us can start using non-leaded or "white" gasolines in our motorcycles and cars. Besides easing the problems of toxic lead in the atmosphere (lead is a poison which never leaves, but slowly builds and accumulates in the body) we can expect very slightly in creased fuel mileage and economy, plus our engines will benefit with increased cylinder, spark-plug, valve and muffler life. Why? Because non-leaded fuels burn clean, leaving only very fine powdered carbon which is discharged with exhaust, while leaded fuels leave compounds of dye (dye is in all leaded fuels by law) and lead bromide, the latter of which is extremely corrosive to most metals, especially if allowed to sit for periods of time. Also, leaded fuels form many other lead associated compounds and silicates that adhere to engine parts from dirt and other foreign matter not completely filtered by even the best air cleaners. So, as you see, unleaded fuel is not only better

MOVE IT, PLEASE!

The parking lot in front of the Academic Complex will be painted this Saturday and the lot in front of Dorm I will be painted on Sunday. You are urgently requested to avoid both lots on their respective days.

The paint being used has a tendency to spray and splatter, thereby ruining a car paint job. Your compliance will be appreciated!

## THE PRESIDENT'S CORNER

## LETTERS

Coming up on the ballot in November's elections are two questions that will affect many of ERAU's students. One is on the 18 year old vote and the other is giving the 18 year old full majority rights. I would like to see both pass and would urge all the students here to talk to people they know in the area who are voters, and ask them to support it.

This is not a political issue and therefore I believe that the students at ERAU can support it without becoming involved in local politics as a school.

This is, however, a highly emotional issue for some voter. Such points as old enough to fight, but not vote - or taxation without representation are fine, but I don't believe they will convince the people who have the power to change the law.

A more realistic approach to the voters would be to try and convince them what people are responsible for their actions when they reach the age of 18.

Today's graduate from high school is better educated, better informed through radio, TV and newspapers, and more capa-

ble of handling his own affairs than the college graduate of fifty or a hundred years ago. If he isn't, perhaps someone should look into the educational system that taught him. At 16 we give people the responsibility of driving. At 18 a person can travel a thousand miles away from home to go to college. Why not allow him to be responsible for all his actions when he is 18? Today a parent cannot control all the actions of an 18 year old, but is still responsible for his actions until 21. I think this would be the strongest selling point we can use to convince the electorate.

A couple of other things to remember: the way we will accomplish this is with our actions as well as what we have to say. Sometimes actions speak louder than words. Also, if this passes, as a student in Florida you will be covered by their laws and with these new privileges you will also have added responsibilities. Now would be the time to start thinking about them.

*Terry Miner*  
Terry Miner  
President  
SGA

Dear Editor:

One of the terms most frequently used to describe the attitude of the maintenance technology (A & P section) students is "apathy". This misnomer needs a little bearing out. Their participation in all school events from blood drives to social functions is as good as, if not better than, any other divisions' participation. The real undercurrent lies in the A & P students feelings towards the SGA. When talking of this subject, you will find the opinion of this department more along the lines of disgust, and rightly so.

After electing senators to the SGA to voice the suggestions and opinions of these students, the representatives go about their jobs in a rather professional manner, only to have their efforts rejected, tabled, passed on, or overlooked by the SGA officials elected by the students, who at election time told all the students that their better interests would be looked out for. After a couple of trimesters of inaction and "can't do's", the A & P students feel that they have reached a point of diminishing returns, and

— From THE DAYTONA BEACH NEWS-JOURNAL

As I was returning from Daytona Beach I had the misfortune to have car trouble, but on the other hand it was good fortune, because it occurred in the vicinity of Embry-Riddle Aeronautical University. I do not have words to express my appreciation and gratitude to the many ERAU students who stopped to give me assistance. I only obtained the name of one young gentleman - Barry Rogers. He stayed with me until the wrecker ar-

rived to tow me to the service station. He also followed me with his blinker lights turned on since I had no lights on my car. Many thanks, Barry, as well as many thanks to the other gentlemen of ERAU. I was also assisted by the Daytona Police who helped get my car off the busy highway and out of the line of traffic. Thanks to the Police and to the many other motorists who offered help.

## LETTERS CONTINUED

have let their enthusiasm and support of the SGA officials drop.

To give an idea of the A & P student's confidence and trust in their official spokesman, a little reflecting back to the summer trimester and the students own action in calling a special meeting to air their grievances against a split schedule for maintenance technology division. This was done out of fear of further inaction by the SGA official on a matter of utmost concern to all the students in this division.

It is the consensus among the A & P students that the SGA officials are no more than token figureheads, comprised of a bunch of "teachers pets" out to fill in one more blank on a job application at the expense of the A & P's.

The challenge is yours, SGA officials, are you going to continue to drop the ball in behalf of the maintenance technology division, and further substantiate this opinion, or attempt through honest and sincere representation to dispel it?

Michael A. Winters  
AMM

Dear Editor:

To those individuals who are deserving of the praise for forseeing the sudden cold spell to hit the Daytona region, and their quick action in turning on the heat, my hand goes out to you. Hopefully, you will realize the sudden cold spell was in your mind, and quite possibly that was the only place that was cold. In light of the fact that the excessive heat was unbearable, unnecessary and a definite inconvenience to those people in the buildings at the Academic Complex, you are to be praised for your total lack of planning on this venture.

This is fair warning to those students who are unfamiliar with cold weather. When it's cold outside,

watch out for what it's like inside.

Knowing full well I have opened myself to ridicule by those chauvinistic members of the student body, and supplemental ridicule from the administration, I dedicate this letter to the "well-managed" operations of Embry-Riddle Aeronautical University.

May sandles go off to you, Embry Riddle, you've done it again.

DAVID MALMAD

Dear Editor:

In relations to your proposal to introduce an aircraft capable of carrying 75 Puerto Ricans, we the 75 Puerto Ricans agree to fly in your aircraft back to Puerto Rico if all the Yankees (i.e. Gringos) in Puerto Rico fly it back to the States.

Sincerely,  
75 Puerto Ricans

P.S. A small modification has been proposed by the Embry Riddle A & P, Engineering and Pilot students from Puerto Rico - a proposed seat for the Gringos return trip. . .

ISRAELI ANSWERS  
ARAB STATEMENT

BY JOSEPH STEIN

After reading the Arabic point of view in last week's issue of THE AVION, there are a few points to be clarified:

To start with, the attack on the Beirut Airport by Israel was brought about by the Arabs. THEY were the ones who attacked civilian settlements and therefore, brought upon themselves a "small" retaliatory act.

The Arab Command ordered the Arabs to leave Israel in 1948, as a preparation for an invasion. ("The Arabs that will remain will be traitors") The Arab Governments have problems with the refugees today. No wonder they are asking why they have no homes.

What is the nonsense about the Zionist Aggression in 1948? It is a well known fact that the Arabs declared war, but paid dearly for it.

"He (The Palestinian) carries a machine gun and fights for his country!" - how can anyone fight for his country when he does not have one?

## IS THE HONOR SYSTEM FEASIBLE?

BY PAUL VARGO

The question has arisen as to whether or not an honor system is a feasible undertaking at an institution of learning such as ERAU. Webster defines honor as a keen sense of ethical conduct on one's word given as a guarantee of performance. His suggested synonym is integrity. What meaning does this have to the student, and how does it apply?

The basic foundation of the honor system is that a student signs a contract upon entering an institution agreeing not to cheat in anyway, which includes homework, exams, and term assignments. The student also agrees not to steal or deface the institution in any way. If any of

these acts are perpetrated, the student faces a possible dismissal from the institution. There are many questions brought to mind concerning these basic criteria of the honor system foundation. For example, a student is having difficulty with his or her homework, and under the honor system, a student must not collaborate with another under penalty of dismissal. Thus, if the student is unable to complete the homework, he or she is faced with a possible grade reduction. However, the student receives an "A" for honor. The instructors reply to this situation is, "see your respective instruc-

## SIGMA PHI DELTA

BY WOODIE VAN WHY

There has been a flurry of activity around our Chapter House for the last couple of weeks as we all pitched in to personalize our new home. Pledges and Brothers rolled up their sleeves and started painting our porch, installing air conditioning in our two upstairs rooms, and getting our Study Room in shape. Besides tables and chairs, we have set up a table for our Aircraft Design men. Pledge Plassman spent his Saturday morning getting our once fine library in order.

Among the excitement emanating from our halls was the arrival of our new RC Cola machine. After years of faithful service, our Pepsi machine has been retired.

This last weekend saw a mass exodus of SPD's from Daytona. Rich Simpson played soldier, Denis Waltz spent the weekend under the command of Lieutenant Pohl, Steve Isaac had business in St. Pete, and Johnson, Kreitner, Alfonso and I were among those who headed North.

Congratulations to Alpha Eta Rho for their victory over our football team. I am sorry that I missed seeing their secret weapon. Maybe next time, though, boys.

Friday, November 13th, Dr. Ritchie will present a program on Electric Warfare and Terrain Radar, our bulletin board says. It sounds like it will be pretty interesting. I suggest that you make plans to attend. We'll be glad to see you.

That's it for another week. See you next week, same time, same place.

## ALPHA ETA RHO

BY BOB DUDEN

The proverbial band wagon was rolled out this past Saturday night, minus the band, and every Bro-

ther and Pledge climbed off the wagon to take part in our first official party of the year. Our chief liquor procurer and sampler, the Honorable Mr. Briggs (and his efficient staff) labeled the brew as well as the party "Grade A".

The brothers feel that we have a really sharp pledge class this semester. If they can start out on the right foot and keep up the good work, our membership should be increased by four weeks from now.

Speaking of good pledges, a few of them turned out Sunday to spur Flash and his three blocks of granite on to victory. The capacity crowd was on its feet most of the game, not because it was exciting - the simple reason remains that the Embry Riddle Bowl is not yet complete. With a slight increase in tuition, this monstrous sports arena will be completed and our famous golf team will take to the field...back on the playing field, we evened our record at 1-1 this past Sunday with a victory over Sigma Phi Delta. Our myriad offense, which now really owns a Flash, rolled up 19 points while our improved defense held the Engineers scoreless.

Before we leave you there is one last item... the membership of Alpha Eta Rho would like to bid a fond farewell to our close friend and brother Dick White. The poor boy left his senses this weekend and took his first step down the road toward wedded bliss...Dick pinned his Sweet Sue.

Beware, Sigma Chi Delta you are next!

## DELTA CHI

BY BOB ARGILA

I would like to welcome myself to the distinguished job of writing our article, since no one else will after reading it.

Delta Chi had another fantastic week, and we

hope the momentum continues. We started out by finding out how much spirit and enthusiasm our thirty or so pledges have. It is a great sight when these guys, who seem to be all over the place, have our Greek letters painted on their cars, pants, girlfriends, etc.

This weekend we had a mass cleanup on the House. The poor neighbors thought we were crazy. The jungle in the backyard was cut down and we are even thinking of having a picnic where there once roamed some pretty weird creatures. We were so happy with our pledges' working performance that we plan to have an even better work period next week.

The week closed by our football team winning a big game over the fierce Sigma Chi Delta squad. Both teams showed some great defensive plays as the final score was, US 7, THEM 0.

Well, everyone take care and have a great week...Bye!

*Happiness is..finding out that the new secretary in Financial Aid was last month's center fold in Playboy.*

## SIGMA CHI DELTA

BY RUSS STRINE

This week the Brothers of Sigma Chi Delta would like to congratulate the members of Gamma Pledge Class for the fine work they have done thus far, only two weeks into their pledge period.

At the Monday night meeting Sigma Chi Delta had its pledges go through a line-up, after which the brothers would decide on the first cuts. We are proud to announce that there were no cuts this time. Keep up the good work, fellas, and continue striving to be the best pledge class Sigma Chi Delta has ever had.

This Saturday, October 17 is Sigma Chi Delta's original "Captain America Bar-B-Q." Here, the pledges continue with the tradition of the past as they come up with their version of the "ideal" Captain America. This should prove to be a very exciting weekend for all with the Bar-B-Q on Saturday night, and the IFC football game against Alpha Eta Rho on Sunday afternoon.

The result of last Sunday's game with Delta Chi wasn't too good, as Sigma Chi Delta went down to defeat with a score of 7-0. All there is to say is we try harder. Anyway, congratulations, Delta Chi, for a game well played!

This Saturday, along with the Captain America Bar-B-Q, the crowning of our new fraternity Sweetheart will take place. In case you haven't heard, our proud new beauty is Miss Nancy Howell. Nancy is a senior at University of Florida in Gainesville and is a member of the Zeta Tau Alpha sorority there.

We have a very promising and exciting year ahead of us, and we know that Nancy will do all she can to make it even better for us.

\*\*\*\*\*

## GAMMA PLEDGE CLASS SIGMA CHI DELTA

BY OLLIE GAGNE

Who's Captain America? That's the question some people who live at 520 S. Ridgewood are asking. But they will have to wait till Saturday night to find out. He doesn't come to town very often, but when he does...

Overall, we've had a rather quiet week, with the exception of our football players. They played a good game Sunday, but we still lost. Our defensive team did a great job, but our young QB was a little too fast for some of our old ends. He couldn't quite connect for the big one.

## ECONOMIC NEWSLETTER

If you know where all your money goes, you're way ahead of most people. Most of us discover that our money goes out just about as fast as it comes in. What we need is a plan, a method of control, a way to make sure we are spending our money on those things that will give us the most pleasure and satisfaction.

The Volusia County Extension Home Economics Office is offering a free subscription to a newsletter series for young married couples. The newsletter is entitled "For Richer, For Poorer." The

series covers a wide variety of subjects from credit and cars to facts about inflation.

The subscription can be received by request to Volusia County Extension Home Economics Office, 3100 East New York Avenue, Deland, Florida. Include how long you have been married, number of children, and what your major financial questions are, to receive special attention.

## ERAU'S SKY PILOT

BY GARY ANDERSON

In keeping with Embury-Riddle's policy of matching the instructor with the course, a new instructor has been hired to teach Religions of Mankind. He is retired Gunner Sgt. Milton Wysniski USMC. Gunny Wysniski is considered to be well qualified to teach this course because as a drill instructor at Parris Island he "put the fear of God" into thousands of recruits. I interviewed the "Gunny" last week:

"Excuse me, sir..."

"Yeah, whatta you want, slick?"

"I understand that you're teaching Religions of Mankind..."

"You bet your ----ing life I am."

"I understand that you have an interesting policy concerning absent students..."

"As far as I'm concerned, any maggot who isn't in his seat by 0800 is UA (unexcused absence) and

I'll send him --- to jail"  
"Do you have any outstanding religious beliefs yourself?"

"Yes, I believe that the Lord will make a second coming on 25 December 1973 at 0920, and as far as I'm concerned, if he's late, he's UA and I'll throw his --- in jail."

"What do the students learn in class?"

"First of all, I take them out to the parking deck and teach them M-27 rosary drills."

"Good Lord! What else?"

"Tomorrow I'm going to teach them how to pray by the numbers with feet at a 45° angle, palms extended and joined, knees on the deck, and if they don't do it right, they'll be doing side straddle hops all day."

"Have you lined up any guest speakers?"

"We had one, but he did not work out. . ."

"What happened?"

"I asked for a Jewish Rabbi, but they sent me some bearded freak."

"But all rabbi's have beards!"

"Not anymore they don't - I dry shaved that one on the spot!"

"I understand you're holding confessions next week."

"That's right."

"Are you using a closed booth?"

"No, I'm using a rubber hose."

\*\*\*\*\*

*honor system continued*  
tor if you are encountering difficulty." This is fine if the student's instructor is available, or if he is not teaching at another institution, or if he is not working a full-time position at General Electric.

Perhaps an instructor doesn't realize the pressures that are placed on a student. For instance, a student enters college for the purpose of getting an education enabling he or she to attain the position of his or her choice. During their college career the flash of success crosses their path with the words "Good Grades". If a student is unable to attain these grades, through hard work, he or she is forced to cheat on examinations or to give up their ambitions.

Society forces a student to cheat on his fellow students and instructors. Before an institution should venture to change their system to one of honor, they should perhaps change their values of grades and grade point average. It is impossible for a student to give up an ambition. It would be like giving up a part of one's life. Before a student will do this, he or she will use any means possible to attain the grades they need.

An honor system with grade values as high as they are at the present is out of the question. Perhaps we use the term college too often when we should be using the term "institution of higher learning." The student is here to learn, not to see how well he or she is able to outguess the instructor or how well he or she is able to apply various test methods for taking exams. People learn by their mistakes.

-----  
THOSE OF YOU WHO WILL BE GRADUATING IN THE NEAR FUTURE ARE PROBABLY THINKING ABOUT JOBS. THE PLACEMENT OFFICE HAS RECENTLY LEARNED OF SOME OPPORTUNITIES FOR NEW GRADS WHICH WILL BECOME AVAILABLE BETWEEN NOW AND EARLY 1971. IN SOME CASES, RESUMES AND APPLICATIONS SHOULD BE SUBMITTED IN THE NEAR FUTURE. CONSEQUENTLY WE RECOMMEND THAT YOU CONTACT THIS OFFICE AT YOUR EARLIEST CONVENIENCE TO REVIEW THE POSSIBILITIES AND OBTAIN ANY NEEDED ASSISTANCE WITH YOUR RESUME.

\*\*\*\*\*

Another new addition to ERAU's coed enrollment is Jackie Mosher from Worcester, Massachusetts. Before coming to Riddle, Jackie had heard about what a campus atmosphere Riddle had! This, along with her desire to obtain an education in Aviation, brought Jackie to Riddle.

Hoping to fly for a company some day, Jackie is working on her BS degree in Aeronautical Science.

Jackie's hobbies include flying, swimming and tennis.

BY DON NICHOLS

In intramural football last weekend, the Jets easily continued on their winning ways, due to a forfeit by the Routers. It seems as though the Routers cannot make it out of bed on Sunday morning. This is the second week that they have forfeited. The Hot Nuts, after losing to the Jets two weeks ago, won over the Mod Squad, 6-0. F-Troop defeated the Chargers 18-0, while the Beagles were idle.

In the inter-fraternity games, Alpha Eta Rho defeated Sigam Phi Delta 18-0, while Delta Chi defeated Sigma Chi Delta, 7-0.

There are now three undefeated teams in intramural football, and it looks as though Delta Chi will win in the inter-fraternity conference. The standings are as follows:

Jets	2-0
F-Troop	2-0
Beagles	1-0
Mod Squad	0-1
Chargers	0-2
Routers	0-2

#### Interfraternity:

Delta Chi	2-0
Alpha Eta Rho	1-1
Sigma Chi Delta	1-1
Sigma Phi Delta	0-2

In college football, two major upsets prevailed. Stanford outclassed Southern Cal by a 24-14 score, while Tennessee showed a strong defense to defeat Georgia Tech, 17-6. This was Georgia Tech's first loss of the season. Georgia Tech was outplayed to the point they did not cross Tennessee's 40 yard line but once. Meanwhile the AirForce trounced Tulane, 24-3. Another upset was Duke defeating 11th ranked West Virginia, 21-13. Notre Dame continued to outclass their opponents and clobbered Army, 51-10. Ohio State continued to win by defeating Michigan State, 29-0, while Texas blasted Oklahoma, 41-9. The Sooners looked strong in the first quarter, but Texas just could not be stopped. Texas is tough, but I do not believe that they will be number one unless Ohio State loses. Penn State came back after two defeats to win easily over unbeaten Boston College, 28-3. Game of the week is Notre Dame vs Missouri. The record for this column is 59 wins, 36 losses, and two ties for a percentage of .621.

## EMBRY RIDDLE DIVING EAGLES

BY RALPH C. WICKLUND JR.

Another trip to the Bahamas has been scrubbed. This time, however, not because of the weather. The Bimini Ghost, the 63ft boat the club had chartered, is laid up in dry dock with a badly damaged hull. The captain is attempting to set up another date for us.

While we're waiting for word on an alternate date we still have other places to dive.

On Saturday morning at 8:30am the Diving Eagles will leave Dorm 1 and head for a beautiful spot called Blue Grotto. Blue Grotto is commercial and the owners charge divers \$2.00 to spend the day. There is a permanent safety line to 110ft., excellent illumination, and an air bubble at 75ft. which is kept filled by a compressor. There are also shower and restroom facilities and a small dive shop.

On Sunday there is an offshore Daytona dive. This will cost \$12.00 per person and all divers must be certified and somewhat experienced. The average diving depth is 70-80ft. and after the last dive of the day some decompression may be necessary. Contact Ron Byerly or Lyle Schmitt at Dorm 1 if you wish to go.

Next week there will be another dive to Croaker

Hole in the St. Johns River. The divers who went last week can't wait to go back. It takes ten minutes to get from the boat dock to the hole where the water is approximately 60 ft. deep. The water visibility from the surface to within a few feet of the bottom is practically nil, but is almost unlimited in and around the cave. If you like Blue Crabs there is a big one in the cave just waiting to be caught, cooked, and served on someones table.

Meetings are still held on Monday nights at 8:00pm in Room 108. If you are interested, don't have too much homework, or can tear yourself away from the TV for an hour, why not drop by and see us.

## POLLUTION CONTINUED

for us, it is better for our engines as well.

It is understood however, that all engines cannot get along on non-leaded fuel, but for some reason, "white" gas has a poor reputation for octane. This may have been true years ago, and may even be partly justified in some very high performance engines today, but as a general rule of thumb, white gas is better for an engine if the compression ratio is below 10.7 to 1 and normal factory recommended ignition timing is obeyed. Factory ignition requirements vary from fuel to fuel, but power output remains relatively constant if timed correctly and no knock or ping occurs. As a matter of fact, using the lowest possible octane required will give the greatest power and economy. As you can see, how big an engine is has nothing to do with fuel octane requirements, nor is fuel octane any measure whatever of fuel quality or power. What all this means is that non-leaded fuel can be a benefit to 99.8% of all cars (including so-called high performance cars) and 99.98% of all motorcycles (100% of all 2 cycle engines) registered in the United States from 1957 to present.

TWO: As everyone knows, Embry Riddle consumes a tremendous amount of 80-87 aviation fuel everyday. Around this time of year we are like a factory going full blast. Clean burning non-leaded aviation fuel has been available all over the world for years, why not here? With gentle request to the administration and considering the large economic influence Embry Riddle enjoys at this field, we could have this fuel shortly and with no increased cost. This would be the most important contribu-

tion ERAU could make for clean air. This is the real meat of the article.

The change to non-leaded 80-87 would have multiple benefits. The most immediate and important is, of course, cleaner air, but it would also have the same effect on our aircraft engines as it does in our automotive engines; in fact, the FAA put out an advisory circular on the advantages of non leaded fuel in aviation engines without even considering pollution. It would also help alert the fuel industries that far thinking institutions are realizing their ecological responsibilities and are doing something about it. Lastly, it would be advantageous for Embry Riddle's public image in a pollution conscious community and state.

Again as individuals we can pay close attention in our classes and to our instructors concerning mixture ratios in aircraft, because as an engine is leaned, carbon monoxide output is greatly reduced and when at peak efficiency only carbon dioxide (a harmless gas we exhale while breathing) is dis-

charged. Besides reducing the chances of carbon monoxide in the cockpit and polluting the air outside the cockpit, the engine will run better and will greatly increase range.

THREE: We should not allow oil from students cars to be drained into the ditch along side the dorm. A very little oil goes a long way on water and wildlife, and that ditch eventually goes into the Halifax River, which is already having its problems. There must be a proper place to put that oil, and we must find it. Besides, it's against the local and state laws to drain that oil into the ditches.

There is an age old quote which follows that sums up pollution neatly. "If a person is not acutely aware and concerned about a problem, then perhaps he is the reason it exists." Are we aware? Do we really care?

Most of us at Riddle are somewhat apart and different from the rest of the populace. Perhaps we tend to cherish and understand things more completely than others.

SNAP CLOSURE

THE SANDAL SHEAF • 811 MAIN STREET  
HOURS - 10:00 - 4:00

Things like crystal clear water to surf, skin dive and swim in; clear blue skies to fly, soar and sky dive in; and wooded trails to ride our motorcycles upon and walk through. But don't you see? We have to do more than enjoy these pleasures, this life and this planet. We have to preserve them if we want to continue our existence as we now do.

All of us know how quickly and completely the air mixes over our world. There is nowhere to escape, no place to hide. The atmosphere is like a fish bowl, some spots get more dirty than others, but the mess eventually spreads throughout the entire bowl. To cure pollution takes more than talk, it takes the large and the small - it takes the United States, Japan and the United Nations. It takes Florida, Embry Riddle, and it takes US, my friend, YOU AND I must care. I think we are aware, and I think we do care. I think we can make a humble start with the three simple things above. It won't be a bit difficult, and, after all, it is the world that's at stake...PLEASE?

#### PRINCETON ALUMNI CONTINUED

cleared up.

Princeton was once run to introduce some order into the disordered thinking of our pubiscents, to elevate their morals above the chimpanzee level, and to discipline their muscless.

Princeton once humanized its puberty-maddened. Today, Princeton is a temple of puberty-worship.

And what I say is that any administration of men over forty who consider students under twenty as smart as they are-is probably right.

Princeton has become a combination playpen and piggpen because it disregards one of the immutable facts of nature. And that is the inferiority of the college student of any other class.

The non-college student is a citizen who announces to the world that he can

be useful to it, four years before a student can.

But when a college student registers as one, it is his confession to the world that he needs four more years of its indulgence and charity before he can contribute anything to it. It is a shameful and pitiful state, and it would seem prudent for any in it not to attract attention to himself.

Until lately, students were aware of their low condition, and hoped not to be noticed, while they strove to rise above it.

And, until today, college administrations were aware of their intellectual and moral superiority and treated students with the benign contempt they deserve. And while they did the alumni were content to support institutions like Princeton, to trust its young to their administrations, to bestow honors upon its great administrators and, in some cases, to pay them a living wage.

It was, however, when they began to treat academics as equals that the trouble started. In all fairness, I must say that it didn't start at Princeton. It started at Harvard and spread.

I live in Cambridge, Mass., a quarter of a mile from Harvard Square as the crow flies. Today what you see flying above Harvard are mainly deans, propelled by student feet.

I remember how amusing it was once, at Cambridge dinner tables, to listen to Arthur Schlesinger Jr. and Kenneth Galbraith tell how they'd run the country if they had the chance. You could enjoy their fan-

tasies in perfect safety because you knew they'd never have the chance. Them, suddenly, they HAD the chance.

It wasn't amusing anymore. It wasn't fantasy anymore. It wasn't even safe any-more. It became the way it is now. And it's going to get worse, until we stop being sentimental about this thing and realize that those in the academic world simply are NOT the equals of those in the real world. In the real world, one must outsmart one's superiors. To succeed in the academic world one need only to outsmart one's inferiors-students. That's not anti-intellectualism. It's a defense against it.

I've worked in both worlds and I am appalled at the anti-intellectualism of our intellectual community. Although they are the world's highest paid babysitters, they lack the intellect to understand, and the manners to respect the immeasurably superior intellect of those who created the wonderful and complex and imperfect outside world, who

## PRINCETON CONTINUED

support the academic world they whine about the outside world FROM, and who, from time to time, are called on to protect the whiners from the lunatics they've made of so many of our children.

But the whining doesn't stop. When we protect them, as Jack Kennedy put it, with all necessary vigor, they whine MORE loudly, as they did at Kent State.

John Lindsay wasn't wrong to fly the flag at half-mast for the keds at Kent State. His mistake—as that he flew it for the wrong bunch. The martyrs at Kent State were kids of ours in National Guard uniforms—who we ordered to protect the University from the mob the Mahysers, and Kellys and Falks of its campus had goaded into madness. The martyrs were the kids who had left their constructive lives to stop the destruction at Kent State because we ordered them to. Those who whined for us to give that order are now whining that we didn't also order them to let the lunatics stone them to death.

Lunacy at Princeton isn't homicidal—not yet—but it IS getting there. You have lunatics running things here of all ages—in all positions—from the most humble dean to the most powerful freshman.

## NO MORE DEFENSE

You won't find a more perfect example of perfect lunacy in Kafka and Krafft-Ebing, in Laurel and Hardy, even in Schlesinger and Galbraith, than the events here of the second week in May.

Several hundred students, egged on and fired up by a flock of faculty Fagins, decided that this country would never again need to be defended. They marched to end all operations at the Institute for Defense Analyses. They barred the entrance with bicycle chains, saving out a few of the heavier type to be used on any IDA employees unscrupulous enough to try to sneak in and go to work.

Then they linked their arms, toes, and tails, and created a barrier of bodies, and body odor. President Goheen, with the courage that has made him a legend, stormed onto the scene and instructed IDA Deputy Director Neuwirth to tell the mob that they could go right on with anything they had in mind, providing they remained nonviolent, didn't damage the building, and didn't interfere with anyone's rights. He then told the IDA scientists to go home. One job they left unfinished in the building was the final development of a device to detect hidden human beings, which would save countless lives from attack from ambush not only in this war, but in any war to come. But with the lunatics running the asylum, it was decided there would never be any more attacks on us, and no further need to go on with such silly experiments.

The mob agreed to be nonviolent, not to damage the IDA building and not to interfere with anyone's rights. They nonviolently broke a large antenna off the roof and replaced it with a peace symbol, the Vietcong flag. They did not damage the building. They painted obscene words and filthy pictures on all four walls, and dropped a stench bomb into the ventilator. They didn't interfere with anyone's rights. Anyone who approached the building had the right to duck the rocks they hurled at them. The administration, stern disciplinarians to the end served them sandwiches, doughnuts and hot coffee, and while the mob and their faculty Fagins were busy munching their picnic lunches and smoking their pot, President Goheen called a faculty meeting that lasted until 4am to discuss ways to handle the situation.

I don't know if anyone suggested that one way might be to turn firehoses on them. Or to expel them on the spot, declare them trespassers, vandals and public nuisances and permit the Princeton police to pile them into paddy wagons.

I don't know if anyone reminded President Goheen that Princeton's commitment to the government was to continue to operate the IDA until 1975; but that there wasn't a student lunatic or faculty Fagin in that mob Princeton was committed to tolerate beyond the next thirty seconds.

Which commitment did Princeton honor?

Its commitment to the defense of the nation?

Or its commitment to the lunatics whose sickness is the fantasy that because they prefer to enjoy America's affluence in peace, our enemies will be lunatic enough to let them once we destroy our capacity to maintain that peace.

Princeton didn't order the obstenity howling, stench-bomb throwing mob off the campus. It ordered off the scientists from the IDA.

No, there wasn't a single move in that that insane man would make, or a lunatic wouldn't. And then there was the appointment of one of the leaders of your 1968 riot here to your Board of Trustees—an act comparable to appointing Richard Speck night watchman to the nurses' dormitory or Adolf Eichmann Chief Rabbi of Berlin.

When the lunatics take over, everything goes crazy, right down the line.

Princeton exists because of the revolution of men who wanted to be free. Now there are those at Princeton who teach revolution against the freedom they won. But, they don't give the student a full course. They aren't taught that revolution doesn't consist wholly of wearing Che Guevara's old hairdo, Leon Trotsky's old beard, and Audie Murphy's old uniform, and going out and lobbing rocks at the other side. They aren't taught that, in a revolution, the other side, whether they're cops, or construction workers, or other kids in National Guard uniforms—can fight back. And when they do,

## FOR SALE

1 Pro Pilot Kit including:

- 1 pair of raunchy sunglasses, w/ gold-plated tin rims
- 1 sunglasses case to hang jauntily from your belt
- 1 Embry-Riddle pocket protector including:

- 1 mechanical pencil w/ blue lead
- 1 19¢ Bic Fine-point w/ black ink
- 1 penlight flashlight w/ red bulb
- 1 combination pocket slide rule, yard stick, metric conversion table, and secret decoder
- 1 telescopic pointer
- 1 tire gauge calibrated in AMU's per furlong
- 1 combination pliers, screwdriver, notary stamp and roto-rooter that glows in the dark
- 1 aviation type watch equipped with: Hobbs meter, stop watch, altimeter, tachometer, barometer, thermometer, flight computer, Mach number index, and alternate static source (time indicator optional)
- 1 sling to support arm with watch
- 1 Embry-Riddle flight bag containing 2 peanutbutter & jelly sandwiches and a Mighty Mouse comic book
- 1 pocket sized full length mirror
- 1 very brown nose

### PRINCETON CONTINUED

the half-baked revolutionaries cry their hearts out and those who sent them to the barricaded half-raw, demand that we cry FOR them.

Princeton, which once, when reason reigned, abhorred racism, now teaches it, by example, as they do at Yale and Harvard. It comes in a more sophisticated form, but that's because the Ivy League can afford a more expensive type of bigot. At Yale when Kingman Brewster said that no black man could get a fair trial in the state of Connecticut, what he also said, in effect, was that there weren't twelve honest white men in the state of Connecticut. Now, racism is racism no matter which race it is directed against.

**RE-ACCREDITATION:** STUDENTS ARE NEEDED TO WORK ON THE VARIOUS COMMITTEES WORKING ON THE SELF-EVALUATION PROGRAM FOR RE-ACCREDITATION. THESE COMMITTEES CANNOT OBTAIN ACCURATE STUDENT OPINION UNLESS THEY HAVE STUDENT MEMBERS. INTERESTED STUDENTS, PLEASE CONTACT DEAN MANSFIELD, DEAN SPEARS, OR MR. PARKER.

October 13, 1970

The twentieth regular meeting of the SGA Senate was held today in Room 108 with 36 members attending. The meeting was called to order at 12:15 by Speaker of the Senate Terry Owens. The minutes of the previous meeting were accepted as written unanimously.

President Miner and Vice President Eddy attended an Executive Board of Trustees meeting today.

Vice President Avery announced the need for the formation of a committee to work on the revision of the SGA Constitution and By-Laws.

All students are invited to submit designs for a permanent ERAU crest. A letter explaining the significance of the details on the crest should accompany the design. The individual submitting the winning design will receive a personal plaque along with a plaque to be displayed at the academic complex and a letter of commendation in his permanent file. A committee of two Senators and two faculty members will choose the winning design.

**Traffic.** Jack Grandman reported that investigation of solutions to the academic complex's traffic congestion is continuing. Senators have been parking in faculty areas and ignoring tickets received for these violations. Senators are reminded that they are expected to pay their fines.

**Blood Drive.** Cam McQuaid announced that the October 30 Blood Drive will be held in Rooms 108 and 110, provided scheduling conflicts can be worked out. Work on the "Blood Vane" has begun. Mr. McQuaid will meet with the IFC next Tuesday; it is hoped that the IFC will coordinate the competitions. The major problem seems to be offering incentive to the student body; more personal incentive is needed, and creating this incentive is every Senator's responsibility. Senators (and any other interested students) are asked to obtain prizes from local merchants for blood donors. Two volunteers--Paul Williams and Barbara Gathany--will coordinate this effort. Many volunteers will be needed on the day of the Blood Drive to keep the operation running smoothly.

(Please note: If you have given a pint of blood, you and your immediate family are eligible to receive blood from the Red Cross for one year--there is no limit on the amount of blood.)

**Greek Week.** The IFC is working on games, etc., to be held at McElroy Park in conjunction with the November 21 barbecue. Campus organizations are asked to contact the IFC if they are interested in entering the Blood Drive competitions.

**Diplomas.** A motion to accept the newly-designed diploma, provided that honors earned be included on the diploma, was passed unanimously.

**Alma Mater.** In regard to the proposed Alma Mater distributed to Senators last week, a motion to keep looking for an Alma Mater was passed unanimously. (The proposed Alma Mater did not seem to meet with Senate approval.)

**Parking Lots.** Mr. Parker announced that the academic parking lot will be painted Saturday and the Dorm I lot will be painted Sunday. No parking in those lots on those days!

**Barbershop.** The campus barber wishes to raise his prices to \$1.75 for students and \$2.00 for faculty. Otherwise, he will terminate his business here. This matter was tabled to the Facilities Committee, who is requested to submit a full report at next week's meeting.

More Parking. There is insufficient space for parking at Dorm I. However, students are now permitted to park at the other end of the fenced area.

A & P. A temporary committee to work with Mr. Barrs and Dean Davis on A & P curriculum problems was formed. David Trucksis is chairman; other members are Larry Rea, Fred Stratton, Larry Abbott, John Fish, Jan Nelson, and Richard Hooper. The committee is requested to submit regular reports to the Senate.

Money. Gary Anderson stated that many students would like to know how much the Senate anticipates spending on its awards banquet. Steve Avery replied that, although no precise figure has yet been set, it has been established that there will be only one awards banquet per year, and there are no longer any installation dinners.

Flight Line. Barbara Gathany stated that there are not enough planes on the flight line. Also, flight students are scheduled for instructors, but such scheduling is not always put on the board. In general, explained Terry Owens, students who are behind in their flight course are given priority, and students who are ahead are placed on stand-by.

Parachute Club. The Sport Parachute Club hopes to enter the national Intercollegiate Parachute Meet at DeLand, November 26 to 29. However, the entrance fee for nine members, three in each of three classes (novice, intermediate, and advanced) is \$250. The club's treasury does not have the necessary funds; the club is trying to raise the money through various projects and drives, but is requesting additional assistance from the SGA (\$100). Past meets have had a very large turn-out. Schools such as Purdue, Harvard, West Point, and the Air Force Academy have already entered. Although the Senate could consider granting the club the funds, the problem arises of setting a precedent that other clubs might try to follow.

A motion to send a recommendation to President Hunt that the school financially support the Sport Parachute Club's participation in this event was passed unanimously.

Surprise! Dan Smock announced there would be a meeting at 3 pm today with representatives of the Sands Company regarding raising prices.

The meeting was adjourned at 1:10.

## DINERS FUGAZY TRAVEL

"A World of Service"

# 253-6731

221 Seabreeze Blvd.  
Adjacent to  
Francis I. DuPont & Co.

DINERS CLUB & OTHER MAJOR CREDIT CARDS HONORED

# ATTENTION ALL EX MILITARY PILOTS AND CREWMEN:

Those of you who are interested in participating in the US Army Reserve and earning a little extra money on the side, let us hear from you! Plans are now under way to organize a Medivac Company in the state of Florida. This company will have its headquarters in Miami, with three platoons located throughout the state. To get a platoon located in the Daytona area we need your help.

Presently I do not have all the answers as how soon the company will be formed, total slots authorized, type equipment to be flown. I do know, however, the more interest generated locally, the greater our chances become of getting a local unit.

If you are or would be interested in this program send a short resume containing your name, rank, MOS, qualifications, length of expected stay at ERAU, and any additional information you feel may be helpful or important to:

Bos 4153  
ERAU MAIL ROOM

This is not a commitment. All we want is to see what we've got in the way of local resources.

Below is an extract of the current pay scale. You are authorized approximately 60 days pay per year in the reserves. This scale does not include flight pay. However, this can be found by dividing the month amount by 30 and multiplying by 4. Aviators are authorized 80 flying hours per year.

Reserve pay is figured on the four hour drill period, equals one days' pay. You meet one weekend a month on both Saturday and Sunday for a total of four drills that weekend.

	Under 2 Years	Over 2 Years	Over 3 Years	Over 4 Years	Over 6 Years
O3	\$ 20.21	\$ 22.59	\$ 24.13	\$ 26.72	\$ 27.99
O2	16.20	19.24	23.11	23.88	24.38
O1	13.92	15.42	19.24		20.55
W3	18.71	20.30		20.55	20.80
W2	16.39	17.72		18.24	19.24
W1	13.65	15.66		16.96	17.72
E6	10.63	12.91	13.44	13.99	14.53
E5	9.18	11.31	11.85	12.37	13.18
E4	7.72	9.67	10.22	11.02	11.57

An E5 over 4 years service would draw \$12.37 X 4 drills or \$49.48 per week-end meeting.

A W2 over 4 years service would draw \$18.24 X 4 drills or \$72.96 per week-end meeting, plus flight pay for 4 days.

## DEAN BUCKS

So, in test after test, Embry-Riddle students proved to be a cut above average. In fact, the Embry-Riddle group had 49% fewer sandals when subjected to our hygienic administration rules.

The AVION is a weekly publication for Embry Riddle students financed by the student's activity fee through the Student Government Association.

Articles may be submitted to the AVION for publication by the Administration, the faculty and student body. The AVION deadline is every Monday. Please mark all items AVION and deposit in the basket in the trailer, the Suggestion Boxes, or ERAU Box 1568.

The opinions expressed in this paper are not necessarily those of the University or all members of the Student Body, nor do letters appearing in the AVION necessarily reflect the opinion of this newspaper.
