Session 1, Room 3:
Certification – Aircraft

- Process clarification – How do we certify new designs?
- Requirements – What requirements do I need to meet? Set by:
  - The aircraft (size, energy, performance)
  - It’s proposed use (Concept of Operation/Mission)
  - Intended Area of Operation (Airspace Integration)
- Operational Influence – Why do Commercial Ops and Hobbyists have different standards?
  - Risk exposure
  - Pressure to operate
  - Public expectation
