TUITION HIKE APPROVED

College of Aeronautical Studies ................. $630
Individual Credit Hours (under 14 and over 18) $45
..........................$675
Technology ............. $275
Additional Individual Credit Hours .......... $45

All students who are enrolled in the Tuition Guarantee Plan will continue to pay the present tuition rate as long as they are satisfactorily enrolled under the terms of the Tuition Guarantee Program.

The following article is a release from President Hunt's desk. For this reason, please read it with a grain of salt.

The Executive Committee of the Board of Trustees authorized an increase in the tuition to exceed $100 per trimester, with the admonition that the administration should keep a minimum compatible with maintaining quality educational programs.

I am pleased to announce that the administration has determined that in spite of increasing costs, E-RAU can continue to provide quality education with the following adjustments in tuition rates per trimester, effective with the Fall Trimester, beginning August 30, 1972: (See page 13 E-RAU Bulletin.)

PROJECT SEVENTH OF MARCH

Who do you want for leader? Will we have buses or not? Do you want Muskie, Jackson, Humphrey, Medovern, Wallace, Lindsay, Shirley Chisholm, Vance Hartke, or Sam Yorty? Now about adding a state student loan system to the ballot? CBS News has expressed an interest in this program. So have the candidates, elected officials and "retired" officials. All have endorsed the project as the only means of accurately getting the students feelings. So let's show them we care.

DORM I STILL WAITING

One month ago Thursday, the Dorm Council had a meeting with Dean Spears and Dean Mansfield. At that meeting the subject of unlimited visiting in Dorm I (an unprecedented time) was the major topic.

Both Dean Spears and Dean Mansfield said that they felt a bargain must be made: If the residents of the dorm could comply with Dorm Council regulations, they would have evidence of the maturity of Dorm I residents to grant such rights.

The month is up and there was not one violation. The dorm council has been pressured by the more militant students to tell the administration that they are fed up with being treated like children, and having someone constantly buzzing, knocking, and asking about their company.

The majority of the students feel that no major upheaval will take place with a new policy. It only means that the hours between 2-6 AM are now free of administrative hassles - most dates have to be home before 2 AM anyway.

The only thing the Dorm I students want is the recognition of their maturity, which they proved.

A Dorm Resident Speaks

"Our part of the bargain is fulfilled. Will you, the Administration, say to us that you made a major mistake? We're sorry if we took you literally - because we did.

Please don't disappoint the Dorm residents. Some of them have reached the boiling point. They were there a month ago, but were temporarily placated by the knowledge that adulthood was only a month away. But don't put off a bargain that was made - we do our part by being adults - don't treat us like children."

DORM II ERUPTS

In keeping with long term scholastic tradition, the mid-semester facet for steam release was opened this past Sunday night, as the mounting frustrations became too much for the Dorm II students to handle.

The invasion of privacy to allowing students began somewhere around nine-thirty. Students arm themselves with Roman Candles, sky-rockets and other assorted fireworks and other assorted fireworks began the melee. The event mushroomed to a peak when two, some reports say three, police cars arrived at the scene, half expecting a Campbell Street type shoot-out. To the total chagrin of the Dayton Police, the show was little more than a hoard of rambunctious noise makers. The police did have trouble bringing the crowd under control, and were forced to call in a secret weapon, Dean Spears.

Dean Spears arrived like the cavalry, just in the nick of time. Within an hour the Dean had instituted law and order with efficient use of the security forces under his command. On duty at the time was security guard Bill Corey. Bill was interviewed shortly after the event on the couch he took shelter behind. Mr. Corey told the AVION that for a while things looked pretty bleak, but when Dean Spears intervened quiet was quickly restored. The Dean, armed with fifty dollar fines for the use of fireworks, hit the crowd where it hurt the most, right in the pocketbook.

Dance Sat. - 9Pm. at Desert Inn
The SGA President’s Corner

Well, it’s party time again and I am cordially inviting all students, faculty and administration members to attend the dance on March 4th. Please note the time is 9 PM, at the Main Ballroom in the Desert Inn. I do hope that all student ID cards are required.

Any student wishing to bring more than one guest to the dance should come by the SGA office and request permission to do so.

During the last social function there were some students and non-students of the University who used another student’s ID card to gain access to the dance. To be fair with your fellow students, in the future, disciplinary action will be taken for any violation or misuse of student ID cards.

On Feb. 25, we had the opportunity to send to Florida Atlantic University two delegates from Embry-Riddle Student Court to attend the first State Judicial Conference. We received the benefits and suggestions from many State and Government Officials who offered conference lectures at this assembly.

The tuition increase is here. The current Student Administration, who are members of the Executive Board, were not given the opportunity to vote upon this motion. The reason was that the motion was made and passed on January 12, 1971, and we were not members of the board at the time. This meeting authorized the administration to increase the tuition if deemed necessary. But in case of any further increase in tuition, your student representatives on the Executive Board will be able to voice their opinion.

See you at the dance on March 4.

FRANK A. MAYER
SGA PRESIDENT

The AVION would like to thank the Maintenance Men across the yard for all their help and cooperation. Thanks for always being there when we need you.

Florida’s sultry days of summer appear to be here at last. Unfortunately, this pleasant beach weather coincides with our mid-terms. In decision abounds when a choice has to be made between the books and the sand.

Kick-backs galore! It appears that my opinions on the Goodyear Slimp were both uncalled for and unsupported. The space in our parking lot is donated due to the contributions Goodyear has made to Embry-Riddle in the past. I’m sure that more adequate space could be given to them though, so as to satisfy both their needs as well as ours.

To all students who feel left out, the SGA has put together another spectacular dance. Scheduled for this Saturday, March 4th at 9PM, the Desert Inn will once again be the location. It appears that our new social functions committee is hard at work erasing any doubts about their management capabilities.

Saturday’s twilight witnessed the fall of ERAU’s Varsity Baseball debut. Poor attendance quite possibly added to the mistake-filled baseball game, as only twenty odd people made the drive across town to the Bunting-Cookman field. In spite of the outcome, a few fans might have had their fill of the game. If the Eagles are to continue getting monetary support from the administration, they’ll need physical support from the students. Why not try to help them?

Sequel to Medevac

My verse’s torso you did print, but With missing parts it’s a loss. So the time that you do your layout, Please stay off the goddam sauce.

Jim Gibbs

The opinions expressed in this paper are not necessarily those of the University or all members of the student body, nor do letters appearing in The AVION necessarily reflect the opinion of this newspaper or its staff.

Robert E. Duden
Editor, AVION

Printed by the Halifax Publishing Co.
The steak was delivered along with the wine, which was warm. You did not have to go to the Vet's wine tasting party to know that Rosé's wine is chilled before drinking, but apparently the Pumphouse is still ignorant to that fact. The steak was very good, now that we can look back on it objectively. At the time we were so angry that it didn't make any difference.

We can say that the Pumphouse is a nice place to sightsee. The place is done in a western style that the management must be very proud of because the place is lit up with no less than ten thousand candle power. We recommend sunglasses.

The bill came to about $20. We should have been reimbursed for all the waiting we did. The Pumphouse has its problems. It is a potential good eating place and if the service improves about one hundred percent, we might try it again. Better get hoppin'...

John Storm

The Best of GWA
WHERE ARE THEY NOW?

In recent years it has been a part of school policy to hire ex-businessmen to teach management courses here at Embry Riddle. The logic behind this seems to land; experience is the best teacher. From time to time, however, some obviously misguided, uninformed, trouble-making hippie from the student body is pretentious enough to ask, "If this guy was such a hot-shot manager, how come he's not still there?"

I surveyed the management department to find out what some of these instructors did before coming here. Mr. Fosnewski-Introduction to Quality Control: From March, 1937 to December, 1941, Mr. Fosnewski was the head director of Spot-A-Plane Inc. This was the firm that installed the early warning devices for Wake Island, Manila, and Pearl Harbor.

Mr. Gross-Accounting II: During his term as chief accountant of U.S. Steel in the years 1935-1941, Mr. Gross masterminded the plans to sell one million tons of old scrap metal to the Japanese as an economy measure.

Mr. Smoot-Advertising II: In 1957 Mr. Smoot was the Vice-president in charge of promotion for the newly formed Edsel Motors Division of the Ford Motor Company.

Col. Abdul Ahmed (Egyptian Army, retired): Effective Organizational Thinking I & II: Col. Ahmed was the officer in charge of the projected invasion of Israel on June 7, 1967. On June 8, he was in charge of the heroic defense of the Suez Canal region. On June 9, he led the heroic defense of Cairo. On June 10, he helped organize the evacuation of Cairo.

A well impressed array of teaching talent, is it not?

Buy of the Week: Eck Clader (EMU Alumnus) at Spruce Creek Airport has an excess of Sig Fuel that he is selling for $3.00 per gallon. Bring your own jug. This is very good fuel for sport flying, and you can't beat the price.

DINING OUT
by Steve Barbour

"Jackalopes Abound at the Pumphouse East...

The legend says that long ago the jackrabbits were so big in certain parts of the west that they mixed in with antelopes and formed a new breed of animal that looked similar to a jackrabbit, but had antlers like an antelope.

This bit of legend adds a certain amount of mystery to the new restaurant in town: The Pumphouse East. We visited the Pumphouse this week and found no jackalopes-or at least none abolishing.

We called to make reservations, but found that the management prefers walk-in customers, and doesn't take reservations. We took our chances and found that we had a one-hour wait for a table. We always thought that a place that didn't take reservations had figured they had ample room and had considered the fact that no one likes to wait for over an hour for a table - as we did.

Getting the table did not ensure our happiness. We ordered onion soup for openers, and a bottle of Rosé. After a considerable wait we decided to try the salad bar before the latter stages of starvation set in.

It's a good thing the soup arrived while we were at the salad bar, because when we tasted the salad it was inedible. The "Roquefort" dressing was thin and tasted more like whipped mayonnaise than Roquefort.

The bill came to about $20. We should have been reimbursed for all the waiting we did.

The Pumphouse has its problems. It is a potential good eating place and if the service improves about one hundred percent, we might try it again. Better get hoppin'...

CANDIDATES CRITIQUE

THE CANDIDATE: Richard Nixon

by Henry Goethal

Richard Nixon, after serving as Vice President under Eisenhower from 1952 to 1960, ran for president for the first time in 1960. He was defeated in the primaries by John Kennedy and subsequently dropped out of the political scene. It was not until 1972 that Mr. Nixon again carried the Republican banner in the presidential race. This time he won.

Mr. Nixon campaigned in 1968 as a moderate. He said he would end the war in Vietnam. He promised welfare reform that he would end inflation and reduce the unemployment rate. For the past four years, Mr. Nixon has changed much in his moderate position and is now wending down the Vietnam War. He has pushed through such anti-crime legislation as the "No Knock" law. He froze wages and prices in an attempt to control inflation, and now has wage and price control.

President Nixon has proposed governmental reorganization in the form of major cabinet decisions. He has also proposed welfare reform through his family assistance plan. To combat one of the problems faced by every city in the U.S., Mr. Nixon has proposed a revenue sharing program.

The Liberals think Mr. Nixon is too conservative and the conservatives think Mr. Nixon has moved too far to the left. He has faced major opposition in virtually all of his major programs. Much of the "lack of action" his critics accuse him of, comes because of their opposition to anything a Republican President proposes.

At the present time, Mr. Nixon seems a virtual shoo-in in the November race. His opposition is split too wide for them to hope to sponsor any one man against Nixon.

Major obstacles for Mr. Nixon to avoid will be memories of the Vietnam War issue, crime, the economy and business.

It is the writer's opinion that Mr. Nixon will be with us until 1976.

GUIDANCE

Upon receiving word from the Veteran's Administration, Mr. Ledewitz, Director of Counseling and Guidance, has found that benefits are available for veterans who are in need of tutoring.

Special tutoring assistance is provided for eligible veterans who are students at Embry-Riddle and who are failing a required subject. Payments are made to the veteran for his tutoring expenses after receipt of his request, for a maximum period of nine months.

The Veteran's Administration does not approve the applications and payment for this assistance until "after the fact". Once your "need" is established by the Veteran's Administration and the Embry-Riddle certification is completed, you can receive reimbursement.

Mr. Ledewitz hopes that veterans who are eligible for this service and who need tutoring assistance will take advantage of the new tutoring program. Anyone who is interested may apply at the Counseling and Guidance Office.

PLACEMENT OFFICE

The Navy Fly Team will have a jet aircraft at Volusia Aviation, March 6, 7, and 8 for those students who qualify for a test ride.

Martin Marietta's Orlando Division will hire 350-400 engineers this year, and "several hundred" other workers, according to a news item in the Orlando Sentinel.

GRAD system literature has been received for those graduates wishing to submit a resume to them. This can be done two weeks prior to graduation. Stop in my office and pick one up if you so wish.

CONSUMER CORNER

TRY Ray's Meat Market for fantastic (and cheap) meat. The beef is western choice and is trimmed of bone and fat much more closely than in local supermarkets.

The market offers pork, chicken (big fat ones for 29c a lb.), and almost anything else you desire. If you have a freezer, the market sells quarters of beef.

Things that caught the AVION's eye were the cleanliness of the place, the friendly, personal service, extra cheap prices, and even free dog bones.

It is located five miles north of Granada Ave. in Ormond Beach.

FOR SALE: Ford 289 parts: Manifold, Cam, Bell Housing, Ford 411 Pos. with Carrier Housing, Ford and Chevrolet 3-speeds. All very cheap. Contact Wayne 767-5783.

NEED A TUTOR? Contact Mr. Ledewitz in the Guidance Office.

Sigma Phi Delta

Our third annual "softball night" was held last Friday. This is an evening in which most of the pledges and brothers get to meet each other informally: in this case over two kegs worth. Paul Barry and Company went to great lengths to acquire some new pledge education films. I'm sure they planted some new thoughts in several people's minds. All in all, a rather busy night, to say the least.

Saturday saw Delta Chi defeat the Broken Bats. However, there's more to it than that. In extra innings we overcame a 7-1 deficit to tie and then win the game by a score of 9-7. It is sufficient to say that it was a very hard and very well played game by both teams. Congratulations Delta Chi. Next week, undefeated Alpha Eta Rho National has their turn against us and our own undefeated record.

One pledge from tomorrow and counting is our much anticipated chartering banquet. Invitations are out and all is ready. Now all that remains is the quick passage of one week.

One pledge class remains and is established at 16. They have had several fruitful work days at the house with the brothers and are now selling refreshments at the weekly Sunday softball games.

Watch out for the other guy! See ya next week.

Alpha Rho Omega

On Feb. 28, Alpha Rho Omega played WMFJ in a basketball game. Due to the superhuman efforts of our players, we won the game 73-72. All fraternity members who desired to play had ample opportunity.

Saturday at 9 AM Alpha Rho Omega played the "Old Timers" in a second softball game. Sunday, Alpha Rho Omega met the Sigma Chi forces.

A highlight of the Feb. 24th meeting was a talk by Frank Impagliazzo on his recent overseas trip. On this trip, Frank investigated Delta Air Line's employment opportunities. Short haircuts and conservative appearance are a must for applicants. Martin Avsec and Jim

Delta Chi

The past couple of weekends have been pretty hectic for the brothers and pledges of Eta Iota. The weekend of Daytona 500 saw all of us trying to earn money for the refurbishing of our chapter house. The excellent participation of the brothers and pledges made the event a smashing success. On Saturday we held a very profitable car wash at our house. We were successful in returning the shine to about a hundred and fifty cars. Also on Saturday that day and on Sunday we parked cars at the races. When all of the final receipts were in we had achieved nearly fifty percent of our goal. A special thanks goes out to Mark Regn and his excellent leadership during the fund raising.

Congratulations to our softball team for their victory this week. The softball team's future looks promising with that victory. Brother Skip Bedar is the man behind our athletic success.

This Saturday will see the members of Eta Iota out in force collecting for the United Way. This is just one of Sigma Chi's many contributions to the welfare of society. We are also in the planning stages for our spring Easter Seal Drive. More on the Easter Seals will be mentioned in later weeks.

Our pledges are hard at work into their fourth week of their pledge period. We have a pledge class of 21, all under the watchful eye of brother Jim Patterson. Between him and his assistant, Terry Gardner, they have a job cut out for them.

Until next week, the brothers of Sigma Chi wish all of you a very pleasant weekend.

I KNOW WHY THEY'RE NOT PASSING THE WEASEL RUNNER - THEY DON'T WANT TO PING HANS! 

Lambda Chi Alpha

Officials from Lambda Chi Alpha Fraternity Headquarters in Indianapolis, Indiana instituted its newest colony: a Lambda Chi chapter at the home of President Hunt. This graciously offered house has been the scene of a day-long program, culminating with the installation ceremonies of the following men: William Ryan, Edward Bular, Les Williams, Stan Peine, Louis Arroyo, Anthony Silvani, Michael Prober, Thomas Morgan, Mr. B. Lamar, Clay Owen, Robert Spielman, and Michael McCarthy.

We are new Brothers in the fourth largest national social fraternity in the US and will join the over 200 chapters collegiate chapters of Lambda Chi. Total membership exceeds 115,000 with chapters in Canada also. Our revolutionary Membership Education Program has proven so successful that we are continually branching out to campuses across the nation. This never-ending search for new Brothers has rewarded the Fraternity with a cross section of men deeply devoted to their fellow man and with a reverent love for their country. We are extremely proud of our affiliation and brotherhood with Lambda Chi Alpha and will earnestly strive to maintain their far-reaching goals.

There is no truth to the rumor that: new course will be added to all curriculums. entitled Pornography 201.
I used to be a nothing - a little short, fat, whiny kid from Milwaukee with a running nose. I was a real thorn in your mother's side, a regular down-and-out; a has-been, who was never beloved, and not at all beloved in the neighborhood.

Then something happened. I became educated.

It all began in high school when I dropped out of P.S. 184 and enrolled in what must have been the first Alternative School. In the swamps of Milwaukee, everyday after school, we guys used to go to Alifa on the shore of lovely Lake Michigan. One afternoon, I noticed my friend, Norman, lighting up. On the cover of his matchbook it said "Finis High School." "Let me see that," Norman, I said to him. "Okay," Norman said to me. And as I lit my weed, I opened the book of matches and read on: "Are you tired of being a nothing, a little short, fat, whiny kid from Milwaukee with a running nose, a real thorn in your mother's side, a regular down-and-out, a whiney, a has-been, who never was, and not at all beloved in the neighborhood? Then finish High School in your spare time. You can't get anywhere without a High School diploma. Write away right away.

So right away I wrote away. A few weeks later my info arrived in a plain brown wrapper. "What's in the plain brown wrapper," my mother asked. "Just some obscene literature," I told her. "Okay," she said. "Just as long as it isn't any of the correct poodle course stuff." I promised her it wasn't and the next day dropped out of school everyday, between the hours of 7:45 A.M. and 4:30 P.M., I'd sit on the banks of Lake Michigan and do my assignments diligently, taking only an hour out for lunch.

A few months later, my diploma from Matchbook High School with my name magic-marked in arrived. And it now hangs proudly over my Father's pipe rack.

Upon discovering there was no Matchbook College, I enrolled at the state university and took classes in physics, freshman English and animal husbandry.

And then it came in the mail. A pamphlet proclaiming: "Instant Learning - courses that turn your tape recorder into an automatic learning machine." Shaking with excitement, I read on. "Now! Electronic Technology gives you a New Way To Learn Any Skill You Wish -- so easily -- so quickly -- so automatically -- so perfectly and permanently that it will take your breath away.

I gasped. Could this be true? Could this be from those nice people who brought me Matchbook High School? And, would I, as the pamphlet promised, "be turned into a walking encyclopedia to whom your friends and business associates will turn as a final authority on virtually any point?" I decided to sign up then and find friends and business associates later.

I dropped out of college. I sold my dorm room, bought myself a tape recorder and ordered learning tapes on each subject. I learned to "At Last! Speak Fluent Spanish, French, Italian, German in exactly 24 hours!" I started, as the ad said, "chatting away like a native." For $9.98.

I obtained a "Power Personality" and got "all the friends you ever wanted." I regained accounts that were considered lost. I won the unconditional approval, respect, and admiration of everyone I came in contact with.

And I revitalized, as the ad promised, "My marriage into a thrilling daily experience." It all worked. And I wasn't even in business or married. Only $9.98 per tape.

I learned how to develop my "Creative Mind Power," as I began to "Librate the Creative Flow Beathing Within You!" I learned "how to defend yourself against the Human parasites who want to rule you. Life and, before you could say $9.98, I forgot my "feelings of inadequacy" and learned how to "try open the clamped fists of control the people wrap around you!"

Right after night, while I was asleep, I began to double my power to learn. (In Just A Single Weekend, I brought the "Magic of Mystic Power" into my life. I learned how to "avoid lawyers and take my way out of fatigue, cast astrological horoscopes, write articles that sell" and "Learn The Magic of Push-Button Self-Hypnosis," started to shed pounds after pound. You'll be More Alive, More Alert, More Attractive to the Opposite Sex." And all for only $9.98.

In one tape I found the secret of perfect living - Instant Sleep - and learned to skyrocket my child's grades in school, as well as become a successful secretary, learn "the new science to command impressions" and win "unlimited power and control."

All this in two quick weeks.

Now I can do anything - I am the American Dream. I'm happy, I'm rich, I have control over people, I know everything you always wanted to know about ever - - thing - just ask - and I am beloved in the neighborhood. I am the perfect human being.

And now I'm in business for myself. With all of my vast experience in educational alternatives, I'm opening up what I call "Knowledge College" under a new, novel and unique principle; you arrive at my building at about 8 A.M. and spend the day sitting at something called a push-button desk as a teacher lectures to you and you take notes. Then you're tested and you give back the information to the teacher by rote. This learning program should take about four years. It is a radical plan, I know, but it just might work. As for the cost, just send me $9.98.

NOTICE of POLICY

All requests for notices on campus signs must be received a minimum of 2 working days prior to the date of placement of sign.

All requests for posters must be received a minimum of one calendar week in advance of day that they are to be posted. The above stated times are necessary for coordination of signs and print shop work.

The Route all requests to Andy Anderson, through the SGA Office.

Andy Anderson, Chairman, Publications and Publicity Committee.

STUDENTS

Flight students have lately been suffering through an unnamed bureaucrats' seemingly arbitrary and inconsiderate new policy. This policy requires all students to arrive at the flight line and personally (as opposed to telephoning) cancel flights (dual and solo) due to weather.

This lack of consideration for the student's position came to light when a student had to drive from Ormond Beach to the flight line to say "cancel me out," and then drive all the way back home. He had called the flight line and the weather wasn't predicted to become flyable for solo's until noon. He was scheduled for 8 o'clock. It does not take a barrel full of brains to see that this student was unreasonably inconvenienced and spent much time, money, and school spirit complying with the new policy. He was told that the alternative was being charged with a "No Show." For an easy-going guy, our friend was pretty hot.

He pointed out that no gripes would be justified if his had been a dual flight. He could have gotten an oral or perhaps a GAT period from his instructor. He realized that the instructors have to make a living, and that weather periods affect them financially. So he wouldn't have been excited about coming to the flight line for a cancelled dual period.

Another student rode the bus over from Dorm II. He cancelled and almost drowned waiting for the bus back (funny thing how weather days and rain go hand in hand). We think that one such trip to the line in a pouring rain would make the originator of this policy withdraw it. The only reason we can come up with for this policy is the attitude of "I have to be here and you might as well be too."

The time spent traveling to and from the line (and drying off) could be spent studying: an item that bureaucrats don't worry about anymore. Flying is only one part of the student's life—so his weather time can be certainly utilized in other areas.

Another consideration is the attitude of the flight student. He often completes flight training and then transfers to academics. With this new thorn in his side he will judge all of E-RAU on the flight line, and leave.

The time spent traveling to and from the line (and drying off) could be spent studying: an item that bureaucrats don't worry about anymore. Flying is only one part of the student's life—so his weather time can be certainly utilized in other areas.

This unreasonable policy contributes nothing to efficiency, safety, or good will. The often quoted word... "Judgement" springs into mind regarding this policy: seems the originator had none.

BASEBALL
by Coach Brown

Embry - Riddle was soundly defeated Sat., 11-1, by Bethune Cookman. Cookman hit the ball well, and took full advantage of breaks and errors.

Riddle, already beset with injury problems and sore arms in the pitching staff, suffered a serious loss when third baseman Roger Fisher was spiked in the second inning. Fisher required six stitches and will be out of action for about 10 days.

Fritz Pederson got the starting nod, but was driven from the mound in the second inning. Rich Santanna came in with the bases loaded and retired Cookman with one pitch: a fly ball to short center. Both pitchers were working with only one day of rest.

Riddle, in addition to its sloppy play in the field, managed only two hits off starter Dobson, and added one more off the bull pen. The team arrived a little early in order to take extra batting practice, and shake the slump that some of the hitters are in.

Looking on the bright side, if there was any, Riddle never gave up, and kept on fighting. It seemed to be one of those days when everything went wrong. A number of obvious "team" errors were spotted, and we will be working even harder than we have been to eliminate them. We are capable of playing better ball than was seen on Saturday.

On Saturday, March 4, the team plays Florida Technological University (away). Game time is 7:30 at Tinker Field.

ATTENTION ALL TEAMS!!
If your game is scheduled for 12:15 on any of the game dates, remember, it is a misprint on the schedule. The games will be played at 12:45.

Sunday, Feb. 27, turned out to be a beautiful day for softball. At 9:00, Sigma Chi and Alpha Rho Omega met on the diamond. At 9:45, the score was 2 to 2. Sigma Chi scored five runs in the first inning and 9 runs in the second and third innings. Needless to say Sigma Chi crushed Alpha Rho Omega.

At 10:15, the undefeated Vets went up against the "Oldtimers." The Vets scored all their runs in the first five innings. The "Oldtimers" rallied in the sixth inning but fell short by five runs. The rally was a futile attempt as the Vets rolled over the "Oldtimers" by a score of 10 to 5.

The third game started at 11:30 as AHP National took on Sigma Phi. Once again the natural talents of the AHP squad came through to defeat Sigma Phi by the score of 13 to 4.

The game went into overtime and Delta Chi pulled the rug out from under the seemingly overconfident "Broken Bats" as they scored two runs in overtime and held the "Broken Bats" to 7. Shomman watched his team bow down to the overpowering Delta Chi by a score of 9 to 7.

That wraps it up for the Eagles this week. See you next week.

INTERNATIONAL STUDENTS ASSOCIATION

The dynamic, new International Students Association held its elections at the home of faculty advisor to foreign students, Mr. Jeff Ledewitz on Feb. 23. The following students were elected: Alexander Rodriguez, Pres., Bill Bolton, Treas., Marcelo Rey, publicity, Anne Irving, Sec., and Robert Sabella, soccer team coach.

The Association was organized three weeks ago by 22 E-R students representing North, Central, and South America, Europe, Africa, the Middle East, and India. It was created to provide a social organization and service club for international students here. There are approximately 80 students at E-R now from foreign countries.

The meeting lasted about one hour and was followed by an informal party. The members provided their own beverages and Mrs. Betty Ledewitz served a snack. Israeli - American Joseph Stein, who studied accordion in Israel, exploded into a fiery "hora!" Chairs were pushed back, and Eilon Krugman-Kadi, another Israeli student, led the circular, Jewish folk dance.

Following this exhibition, Telmo Guevara of Ecuador and Alexander Rodriguez of Peru dashing executed a tango, and the spotlight shifted to Puerto Rican Noel Colon, who is a terrific guitarist. The rest of the membership joined in on many familiar songs.

The International Students Association is looking for a place to hold its Wednesday night meetings. Any student may join the International Students Association by signing the membership roster. Students from the USA are welcome. If interested, please contact the secretary, E-R box 657.

MODEL AIRPLANE CLUB

It has come to our attention that there are many E-R students around campus who are interested in model airplanes, but are reluctant to join our club because of their inexperience in building models or in flying them. You do not have to be an experienced modeler to be welcome to our club. We are dedicated to the promotion of the hobby, and that includes helping others get started. We have experts in most phases of building and flying who are anxious to share their knowledge with others so if you are a beginner, come by and let us help you, or if you are already an expert, come by and share your experience with us. We'll be glad to have you. Our next meeting will be held at 7:00 PM, March 6, Building A, Room 102. Also, we fly in the Academic Complex Parking Area on Sunday afternoons. You are welcome to stop by and discuss modeling with us there.

Plans for the Third Annual Eagle - Beagle Model Airplane Contest have been completed. The contest will be held April 29 & 30 in the Complex Parking Area. This is an AMA Class AA, control line contest and will attract modelers from all over the Southeast. A breakdown of the various events will be published in a later edition of the AVION; however, anyone interested in participating in the contest should start preparing now. Additional info can be obtained at our club meeting or by addressing a note to ERAU Box 296.
Getting It Together
by John Eaton

I have been talking about involvement these past couple of weeks and the Dorm Council of Dorm I is a fine example of the point I've been trying to express. We have been involved in productive issues regarding the needs and benefits of the residents of Dorm I, and so far have proven to the Administration and to the Resident Manager, Fred Arabab, that the present Dorm Council is more organized and more effective, through our concern, than others in the past. That, in itself, was the only valid argument presented by the Administration - that the former Dorm Council could not live up to their responsibilities.

Presently our main issue is bringing about 24 hour visitation on weekends, beginning 6 PM Friday and ending 11 PM Sunday. With the Administration's advice, we agreed to a week trial period, under the existing visitation hours. We passed this test with flying colors. Another meeting is scheduled for Wednesday the 33th with the Administration to represent our request. At this meeting, we will see if they live up to their part of the agreement. News of this meeting will appear next week. Through much determination and effort we are fairly optimistic of the outcome.

Theceed another meeting with Dave Harvey, the Secretary of the SGA, and Linn Henry, the Chairman of HEW, and it became apparent that we would receive any support we needed from the SGA and, in their opinion, favorable consideration of the Board of Trustees.

With the incoming residents of Dorm II, change is even more necessary in order to accommodate the needs of the "unquestionable CROWD" in Dorm I. As a result of this realization, we are beginning to formulate proposals for cooking and/or eating facilities for Dorm II. We are in the process of planning the construction of two kitchenettes on each floor. I feel this is the quickest and best solution to this problem.

I had a discussion with Frank Forest, the "on campus" man, for building and planning. He said that, "It's a draw", between the construction of new A&P buildings of the Student Center which would include dining facilities (etc.). This whole issue is on a seesaw. First on one side is the decreased enrollment this fall (approx. 250), possibly due to the parent's negative attitude concerning their kids having to walk a mile for a meal. On the other side is the Administration trying to get increased enrollment to finance additional buildings for an "impressive, funded, Flight Line; not to mention the increase in tuition for the present students. Now, I can't really say that a new A&P hangar is less important than a Student Center, because I don't know which one the A&P students need more. All I can say is, that with a Student Center/Cafe- teria, the majority would benefit enormously. The increased enrollment and finances would then solve problems for specific students. I admit that I don't know all there is to this issue, so please return the pupil below to the Suggestion Box in the Student Center or to my box, Box 4498, or even to the AVION. This will be a good indication of how much ACTUAL influence we really do have - provided we ALL get involved and speak our minds!

While I'm on the subject of "speaking our minds", I'd like to extend my admiration to the residents of Dorm II for a good example of "speaking their minds" last Sunday night. Don't get me wrong, I don't combine such action. I do feel though, that this is a good indication of what's to come from rising student unrest and frustrations.

Overall 20% increase of asking for overstuffed payments and an advance payment program to help a Vet make his first tuition payment (remember that long wait for the first check). The foregoing proposals outline some of the weak areas of the current "Bill." We realize that all of the proposals will probably not become a reality, however, all of the area must be prodded to see where advances can be made. We are not asking for over-stuffed inflationary legislation only fair and equitable treatment. Doesn't it make sense to have a Vet with a trade working rather than a Vet drawing unemployment? Most of us are all too aware of the fact that most of the good jobs went to the boys on the "block" while we were doing our thing.

We need a lot of support from all the Vets on campus, and petition will be circulated to all Vets Association members via their school mailbox. Petitions will also be available at different points around campus including the Vet's bookstore. So if you're a Vet, whether a member of the club or not, please grab one and get as many signatures as you can from friends, neighbors, and students. Remember, they do not have to be veteran's to sign.
LETTERS TO THE AVION CONT.

Dear Avion,

On Sunday night, Feb. 28, it was rumored around campus that Dorm II re-constructed D-Day, an event that brought forth both the Daytona Police and part of our beloved administration. It may seem funny that I should be writing an open letter concerning Dorm II, but it got back to me that chances for Dorm II's tentative 24-hour privileges were seriously set back. It is the feeling of the Dorm Council that Dorm II was in no way related to or responsible for Dorm II's action and feels resentment towards the administration (President Hunt) for even considering this incident in his consideration for our 24-hour privileges. Although we don't exactly condone the action of Dorm II, it is none of our concern. When Dorm II is vacated, some of those students will be residing with us and our Council will take responsibility of seeing that they regulate themselves just as we regulate ourselves now.

Dorm I is finally beginning to get well organized, and the privileges and better living conditions we are working toward depends on each individual cooperation. As long as Dorm I regulates itself, things will continue to get better, but let it be known now that we regulate only ourselves; not students that live off campus or in Dorm II.

Don Coleman, Dorm I, Dorm Council President, on behalf of the residents of Dorm I.
