The Dual Degree Program Offers Diversity For Students

The Dual Degree Program of E-FAU and Georgia Institute of Technology offers a variety of new courses for E-RAU students. The program which combines three years of academic work at E-RAU and two years at Georgia Tech culminates in the issuance of a degree from both E-RAU and Georgia Tech.

Dean of Continuing Education, Dean Wilson, explained that the primary purpose of the Dual Degree Program is to produce engineers who are prepared to work in the highly technical and complex fields of industry. The program is designed to provide students with a solid foundation in both the technical and managerial aspects of engineering.

President's Inaugural Address

I would like to take this opportunity to express my thanks to those who showed an interest in the past election. I would like to express my gratitude to President Leonhardi who with the help of many other SA members planned, organized, and conducted the greatest election in the history of E-FAU.

Second, to the students who voted because they believed in the Student Government Association. I am proud of my opponents of whom I have the highest respect.

Now that I have arrived at this position, I find that the views that I have expressed in the past about the SGAs are even more realistic than I had expected. The Student Government of E-FAU is in the process of initiating and very important form of this University.

Let me remind you that I am a part of the mock or model senate that represents the interests of students on campus. It is not just another extracurricular activity as many of the new students think, nor is it just an organization which was established to satisfy the students' desire to be recognized.

Dual Degree Program Offers Diversity For Students

The Dual Degree Program of E-RAU and Georgia Institute of Technology offers a variety of new courses for E-RAU students. The program which combines three years of academic work at E-RAU and two years at Georgia Tech culminates in the issuance of a degree from both E-RAU and Georgia Tech. Undergraduate degree offerings at Georgia Tech include a Bachelor of Science in Civil Engineering, Electrical Engineering, Industrial Engineering, Mechanical Engineering, and Industrial Science.

Dean of Continuing Education, Dean Wilson, explained that the primary purpose of the Dual Degree Program is to produce engineers who are prepared to work in the highly technical and complex fields of industry. The program is designed to provide students with a solid foundation in both the technical and managerial aspects of engineering.

Ralph Nader To Speak At Stetson

Consumer advocate Ralph Nader will speak at Stetson University October 26 as part of the university's fine arts calendar for the coming months.

Nader's appearance on campus is sponsored by the University Artists and Lecturers Committee in cooperation with the Stetson Student Government. The lecture will begin at 8 PM in Elizabeth Hall Auditorium.

Nader has been called everything from muckraker to Consumer Crusader to Public Defender. His documented criticisms of government and industry have had widespread repercussions on public awareness and bureaucratic power.

Last Day

The last day to register to vote for the November elections will be Saturday, October 7. Anyone not registered and desiring to vote should contact the County Supervisor of Elections at the Volusia County Courthouse on City Island.

S.G.A. Inaugurates New Officers

Dick Reiman, Mike Lesman, Lance Irvins, and Jim Daby took their oaths of office last Tuesday, followed by 9 of the 10 persons who were elected to the senate. Bob Harrel gave the invocation.

Dick Reiman took the stand following the long Invocation and Airmanship speech. He had planned this address to be a plea to the students of Senate during his term, but has shortened the message to: "Only complimentary remarks and I'd like to work together..." The lecture will begin at 8 PM in Elizabeth Hall Auditorium.

Mr. Wang, a citizen of the United States of America, has been the President of the Wang Family for eleven years. Mr. W. W. Wang was asked what was the most difficult part of becoming a citizen. His reply was, "waiting for the five-year residency requirement to pass". When asked about the oral exam she said, "the whole family had prepared together in learning American history and civic and social events or anything about it. We came to E-RAU in September, 1965, and have been in the United States for eleven years. I have worked as an accountant and have a great feeling of pride in becoming American citizens. We have looked forward to this day for a long time and now it finally come. We are very proud of the Wang Family. Congratulations are definitely in order for the Wang Family."
Letters To The Editor

Talking about our problems seems to be a common point of interest amongst us, but when it comes right down to solving them, no one wants to be first.

I am biased in this article because I live in the dorm, which will be the main topic.

After being shifted around from the dorm to motels to motels to the dorm, room to room, the dorm was less appreciated by the students. Problems like these could have been solved by proper management.

A major complaint of the residents in Dorm I is the cross-country run for a decent meal at a local restaurant. Money-wise, you will go broke fast. Who, I ask you, can afford the luxury of dining out every day?

Not many of us.

How can this problem be solved? Not only by putting a hamburger grill close to the dorm. "You'll still presell money," Room should be transformed into kitchens. Why don't we have the same rights as our female students. Are we less? I urge some people to read the "Bill of Rights".

Another strong discussion of interest are the washers and dryers. Even in the work, you can see the guys standing on waiting lines, sometimes until late in the night. Isn't there a better way?

Many a time I've seen students willing to get those vending machines to deliver its payed for goods.

Sure, he's got to get what he has paid for. But if you think for a minute, has anyone ever thought of replacing the faulty machines?

Changes must be made. The question is: "WHEN?"

A Spirited Campaign
by Curtis J. Purss Jr.

An old country boy once said, "ain't no politi-

cian ever get 'lected that didn't do no camp-
gaign, 'cept when folks didn't do no votin' ."

From the candidates' point of view the SGA election campaign was a very spirited campaign, and ranks among the best we have had at E-RAU.

Everyone involved, including those that lost, should be congratulated for the spirit and enthusiasm displayed.

On the other hand, students' interest was reflected in the voter turnout, which was indicated by the 48.5% of all eligible votes that were cast.

Even so, this was the best voter turnout we have ever had.

Student participation in student activities is part of the extra-curricular activities that make the university more interesting and enjoyable.

After all, we don't want this school to turn into just another "diploma mill." From the candidates are I would like to add one or other thing to that old country boy's saying, "Folks that don't do no votin' didn't do no complainin'."

Inaugural Address con'd from page 1

"I hereby required to protect the students' interests. I can assure you that I will take the time to research any decision I have to make before I take action.

I will promise you that I will work on getting a worthwhile and long-overdue compensation for those SG representatives who demonstrated an outstanding experience, and eager-ness which is needed in an organization to be productive and efficient.

In conclusion I would like to appeal to you for your support of my job. I promise you my support, together we will be successful in accomplishing our goals.

Thank you,

Richard B. Reiman
SG President

The Realm of Rollied

A small group of archaeologists digging in California discovered a large manuscript concerning life and times of the people of Rollied. While painstakingly copying the document, they noticed striking similarities to the epic tale ofRollied.

"In the Kingdom of Rollied, there lies a small realm called the Valley of the Great Plains. It is a land of rather peculiar traditions. We would like to share some of them with you.

"Every year when the harvest was over, the Council of Knights Errant would convene. The Council would gather in the Town Hall to determine who was the highest spirited person in the realm. A questing for the title of Knight Errant was open to all who wished to participate. The winner would become the Knight Errant for the year.

"The Council of Knights Errant, known as the Council of the Great Plains, was the ruling body of the Kingdom of Rollied. It was composed of seven members, each representing a different region of the kingdom. The members of the council met annually to discuss the affairs of the realm and make decisions necessary for the well-being of the people.

"One of the most frequently asked questions at this university is: How can I get involved in the community? One way to get involved is to volunteer your time and energy to a good cause. This is an excellent way to meet new people and learn about different aspects of life.

"In this respect, the University of Rollied has numerous opportunities for students to get involved. For example, there is the Student Action Board, which is responsible for organizing and coordinating various service projects throughout the year. The board meets on a regular basis to discuss upcoming events and plan new initiatives.

"The Student Action Board is always looking for new members, so if you are interested in getting involved in community service, I encourage you to attend one of their meetings or contact them directly.

"In addition to the Student Action Board, there are many other opportunities for students to get involved in the community. These include volunteering at local hospitals, participating in community service projects, or working as a mentor to younger students.

"I hope that this information has been helpful. If you have any other questions, please feel free to ask me.

RIDDLE'S RIP-OFF RIDDLE

A new face on campus

By Curtis J. Foree, Jr.

A new face on campus is that of Mrs. Carolyn Griffin, who is the Librarian at the Life Science Library.

Mrs. Griffin has been on campus for two years, and she is well-liked by the students. She is always willing to help students with their research projects and is known for her patience and understanding.

"Mrs. Griffin has a unique way of making people feel comfortable and at ease," says one student. "She always takes the time to listen and offer advice, and she never seems rushed or stressed.

"I've been working with Mrs. Griffin for nearly two years now, and I must say that she is an excellent librarian. She always goes above and beyond to ensure that everyone is satisfied with the service they receive.

"I appreciate all that Mrs. Griffin does for us, and I hope she continues to bring her positive energy to the library for many years to come.

"Mrs. Griffin's dedication to her work is truly inspiring. She is a role model for all of us, and we are grateful to have her as a part of our campus community.

"From all of us at MILEX, we extend a hearty welcome to Mrs. Griffin.

MILEX-TECH=TUNE-UP

SPORTS WORLD

Intramural Team Of The Week

By Bob Barreal

The Vets football team has been chosen the team of the week. This is the second season for the Vets. Fortunately, most of last year's team was able to return to the field. This season finds the Vets an experienced and spirited team. To be sure last year was not very inspiring to the team. Their offense was out of shape and the Vets lost many games. The defense was among last season and only eighteen points were scored against them.

After a long hot summer, the offense has gotten it together and started the season off with a bang. The first game of the season found the Vets victorious over Sigma Chi. Last week the Vets played a beautiful game against the Cowboys and again found that the nectar of victory sweeter than defeat.

This Sunday the Vets play Lambda Chi Alpha at 10 AM. The Vets are looking forward to meeting the Delta Chi Jets in the last game of the season. It would be the Vets’ reward game of the South.

It's bad enough when his head is here...
Ordinarily, unless a live album is done with exacting precision and control, it just doesn't make it. Somehow, all of the studio albums fail to capture the mood of the audience in front of you. But here is a live, in-person double album that is the finest. It is clear that the feeling and spirit of the concert hall has been captured on tape.

The name of the group is The Band and the album is Rock of Ages. Robbie Robertson, Garth Hudson, Rick Danko, Richard Manuel, and Levon Helm make up this remarkable group of instrumentalists. They have been together eleven years. Several of these songs were written working with Dylan. Who could ask for a finer turntable?

Rock of Ages is an out-of-the-ordinary album, with a unique mixture of rock, country, jazz, and classical influences. It is my opinion that The Band is headed in the same direction that rock music is inevitably evolving to.

The mood is American, if you will. The words are clever and the styles are so varied that it can't be put into one category. The tempo seems to be toned down in an effort to sellout the album. This technique is rather unskillful. As far as the vocals are concerned, The Band can only be called unique. There is one characteristic of this album that stands above all others, providing an amazing asset of the horns to the production. The horns are not short of superb when added to the keyboard operations of Garth Hudson.

From the beginning to the end, there is one hour and ten minutes of enjoyable music. I'm sure it's worth the price.

**Today's Music**

*by Rory Donnelly*

609 Grad's Denied Diplomas

by John R. Miller, Jr.

---

This headline, or one similar, probably appeared in the University of Wisconsin's newspaper after this year's graduation ceremonies. The allegations were that the students involved had purchased material from a term paper writing service, known as the Academic Marketplace, and had submitted the material as their own work. (The evidence was a list of names taken from the files of the Marketplace by the state's attorney.)

No longer is it simply peeping into "fraternity files," or having one's best friend's sister's aunt type up a thesis on "Crossbreeding the Aardvark." Cheating has gone public. (One entrepreneur is considering selling shares of stock in his enterprise.) The cost of the service represented an average of thirty dollars for an average length paper to 400 dollars for a master's thesis.

The question of legitimacy of such an enterprise became particularly pertinent here at E-Raw when an advertisement for the Temaper Arsenal appeared in this newspaper. The result of the ad's few appearances (it will no longer appear—see editorial) are difficult to define. Perhaps some students will use the service. They must consider, however, that their instructors have also seen the advertisement (and have probably purchased more than one car radio as offered). Perhaps the term paper and a learning device will be reevaluated.

The basic question is one of integrity. Regardless of how "official" the services seem to a person's use of purchased material as his own is plagiarism.

One faculty member considers Temaper Arsenal's advertisement to be a portion of advertising for "hot tires".

---

**Don't Get Involved!**

*by Charles Mottahon*

---

Last June, David J. Hanley, 30, tried to stop an airport skyjacking at St. Louis Lambert Airport. He drove his 1972 Cadillac convertible through an airport fence and rammed the skyjacked American Airlines 727 to keep it from taking off. The skyjacker with his ransom and his hostages just switched to another aircraft. He parachuted and was captured later.

Hanley now probably wishes he had kept out of it, for he now finds himself in deep trouble. His medical insurance will not fully pay for his injuries. His auto insurance will not pay for damage to his car, to the plane, or to the airport fence he drove through. And to top it off, the Federal Government has charged him with interfering with an aircraft.

All students, staff and faculty members, or University groups are invited to submit a design that will symbolize Rubby-Riddle. The conventional design shown may be licensed and sold for the appropriate design. The University name and date of founding (1926) must be used.

Designs will be judged by a committee comprised of representatives from the Board of Trustees, Faculty, Student Government Association and Administrative Staff. The joint design committee will meet November 16. The purpose of making a selection. Therefore, all proposals must reach the University Special Activities Office by the close of business on Friday, October 31, 1972. The person or group whose design is adopted by the University will be awarded $50.

---

**ALPHA RHO OMEGA**

YOUR PROFESSIONAL FRATERNITY

In the short period of eighteen months, the brothers of Alpha Phi Omega have accomplished much for their fellow technologists. We have grown to be the largest fraternity on campus. Our doors are open to all A&P, AMM, and AME students.

We do not have pledges or background of prospective members as we are a professional fraternity. Instead, our prospective members are invited to all business meetings and their suggestions are welcome. We are run by the students operating on our own merit and the support of our brothers in the aviation community.

Your membership in an organization such as this will reward you in your future life. Alpha Phi Omega is the first step to success in the United States for Aviation Maintenance Technicians. We are affiliated with A.S.A.T., the Society of Licensed Aircraft Engineers and Technologists, London, England, and Alpha Phi Omega believes in the professional Aviation Maintenance Technician filled with an important position in today's aviation community, and wants you to be a part of that Professionalism.

Cooperative Education

Cooperative Education, which has been in the planning and implementing stages for nearly a year, will become a reality this trimester at Embry-Riddle. It is our desire and intent to expand the program as quickly as is feasible. However, the success of Cooperative Education is inter-dependent on several factors: the student; the participating employer; and the overall Try JoL Luck which the program through the university. Co-operatives benefit to be realized for all parties involved, but this article will be concerned with benefits which can be realized by the student.

Some benefits to the student arc very real and obvious, and of course, these are important. Some of these salary earned while on the training assignment, higher earning capability upon graduation, actual work experience, in your chosen career field (or one that is closely related) and the opportunity to earn twelve credit hours for elective credit towards your degree requirements. Some of the less measurable benefits include the opportunity to

Lean Approval Needed For Student Center

Upon approval of a H.U.S. loan, E-RBU will begin construction of a permanent Student Center in June of 73.

Frank Forest, Vice-President of Development and Planning, stated the major obstacle in starting construction of the new Student Center is the financing of the building.

Initial plans have been drawn and are under HUB study for possible financing. If this loan is not approved, the school must find private financing for the $1,388,500 complex cost. The time schedule is as follows:

March 1, 1973—final plans approval.

June 1973— bids and construction permits.

June 30, 1974—complete construction.

July 15, 1974—occupancy.

If completed, the 30,000 sq. ft. complex will contain a Book Store, Cafeteria (eating over 300), Post Office, Health Facilities, Placement Office, Barber Shop, a laundry and dry cleaning establishment, Game Room, and student offices. The complex will be placed between Dorm 1 and the Gill Robb Wilson Complex on the north side of the Flight Instructors parking lot.

The architect estimated a need for 340 additional parking spaces. It has been stated that a 200 car capacity lot will probably be added. Of the 200 spaces, one-half will utilize the present taxi way area and one-half spaces will be shared with Gill Robb Wilson.

Dining Out

by Charles McMahon

Joy Luck is a new Chinese restaurant located at 529 Volusia Avenue. It's a small place with casual decor which seats approximately 25 people. Because of Joy Luck's small size, everything you can order can be made up to the individual order and served very quickly.

The food is very good and the portions are generous, whether you order small dishes which contain more than enough for two people, or combination plates which have a little bit of all the different foods.

Joy Luck's prices are low, the lowest in town for Chinese food. Meals of food can also be prepared to take out and accommodate the taste for anyone who feels skilled enough.

Try Joy Luck when you're in the mood for a change.

Student Views
On 1972 Presidential Election

With this attempt at getting the student views in The Avion, it is obvious that the results would rather not get involved. Despite anonymity, over 600 declined to answer or said they didn't know. Responds received varied greatly; the following is a sample.

"...McGovern is thinking too much cutting back on the aviation field...in other aspects, I favor McGovern, but as far as my profession is concerned, I will vote for Nixon..."

"...McGovern may have been hurt worse by dumping him than he would have been by keeping him (Eagleton). But he didn't have the guts to stand up to the articles in periodicals and newspapers..."

"...I'd like to see Nixon stay in, but only for one basic issue...I like McGovern's attitude toward the poor. As far as some of his welfare programs are concerned, and I think he would do more for racial equality than Nixon has done. At the same time, it's McGovern's national defense policies that I really can't go along with...Although I hope Nixon is elected, I hope the pressure put on him because of the fact that McGovern was running will cause him to have better welfare programs (educational) and improve the welfare situation..."

"...I disagree with a lot of McGovern's platform, but the main thing I disagree with is the fact that he doesn't seem to be able to make a decision. He has vacillated several times initially in the selection of a V.P., which I think is critical. Because of this type of personality, I don't think he has the decision making ability to be in that office. There's only one other choice, and either he be forced to abstain from voting or vote for President Nixon..."

"...I think Nixon's got it, but I'm voting for McGovern...I think this is the worst of Nixon's just fooled around for the past four years, and now all of a sudden he's getting on his toes and starting to do something..."

"...McGovern gets elected, the aviation industry will fall flat on its face. That's what we're here for..."

"...I'm sick of Nixon's not doing anything for the common people. He favors the corporations. I think he should take more people into consideration rather than all the few. Also in the area of credibility, people just don't trust him any more. He says one thing, then acts in a different direction..."

"...Nixon will win. I think anyone who has done his job that well shouldn't even be up for election. Why should he be chosen losing his job? But I know he'll win anyhow..."

"...I would prefer that president be allowed to run while in office; I don't think he should be allowed to waste a year of my life every four years...The guy plays president for three years and then plays games for one year, and when he's not running he's playing for whoever his party is running..."
Foreign Students

Are you interested in placing your name and pertinent information in a paper which is published yearly for international companies who are interested in foreign students from their own countries? There is no cost for this service and it is open to all foreign students who will be graduating within the next year. It is a very good opportunity for you to advertise your qualifications to international companies and it may warrant you a job. All you must do is come by the Placement Office and see Claire Lane to complete the necessary forms. There is a deadline of November 20th, so hurry on in and complete the forms so they can be mailed off.

E-RAU Pistol And Rifle Club

All E-RAU students are welcome this Sat. Oct. 7, to our meeting at the county range at 1:30 PM. For those who don't know the way to the range, a PRC member will be waiting for you at Dorm 1 at 1:05 with instructions. Hope to see you there.
