Effective the Spring Term, the university deans from all the colleges write letters to students involved in pre-registration, containing the above paragraphs and requesting their views. In addition, the letter gives procedural changes and reasons for selection of program.

The first paragraph explains that instituting Dr. Pence's proposal will reduce the number of registration periods from four to two, without short mini-registration for the second half of the semester.

The second paragraph states that data receiv- ed during pre-registration is not sufficient for the amount of work involved.

The third paragraph notes that students are informed far in advance that it generates additional changes of registration.

The new proposals that should be made, including:
1. A person from the flight department will help schedule student flight periods.
2. A person from the SGA's Office will take checks from those who wish to pay immediately.
3. Financial Aid office is to complete all financial arrangements and continue until students are registered.
4. Wider coverage among school publications is needed.

Registration by class preference with SGA approval will be instituted.

The next paragraph comments on the proposal.

For the students should contact their sen- ates from these applications. The student senate will be provided with a resume of the ap- pointees at least one week prior to a meeting at which the senate will appoint them. Appointments shall be confirmed by a 2/3 vote of the senate present.

(1) Any member of the Internal Affairs Committee who submits an ap- plication shall sit on committee meetings when applications are being reviewed.

D. Requirements for Office
(1) Must have completed at least three trimesters at E-RAU and must be able to serve at least three consecutive tri- mesters excluding the trimester in which he is appointed.
(2) Must be on an acade- mic or disciplinary prob- ation and must re- main off probation during the period.
(3) Must be a full-time student and must remain full-time during his term of office with the exception of his final trimester.
C. Term of Office
(1) The student shall serve continuously until graduation or until he resigns or is dismissed.
(2) If at the end of the year the student leaves E-RAU, the office shall be con- sidered vacant.

The course will last 3 weeks, beginning Dec. 14. It will include tours to various manu- facturing plants and cities as well as aca- demic institutions and aviation facilities. A minimum of 16 people will be needed to start the course. Interested students should contact Nan Green in admissions.
President's Corner

The A P G grievances, of which there are many, are being handled by a committee. This committee is headed by Senator David Clausen. If you have any requests, grievances, or solutions to the multitude of problems, please contact Senator Clausen through his R-AU Box No. 548.

My congratulations to the SGA this week. For the first time in almost a year I have just witnessed a very efficient running of last Tuesday's Senate meeting. There were no items on the agenda which were very contrived yet somehow in record time, leaving no room for the facts. A change to the By-Laws was put through. Briefly, the new change outlines guidelines that the president, in the future, will follow in appointing another member to the University Board of Trustees. Congratulations to Paul Mercedestin! You and your Law Revisor Committee have done a great service. I am certain that many of these recommendations will be put through the Senate for their new change not put through at this Senate meeting. However, I am sure that during this next Senate meeting everything will be fine.

Last I would like to remind all the students that the letters to the editor are being handled. Help support it! Also, the Halloween Dance is scheduled for October 28th and will be held at the Arizona Memorial. Controversy is in order to them, we have in turn the Arizona Editorial Committee which comes under ASB and is headed by Senator Randy Kuykendall. He will be more than glad to assist the Dorn Council in any way in order to help fulfill action for their requests.

Tuesday, Oct. 24th, 5:30 p.m., Room 164. This is the date of an open Student Council meeting, in which Mr. Jerry Fry, president of the senior class, will present his case against SGA president Richard Reimann.

Why is there a need for a court session? Mr. Fry will, at this time, defend the rights of his fellow senators and students.

How did this all come about? R-AU's Board of Trustees allows two students to be members of the board. The first student is the president of the Student Government Association. The second is a member appointed by the president. The procedure for the appointment is as follows: 1) the appointment is made by the SGA president; 2) it is presented to the SGA senate for approval. If approved, the appointment is officially in office. Last summer, Mr. Fry was appointed and approved by the SGA to be a member of the Board of Trustees. All procedures were official according to my interpretation of the constitution.

On Oct. 5th of this trimester, President Reimann announced the appointment and spoke approving of Vice-president Mike Leonard to the position of Student Government Association president. Replacing Mr. Fry, if approved, the appointment was made, it was not presented to the SGA senate. Mr. Fry has not approved. Mr. Fry, in the Senate meeting, received no letter asking for his resignation.

On Oct. 6th, a letter to General Sprunke, president of the Board of Trustees, was drawn up, asking him aware that Mr. Reimann was the newly elected president of the SGA, and Mr. Leonard was the second new Board of Trustees member.

On Oct. 11th, Mr. Fry FINALLY received a letter asking for his letter of resignation. Why was this situation handled in this manner, and why did it take so long? President Reimann neglects or totally deny the senate the right to approve Mr. Leonard's appointment? Could it be that the senate would not approve the changeover among Board members, and President Reimann knows this? Why should the senate have the power to remove one board member who is right in the middle of many fundamental projects and replacing him with a man who could only serve six and one half months due to graduation in April? Is it really necessary to make any other changes every time a new administration is in office? Who is the person accomplish and what changes can be made?

This case has brought much disgrace to the name of Embry-Riddle by the unofficial constitutional procedures; by one man's decision only to make a decision which must be made by the Student Government Association as a whole.

I urge President Reimann to "clean up his act" by living up to his inauguration to the senate, which is not to be approved. Mr. Fry, if you have not already, I again attempt to run or dominate this SGA, I feel that the people who are in this organization now are mature and intelligent enough to get the job done."

This whole unfortunate matter could be settled if the Senate would be allowed to do its job and their ruling not be ignored by the appointment of the Board of Trustees member. It could be a real word.

If not, I urge all students to attend the Student Court on Tuesday, as the issue has not been settled. It will give you an opportunity to see exactly how the Reimann administration is working. You can then formulate your own opinion.

Dear AVION:

I have very strong feelings about our excellent grade of student drivers. When I returned to school in August, my car was parked on a street corner. Each one had a good sized dent which will be costly to repair. The person responsible for this were not caught, also enough to tell me.

My car was not damaged for a demolition derby and I sure don't want it to look like it has been in one.

What we need around here are people to look before putting their cars in gear. These people could be avoided and the costly repairs would be saved.

I am thoughtful enough to watch out for other cars and all I can ask is the same respect from you. Remember only you can help prevent this from happening again.

David Clausen

President, SGA
Dining Out Goes To Fritze's

by Charles McMahon

Fritze's Old Timers is the place to go this year. Travel 4 miles south of the 82nd Airborne Bridge on South Atlantic Avenue to find this unique restaurant and night spot.

You enter Fritze's dining room through the lounge where the walls are covered with autographed straw hats, setting the scene for the old timers theme. The dining room contains large picture windows facing directly on a deserted stretch of ocean beach. The whole atmosphere is relaxed, and dress is strictly casual.

If you need a meal served at Fritze's (mainly seafood and chowder, both are well prepared and delicious). You salued livers will enjoy the salad bar which features eight or nine different salads and dressings. Help yourself to as much as you like. Another nice touch is the hot loaf of homemaded bread served at each table.

In addition to serving great food at very reasonable prices, the Old Timers also has entertainment. On Friday and Saturday nights from 9 to 1, band music is in the bar. Everyone joins in the fun with a lively two-step--albeit creating a friendlile atmosphere than you're likely to find at any other night spot in Daytona Beach area.

Give Fritze's food a try, and don't let the name Old Timers mislead you. Fritze's caters to all age groups, and all age groups join in the fun!

Sullivan Receives ROTC Student Award

by Jim Owen

William (Mike) Sullivan spent six weeks of his summer vacation at the Third Army ROTC summer camp and received the Distinguished Military Student Award for his efforts. The award is given to the Army ROTC cadet who shows outstanding leadership and has an attitude for military training at the Summer Camp. It is usually given to someone in the top 15% of "walk on water" category.

Mike Sullivan, who is well known for his war stories, came back from camp with a whole new group telling how he got to use the classroom less.

His hosts, the 82nd Airborne (all members of the boys), first showed the cadets how to operate the equipment and then stepped back and let the cadets take over. The cadets got "hands on" experience in everything from tanks and A.P.C.'s, to firing the tank, howitzer, 105 and 155 in both direct and indirect mode, dropping 81 m.m. mortars; blowing holes in concrete; tossing hand grenades; and shooting the 45, M14, M16, M79, and L.O.M.S.

Space and editorial policy prevent me from repeating any of the stories, but if you want to listen to a couple of good Friday night cadet Mike up with a few well placed questions and then relax. He careful thought; he almost talked a cadet joining Army ROTC.

The Death of the Convertible

by Bob Butterworth

Those were the days. Ingrid Jay's father bought a new Ford convertible sport car. If questioned then, or even now, about which I liked more, Ingrid or the car that smelled of new leather and even newer canvas that I would be permitted to use when escorting Miss Jay, I would be hard put to come up with an honest answer.

A real convertible--a Ford convertible--the more's and morals in three or four years was a much a puberty rite as a girl whose brown eyes glinted like tidal pools and whose upturned nose supported a light dusting of freckles. Sitting in an open car under a star-filled sky, mooting lines cribbed from an old Humphrey Bogart movie hasn't left any psychic scars. Too bad my kids won't be doing the same thing.

Today it would necessitate a long journey, presumably back in time, but if not your distance, to a place where the air is clear enough so that you can see the stars, and lone-

5 cent. Scholarship Awarded For Fall

The scholarship committee has announced the following scholarships for the Fall Trimester: Elizabeth Krueger (1200), Vicki Smith (1300), Nancy Brown (1200), William Woody (1200), Dono Darrajanja (1000), and Carol Kerking (1000).

Congratulations to all recipients of these scholarships.

E-RAU Features

COINS

AWARDS

More On Coins

by Joe Green

Collecting rotated dies is an interesting part of numismatics. It's inexpensive, makes a fascinating display, and everyone of these coins can be found in circulation.

If you take a coin between your fingers upright and slowly turn it around, you can see that the obverse and reverse designs are up-side down. This is normal, however, some coins are found to have both sides either of, or one design rotated from 360. This happens when a die is loose, either top or bottom, the resulting coin will have a rotated front or back.

The bottom die, the reverse, is the one that will determine cause this error. This die is stationary, and set in place by a lock screw. A loose lock screw will cause this die to vibrate or shift.

The upper die is also set in place by a lock screw, but usually if this lock screw becomes loose, the coin will be destroyed or placed out of place.

A collection of this sort is relatively easy to collect, and makes a very interesting collection.

What sort of a value can you put on a collection of this sort? Well it's impossible to say. The condition of the coins, denomination, and degrees of shift are important. Usually, values are determined by supply and demand, and what the market will bear.

Scholarships

The Scholarship Committee has announced the following scholarships for the Fall Trimester: Elizabeth Krueger (1200), Vicki Smith (1200), Nancy Brown (1300), William Woody (1200), Dono Darrajanja (1000), and Carol Kerking (1000).

Congratulations to all recipients of these scholarships.

155 in both direct and indirect mode, dropping 81 m.m. mortars; blowing holes in concrete; tossing hand grenades; and shooting the 45, M14, M16, M79, and L.O.M.S.

Space and editorial policy prevent me from repeating any of the stories, but if you want to listen to a couple of good Friday night cadet Mike up with a few well placed questions and then relax. He careful thought; he almost talked a cadet joining Army ROTC.

The computers say that the Mr. Jays are dead. He flew fighter planes during the Korean War, and that's where he picked up his approach to automobiles. In an open car you can't fly a flying butt. But there are a number of reasons why the convertibles will no longer be produced in the U.S.

The industry watchers talk about the increase in popularity of the hardtop, on top of which came the vinyl roof that gave a car the look and texture of a con-

verible. Add to all of this the consumer preference for air conditioning, they say, and also the sales of Ford convertibles. You droping from a high of 123,000 in 1965 to 16,000 five years later. In addi-

So there you have it, the modern convertible being put down by pollution, crime in the streets, an armored car approach to safety conform-

ity, and computer marketing techniques that would give the mass buyer what he wants. Why did it really die? The quick answer seems to be that it was an imperfect syllo-
gen that ran head on into a changing world.

But I have other more personal reasons. We had our heads down, busy getting and spending, and when we looked up, our favorite car was gone. Yes, we were the generation that grew up knowing that man's high-
est attainment was an automobile, a convertible, but became preoccupied with the means of attachment to allow its goal to exist.

Mr. Jay had the formula. So did Ingrid who was far ahead of her age peers. Even though I didn't get the girl, I got the idea. An open car just seemed wrong.

A closed car was one that drove you. If this is an imperfect syllo-
gen, blame it on the fact that it was steamed from the fires of a 16-year-old who had a white lie, a white lie, or lack of one of total victory.
SPORTS WORLD

SIGMA CHI
TEAM OF THE WEEK

Soccer Team Wins Again
by Rory Donnelly

Embry-Riddle Aeronautical University ran their winning streak to four games in a row with a 4-2 win over Florida Institute of Technology last weekend. The game was played in Melbourne, enhanced the Eagles' chances of repeating last year's undefeated season.

From the first goal scored by Riddle's Mohniel Johnson, the outcome of the game was never in any doubt. Johnson was the only regular that started in the game. It was his third goal of the season.

All of the other three goals for E-RAU were scored by a new player on Coach Mansfield's front line, Albert Nabha. Nabha, from Malawi, South Africa, is sure to add strength to the already well-balanced attack of the Eagles.

Next Saturday, the Embry-Riddle Eagles will play host to Oglethorpe University of Atlanta, Georgia at the airport field. Game time is two o'clock.

SIGMA CHI FRATERNITY continued a fine winning streak by blanking Lambda Chi 20-0. The team was led by Mike Plants, quarterback, who passed for two touchdowns and ran for one more. Mike's favorite receiver for the day was unstoppable Terry Gardner who caught everything thrown his way.

The defensive squad continued to be the strong point of the team. Captained by Mark Rodgers, they have been scored on only once the entire season. Dan Rees managed to snag three interceptions for the day and one punt return to help set up the scoring.

Sigma Chi is much improved over the beginning of the season and will be a definite contender for the number one spot in the league.

FOOTBALL

Lancer Vets triumph in intramural football league. The Intramural football league is getting tougher every week, and this past Sunday there was a lot of hard hitting, as each team tired to stay in contention.

The Delta Chi Jets and the Sunshine Company runners went into this week, undefeated. The first and only score was a safety by the Jets when they punted and caught the Sunshine Company runner in the end zone. Both defenses would not budge the rest of the game and the final score wound up at 2-0.

A vastly improved Cowboy team capped off the Sigma Phi Delta squad 25-0. An interception by Gene Columbia, and another one by Brian Welch were returned for touchdowns and started things off. Welch also ran for a touchdown and hit Jack Hutchinson with a pass for the final score.

The Vets also remained undefeated as they beat the Coyotes, 8-0. This was another close game for the first half but a touchdown by Mike Tylor broke the ice for the Vets Club. The stubborn Vet defense also came up another safety this time lineman Stan Steenbock caught the Coyote runner in the end zone. The Vets remained tied with Delta Chi for first place honors.

Sigma Chi, who has been really surprising everyone this year, got together to whip Lambda Chi Alpha 26-9. Three interceptions by Dan Rees and fine passing by quarterback Mike Plants to his favorite receiver, Terry Gardner, put the pressure on Lambda Chi. The win moved Sigma Chi up to 2nd place and left Lambda Chi in last place.

The standings after 4 games are as follows:

- Team: W-L-T
  - Delta Chi Jets: 4-0-0
  - Vets Club: 4-0-0
  - Sigma Chi: 3-1-0
  - Sunshine Co.: 2-1-1
  - Cowboys: 1-3
  - Sigma Phi Delta: 1-3
  - Lambda Chi Alpha: 0-4

No games will be played this week because of the holiday on Monday. The games will be rescheduled later.

IMPORTANT: Intramural football meeting Tus. Oct. 24, 6:00PM in Room 107, H&G. A. Three representatives from each team must be there.

BASEBALL practice Sat. 21 at 5:30 PM at the Baseball Field.

There will be a tennis movie on Tues., Oct. 11th at 11:15 in Room 110, Building A. The movie will be covering the Kemper Tournament. It is open to anyone interested. It is about a 40 minute film.

TIMES:
- 6:30 Game: Faculty-Phoenix vs. Delta Gang-Spiers
- 7:30 Game: Delta Gang-Spiers vs. Delta Chi-Phoenix
- 8:15 Game: James Gang-Delta Chi vs. Phoenix-Spiers
- Playoff if necessary

Don Kent vs. J.M. Fields

by John Miller

The following is the sequence of events that occurred when John Riddle's student-organized purchase of a television set failed:

Don Kent began shopping for a television in September. When he visited J.M. Fields, Don was told that there was no written proof of purchase (such as a C.O.D. slip) that he was able to purchase the same model elsewhere for less money. Furthermore, Fields would "double the difference" between their cost and the lower cost and subtract the amount from the original J.M. Fields cost.

20 Sept. -- Don went to K-Mart and ordered the set on a C.O.D. basis for $285.96. Don returned to J.M. Fields and showed the proof of purchase to the salesman. The salesman denied the difference between the K-Mart price and the J.M. Fields price ($249.00), and arrived at a new cost of $257.00 (tax). Don and the salesman proceeded to the credit department to arrange financing. Don was told that the set would be delivered by Saturday, Sept. 21 or Monday the next day.

21 Sept. -- Don returned to J.M. Fields. Credit department personnel told him that they had not yet handled his paper, and he would handle it the next day. The television department said that the set could not be ordered until credit was approved. Don told them he would call in cash and wrote a check for the set. The salesman accepted the check and told Don that the set would be ordered the next morning.

22 Sept. -- Don deposited the money in his checking account at 8 a.m. At 4 p.m. he called J.M. Fields to ask if the set had been ordered. He was told that the check had not cleared the bank and the set had not been ordered. At 5 p.m. Don visited the bank and the amount was then deposited to his account.

Don returned to J.M. Fields and was told that he had been undercharged $3.96. He wrote another check which was accepted. The salesman told Don that the set would be delivered in the morning.

23 Sept. -- Don called J.M. Fields, asking if the set had been ordered. He was told that it was and that the set would be delivered the next morning. He was told that the time was not known because the set had not arrived at the store.

27 Sept. -- Don called J.M. Fields to ask if the set would be delivered on that day. He was told that it would be the next day. Don then called the department manager and told him the situation. After confering with the department manager, the department manager told Don that it was his mistake and that J.M. Fields was only stalling.

The first Freedom Tree was planted in California earlier this year. The planting here Monday will be the second of such ceremonies. The E-RU Veterans Association has unofficially, for the last year, been a district branch of VIVA. The club helps to distribute brochures, pamphlets, and bumper stickers through the Used Book store on campus and throughout Central Florida.

The ceremony is expected to be short and all students at E-RU are cordially invited to attend.
Dr. Pence has suggested that E-RAU increase the pre-registrations, citing cost and the increase in the number of pre-registrations as the main problems. The idea is to reduce the number of add/drop slips.

I agree with his reasons, as they are unrebuttable. In his reasons, and I believe many students I talk to, I suggest the school increase the classes and registration. What do I mean by split? Each registration could be split into 2 sessions, one a couple of weeks before the end of the trimester and the other during the break.

The reasons for this idea are concluded as follows:

1) Near the end of a trimester most students are aware of their class standing and know what they need or want for the new trimester.
2) If the advanced registration study is held near the end of the trimester, there will be no need to complete the mounts of paperwork presented after pre-registration. In a few weeks, the registration period will end. This would be the cost of the school.
3) This will benefit the students who attend the students who attend E-RAU during the Summer term.
4) Those students who return to E-RAU because they are required to return would continue to return instead of losing the hasset and frustrations of registration.
5) The advanced registration reduces the long and tiring lines.
6) The advanced registration reduces the long and tiring lines.
7) If 900 students try to register at once, some students get add/drop slips. This is a concern for many other reasons, but I believe what 170 students would do to registration.

A study for Dr. Pence’s study was to determine the number of people and that of over 2000 add/drop process. The case can be shown and it concluded that registering in March for a trimester starting in September caused the majority of the add/drops. Therefore, this study suggested to do away with pre-registration. A more current study would be to make advanced registration closer to the start of the trimester.

I made a small unscientific study of add/drop slips I received. The dominate reason given: “I first registered for anything to get into the system.” Many people improved further noted, “my class was closed, and I closed out my account for the class of my first choice.”

Students who opened classes after pre-registration, so I just transferred to an opened class which fits my schedule better.” Surprisingly, a high percentage of people said, “I changed my class time so I moved to another class.”

From this survey, the results for this year’s pre-registration should be dropped and replaced with a later “advanced registration session.”

However, the problems of closed classes will be dealt with and changing class time must be stopped.

If you have any comments or against any of the plans, either the present system, Dr. Pence’s plan, or mine, please come to Dean Searle, Dean Clay, Mr. Wilson, Mr. Kasler, Mr. Campbell, Mr. Chramback, Mr. APEC, Mr. Yokely, your senator or especially me.

Emby-Riddle

Speech Forum

by John Miller, Jr.

A speech forum will be presented here on Monday night, the 21st of November. The forum, sponsored by the Division of Humanities and Social Sciences, will be researched, organized, and presented by students chosen from the speech classes.

Our forum is divided into two teams, the students will discuss a particular aspect of the contemporary society. The topics of past forums have included drug abuse and consumer problems. The exact time and place of the forum and the names of the chosen members will be announced.

The forum will be open to the public and refreshments will be served during intermission.

December Graduates -- Please come by the Dean of Men’s Office to be measured for your cap and gown.

November will be a big month for sports rallies. The following is the tentative schedule of events.

Sat. Nov. 4 - DARCC Annual Hare & Hound Rally

By Joe Green

Emby-Riddle did it again! That’s right, another outstanding educator has been added to the University’s academic faculty.

He is Mr. Donald J. Kemater, who will be instructing Management and Law.

Mr. Kemater is indirectly a native of Daytona, although he originally came from Ohio. He has been here for 18 years. In 1947, he left to attend the University of South Florida to complete his degree in Management.

While at South Florida, he was a graduate assistant and taught several courses.

He is married (sorry girls) and has four children.

Mr. Kemater expressed his desire to teach at the college level because of the dedication and enthusiasm of the students. He considers his vocation and teaching experience important. The Riddle ideal is more than happy to be here.

Let’s extend a hearty welcome to Mr. Kemater.

Sat. Nov. 11 - IPC Road Rally

Sat. Nov. 18 - DARCC Appreciation Night, auto-cross, followed by short rally.

Check The Avion for further times and dates.
by L.E. (Andy) Andersen

One of the closest attractions to Embry- Riddle is Marineland. It is only 100 yards off U.S. Highway A1A, approximately 30 miles north of Daytona Beach. The drive along the ocean is pleasantly scenic. An alternate route is via Interstate Highway 95, but the hustle- bustle of the traffic seems to detract from the outing.

Over a third of a century Marineland has entertained, educated, and amazed millions of visitors with an unequalled display of marine life. Hundreds of species can be viewed, photographed, and studied in near natural habitats.

The admission to Marineland is reasonable and would not particularly stress even the smallest budgets of the college student. One admission covers the doors of the entire Marineland complex. Within the complex, one will find sufficient attractions to keep him for a couple of hours or a full day.

The main attraction at Marineland is the porthole show. This 30 minute show demonstrates a few of the various talents of these remarkable mammals. During their performing half hour, they will jump, "sing", dance, play ball, and retrieve rings while blindfolded. This last demonstration very clearly points out the "Sonar" of the porpoise and demonstrates his ability to find objects without seeing them.

The Marineland complex is filled with many tanks. Suspended over the circular tank is a movable platform. The attendant sets into this bucket type platform and moves it out over the pool at a height of 10 feet. He is equipped with a generous supply of fish, which he gladly feeds to any porpoise that is willing to jump up and take the fish from his hand.

Adjoining to this tank is the rectangular tank, and it contains nearly every imaginable species of salt water fish. Most memorable of this tank is the one containing over 1000 live coral heads. A large, white-tipped, sawnfish is the dominant attraction in this tank. The tank is devoted exclusively to wrasses, parrotfishes and angelfish. It is estimated that there are over 50 different species in this tank.

The astonishing thing about this tank is the fish—colorful and beautiful. The nurseries day and night. The attendant in his "hard hat" scuba suit feeds the fish. A small, one-of-a-kind service is offered at this attraction.

Adjacent to this tank is the reptile, reptile, reptile—gator and alligators and crocodiles. This tank is located in an area remotely removed from guests' eating areas. The gator is not a very tranquil animal. It has a loud roar and the bite is vicious. The attendants are no strangers to the bites that come from this animal.

A very interesting side-light about this tank and its inhabitants was brought to light by its attendants. Many of the species within the tank come from tropical waters. Therefore, the water in the tank has to be heated during the winter months to sustain proper temperatures for these fish. I thought this rather unusual in Florida.

There are other displays and tanks at Marineland which will have to be seen when one visits this interesting and educational attraction. Your time spent in the porthole show will be well rewarded not only with enjoyment but also with knowledge.

### Placement

The Marine Corps Office Selection Team will be on campus at the Student Center, Monday and Tuesday, October 30 and 31, from 9 a.m. to 4 p.m.

Good luck to the Airframe and Powerplant Technicians who are completing course requirements this week. If you haven't been by the Placement Office to check on employment opportunities and to complete your graduate placement form, please do so. We are approximately 30 available positions for Airframe and Powerplant Technicians.

For those seniors graduating in December, please fill out your graduate placement form on your earliest convenience. If you desire assistance with a resume and cover letter, please don't wait until the last minute to accomplish this.

We have received the 1973 College Placement Annual which you may borrow to reference. Also, I have available for handout, a brochure on interviewing which may give you some helpful information.

The new Aviation Employment Report should be arriving around October 20.
Loans Are Available For You

The Financial Aid office at Embry-Riddle Aeronautical University has a number of financial aid programs available for students with a monetary need. Eligibility is based on a confidential application from the student for assessment of his financial position. Under the various aid programs an applicant must be a full-time student, make normal academic progress, and be of good character and citizenship. Although formal awards cannot be made until an applicant is accepted by the University, prospective students are encouraged to apply as soon as possible.

The College Work-Study Program provides part-time employment for students, particularly those from low-income families. The part-time schedule may involve work in the University or a public or private, non-profit organization in the community.

The Educational Opportunity Grant Program provides federal assistance to those not financially able to attend the University without a grant.

A new program, the Florida Student Assistance Grant Program, is available for qualified Florida residents who have an exceptional need for student aid. The maximum grant available is $1,500 per academic year with priority given to entering freshmen and transfer students.

Pursuit of a college education is very taxing in effort, money, and time. The rewards and opportunities for college graduates are increasingly attractive, especially in aviation related fields. Embry-Riddle Aeronautical University serves the needs of both students and industry as the world's only totally aviation oriented university with six degree disciplines, a Maintenance Technology Program, and a Professional Pilot Program.

The Federally Insured Student Loan is a program designed to meet the needs of students from middle and upper-income levels. This program involves student application to financial institutions such as participating banks, savings and loan associations or credit unions.

Another loan program, the National Direct Student Loan, provides a maximum of $15,000 per academic year for undergraduate studies. Repayment of the loan with 3% interest usually begins nine months after the borrower ceases to be a full-time student with 10 years to make repayment. Postponement of repayment may be granted for as much as three years if the borrower is subsequently serving in the Armed Forces, Peace Corps, or VISTA.

Is there any truth to the rumor that No Dollars No Peace!?
