NICARAGUA FLIGHTS: ERAU PILOTS RELIEF FLIGHT

BY MIKE TALLMAN

Mr. Walter Green and Mr. Charles Horstman, both of whom were ERAU flight instructors, and Mr. Charles Spellman, an ERAU student, made up the crew of a DC-3 which left Daytona Beach Jan. 13 with $3,000 and 6,000 pounds of food and clothing to aid the victims of the earthquake in Managua, Nicaragua.

The money and supplies were collected by the students of Seabreeze High School. The Air craft was donated for use by Marian Scott of Savannah, Georgia.

The flight to Nicaragua was plagued by maintenance problems. While refueling in Key West, fuel leaks were discovered in both engines. After repairs had been made the flight was continued, only to have the navigation equipment fail, making it necessary to return to Miami for more repairs.

The flight continued from Miami at 8 a.m. Saturday, finally reached Managua at 6:45 p.m. The return trip was much less eventful. After spending a restful night in Managua, the plane and crew arrived in Daytona Beach at 9:05 p.m. Monday, Jan. 15.

Mr. Green said that he had been approached by a member of the E-R SGA about making additional flights with supplies collected by ERAU students.

MORE RELIEF BY SGA

BY MIKE TALLMAN

The Embry Riddle Student Government Association has formed an ad hoc committee, headed by Mike Leonard, to collect and transport relief supplies to Nicaragua to aid earthquake victims there.

Collections have already begun, and items most needed are staple foods such as rice, corn meal, dried beans, clothing, and, of course, money.

For those who wish to contribute money, according to Leonard, checks should be sent to the SGA office, P.O. Box 2411 Daytona Beach, Fla. 32114.

Food, clothing, blankets, etc. can be taken to the following collection points:

Daytona Beach area
Daytona Beach Aviation DAB Regional Airport
St. James Episcopal Church 1391 New Smyrna Road
St. Pauls Episcopal Church 369 Downing Ave.

If contributors have no means of getting donations to the collection points, the SGA will pick them up. Call them at 252-5541 Ext. 26 and leave your name and address.

The committee has requested that fraternity and sorority houses assist in this project and contact the SGA office. If there are not enough supplies to fill a plane, the supplies will be flown to Nicaragua aboard a DC-3 donated by Marian U.L.V. Air Spray, Inc. of Savannah, Ga.

Cheating & Plagiarism Policies Changed

BY PETER H. NURKO

The ten professors in the College of Humanities and Social Sciences have agreed to new policies concerning cheating, plagiarism and making-up examinations with their various departments.

The new policy states that any student found cheating or plagiarizing "shall receive a failing grade in the class, and if his or her name shall be forwarded through the Division Chairman to the Dean of Students."

When a student misses an exam, for any reason, the instructor of record shall be offered only one chance at a make-up exam if he desires.

Plagiarism, defined as the act of taking the ideas or the spelling and passing off as one's own without crediting the source, is considered a serious offense. According to Roger G. Campbell, Humanities and Social Sciences Division Chairman, plagiarism is much less frequent than is generally believed. A student's normal literary style or the expressing of facts or statistics which otherwise indicate a student's level of investigation is not plagiarism.

Members of Campbell's division believe plagiarism is a serious offense and have continued page 3

LIBRARY HAS NEW LOCATION

BY PETER MINERO

Twenty four people, including 16 students, have moved the library across campus and rearranged 15,000 books during the Christmas Break, according to Mr. Sauls, ERAU Director of Library services.

The job was completed without having to hire help or call in Mr. Sauls, just enough room exists now for an additional 2,000-5,000 books and the library will now have more student spaces in just two years.

Present planning provides 12,000 square feet for the library, and in the proposed new student center an area of 8,000 square feet is being kept within President Hunt's policy of decentralized administration and calling for parts of the library to be moved. The library is proposed to be used for student activity centers.

Mr. Sauls believes that the utilization of the library is the same and more. The increased space gives the reader more room to browse about the same as before. The increased space also gives the reader more room to browse about the same as before. The increased space also gives the reader more room to browse about the same as before.

The increased space would not only make more room for students, but for the library as well. The increased space would not only make room for students, but for the library as well.
President's Corner

"Happy New Year All Students!" I would like to welcome all returning students back and wish you all a successful year. While you were gone, the admissions office set a record and enrolled many more students than expected.

There are several things under consideration by the various committees on this page. One of the more interesting ones is that President Baker requested a study to be initiated to find a way in which we could authorize AAP students, except those classified as non-candidates in AM, to receive credit for TVA flight training. A pre-registra-
tion committee has also been formed which will be convening shortly to discuss different means of pre-registration.

Another area under study are the graduation policies of the University.

You have probably heard on the radio and from other new sources that 1972 marked a new flight to NASA. As a compliment to the students of Seabreeze High School, especially Rick Karl, for his fine job.

He announced that they were going to sponsor only one flight, well in the SGA, decided to keep the bus rolling. A committee was formed, which is headed by the Vice President, Alan Baker for SGA, Mike Leonard, to collect funds and or goods to be sent on future flights sponsored by the University. So far, the response has been excellent.

All students should note take of Tejinder's Noviana. He has taken upon himself to locate all films which were available at his residence and technical in nature and has volunteered his time to interested students. The showings are at 8:00P.M. every Thursday night in the large classroom at the second floor of the public's University Board of Trustees.

I would like to take this opportunity to congratulate Drew Russell and Gary Rice for their success in the last election.

A letter on security especially for new students on campus who may be unfamiliar with the rules and regulations of the policies that were outlined in your Student Briefing.

Unfortunately, last trimester we lost one of our students to a traffic mishap, although we have some successes in the right. We must be careful and stay alert.

"The SGA President's Interesting Fact of the Week" The tuition at ERAU is one of, if not the lowest, compared with the average of private universities in the State of Florida. But that in your pipe and smoke it.

Ramesh V. Ramamurthy
President SGA

A Proposal For Books

Buying And Selling

Now that the bookstore is open, in the interest of the students, I find there is a need for some new texts.

Students who have had approximately ten Sena-
tors graduated some of whom were holding major memberships.

Meeting is to be announced.

A proposal that books and materials without paying third-
party bills, but in accordance with good journalism practice.

A book might be sold through a proposed system of pre-registra-
tion. A book might be sold through a proposed system of pre-registra-

THE OPINIONS EXPRESSED IN THIS PAPER ARE NOT NECESSARILY THOSE OF THE UNIVERSITY OR ALL MEMBERS OF THE STAFF OR PUBLISHERS APPEARING IN THE ACADEMIC NEWSLETTER, AND DO NOT REPRESENT THE OPINIONS OF THIS NEWSPAPER OR ITS STAFF.

To the Students, Staff and Faculty of ERAU.

This is a critical evaluation of the Academic Administration and Division of Flight Technology, founded on my experiences as an Air Science and Aviation Management student.

The Academic Division offers excellent college courses, however, there are certain departments that have courses that cannot be equated with any other university.

The Air Science Department offers undergraduate training in History of Naval Aviation, numerous hard-core experiences in Flight Physiology and the unequalled training in Aircrews Performance. The Humanities and Social Science Department offers good quality courses from instructors who are real experts and seem to be TV opera stars.

The Management Department offers courses on the management of a taste of Dairy Products Management, and Trucking I, II, III.

The Math and Science Department offers courses of excellent quality from instructors who will guide you.

The Administration of ERAU has made every effort to allow students to gather the necessary knowledge to begin their own businesses of selling and/or buying used materials among themselves.

The advantages are obvious and the idea of many students gathering at one place at one time would make potential book publishers available; second, obtaining the books you need direct from the owner would save; third, anyone wishing to sell their texts would be paid immediately.

Anyone wishing to comment on this proposal should contact Mr. Ramesh V. Ramamurthy, President SGA.

Letter To The Avion

To the Students, Staff and Faculty of ERAU,

**Elections**

Hello Students, your favorite President, Jimmy Carter, has a new enemy of the common people. This January 31st, a local Student Government election is held. The student-elected President, which the eventual winner can be accurately forecast before the ballots are cast. Those elected will be the winners of the "Paper War".

What ask you is the "Paper War"? Look about you this next couple of weeks. Honestly, under all those layers of paper, the doors made of glass, the walls are of brick, and the posts are concrete.

Those elected shall be of the money aristocracy. Elections cost money. Past campaigns have cost upwards of $60,000. That money has been frivolously thrown away in order to litter the landscape, not for the couple of weeks but for months. Look about you a this time. Old bumper stickers from elections past (and other past events) on wall doors, buses, trash cans, and urinals.

James T. Bigot, propose a limit be placed upon those trying to join the most revered and hated collection of characters on campus, the Student Government Association. This limit would be the SGA fees in effect at the time of the election. (Thus allowing for inflation.) With the slight adjustment, I see a more reasonable, another election with the emphasis on personal and issue basis of campaigning.

Those interested can reach their Senators and Candidates. A list of them is supposed to be in the Student Center.

**U.S. Marine Corps Coming To Student Center**

The U.S. Marine Corps Officer Selection Team from Jacksonville, Fla., will be here 29-30th January 1973 to discuss Marine Corps opportunities for men and women.

The Team will be available between 8:00 a.m. to 3:00 p.m. in the Student Center to interview, counsel and test those persons interested in earning a commission in the U.S. Marine Corps.

Available programs include Officer Candidate School for seniors and graduate students. The Platoon Leaders Class summer training program is offered for undergraduates and seniors that are interested in assuming training positions, pilot training, school positions, and law school positions. The PLC program offers financial aid and civilian pilot training for those who qualify.

Students are invited to discuss their interests with the team and for those who desire may be tested on campus.

**AVIATION FEATURES**

**New Ring For Riddle**

The HERFF-JONES CO, will now be concentrating on the students to make rings for interested individuals. We encountered numerous delays and uncorrect deliveries with the previous company and the SGA decided it was time to take action to remedy this unfortunate situation.

Mr. Adam Sowell will hold a ring day sometime during the beginning of February inorder to display his company's products. Design and cost of the new rings is expected to remain approximately the same; the major improvements in the field of quality and customer satisfaction. We're looking forward to trying them and talking to Mr. Sowell here on campus.

**Daytona Beach Aviation Turns Over A New Leaf**

Since the purchase of Daytona Beach Aviation by Embry Riddle, the operation of the FBO has been completely independent of the school. Daytona Beach Aviation is still run as an independent company, just like it was before, but with Embry Riddle graduates running the show, and the university as the sole stock holder.

The president of DAB Aviation, Mr. T. Jones, stated that there are still a few bugs to be worked out in the operation of the FBO, but they seem to have the problems well in hand.

ERAM airframe and powerplant classes are held on the second floor of their hangar and there are plans to start a work study program between the school and DAB Aviation. This may offer and position at a later date for certain ERAM students.

It has been described as a new opportunity for students to give graduates, and soon to be graduates, the opportunity to find him or herself involved in the real world of aviation, not just studying about it, but actually working with it as it now done with various other programs ERAM offers. This will definitely be a landmark for the students of this school and their future achievements.

**New I.D. Cards Issued**

Students MUST come to the Dean of Men's Office and pick up Certificate of Registration and new I.D. Card. Old I.D. Cards WILL NOT be accepted on campus as local merchants in Daytona are also being notifed of the old I.D. Card change.

The reason for the change in I.D. Cards is due to the excessive misuse of the old I.D. Cards. The old I.D. Card had no expiration date on it. In the new I.D. Card system now being incorporated, I.D. Cards are good for as long as a student continues as a regular student.

To be sure and get your new I.D. Card, just come to the Dean of Men's Office before Jan. 26th. After Friday, Jan. 26, 1973 old I.D. Cards WILL NOT be accepted on campus as valid and local merchants will be advised not to accept the old I.D. as any form of identification.

**MA 111 Led By "Blackbelt" Of Quadratic Equations**

By Bill Leedy

A former ERAM student is the latest edition to the full time Math Department. His name is Jim Laslisc who came to ERAM when he graduated from Miami High in the Fall of 1964. He is now completing the requirements in mechanical engineering at the University of Florida. His duties were varied and numerous and include working for the physics department, and was later in- vested with Undergraduate Research for the Under-

Mr. Laslisc managed to migrate back to Fla. in January 1971 where he entered the University of Florida in a Mechanical Engineering Curriculum. Finding that Mechanical Engineering was not as personally rewarding as he had originally expected, he moved back to Daytona Beach and began teaching the Math 111 course on a part time basis during the Summer of '72 he transferred to the Daytona Beach Branch of Florida Tech- nological University in pursuit of a Master's Degree in Engineering Mathematics and Material Science. As is evidenced by his past educational background he is very much interested in Structural Design, especially the structural framework that fills the dimensions of 36-24-36.

His hobbies include working on his Masters Degree. During a remedial Math course to the 50-60 dancers Bourbon Street and attempting to get into the faculty lounge by building in Building B using his skate key.

When asked his thoughts about ERAM students he volunteered that the student body here works very hard, but there's much work well during class. I look forward to expand it as much as useful and interesting and meaningful to the students and am willing to help them learn. My goal is to expand this knowledge of math and math so that the student body and the University can expand it as much as possible. I know Mr. Laslisc and he can only comment that this individual gets his vote as Teacher of the Year!
BUDDY BAKER MOVES

Buddy Baker, one of the nation's fastest and most successful automobile race drivers, will begin a new profession on Dec. 15. Baker, the first driver to break the 200 mile-per-hour barrier on a closed course and winner of the recent season ending 500-mile NASCAR Grand National Race at Texas World Speedway, will join the public relations staff of the Internal Speedway Corporation.

Announcement of Baker's appointment was made by Jim Foster, vice-president and director of corporate communications for the company which operates the world's most popular speedways including the world-famous Daytona and Alabama International Motor Speedway at Talladega, Ala.

"We are very pleased to have Baker join our staff, even on a part-time basis," Foster said. "He is one of the brightest and most promising men in the racing profession and we feel he has a great future in public relations."

Baker will work with the speedway publicity staff on weekends he is not involved in Winston Cup Grand National competition. His initial assignment will be in the main room at Daytona Speedway. He will also assist in poster and brochure distribution, writing and editing, as well as make public appearances.

"This is a good opportunity for me to lend public relations from the ground up," Baker said. "It's something I've wanted to do for several years and I am pleased to be associated with the group at Daytona and Talladega."

Baker emphasized that the start of a new profession does not mean he is thinking of retiring as a race driver. "I have a lot of competition ahead," he said.

He will compete in 1973 in the K&K Insurance Dodge prepared by Harry Hyde of Charlotte, N.C.

Baker won two major Winston Cup Grand National races in 1972 en route to an $87,540. He has won over $200,000 in his last two seasons.

We need tennis players with experience. All players are interested are invited to join this trimmer which is urgently requested to make contact with Mr. Brown Room 226, telephone 35, between nine and eleven a.m.

FENCING

Vince Gimondo and Bill Dingman, both "mas ters" over Daytona International Speedway's road course, have filed the first entry for 1973 24 Hours of Daytona set for Saturday and Sunday, Feb. 4-5.

The Orlando, Fla., duo has a remarkable record over the demanding 3.81 mile road-track circuit. The pair will co-drive a Camaro 5-28 powered by a 350 cid powerplant in the World Manufacturers' Championship event.

Dingman co-drove with Gimondo to class victory in the 12-hour Sebring race and the six-hour IHRA race at Mid-Ohio during the past season. Gimondo, considered to be one of the best road racers in the nation, also spearheaded victories in the Mid-night Challenge race and Paul Revere 250 at the Daytona course during the '72 season. Gimondo was also a class winner in Daytona's 24-hour race in 1971.

Gimondo, a broad-shouldered athlete who sports a shaved head, has one of auto racing's most outstanding performance records. Since he entered competition five years ago he has posted two international victories at Daytona and two at Sebring. He also has two second-place successes at Daytona and Sebring.

The upcoming 24 Hours of Daytona is set for a 3:00 p.m. starting time, Feb. 3, traditionally kicking off Daytona's annual speedweek. The Winston Cup NASCAR Grand National Daytona 500 stock car classic will windup the festivities Sunday, Feb. 18.

Entry forms for the $50,000-plus 24-hour event were recently mailed to drivers in the United States, Puerto Rico and 18 foreign countries.
**Volleyball:** NCAA, Intramural

by James Hunter

This trimester RAU intramural volleyball is really going places. Aside from the regular intramural volleyball games, which will be held in the old gym next to the student center, coach Wurtzbach is organizing the first Varsity Volleyball team. Toward the end of the intramural season, the best players will be picked from each team to form one varsity team. After a few more weeks of practice, this team will travel up to the University of Florida at Gainesville to compete in the invitational volleyball games. This will take place sometime in March. Anyone interested in forming a team should get at least six people together and elect a team captain.

Coach Wurtzbach is holding a meeting Wednesday, January 24th at 7p.m. in building A room 100 to discuss the rules and make up a schedule for each team. Each captain is urged to attend this meeting in order to get his team on the roster. The first game will be held Wednesday, February 7th, and don't forget everyone is invited.

**Baseball Warms Up**

by Jim Hunter

In the past the RAU team has done very well considering all the injuries they encountered, but this trimester under the direction and supervision of Coach Brown, the eagles are really looking strong. With the exception of a few good men from last year, the team consists of all new blood. Each man has had much previous experience and it shows in their practices. Already, with only one week of practice, they have been much better hitting and stronger catching than in the previous seasons. Thus extra efforts by the team alone, such as selling light bulbs and asking for donations from small businesses in town, the eagles have added a new pitching machine to their practicing equipment. Now, thru team spirit.

The eagles first scrimmage is against Saint Johns Junior College on Saturday, January 26th, at home. These scrimmage or pre-season games are nothing more than practices where every man on the team gets a chance to show his ability. After these practice games are over, its down to business for the eagles. Because this trimester involves some tough competition, they will be playing schools such as Nebraska, University of Delaware, Harvard, and the tough Florida Southern team who are the NCAA champs.

Cheating Changes Continued

an offense as cheating
on exams; both misst- 
present the student's
actual knowledge on the
subject.

Many students may not
realize that when an in-
spector grades on a
curve, "cheating or
plagiarism by other stu-
dents may prevent the
honest student from at-
taining the grade he de-
serves.

Prior to the issuance
of this policy, these
offenses were handled
individually, Campbell
stated. The expected
punishment was vague
and subject to approval
by administrators above
the Division Chairman. Now
punishment will be con-
sistent and will be
handled objectively
within the department.

Prior to the new make
up exam policy, Campbell
added, many students
were abusing the privi-
lege by missing exams
for minor or improper
reasons, causing more
work for instructors
than should be necessary.
It is almost impossible
to provide make-up exams
to different individuals
at different times that
